SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

Form 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the fiscal year ended December 31, 2018

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the Transition period from _____ to _____.

Commission File Number 001-34820

KKR & CO. INC.

(Exact name of Registrant as specified in its charter)

Delaware 26-0426107

(State or other Jurisdiction of (I.R.S. Employer
Incorporation or Organization) Identification Number)

9 West 57th Street, Suite 4200

New York, New York 10019

Telephone: (212) 750-8300

(Address, zip code, and telephone number, including
area code, of registrant's principal executive office.)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class Name of each exchange on which registered

Class A Common Stock New York Stock Exchange

6.75% Series A Preferred Stock New York Stock Exchange

6.50% Series B Preferred Stock New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 and 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter periods that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements

Edgar Filing: KKR & Co. Inc. - Form 10-K

incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of Class A common stock of the registrant held by non-affiliates as of June 30, 2018, was approximately \$12.1 billion. As of February 12, 2019, the registrant had 533,486,948 shares of Class A common stock, 1 share of Class B common stock and 299,081,239 shares of Class C common stock outstanding.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), which reflect our current views with respect to, among other things, our operations and financial performance. You can identify these forward-looking statements by the use of words such as "outlook," "believe," "expect," "potential," "continue," "may," "should," "seek," "approximately," "predict," "intend," "will," "plan," "estimate," "anticipate," the negative version of these words, other comparable words or other statements that do not relate strictly to historical or factual matters. Without limiting the foregoing, statements regarding the declaration and payment of dividends on common or preferred stock of KKR, the timing, manner and volume of repurchases of common stock pursuant to a repurchase program, and the expected synergies and benefits from acquisitions, reorganizations or strategic partnerships, may constitute forward-looking statements. Forward-looking statements are subject to various risks and uncertainties. Accordingly, there are or will be important factors that could cause actual outcomes or results to differ materially from those indicated in these statements or cause the anticipated benefits and synergies from transactions to not be realized. We believe these factors include those described under the section entitled "Risk Factors" in this report. These factors should be read in conjunction with the other cautionary statements that are included in this report and in our other filings with the U.S. Securities and Exchange Commission (the "SEC"). We do not undertake any obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future developments or otherwise, except as required by law.

On July 1, 2018, we completed our conversion (the "Conversion") from a Delaware limited partnership named KKR & Co. L.P. into a Delaware corporation named KKR & Co. Inc.

In this report, references to "KKR," "we," "us" and "our" refer to (i) KKR & Co. Inc. and its subsidiaries following the Conversion and (ii) KKR & Co. L.P. and its subsidiaries prior to the Conversion, in each case, except where the context requires otherwise. KKR & Co. L.P. became listed on the New York Stock Exchange ("NYSE") on July 15, 2010 under the symbol "KKR." KKR Management Holdings L.P., KKR Fund Holdings L.P. and KKR International Holdings L.P. are together referred to in this report as the "KKR Group Partnerships." Each KKR Group Partnership has an identical number of partner interests and, when held together, one Class A partner interest in each of the KKR Group Partnerships together represents one "KKR Group Partnership Unit." In connection with the 6.75% Series A Preferred Stock ("Series A Preferred Stock") and 6.50% Series B Preferred Stock ("Series B Preferred Stock") of KKR & Co. Inc., the KKR Group Partnerships have outstanding preferred units with economic terms designed to mirror those of the Series A Preferred Stock and Series B Preferred Stock, respectively. References to our Class A common stock, Series A Preferred Stock or Series B Preferred Stock for periods prior to the Conversion mean the common units, Series A preferred units and Series B preferred units of KKR & Co. L.P., respectively.

References to the "Class B Stockholder" are to KKR Management LLC, the holder of the sole share of our Class B common stock, and unless otherwise indicated, references to equity interests in KKR's business, or to percentage interests in KKR's business, reflect the aggregate equity interests in the KKR Group Partnerships and are net of amounts that have been allocated to our principals and other employees and non-employee operating consultants in respect of the carried interest from KKR's business as part of our "carry pool" and certain minority interests. References to "principals" are to our senior employees and non-employee operating consultants who hold interests in KKR's business through KKR Holdings L.P. ("KKR Holdings") and references to our "senior principals" are to our senior employees who hold interests in the Class B Stockholder.

References to "non-employee operating consultants" include employees of KKR Capstone, who are not employees of KKR. KKR Capstone refers to a group of entities that are owned and controlled by their senior management. KKR Capstone is not a subsidiary or affiliate of KKR. KKR Capstone operates under several consulting agreements with KKR and uses the "KKR" name under license from KKR. KKR is in the process of evaluating a potential acquisition of KKR Capstone.

In this report, the term "GAAP" refers to accounting principles generally accepted in the United States of America.

We disclose certain financial measures in this report that are calculated and presented using methodologies other than in accordance with GAAP. We believe that providing these performance measures on a supplemental basis to our GAAP results is helpful to stockholders in assessing the overall performance of KKR's businesses. These financial measures should not be considered as a substitute for similar financial measures calculated in accordance with GAAP, if available. We caution readers that these non-GAAP financial measures may differ from the calculations of other investment managers, and as a result, may not be comparable to similar measures presented by other investment managers. Reconciliations of these non-GAAP financial

Table of Contents

measures to the most directly comparable financial measures calculated and presented in accordance with GAAP, where applicable, are included within Note 14 "Segment Reporting" to our consolidated financial statements and under "Management's Discussion and Analysis of Financial Condition and Results of Operations—Key Segment and Other Operating and Performance Measures" and "—Segment Balance Sheet."

This report uses the terms assets under management ("AUM"), fee paying assets under management ("FPAUM"), after-tax distributable earnings, fee related earnings ("FRE"), capital invested, syndicated capital and book value. You should note that our calculations of these financial measures and other financial measures may differ from the calculations of other investment managers and, as a result, our financial measures may not be comparable to similar measures presented by other investment managers. These and other financial measures are defined in the section "Management's Discussion and Analysis of Financial Condition and Results of Operations—Segment Operating and Performance Measures" and "—Segment Balance Sheet."

References to our "funds" or our "vehicles" refer to investment funds, vehicles and accounts advised, sponsored or managed by one or more subsidiaries of KKR, including collateralized loan obligations ("CLOs") and commercial real estate mortgage-backed securities ("CMBS") vehicles, unless the context requires otherwise. They do not include investment funds, vehicles or accounts of any hedge fund manager with which we have formed a strategic partnership where we have acquired a non-controlling interest.

Unless otherwise indicated, references in this report to our fully exchanged and diluted Class A common stock outstanding, or to our Class A common stock outstanding on a fully exchanged and diluted basis, reflect (i) actual shares of Class A common stock outstanding, (ii) shares of Class A common stock into which KKR Group Partnership Units not held by us are exchangeable pursuant to the terms of the exchange agreement described in this report, (iii) shares of Class A common stock issuable in respect of exchangeable equity securities issued in connection with the acquisition of Avoca Capital ("Avoca"), all of which have been exchanged as of December 31, 2018, and (iv) Class A common stock issuable pursuant to any equity awards actually granted from the Amended and Restated KKR & Co. Inc. 2010 Equity Incentive Plan (our "Equity Incentive Plan"). Our fully exchanged and diluted Class A common stock outstanding does not include (i) shares of Class A common stock available for issuance pursuant to our Equity Incentive Plan for which equity awards have not yet been granted and (ii) shares of Class A common stock that we have the option to issue in connection with our acquisition of additional interests in Marshall Wace LLP (together with its affiliates, "Marshall Wace").

On January 28, 2019, common stockholders of KKR & Co. Inc. approved the KKR & Co. Inc. 2019 Equity Incentive Plan (our "New Equity Incentive Plan") in a special stockholders meeting. Our New Equity Incentive Plan will become effective on March 29, 2019. See "Executive Compensation—KKR & Co. Inc. Equity Incentive Plan."

The use of any defined term in this report to mean more than one entities, persons, securities or other items collectively is solely for convenience of reference and in no way implies that such entities, persons, securities or other items are one indistinguishable group. For example, notwithstanding the use of the defined terms "KKR," "we" and "our" in this report to refer to KKR & Co. Inc. and its subsidiaries, each subsidiary of KKR & Co. Inc. is a standalone legal entity that is separate and distinct from KKR & Co. Inc. and any of its other subsidiaries.

Table of Contents

PART I

ITEM 1. BUSINESS

Overview

We are a leading global investment firm that manages multiple alternative asset classes including private equity, energy, infrastructure, real estate and credit, with strategic partners that manage hedge funds. We aim to generate attractive investment returns for our fund investors by following a patient and disciplined investment approach, employing world-class people, and driving growth and value creation with our portfolio companies. We invest our own capital alongside the capital we manage for fund investors and provide financing solutions and investment opportunities through our capital markets business.

Our business offers a broad range of investment management services to our fund investors and provides capital markets services to our firm, our portfolio companies and third parties. Throughout our history, we have consistently been a leader in the private equity industry, having completed more than 350 private equity investments in portfolio companies with a total transaction value in excess of \$600 billion as of December 31, 2018. We have grown our firm by expanding our geographical presence and building businesses in areas such as leveraged credit, alternative credit, hedge funds, capital markets, infrastructure, energy, real estate, growth equity and core investments. Our balance sheet has provided a significant source of capital in the growth and expansion of our business, and has allowed us to further align our interests with those of our fund investors. Building on these efforts and leveraging our industry expertise and intellectual capital have allowed us to capitalize on a broader range of the opportunities we source. Additionally, we have increased our focus on meeting the needs of our existing fund investors and in developing relationships with new investors in our funds.

We seek to work proactively and collaboratively as one-firm across business lines, departments, and geographies, as appropriate, to achieve what we believe are the best results for our funds and the firm. Through our offices around the world, we have a pre-eminent global integrated platform for sourcing transactions, raising capital and carrying out capital markets activities. Our growth has been driven by value that we have created through our operationally focused investment approach, the expansion of our existing businesses, our entry into new lines of business, innovation in the products that we offer investors in our funds, an increased focus on providing tailored solutions to our clients and the integration of capital markets distribution activities.

As a global investment firm, we earn management, monitoring, transaction and incentive fees and carried interest for providing investment management, monitoring and other services to our funds, vehicles, CLOs, managed accounts and portfolio companies, and we generate transaction-specific income from capital markets transactions. We earn additional investment income by investing our own capital alongside that of our fund investors, from other assets on our balance sheet and from the carried interest we receive from our funds and certain of our other investment vehicles. A carried interest entitles the sponsor of a fund to a specified percentage of investment gains that are generated on third-party capital that is invested.

Our investment teams have deep industry knowledge and are supported by a substantial and diversified capital base; an integrated global investment platform; the expertise of operating consultants, senior advisors and other advisors; and a worldwide network of business relationships that provide a significant source of investment opportunities, specialized knowledge during due diligence and substantial resources for creating and realizing value for stakeholders. These teams invest capital, a substantial portion of which is of a long duration and not subject to redemption. As of December 31, 2018, approximately 78% of our fee paying assets under management are not subject to redemption for at least 8 years from inception, providing us with significant flexibility to grow investments and select exit opportunities. We believe that these aspects of our business will help us continue to expand and grow our business and deliver strong investment performance in a variety of economic and financial conditions.

Our Firm

With offices around the world, we have established ourselves as a leading global investment firm. We have multilingual and multicultural investment teams with local market knowledge and significant business, investment, and operational experience in the countries in which we invest. We believe that our global capabilities and "one-firm" philosophy have helped us to raise capital, capture a greater number of investment opportunities, and assist our portfolio companies in their increasing reliance on global markets and sourcing, while enabling us to diversify our operations.

Though our operations span multiple continents and asset classes, our investment professionals are supported by an integrated infrastructure and operate under a common set of principles and business practices that are monitored by a variety of committees. The firm operates with a single culture that rewards investment discipline, creativity, determination and patience

Table of Contents

and emphasizes the sharing of information, resources, expertise and best practices across offices and asset classes. When appropriate, we staff transactions across multiple offices and businesses in order to take advantage of the industry-specific expertise of our investment professionals, and we hold regular meetings in which investment professionals throughout our offices share their knowledge and experiences. We believe that the ability to draw on the local cultural fluency of our investment professionals while maintaining a centralized and integrated global infrastructure distinguishes us from other investment firms and has been a substantial contributing factor to our ability to raise funds, invest internationally and expand our businesses.

Since our inception, one of our fundamental philosophies has been to align the interests of the firm and our principals with the interests of our fund investors, portfolio companies and other stakeholders. We achieve this by putting our own capital behind our ideas. As of December 31, 2018, we and our employees and other personnel have approximately \$17.1 billion invested in or committed to our own funds and portfolio companies, including \$9.1 billion funded from our balance sheet, \$5.3 billion of additional commitments from our balance sheet to investment funds, \$1.8 billion funded from personal investments and \$0.9 billion of additional commitments from personal investments.

Our Business

Our Business Lines

We operate our business in four business lines: (1) Private Markets, (2) Public Markets, (3) Capital Markets, and (4) Principal Activities. Information about our business lines below should be read together with "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements included elsewhere in this report.

Private Markets

Through our Private Markets business line, we manage and sponsor a group of private equity funds that invest capital for long-term appreciation, either through controlling ownership of a company or strategic minority positions. In addition to our traditional private equity funds, we sponsor investment funds that invest in growth equity and core equity investments. We also manage and sponsor investment funds that invest capital in real assets, such as infrastructure, energy, and real estate. Our Private Markets business line includes separately managed accounts that invest in multiple strategies, which may include our credit strategies as well as our private equity and real assets strategies. These funds and accounts are managed by Kohlberg Kravis Roberts & Co. L.P., an SEC-registered investment adviser. As of December 31, 2018, our Private Markets business line had \$103.4 billion of AUM and FPAUM of \$66.8 billion, consisting of \$44.0 billion in private equity (including growth equity and core investments), \$18.4 billion in real assets (including infrastructure, energy, and real estate) and \$4.4 billion in other related strategies.

Table of Contents

Private Markets

Assets Under Management ⁽¹⁾

(\$ in billions)

For the years 2006 through 2008, AUM are presented pro forma for the acquisition of the assets and liabilities of KKR & Co. (Guernsey) L.P. (formerly known as KKR Private Equity Investors, L.P.) ("KPE") on October 1, 2009 (the "KPE Transaction"), and therefore exclude the net asset value of KPE and its former commitments to our (1) investment funds. In 2015, our definition of AUM was amended to include capital commitments for which we are eligible to receive fees or carried interest upon deployment of capital and our pro rata portion of the AUM managed by strategic partners in which we hold a minority ownership interest. AUM for all prior periods have been adjusted to include such changes.

Table of Contents

The table below presents information as of December 31, 2018, relating to our current private equity, growth equity, core investment and real asset funds and other investment vehicles in our Private Markets business line for which we have the ability to earn carried interest. This data does not reflect acquisitions or disposals of investments, changes in investment values, or distributions occurring after December 31, 2018.

Markets Total

The start date represents the date on which the general partner of the applicable fund commenced investment of the fund's capital or the date of the first closing. The end date represents the earlier of (i) the date on which the general partner of the applicable fund was or will be required by the fund's governing agreement to cease making investments on behalf of the fund, unless extended by a vote of the fund investors and (ii) the date on which the last investment was made.

The commitment represents the aggregate capital commitments to the fund, including capital commitments by third-party fund investors and the general partner. Foreign currency commitments have been converted into U.S. dollars based on (i) the foreign exchange rate at the date of purchase for each investment and (ii) the exchange rate that prevailed on December 31, 2018, in the case of uncalled commitments.

The remaining cost represents the initial investment of the general partner and limited partners, reduced for returns of capital, with the limited partners' investment further reduced for any return of capital and realized gains from which the general partner did not receive a carried interest.

(4) Upon end date of predecessor fund.

(5) Six years from first investment date.

(6) The "Invested" and "Realized" columns do not include the amounts of any realized investments that restored the unused capital commitments of the fund investors, if any.

(7) "Unallocated Commitments" represent unallocated commitments from our strategic investor partnerships.

Table of Contents

Performance

We take a long-term approach to Private Markets investing and measure the success of our investments over a period of years rather than months. Given the duration of these investments, the firm focuses on realized multiples of invested capital and internal rates of return ("IRR") when deploying capital in these transactions. We have nearly doubled the value of capital that we have invested in our Private Markets investment funds, turning \$97.0 billion of capital into \$190.7 billion of value from our inception in 1976 to December 31, 2018.

Private Markets Investment Funds

As of December 31, 2018

From our inception in 1976 through December 31, 2018, our investment funds with at least 24 months of investment activity generated a cumulative gross IRR of 25.6%, compared to the 11.7% and 8.7% gross IRR achieved by the S&P 500 Index and MSCI World Index, respectively, over the same period, despite the cyclical and sometimes challenging environments in which we have operated. The S&P 500 Index and MSCI World Index are unmanaged indices and such returns assume reinvestment of distributions and do not reflect any fees or expenses. Our past performance, however, may not be representative of performance in any period other than the period discussed above and is not a guarantee of future results. For example, as of March 31, 2009, the date of the lowest aggregate valuation of our private equity funds during the 2008 and 2009 market downturn, the investments in certain of our private equity funds at the time were marked down to 67% of original cost. For additional information regarding impact of market conditions on the value and performance of our investments, see "Risk Factors—Risks Related to Our Business—Difficult market and economic conditions can adversely affect our business in many ways, including by reducing the value or performance of the investments that we manage or by reducing the ability of our funds to raise or deploy capital, each of which could negatively impact our net income and cash flow and adversely affect our financial prospects and condition" and "Risk Factors—Risks Related to the Assets We Manage—The historical returns attributable to our funds, including those presented in this report, should not be considered as indicative of the future results of our funds or our balance sheet investments, of our future results or the performance of our common stock."

The tables below present information as of December 31, 2018, relating to the historical performance of certain of our Private Markets investment vehicles since inception, which we believe illustrates the benefits of our investment approach. This data does not reflect additional capital raised since December 31, 2018, or acquisitions or disposals of investments, changes in investment values, or distributions occurring after that date. However, the information presented below is not intended to be representative of any past or future performance for any particular period other than the period presented below. Past performance is no guarantee of future results.

Table of Contents

(3) The gross IRR, net IRR and gross multiple of invested capital are calculated for our investment funds that made their first investment at least 24 months prior to December 31, 2018. None of the Americas Fund XII, Real Estate Credit Opportunity Partners, Asian Fund III, Real Estate Partners Americas II, our Core Investment Vehicles, Global Infrastructure Investors III or European Fund V has invested for at least 24 months as of December 31, 2018. We therefore have not calculated gross IRRs, net IRRs and gross multiples of invested capital with respect to those funds.

(4) An investment is considered realized when it has been disposed of or has otherwise generated disposition proceeds or current income that has been distributed by the relevant fund. In periods prior to the three months ended September 30, 2015, realized proceeds excluded current income such as dividends and interest.

IRR measures the aggregate annual compounded returns generated by a fund's investments over a holding period. Net IRRs are calculated after giving effect to the allocation of realized and unrealized carried interest and the (5) payment of any applicable management fees and organizational expenses. Gross IRRs are calculated before giving effect to the allocation of realized and unrealized carried interest and the payment of any applicable management fees and organizational expenses.

The gross multiples of invested capital measure the aggregate value generated by a fund's investments in absolute terms. Each multiple of invested capital is calculated by adding together the total realized and unrealized values of a fund's investments and dividing by the total amount of capital invested by the fund. Such amounts do not give effect to the allocation of realized and unrealized carried interest or the payment of any applicable management fees or organizational expenses.

KKR's Private Markets funds may utilize third-party financing facilities to provide liquidity to such funds. The above net and gross IRRs are calculated from the time capital contributions are due from fund investors to the time fund investors receive a related distribution from the fund, and the use of such financing facilities generally decreases the amount of time that would otherwise be used to calculate IRRs, which tends to increase IRRs when fair value grows over time and decrease IRRs when fair value decreases over time. KKR's Private Markets funds also generally provide in certain circumstances, which vary depending on the relevant fund documents, for a portion of capital returned to investors to be restored to unused commitments as recycled capital. For KKR's Private Markets funds that have a preferred return, we take into account recycled capital in the calculation of IRRs and multiples of invested capital because the calculation of the preferred return includes the effect of recycled capital. For KKR's Private Markets funds that do not have a preferred return, we do not take recycled capital into account in the calculation of IRRs and multiples of invested capital. The inclusion of recycled capital generally causes invested and realized amounts to be higher and IRRs and multiples of invested capital to be lower than had recycled capital not been included. The inclusion of recycled capital would reduce the composite net IRR of all Included Funds by 0.1% and the composite net IRR of all Legacy Funds by 0.5% and would reduce the composite multiple of invested capital of Included Funds by less than 0.1 and the composite multiple of invested capital of Legacy Funds by 0.4.

For more information, see "Risk Factors—Risks Related to the Assets We Manage—The historical returns attributable to our funds, including those presented in this report, should not be considered as indicative of the future results of our funds or our balance sheet investments, of our future results or the performance of our common stock."

Private Equity

We are a world leader in private equity, having raised 24 private equity funds (including growth equity), as indicated in the table above, with approximately \$107.2 billion of capital commitments through December 31, 2018. We invest in industry-leading franchises and attract world-class management teams. Our investment approach leverages our capital base, sourcing advantage, global network and industry knowledge. It also leverages a sizable team of operating consultants, who work exclusively with our investment professionals and portfolio company management teams and otherwise at our direction, as well as senior advisors and other advisors, many of whom are former chief executive officers and leaders of the business community.

Our traditional private equity investment strategy typically seeks to engage primarily in management buyouts, build-ups, or other investments with a view to acquire a controlling or significant influence. Building upon our four decades of private equity investing experience, we have sourced a number of smaller growth equity investment

opportunities, and we expanded our business by launching dedicated growth equity funds. We have a dedicated growth equity fund, launched in 2016, that pursues growth equity investment opportunities in the technology, media and telecommunications ("TMT") sector, primarily in the United States, Canada, Europe and Israel. In 2016, we launched another dedicated growth equity fund to pursue growth equity investment opportunities in the health care sector, primarily in the United States. As of December 31, 2018, we have received \$2.0 billion of capital commitments to our TMT and health care growth equity strategies.

We further expanded on our private equity business by making our first core investment in 2017. Through our core investments strategy, we target investments that have a longer holding period and a lower risk profile, which may not be suitable for our traditional private equity funds. See "—Core Investments Strategy."

Table of Contents

Portfolio

The following chart presents information concerning the amount of capital invested by traditional private equity funds and growth equity funds by geography through December 31, 2018. We believe that this data illustrates the benefits of our business approach and our ability to source and invest in deals in multiple geographies.

As of December 31, 2018, our traditional private equity portfolio consisted of 114 companies with approximately \$123 billion of annual revenues. These companies are headquartered in 18 countries and operate in 19 general industries, which take advantage of our broad and deep industry and operating expertise. Many of these companies are leading franchises with global operations, strong management teams and attractive growth prospects, which we believe will provide benefits through a broad range of business conditions.

Investment Approach

Our approach to making private equity investments focuses on achieving multiples of invested capital and attractive risk-adjusted IRRs by selecting high-quality investments that may be made at attractive prices, applying rigorous standards of due diligence when making investment decisions, implementing strategic and operational changes that drive growth and value creation in acquired businesses, carefully monitoring investments, and making informed decisions when developing investment exit strategies.

We believe that we have achieved a leading position in the private equity industry by applying a disciplined investment approach and by building strong partnerships with highly motivated management teams who put their own capital at risk. When making private equity investments, we seek out strong business franchises, attractive growth prospects, leading market positions and the ability to generate attractive returns. In our private equity funds, we do not effect transactions that are "hostile," meaning a target company's board of directors makes an unfavorable recommendation with respect to the transaction or publicly opposes the consummation of the transaction.

Sourcing and Selecting Investments

We have access to significant opportunities for making private equity investments as a result of our sizable capital base, global platform, and relationships with leading executives from major companies, commercial and investment banks, and other investment and advisory institutions. Members of our global network contact us with new investment opportunities, including a substantial number of exclusive investment opportunities and opportunities that are made available to only a limited number of

Table of Contents

other firms. We also proactively pursue business development strategies that are designed to generate deals internally based on the depth of our industry knowledge and our reputation as a leading financial sponsor.

To enhance our ability to identify and consummate private equity investments, we have organized our investment professionals in industry-specific teams. Our industry teams work closely with our operating consultants and other advisors to identify businesses that can be grown and improved. These teams conduct their own primary research, develop a list of industry themes and trends, identify companies and assets in need of operational improvement, and seek out businesses and assets that they believe will benefit from our involvement. They possess a detailed understanding of the economic drivers, opportunities for value creation and strategies that can be designed and implemented to improve companies across the industries in which we invest.

Due Diligence and the Investment Decision

When an investment team determines that an investment proposal is worth consideration, the proposal is formally presented to the applicable regional investment committee and the due diligence process commences if appropriate. The objective of the due diligence process is to identify attractive investment opportunities based on the facts and circumstances surrounding an investment and to prepare a framework that may be used from the date of an acquisition to drive operational improvement and value creation. When conducting due diligence, investment teams evaluate a number of important business, financial, tax, accounting, environmental, social, governance, legal and regulatory issues in order to determine whether an investment is suitable. While the due diligence process differs depending on the type of investment we make, generally, in connection with the private equity due diligence process, investment professionals spend significant amounts of time meeting with a company's management and operating personnel, visiting plants and facilities, and where appropriate, speaking with other stakeholders interested in and impacted by the investment in order to understand the opportunities and risks associated with the proposed investment. Our investment professionals may also use the services of outside accountants, consultants, lawyers, investment banks and industry experts as appropriate to assist them in this process. Investment committees or portfolio managers, as applicable, monitor our due diligence practices and approve an investment before it is made.

Building Successful and Competitive Businesses

Portfolio management committees are responsible for working with our investment professionals from the date on which a private equity investment is made until the time it is exited in order to ensure that strategic and operational objectives are accomplished and that the performance of the investment is closely monitored. When investing in a private equity portfolio company, we partner with management teams to execute on our investment thesis, and we rigorously track performance through regular monitoring of detailed operational and financial metrics as well as appropriate environmental, social and governance issues. We have developed a global network of experienced managers and operating executives who assist the private equity portfolio companies in making operational improvements and achieving growth. We augment these resources with operational guidance from operating consultants at KKR Capstone, senior advisors, other advisors and investment teams, and with "100-Day Plans" that focus the firm's efforts and drive our strategies. We seek to emphasize efficient capital management, top-line growth, R&D spending, geographical expansion, cost optimization and investment for the long-term.

Realizing Investments

We have developed substantial expertise for realizing private equity investments. From our inception through December 31, 2018, the firm has generated approximately \$141.7 billion of cash proceeds from the sale of our private equity portfolio companies in initial public offerings and secondary offerings, dividends, and sales to strategic and financial buyers. When exiting private equity investments, our objective is to structure the exit in a manner that optimizes returns for fund investors and, in the case of publicly traded companies, minimizes the impact that the exit has on the trading price of the company's securities. We believe that our ability to successfully realize investments is attributable in part to the strength and discipline of our portfolio management committees and capital markets business, as well as the firm's longstanding relationships with corporate buyers and members of the investment banking and investing communities.

Private Equity Fund Structures

The private equity funds that we sponsor and manage have finite lives and investment periods. Each fund is organized as one or more partnerships, and each partnership is controlled by a general partner. Private equity fund investors are limited partners who agree to contribute a specified amount of capital to the fund from time to time for use in qualifying investments during the investment period, which generally lasts up to six years depending on how quickly capital is deployed. The investment period for certain funds may be terminated upon supermajority vote (based on capital commitment) of the fund's limited partners or by the fund's advisory committee. The term of our private equity funds generally last for 10 to 12 years and may last up to 15 years from the date of the fund's first or last investment, subject to a limited number of extensions with the consent of the limited partners or the applicable advisory committee. Given the length of the investment periods and terms of

Table of Contents

our private equity funds and the limited conditions under which such periods can be terminated and commitments may be withdrawn, the AUM of our private equity funds provide a long-term stable capital base.

Each private equity fund's general partner is generally entitled to a carried interest that allocates to it 20% of the net profits realized by the limited partners from the fund's investments. Our private equity funds since 2012 generally have a performance hurdle which requires that we return 7%, compounded annually, to limited partners in the fund prior to receiving our 20% share of net profits realized by limited partners. Such performance hurdles are subject to a catch-up allocation to the general partner after the hurdle has been reached. Our earlier private equity funds do not include a performance hurdle. The timing of receipt of carried interest in respect of investments of our private equity funds is dictated by the terms of the partnership agreements that govern such funds, and is distributed to the general partner of a private equity fund only after all of the following are met: (i) a realization event has occurred (e.g. sale of a portfolio company, dividend, etc.); (ii) the vehicle has achieved positive overall investment returns since its inception, in excess of performance hurdles where applicable; and (iii) with respect to investments with a fair value below cost, cost has been returned to fund investors in an amount sufficient to reduce remaining cost to the investments' fair value. For a fund that has a fair value above cost, overall, but has one or more investments where fair value is below cost, the shortfall between cost and fair value for such investments is referred to as a "netting hole." See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity—Sources of Liquidity" for a discussion of netting holes. Net realized profit or loss is not netted between or among funds except for the Annex Fund. In addition, the agreements governing our private equity funds generally include a "clawback" provision that, if triggered, may give rise to a contingent obligation that may require the general partner to return or contribute amounts to the fund for distribution to fund investors at the end of the life of the fund. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies—Recognition of Carried Interest in the Statement of Operations" and "Risk Factors—The 'clawback' provision in our governing agreements may give rise to a contingent obligation that may require us to return or contribute amounts to our funds and fund investors."

We enter into management agreements with our private equity funds pursuant to which we receive management fees in exchange for providing the funds with management and other services. Gross management fees for our private equity funds generally range from 1% to 2% of committed capital during the fund's investment period and are generally 0.75% to 1.25% of invested capital after the expiration of the fund's investment period with subsequent reductions over time, which causes the fees to be reduced as investments are liquidated. In addition, in connection with the expiration of the investment period, a private equity fund may establish a reserve on its fund investors' capital commitments on which no fee is paid unless such capital is invested. These management fees are paid by private equity fund investors, who generally contribute capital to the fund in order to allow the fund to pay the fees to us. Our private equity funds generally require that management fees be returned to fund investors before a carried interest may be paid.

We also enter into monitoring agreements with our portfolio companies pursuant to which we receive periodic monitoring fees in exchange for providing them with management, consulting and other services, and we typically receive transaction fees for providing portfolio companies with financial, advisory and other services in connection with specific transactions. Monitoring agreements may provide for a termination payment following an initial public offering or change of control, if certain criteria are satisfied. In some cases, we may be entitled to other fees that are paid by an investment target upon closing a transaction or when a potential investment is not consummated. Our newer private equity fund agreements typically require us to share 100% of any monitoring, transaction and other fees that are allocable to a fund (after reduction for expenses incurred allocable to a fund from unconsummated transactions) with fund investors.

In addition, the agreements governing our private equity funds enable investors in those funds to reduce their capital commitments available for further investments, on an investor-by-investor basis, in the event one or more "key persons" (for example, investment professionals who are named as "key executives" for certain geographically or product focused funds) cease to be actively involved in the management of the fund. While these provisions do not allow investors in our funds to withdraw capital that has been invested or cause a fund to terminate, the occurrence of

a "key person" event could cause disruption in our business, reduce the amount of capital that we have available for future investments, and make it more challenging to raise additional capital in the future.

Because private equity fund investors typically are unwilling to invest their capital in a fund unless the fund's manager also invests its own capital in the fund's investments, our private equity fund documents generally require the general partners of the funds to make minimum capital commitments to the funds. The amounts of these commitments, which are negotiated by fund investors, generally range from 2% to 8% of a fund's total capital commitments at final closing, but may be greater for certain funds pursuing newer strategies. When investments are made, the general partner contributes capital to the fund based on its fund commitment percentage and acquires a capital interest in the investment that is not subject to a carried interest or management fees.

Table of Contents

Real Assets

Energy

Our energy platform aims to deliver current returns to fund investors through distributions generated by producing and selling oil and natural gas reserves and capital appreciation. The goal is to provide fund investors with exposure to commodity prices and optionality associated with future drilling and production. Our energy platform targets real asset investment opportunities across the upstream and midstream segments of the oil and gas industry. We have acquired and operated oil and natural gas properties in mature basins located primarily in the United States. In acquiring these properties, which are typically considered to be non-core by their sellers, we seek to generate value through optimizing production, reducing operating costs, and optimizing commercial and marketing arrangements. In addition, we have completed investments in oil and gas drilling development transactions with operating companies and have also acquired mineral and royalty interests. We work closely with external teams of technical and operational experts to assist in the selection, evaluation and operation of investments. We invest in these energy strategies primarily through KKR's energy funds. As of December 31, 2018, we have received \$3.6 billion of capital commitments to our energy funds and \$1.0 billion of capital commitments to this strategy through separately managed accounts.

Infrastructure

Our infrastructure platform seeks to achieve returns including current income through the acquisition and operational improvement of assets important to the functioning of the economy. We believe that the global infrastructure market provides an opportunity for the firm's private investment, operational improvement capabilities and stakeholder engagement. Through this platform we have made investments in parking, alternative energy, district heating and contracted electricity generation, water and wastewater, locomotive transportation, midstream and telecommunications infrastructure. As of December 31, 2018, we had received \$11.2 billion of capital commitments to our infrastructure funds, which include approximately \$7.2 billion of total capital commitments in our new KKR Global Infrastructure Investors III fund, and \$1.1 billion of capital commitments to this strategy through separately managed accounts and co-investment vehicles.

Real Estate

Our real estate equity platform targets real estate investment opportunities globally, across United States, Western Europe and Asia-Pacific. Our equity investments include direct investments in real property, debt, special situations transactions and businesses with significant real estate holdings that can benefit from KKR's involvement and operational expertise. We seek to partner with real estate owners, lenders, operators, and developers to provide flexible capital to respond to transaction specific needs, including the outright purchase or financing of existing assets or companies and the funding of future development or acquisition opportunities. Through this strategy, we have made real estate equity investments in residential and commercial assets. We have also established investment platforms with strategic partners to invest in commercial real estate in Germany and the United States. As of December 31, 2018, we have received \$3.9 billion of capital commitments through our real estate equity investment funds.

Our real estate credit platform provides capital solutions for real estate transactions with a focus on commercial mortgage-backed securities, whole loans and subordinated debt. As of December 31, 2018, we managed approximately \$2.3 billion of assets in our real estate credit strategy, which include KKR Real Estate Finance Trust Inc. ("KREF"), a NYSE-listed real estate investment trust ("REIT"), and \$1.1 billion of capital commitments through our real estate credit fund focused on the risk retention tranches of CMBS transactions.

Real Asset Investment Process

Our energy, infrastructure and real estate funds have a similar investment process as that described under "—Private Equity." Investment teams for a particular real asset strategy formally present potential investments to the applicable strategy oriented investment committee or the portfolio manager, as applicable, which monitors our due diligence practices and approves an investment before it is made. Most of our real asset strategies also have a portfolio management committee that works with our investment professionals from the date on which an investment is made

until the time it is exited in order to ensure that strategic and operational objectives are accomplished and that the performance of the investment is closely monitored. In addition to leveraging the resources of the firm, our energy, infrastructure and real estate investment teams typically partner with technical experts and operators to manage our real asset investments.

15

Table of Contents

Real Asset Fund Structures

Our energy, infrastructure and real estate funds generally have investment periods of up to 6 years and generally have a fund term of up to 13 years. Management fees for such funds generally range from 0.75% to 1.5% on committed capital, invested capital or net asset value during the investment period and on invested capital or net asset value for investments thereafter, subject to certain adjustments. These funds generally have performance hurdles of 8% to 10% subject to a catch-up allocation to the general partner after the hurdle has been reached. Thereafter the general partners of such funds generally share in 10% to 20% of net profits realized by limited partners.

Core Investments Strategy

Our core investments strategy targets investments with a longer holding period and a lower risk profile than our traditional private equity or, in certain cases, our real asset investments. The holding periods in core investments are generally longer than 15 years. In 2017, we established core investment vehicles with \$6.0 billion of capital commitments from fund investors and a \$3.5 billion capital commitment from KKR's balance sheet, through which we aim to make core investments in private equity and real asset opportunities globally.

Public Markets

Through our Public Markets business line, we operate our combined credit and hedge funds platforms. Our credit business invests capital in (i) leveraged credit strategies, including leveraged loans, high-yield bonds, opportunistic credit and revolving credit strategies, and (ii) alternative credit strategies, including special situations and private credit strategies such as direct lending and private opportunistic credit (or mezzanine) investment strategies. The funds, CLOs, separately managed accounts, investment companies registered under the Investment Company Act of 1940 (the "Investment Company Act"), including business development companies ("BDCs"), and alternative investment funds ("AIFs") in our leveraged credit and alternative credit strategies are managed by KKR Credit Advisors (US) LLC, which is an SEC-registered investment adviser and KKR Credit Advisors (Ireland) Unlimited Company, regulated by the Central Bank of Ireland ("CBI"). Our Public Markets business line also includes our hedge funds platform, which consists of strategic partnerships with third-party hedge fund managers in which KKR owns a minority stake (which we refer to as "hedge fund partnerships"). Our hedge fund partnerships offer a variety of investment strategies, including hedge fund-of-funds, equity hedge funds and credit hedge funds.

We intend to continue to grow the Public Markets business line by leveraging our global investment platform, experienced investment professionals and the ability to adapt our investment strategies to different market conditions to capitalize on investment opportunities that may arise at various levels of the capital structure and across market cycles.

On April 9, 2018, we completed the transaction (the "FS Investments Transaction") to form FS/KKR Advisor, LLC ("FS/KKR Advisor"), a new strategic BDC partnership with Franklin Square Holdings, L.P. ("FS Investments"), to provide investment advisory services to two BDCs previously advised and sub-advised by KKR Credit Advisors (US) LLC, and four BDCs previously advised by FS Investments. We own a 50% interest in FS/KKR Advisor. In December 2018, one of the BDCs previously advised by KKR Credit Advisors (US) LLC and one of the BDCs previously advised by FS Investments merged to create FS KKR Capital Corp., a BDC listed on the NYSE and advised by FS/KKR Advisor. As of December 31, 2018, our BDC platform had approximately \$16.8 billion in combined AUM. We report all of the AUM of the BDCs in our AUM.

Table of Contents

The following chart presents the growth in the AUM of our Public Markets business line from the commencement of its operations in August 2004 through December 31, 2018.

Public Markets

Assets Under Management ⁽¹⁾ ⁽²⁾

(\$ in billions)

(1) For years 2006 through 2008, AUM are presented pro forma for the KPE Transaction and, therefore, exclude the net asset value of KPE and its former commitments to our investment funds. AUM of acquired businesses and pro rata AUM of hedge fund partnerships in which KKR has made an investment are included in the years on and after the completion of the respective acquisitions or transactions, as applicable.

(2) In 2015 our definition of AUM was amended to include (i) KKR's pro rata portion of AUM managed by third-party hedge fund managers in which KKR holds a minority stake and (ii) capital commitments for which we are eligible to receive fees or carried interest upon deployment of capital. AUM for all prior periods has been adjusted to include such changes.

Table of ContentsCredit
Performance

We generally review our performance in our credit business by investment strategy.

Our leveraged credit strategies principally invest through separately managed accounts, BDCs, CLOs and investment funds. In certain cases, these strategies have meaningful track records and may be compared to widely-known indices. The following table presents information regarding larger leveraged credit strategies managed by KKR from inception to December 31, 2018. However, the information presented below is not intended to be representative of any past or future performance for any particular period other than the period presented below. Past performance is no guarantee of any future result.

Leveraged Credit Strategies: Inception-to-Date Annualized Gross Performance vs. Benchmark by Strategy

(\$ in millions)	Inception Date	Gross Returns	Net Returns	Benchmark ⁽¹⁾	Benchmark Gross Returns
Bank Loans Plus High Yield	Jul 2008	7.46 %	6.83 %	65% S&P/LSTA Loan Index, 35% BoAML HY Master II Index ⁽²⁾	5.71 %
Opportunistic Credit ⁽³⁾	May 2008	12.06 %	10.08 %	50% S&P/LSTA Loan Index, 50% BoAML HY Master II Index ⁽³⁾	5.96 %
Bank Loans	Apr 2011	4.90 %	4.30 %	S&P/LSTA Loan Index ⁽⁴⁾	3.75 %
High-Yield	Apr 2011	6.13 %	5.55 %	BoAML HY Master II Index ⁽⁵⁾	5.41 %
Bank Loans Conservative	Apr 2011	4.21 %	3.62 %	S&P/LSTA BB-B Loan Index ⁽⁶⁾	3.74 %
European Leveraged Loans ⁽⁷⁾	Sep 2009	4.97 %	4.45 %	CS Inst West European Leveraged Loan Index ⁽⁸⁾	4.31 %
High-Yield Conservative	Apr 2011	5.47 %	4.89 %	BoAML HY BB-B Constrained ⁽⁹⁾	5.35 %
European Credit Opportunities ⁽⁷⁾	Sept 2007	5.20 %	4.30 %	S&P European Leveraged Loans (All Loans) ⁽¹⁰⁾	4.17 %
Revolving Credit ⁽¹¹⁾	May 2015	N/A	N/A	N/A	N/A

The benchmarks referred to herein include the S&P/LSTA Leveraged Loan Index (the "S&P/LSTA Loan Index"), S&P/LSTA U.S. B/BB Ratings Loan Index (the "S&P/LSTA BB-B Loan Index"), the Bank of America Merrill Lynch High Yield Master II Index (the "BoAML HY Master II Index"), the BofA Merrill Lynch BB-B US High Yield Index (the "BoAML HY BB-B Constrained"), the Credit Suisse Institutional Western European Leveraged Loan Index (the "CS Inst West European Leveraged Loan Index"), and S&P European Leveraged Loans (All Loans). The S&P/LSTA Loan Index is a daily tradable index for the U.S. loan market that seeks to mirror the market-weighted performance of the largest institutional loans that meet certain criteria. The S&P/LSTA BB-B Loan Index is comprised of loans in the S&P/LSTA Loan Index, whose rating is BB+, BB, BB-, B+, B or B-. The BoAML HY Master II Index is an index for high-yield corporate bonds. It is designed to measure the broad high-yield market, including lower-rated securities. The BoAML HY BB-B Constrained is a subset of the BoAML HY Master II Index including all securities rated BB1 through B3, inclusive. The CS Inst West European Leveraged Loan Index contains only institutional loan facilities priced above 90, excluding TL and TLa facilities and loans rated CC, C or are in default. The S&P European Leveraged Loan Index reflects the market-weighted performance of institutional leveraged loan portfolios investing in European credits. While the returns of our leveraged credit strategies reflect the reinvestment of income and dividends, none of the indices presented in the chart above reflect such reinvestment, which has the effect of increasing the reported relative performance of these strategies as compared to the indices. Furthermore, these indices are not subject to management fees, incentive allocations, or expenses.

(2)

Performance is based on a blended composite of Bank Loans Plus High Yield strategy accounts. The benchmark used for purposes of comparison for the Bank Loans Plus High Yield strategy is based on 65% S&P/LSTA Loan Index and 35% BoAML HY Master II Index.

- (3) The Opportunistic Credit strategy invests in high-yield securities and corporate loans with no preset allocation. The benchmark used for purposes of comparison for the Opportunistic Credit strategy presented herein is based on 50% S&P/LSTA Loan Index and 50% BoAML HY Master II Index. Funds within this strategy may utilize third-party financing facilities to enhance investment returns. In cases where financing facilities are used, the amounts drawn on the facility are deducted from the assets of the fund in the calculation of net asset value, which tends to increase returns when net asset value grows over time and decrease returns when net asset value decreases over time.
- (4) Performance is based on a composite of portfolios that primarily invest in leveraged loans. The benchmark used for purposes of comparison for the Bank Loans strategy is based on the S&P/LSTA Loan Index.
- (5) Performance is based on a composite of portfolios that primarily invest in high-yield securities. The benchmark used for purposes of comparison for the High Yield strategy is based on the BoAML HY Master II Index.
- (6) Performance is based on a composite of portfolios that primarily invest in leveraged loans rated B-/Baa3 or higher. The benchmark used for purposes of comparison for the Bank Loans Conservative strategy is based on the S&P/LSTA BB-B Loan Index.
- (7) The returns presented are calculated based on local currency.
- (8) Performance is based on a composite of portfolios that primarily invest in higher quality leveraged loans. The benchmark used for purposes of comparison for the European Leveraged Loans strategy is based on the CS Inst West European Leveraged Loan Index.
- (9) Performance is based on a composite of portfolios that primarily invest in high-yield securities rated B or higher. The benchmark used for purposes of comparison for the High-Yield Conservative strategy is based on the BoAML HY BB-B Constrained Index.
- (10) Performance is based on a composite of portfolios that primarily invest in European institutional leveraged loans. The benchmark used for purposes of comparison for the European Credit Opportunities strategy is based on the S&P European Leveraged Loans (All Loans) Index.
- (11) This strategy has not called any capital as of December 31, 2018. As a result, the gross and net return performance measures are not meaningful and are not included above.

Table of Contents

Our alternative credit strategies primarily invest in more illiquid instruments through private investment funds, BDCs and separately managed accounts. The following table presents information regarding our Public Markets alternative credit commingled funds where investors are subject to capital commitments from inception to December 31, 2018. Some of these funds have been investing for less than 24 months, and thus their performance is less meaningful and not included below. In addition, the information presented below is not intended to be representative of any past or future performance for any particular period other than the period presented below. Past performance is no guarantee of any future result.

(1) Recycled capital is excluded from the amounts invested and realized.

(2) These credit funds utilize third-party financing facilities to provide liquidity to such funds, and in such event IRRs are calculated from the time capital contributions are due from fund investors to the time fund investors receive a related distribution from the fund. The use of such financing facilities generally decreases the amount of invested capital that would otherwise be used to calculate IRRs, which tends to increase IRRs when fair value grows over time and decrease IRRs when fair value decreases over time. IRRs measure the aggregate annual compounded returns generated by a fund's investments over a holding period and are calculated taking into account recycled capital. Net IRRs presented are calculated after giving effect to the allocation of realized and unrealized carried interest and the payment of any applicable management fees. Gross IRRs are calculated before giving effect to the allocation of carried interest and the payment of any applicable management fees.

(3) The multiples of invested capital measure the aggregate value generated by a fund's investments in absolute terms. Each multiple of invested capital is calculated by adding together the total realized and unrealized values of a

fund's investments and dividing by the total amount of capital invested by the investors. The use of financing facilities generally decreases the amount of invested capital that would otherwise be used to calculate multiples of invested capital, which tends to increase multiples when fair value grows over time and decrease multiples when fair value decreases over time. Such amounts do not give effect to the allocation of any realized and unrealized returns on a fund's investments to the fund's general partner pursuant to a carried interest or the payment of any applicable management fees and are calculated without taking into account recycled capital.

(4) "Unallocated Commitments" represent unallocated commitments from our strategic investor partnerships.

For additional information regarding impact of market conditions on the value and performance of our investments, see "Risk Factors—Risks Related to Our Business—Difficult market and economic conditions can adversely affect our business in many ways, including by reducing the value or performance of the investments that we manage or by reducing the ability of our funds to raise or deploy capital, each of which could negatively impact our net income and cash flow and adversely affect our financial prospects and condition" and "Risk Factors—Risks Related to the Assets We Manage—The historical returns attributable to our funds, including those presented in this report, should not be considered as indicative of the future results of our funds or our balance sheet investments, of our future results or the performance of our common stock."

Investment Approach

Our approach to making investments focuses on creating investment portfolios that seek to generate attractive risk-adjusted returns by selecting investments that may be made at attractive prices, subjecting investments to regular monitoring and oversight, and, for more liquid investments, making buy and sell decisions based on price targets and relative value parameters. The firm employs both "top-down" and "bottom-up" analyses when making investments. Our top-down analysis involves, as appropriate, a macro analysis of relative asset valuations, long-term industry trends, business cycles, regulatory trends, interest rate expectations, credit fundamentals and technical factors to target specific industry sectors and asset classes in which to invest. From a bottom-up perspective, our investment decision is predicated on an investment thesis that is developed using our proprietary resources and knowledge and due diligence.

Table of Contents

Sourcing and Selecting Investments

We source investment opportunities through a variety of channels, including internal deal generation strategies and the firm's global network of contacts at major companies, corporate executives, commercial and investment banks, financial intermediaries, other private equity sponsors and other investment and advisory institutions. We are also provided with opportunities to invest, in certain strategies where appropriate, in the securities of KKR's private equity portfolio companies, though there are limitations across the platform on the availability and maximum size of such KKR-affiliated investments.

Due Diligence and the Investment Decision

Once a potential investment has been identified, our investment professionals screen the opportunity and make a preliminary determination concerning whether we should proceed with further diligence. When evaluating the suitability of an investment for our funds, we typically employ a relative value framework and subject the investment to due diligence. This review considers many factors including, as appropriate, expected returns, capital structure, credit ratings, historical and projected financial data, the issuer's competitive position, the quality and track record of the issuer's management team, margin stability, and industry and company trends. Investment professionals use the services of outside advisors and industry experts as appropriate to assist them in the due diligence process and, when relevant and permitted, leverage the knowledge and experience of our Private Markets investment professionals. Strategy-specific investment committees monitor our due diligence practices.

Monitoring Investments

We monitor our portfolios of investments using, as applicable, daily, quarterly and annual analyses. Daily analyses include morning market meetings, industry and company pricing runs, industry and company reports and discussions with the firm's Private Markets investment professionals on an as-needed basis. Quarterly analyses include the preparation of quarterly operating results, reconciliations of actual results to projections and updates to financial models (baseline and stress cases). Annual analyses involve conducting internal audits, and testing compliance with monitoring and documentation requirements.

Credit Strategies

Our credit business pursues investments in leveraged credit strategies, such as leveraged loans, high-yield bonds, opportunistic credit and revolving credit strategies, and alternative credit strategies, such as special situations, direct lending and private opportunistic credit (or mezzanine) strategies. We pursue these investments across a range of vehicles, including investment funds and separately managed accounts, for which we receive a fee and in certain cases an incentive fee or carried interest.

We also manage structured credit vehicles in the form of CLOs that hold leveraged loans, high-yield bonds or a combination of both. CLOs are typically structured as special purpose investment vehicles that acquire, monitor and, to varying degrees, manage a pool of credit assets. CLOs generally serve as long-term financing for leveraged credit investments and as a way to reduce refinancing risk, reduce maturity risk and secure a fixed cost of funds over an underlying market interest rate. We typically receive a fee for managing CLOs.

We also serve as the registered investment adviser or sub-adviser to registered investment companies. The management fees we are paid for managing registered investment companies are generally subject to contractual rights that require their board of directors to provide prior notice in order to terminate our investment management services. Following the completion of the transaction to form a strategic BDC partnership with FS Investments in April 2018, FS/KKR Advisor serves as the investment adviser to the BDCs in our BDC platform.

Leveraged Credit. Our leveraged credit strategies are principally directed at investing in leveraged loans, high-yield bonds or a combination of both. Our opportunistic credit strategy seeks to deploy capital across investment themes that take advantage of credit market dislocations, spanning asset types and liquidity profiles. Our revolving credit strategy invests in senior secured revolving credit facilities.

Alternative Credit. Our alternative credit strategies consist of special situations and private credit strategies.

Special Situations. We seek to make opportunistic investments largely in stressed or distressed companies through our special situations investment strategy. These investments include distressed investments (including post-restructuring equity), control-oriented opportunities, rescue financing (debt or equity investments made to address

Table of Contents

covenant, maturity or liquidity issues), debtor-in-possession or exit financing, and other event-driven investments in debt or equity.

Private Credit. Our private credit strategies seek to leverage the knowledge and relationships developed in the leveraged credit business. These strategies include direct lending and private opportunistic credit strategies. Through our direct lending strategy, we seek to make investments in proprietary sourced primarily senior debt financings for middle-market companies. Through our private opportunistic credit strategy, we seek to make investments in directly sourced third-party mezzanine and mezzanine-like transactions and also seek asset-based credit and structured credit opportunities across financial and hard assets. These investments often consist of mezzanine debt, which generates a current yield, coupled with marginal equity exposure with additional upside potential.

Hedge Funds

Our hedge fund platform consists of strategic partnerships with third-party hedge fund managers in which KKR owns a minority stake. This includes a 34.6% interest in Marshall Wace, a global alternative investment manager specializing in long/short equity products, and a 24.9% interest in BlackGold Capital Management L.P. ("BlackGold"), a credit-oriented investment manager focused on energy and hard asset investments. We also own a 39.9% interest in, and are entitled to receive certain other payments from, PAAMCO Prisma Holdings, LLC ("PAAMCO Prisma"), an investment manager focused on liquid alternative investment solutions, including hedge fund-of-fund portfolios.

On November 14, 2018, we sold all of our 24.6% interest in Nephila Capital Ltd. ("Nephila"), an investment manager focused on investing in natural catastrophe and weather risk, as part of an acquisition of Nephila by a third-party buyer.

Public Markets AUM and Vehicle Structures

As of December 31, 2018, our Public Markets business line had \$91.3 billion of AUM, comprised of \$35.5 billion of assets managed in our leveraged credit strategies (which include \$2.2 billion of assets managed in our opportunistic credit strategy and \$1.8 billion of assets managed in our revolving credit strategy), \$6.6 billion of assets managed in our special situations strategy, \$22.8 billion of assets managed in our private credit strategies, \$25.7 billion of assets managed through our hedge fund platform, and \$0.7 billion of assets managed in other strategies. Our private credit strategies include \$17.0 billion of assets managed in our direct lending strategy and \$5.8 billion of assets managed in our private opportunistic credit (or mezzanine) strategy.

Table of Contents

The table below presents information as of December 31, 2018, based on the investment funds, vehicles or accounts offered by our Public Markets business line. Our funds, vehicles and accounts have been sorted based upon their primary investment strategies. However, the AUM and FPAUM presented for each line in the table includes certain investments from non-primary investment strategies, which are permitted by their investment mandates, for purposes of presenting the fees and other terms for such funds, vehicles and accounts.

(\$ in millions)	AUM	FPAUM	Typical Management Fee Rate	Incentive Fee / Carried Interest	Preferred Return	Duration of Capital
Leveraged Credit:						
Leveraged Credit SMAs/Funds	\$18,915	\$17,645	0.10%-1.10%	Various ⁽¹⁾	Various ⁽¹⁾	Subject to redemptions
CLOs	13,026	13,026	0.40%-0.50%	Various ⁽¹⁾	Various ⁽¹⁾	10-14 Years ⁽²⁾
Total Leveraged Credit	31,941	30,671				
Alternative Credit: ⁽³⁾						
Special Situations	6,846	4,382	0.90%-1.75% ⁽⁴⁾	10.00-20.00%	7.00-12.00%	8-15 Years ⁽²⁾

Total Alternative Credit	16,919	8,584				
Hedge Funds ⁽⁵⁾						
Hedge Funds ⁽⁵⁾	25,685	18,144	0.50%-2.00%	Various ⁽¹⁾	Various ⁽¹⁾	Subject to redemptions
BDCs ⁽⁶⁾	16,779	16,779	0.60%	8.00%	7.00%	Indefinite
Total	\$91,324	\$74,178				

Certain funds and CLOs are subject to a performance fee in which the manager or general partner of the funds share up to 20% of the net profits earned by investors in excess of performance hurdles (generally tied to a benchmark or index) and subject to a provision requiring the funds and vehicles to regain prior losses before any performance fee is earned.

(1) Duration of capital is measured from inception. Inception dates for CLOs were between 2013 and 2018 and for separately managed accounts and funds investing in alternative credit strategies from 2009 through 2018.

(2) Our alternative credit funds generally have investment periods of three to five years and our newer alternative credit funds generally earn fees on invested capital during the investment period.

(3) Lower fees on uninvested capital in certain vehicles.

(4) Hedge Funds represent KKR's pro rata portion of AUM and FPAUM of our hedge fund partnerships.

(5) Consists of our BDC platform advised by FS/KKR Advisor. We report all of the AUM of the BDCs in our AUM and FPAUM.

Fundraising and Composition of Fund Investors

We have a Client & Partner Group that is responsible for raising capital for us globally across all products, expanding our client relationships across asset classes and across types of fund investors, developing products to meet our clients' needs, and servicing existing fund investors and products. We also provide fundraising services to certain third-party fund managers in our hedge fund partnerships. As of December 31, 2018, we had over 80 executives and professionals dedicated to our Client & Partner Group.

As of December 31, 2018, we had approximately 970 investors in funds across all our strategies, which reflect the addition of 70 investors during the year. On average, a fund investor is invested in approximately two of our products as of December 31, 2018. The following charts detail our investor base by type and geography as of December 31, 2018.

Fund Investor Base by Type ⁽¹⁾ Fund Investor Base by Geography ⁽¹⁾

Based on the AUM of our Private Markets investment funds, Private Markets co-investment vehicles, and Public Markets separately managed accounts and Public Markets investment funds. These charts exclude general partner (1) commitments, assets managed through CLOs, and assets managed by other asset managers with which KKR has formed strategic partnerships where KKR does not hold more than a 50% ownership interest. Allocations are assigned to a type or geographic region according to subscriptions received from a limited partner.

Capital Markets

Our Capital Markets business line is comprised of our global capital markets business, which is integrated with KKR's other business lines, and serves our firm, our portfolio companies and third-party clients by developing and implementing both traditional and non-traditional capital solutions for investments or companies seeking financing. These services include arranging debt and equity financing, placing and underwriting securities offerings, and providing other types of capital markets services that may result in the firm receiving fees, including underwriting, placement, transaction and syndication fees, commissions, underwriting discounts, interest payments and other compensation, which may be payable in cash or securities, in respect of the activities described above.

Our capital markets business underwrites credit facilities and arranges loan syndications and participations. When we are sole arrangers of a credit facility, we may advance amounts to the borrower on behalf of other lenders, subject to repayment. When we underwrite an offering of securities on a firm commitment basis, we commit to buy and sell an issue of securities and generate revenue by purchasing the securities at a discount or for a fee. When we act in an agency capacity or best efforts basis, we generate revenue for arranging financing or placing securities with capital markets investors. We may also provide issuers with capital markets advice on security selection, access to markets, marketing considerations, securities pricing, and other aspects of capital markets transactions in exchange for a fee. Our capital markets business also provides syndication services in

Table of Contents

respect of co-investments in transactions participated in by KKR funds or third-party clients, which may entitle the firm to receive syndication fees, management fees and/or a carried interest.

The capital markets business has a global footprint, with local presence and licenses to carry out certain broker-dealer activities in various countries in North America, Europe, Asia-Pacific and the Middle East. Our flagship capital markets subsidiary is KKR Capital Markets LLC, an SEC-registered broker-dealer and a member of the Financial Industry Regulation Authority ("FINRA").

Principal Activities

Through our Principal Activities business line, we manage the firm's own assets on our balance sheet and deploy capital to support and grow our business lines. Typically, the funds in our Private Markets and Public Markets business lines contractually require us, as general partner of the funds, to make sizable capital commitments from time to time. We believe making general partner commitments assists us in raising new funds from limited partners by demonstrating our conviction in a given fund's strategy. We also use our balance sheet to acquire investments in order to help establish a track record for fundraising purposes in new strategies. We may also use our own capital to seed investments for new funds, to bridge capital selectively for our funds' investments or finance strategic acquisitions and partnerships, although the financial results of an acquired business or hedge fund partnership may be reported in our other business lines.

Our Principal Activities business line also provides the required capital to fund the various commitments of our Capital Markets business line when underwriting or syndicating securities, or when providing term loan commitments for transactions involving our portfolio companies and for third parties. Our Principal Activities business line also holds assets that may be utilized to satisfy regulatory requirements for our Capital Markets business line and risk retention requirements for our CLOs.

We also make opportunistic investments through our Principal Activities business line, which include co-investments alongside our Private Markets and Public Markets funds as well as Principal Activities investments that do not involve our Private Markets or Public Markets funds.

We endeavor to use our balance sheet strategically and opportunistically to generate an attractive risk-adjusted return on equity in a manner that is consistent with our fiduciary duties, in compliance with applicable laws, and consistent with our one-firm approach.

Table of Contents

The chart below presents the holdings of our Principal Activities business line by asset class as of December 31, 2018.

Holdings by Asset Class ⁽¹⁾

General partner commitments in our funds are included in the various asset classes shown above. Assets and revenues of other asset managers with which KKR has formed strategic partnerships where KKR does not hold more than 50% ownership interest are not included in our Principal Activities business line but are reported in the (1) financial results of our other business lines. Private Equity includes KKR private equity funds, co-investments alongside such KKR-sponsored private equity funds, certain core equity investments, and other opportunistic investments. Equity investments in other asset classes, such as real estate, special situations and energy appear in these other asset classes. Other Credit consists of certain leveraged credit and specialty finance strategies.

Table of Contents

Competition

We compete with other investment managers for both fund investors and investment opportunities. The firm's competitors consist primarily of sponsors of public and private investment funds, real estate development companies, BDCs, investment banks, commercial finance companies and operating companies acting as strategic buyers. We believe that competition for fund investors is based primarily on investment performance, investor liquidity and willingness to invest, investor perception of investment managers' drive, focus and alignment of interest, business reputation, duration of relationships, quality of services, pricing, fund terms including fees, and the relative attractiveness of the types of investments that have been or are to be made. We believe that competition for investment opportunities is based primarily on the pricing, terms and structure of a proposed investment and certainty of execution. In addition to these traditional competitors within the global investment management industry, we also face competition from local and regional firms, financial institutions and sovereign wealth funds in the various countries in which we invest. In certain emerging markets, local firms may have more established relationships with the companies in which we are attempting to invest. These competitors often fall into one of the aforementioned categories but in some cases may represent new types of fund investors, including high net worth individuals, family offices and state-sponsored entities.

There are numerous funds focused on private equity, real assets, growth equity, credit and hedge fund strategies that compete for investor capital. Fund managers have also increasingly adopted investment strategies outside of their traditional focus. For example, funds focused on credit and equity strategies have become active in taking control positions in companies, while private equity funds have acquired minority equity or debt positions in publicly listed companies. This convergence could heighten competition for investments. Furthermore, as institutional fund investors increasingly consolidate their relationships for multiple investment products with a few investment firms, competition for capital from such institutional fund investors may become more acute. However, such consolidation may also lead institutional fund investors to prefer more established investment firms, which could help us compete against newer entrants or investment firms that are smaller in size or offer more limited types of investment strategies.

Some of the entities that we compete with as an investment firm may have greater financial, technical, marketing and other resources and more personnel than us and, in the case of some asset classes, longer operating histories, more established relationships or greater experience. Several of our competitors also have raised, or may raise, significant amounts of capital and have investment objectives that are similar to the investment objectives of our funds, which may create additional competition for investment opportunities. Some of these competitors may also have lower costs of capital and access to funding sources that are not available to us, which may create competitive advantages for them. In addition, some of these competitors may have higher risk tolerances, different risk assessments or lower return thresholds, which could allow them to consider a wider range of investments and to bid more aggressively than us for investments. Strategic buyers may also be able to achieve synergistic cost savings or revenue enhancements with respect to a targeted portfolio company, which may provide them with a competitive advantage in bidding for such investments.

Our capital markets business competes primarily with investment banks and independent broker-dealers in North America, Europe, Asia-Pacific and the Middle East. We principally focus our capital markets activities on the firm, our portfolio companies and fund investors, but we also seek to service other third parties. While we generally target customers with whom we have existing relationships, those customers may have similar relationships with the firm's competitors, many of whom will have access to competing securities transactions, greater financial, technical or marketing resources or more established reputations than us.

Competition is also intense for the attraction and retention of qualified employees and consultants. Our ability to continue to compete effectively in our businesses will depend upon our ability to attract new employees and consultants and retain and motivate our existing employees and consultants.

Employees, Consultants and Advisors

As of December 31, 2018, we employed 1,301 people worldwide:

Investment Professionals 447

Other Professionals	587
Support Staff	267
Total Employees ⁽¹⁾	1,301

(1) Does not include operating consultants and other consultants who provide services to us or our funds.

Table of Contents

Investment Professionals

Our 447 investment professionals come from diverse backgrounds in private equity, real assets, credit, hedge funds and other asset classes and include executives with operations, strategic consulting, risk management, liability management and finance experience. As a group, these professionals provide us with a strong global team for identifying attractive investment opportunities, creating value and generating superior returns.

Other Professionals

Our 587 other professionals come from diverse backgrounds in capital markets, economics, capital raising, client services, public affairs, finance, tax, legal, compliance, human resources, and information technology. As a group, these professionals provide us with a strong team for overseeing investments and performing capital markets activities, servicing our existing fund investors and creating relationships with new fund investors globally. Additionally, a majority of these other professionals are responsible for supporting the global infrastructure of KKR. KKR Capstone

We have developed an institutionalized process for creating value in investments. As part of our effort, we utilize a team of 66 operating consultants at KKR Capstone, who are not KKR employees but work exclusively with our investment professionals and portfolio company management teams or our designees. With professionals in North America, Europe and the Asia-Pacific, KKR Capstone provides additional expertise for assessing investment opportunities and assisting managers of portfolio companies in defining strategic priorities and implementing operational changes. During the initial phases of an investment, KKR Capstone's work seeks to implement our thesis for value creation. These operating consultants may assist portfolio companies in addressing top-line growth, cost optimization and efficient capital allocation and in developing operating and financial metrics. Over time, this work shifts to identifying challenges and taking advantage of business opportunities that arise during the life of an investment. KKR Capstone is consolidated in KKR's financial results for GAAP purposes, but is not a subsidiary or affiliate of KKR.

Senior Advisors and Other Advisors

To complement the expertise of our investment professionals, we have a team of senior advisors and other advisors. While not KKR employees, they provide us with additional operational and strategic insights. The responsibilities of senior advisors and other advisors include serving on the boards of our portfolio companies, helping us source and evaluate individual investment opportunities and assisting portfolio companies with operational matters. These individuals include current and former chief executive officers, chief financial officers and chairpersons of major corporations and others holding leading positions of public agencies worldwide.

Table of Contents

Organizational Structure

The following simplified diagram illustrates our organizational structure as of December 31, 2018, unless otherwise noted. Certain entities depicted below may be held through intervening entities not shown in the diagram.

KKR Management LLC is the sole holder of Class B common stock of KKR & Co. Inc. Class B common stock is (1) the only class of common stock that is entitled to vote generally. KKR Management LLC is owned by senior KKR employees.

KKR Holdings is the holding vehicle through which certain of our current and former employees and other persons indirectly own their interest in KKR. KKR Group Partnership Units that are held by KKR Holdings are exchangeable for shares of Class A common stock on a one-for-one basis, subject to customary conversion rate adjustments for stock splits, stock dividends and reclassifications and compliance with applicable vesting and transfer restrictions. As limited partner interests, these KKR Group Partnership Units are non-voting and do not (2) entitle KKR Holdings to participate in the management of our business and affairs. As of December 31, 2018, KKR Holdings had approximately a 35.9% interest in our business indirectly through its limited partner interests in the KKR Group Partnerships. KKR Holdings also holds Class C common stock that entitles it to cast, with respect to those limited matters that may be submitted to a vote of our Class A common stockholders, a number of votes equal to the number of KKR Group Partnership Units that it holds from time to time.

(3) Includes holders of 13,800,000 shares of Series A Preferred Stock issued on March 17, 2016, 6,200,000 shares of Series B Preferred Stock issued on June 20, 2016 and our Class A common stock.

KKR Group Partnerships include KKR Management Holdings L.P., KKR Fund Holdings L.P. and KKR (4) International Holdings L.P. Following the Conversion, KKR & Co. Inc.'s allocable share of all taxable income of the KKR Group Partnerships is subject to taxation at a corporate rate. As of February 12, 2019, KKR International Holdings L.P. held no assets.

(5) KKR Management Holdings L.P. is the parent company of Kohlberg Kravis Roberts & Co. L.P., the SEC-registered investment adviser, which in turn is generally the parent company for most of KKR's other management and capital markets subsidiaries including KKR Credit Advisors (US) LLC and KKR Capital Markets Holdings L.P., the holding company for KKR Capital Markets LLC. KKR Fund Holdings L.P. is the parent company of KKR Credit Advisors (Ireland) Unlimited Company and KKR Alternative Investment Management Unlimited Company.

40% of the carried interest earned from our investment funds, and, beginning with the quarter ended September 30, 2016, 40% of the management fees that would have been subject to a management fee refund for investment funds that have a preferred return, are allocated to a carry pool, from which carried interest is allocable to our employees and selected other individuals. Beginning with the quarter ended September 30, 2017, 43% of carried interest (6) generated by then-current and future funds is allocated to the carry pool instead of 40% of carried interest. For impacted funds, the incremental 3% replaces the amount of certain management fee refunds that would have been calculated for those funds as performance income compensation. No carried interest has been allocated with respect to co-investments acquired from KPE in the KPE Transaction. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Key Financial Measures Under GAAP—Expenses—Compensation and Benefits."

Table of Contents

Regulation

Our operations are subject to regulation and supervision in a number of jurisdictions. The level of regulation and supervision to which we are subject varies from jurisdiction to jurisdiction and is based on the type of business activity involved. We, in conjunction with our outside advisors and counsel, seek to manage our business and operations in compliance with such regulation and supervision. The regulatory and legal requirements that apply to our activities are subject to change from time to time and may become more restrictive, which may make compliance with applicable requirements more difficult or expensive or otherwise restrict our ability to conduct our business activities in the manner in which they are now conducted. Changes in applicable regulatory and legal requirements, including changes in their enforcement, could materially and adversely affect our business and our financial condition and results of operations. As a matter of public policy, the regulatory bodies that regulate our business activities are generally responsible for safeguarding the integrity of the securities and financial markets and protecting fund investors who participate in those markets rather than protecting the interests of our stockholders.

United States

Regulation as an Investment Adviser

We conduct our advisory business through our investment adviser subsidiaries, including Kohlberg Kravis Roberts & Co. L.P. and its wholly-owned subsidiary KKR Credit Advisors (US) LLC, each of which is registered as an investment adviser with the SEC under the Investment Advisers Act of 1940 (the "Investment Advisers Act"). The investment advisers are subject to the anti-fraud provisions of the Investment Advisers Act and to fiduciary duties derived from these provisions, which apply to our relationships with our advisory clients globally, including funds that we manage. These provisions and duties impose restrictions and obligations on us with respect to our dealings with our fund investors and our investments, including for example restrictions on agency cross and principal transactions. Our registered investment advisers are subject to periodic SEC examinations and other requirements under the Investment Advisers Act and related regulations primarily intended to benefit advisory clients. These additional requirements relate, among other things, to maintaining an effective and comprehensive compliance program, record-keeping and reporting requirements and disclosure requirements. The Investment Advisers Act generally grants the SEC broad administrative powers, including the power to limit or restrict an investment adviser from conducting advisory activities in the event it fails to comply with federal securities laws. Additional sanctions that may be imposed for failure to comply with applicable requirements include the prohibition of individuals from associating with an investment adviser, the revocation of registrations and other censures and fines.

KKR Credit Advisors (US) LLC is also subject to regulation under the Investment Company Act as an investment adviser to a registered investment company. The KKR Income Opportunities Fund is a closed-end management investment company registered under the Investment Company Act. The closed-end management investment company and KKR Credit Advisors (US) LLC are subject to the Investment Company Act and the rules thereunder, which among other things regulate the relationship between a registered investment company and its investment adviser and prohibit or restrict principal transactions and joint transactions.

Regulation as a Broker-Dealer

KKR Capital Markets LLC, one of our subsidiaries, is registered as a broker-dealer with the SEC under the Exchange Act and in all 50 U.S. States and U.S. territories, and is a member of the FINRA. MCS Capital Markets LLC, one of our subsidiaries, is registered as a broker-dealer with the SEC under the Exchange Act and in 35 U.S. States. As registered broker-dealers, KKR Capital Markets LLC and MCS Capital Markets LLC are subject to periodic SEC and FINRA examinations and reviews. A broker-dealer is subject to legal requirements covering all aspects of its securities business, including sales and trading practices, public and private securities offerings, use and safekeeping of customers' funds and securities, capital structure, record-keeping and retention and the conduct and qualifications of directors, officers, employees and other associated persons. These requirements include the SEC's "uniform net capital rule," which specifies the minimum level of net capital that a broker-dealer must maintain, requires a significant part of the broker-dealer's assets to be kept in relatively liquid form, imposes certain requirements that may have the effect of prohibiting a broker-dealer from distributing or withdrawing its capital and subjects any distributions or withdrawals of capital by a broker-dealer to notice requirements. These and other requirements also include rules that

limit a broker-dealer's ratio of subordinated debt to equity in its regulatory capital composition, constrain a broker-dealer's ability to expand its business under certain circumstances and impose additional requirements when the broker-dealer participates in securities offerings of affiliated entities. Violations of these requirements may result in censures, fines, the issuance of cease-and-desist orders, revocation of licenses or registrations, the suspension or expulsion from the securities industry of the broker-dealer or its officers or employees or other similar consequences by regulatory bodies.

Table of Contents

Ireland

We have a number of subsidiaries which are authorized and regulated by the Central Bank of Ireland. CBI is responsible for, among other things, regulating and supervising firms that provide financial services in Ireland, including broker-dealers and investment firms. CBI also develops and maintains regulatory policies for Ireland's financial services sector. CBI has the authority to approve applications from financial services providers in Ireland, monitor compliance with its standards, and take enforcement action for non-compliance. Violation of CBI's requirements may result in administrative sanctions; investigations; refusal, revocation or cancellation of authorization or registrations; criminal prosecution; and/or reports to other agencies.

KKR Alternative Investment Management Unlimited Company, KKR Credit Advisors (Ireland) Unlimited Company and KKR Capital Markets (Ireland) Limited Company are regulated by CBI. KKR Alternative Investment Management Unlimited Company is an authorized EU alternative investment manager permitted to conduct portfolio management, risk management and certain administrative activities. KKR Credit Advisors (Ireland) Unlimited Company is authorized to carry out a number of regulated activities including receiving and transmitting orders, portfolio management and providing investment advice. KKR Capital Markets (Ireland) Limited Company is authorized to engage in a number of regulated activities regulated under Markets in Financial Instruments Directive, known as "MiFID," including dealing as principal or agent, making arrangements in relation to certain types of specified investments, and arranging the safeguarding and administration of assets. KKR Capital Markets (Ireland) Limited also benefits from a passport under the single market directives to offer services cross border into all countries in the European Economic Area.

United Kingdom

We have several subsidiaries which are authorized and regulated by the United Kingdom Financial Conduct Authority (the "FCA") under the Financial Services and Markets Act 2000 ("FSMA"). FSMA and related rules govern most aspects of investment business, including investment management, sales, research and trading practices, provision of investment advice, corporate finance, use and safekeeping of client funds and securities, regulatory capital, record-keeping, margin practices and procedures, approval standards for individuals, anti-money laundering, periodic reporting and settlement procedures. The FCA is responsible for administering these requirements and our compliance with the FSMA and related rules. Violations of these requirements may result in censures, fines, imposition of additional requirements, injunctions, restitution orders, revocation or modification of permissions or registrations, the suspension or expulsion from certain "controlled functions" within the financial services industry of officers or employees performing such functions or other similar consequences.

KKR Capital Markets Limited has permission to engage in a number of regulated activities regulated under FSMA, including dealing as principal or agent and arranging deals in relation to certain types of specified investments and arranging the safeguarding and administration of assets. KKR Capital Markets Limited also currently benefits from a passport under the single market directives to offer services cross border into all countries in the European Economic Area and Gibraltar. Kohlberg Kravis Roberts & Co. Partners LLP has permission to engage in a number of regulated activities including advising on and arranging deals relating to corporate finance business in relation to certain types of specified investments. KKR Credit Advisors (EMEA) LLP has permission to engage in a number of regulated activities including managing, advising on and arranging deals in relation to certain types of specified investments.

Other Jurisdictions

Certain other subsidiaries or funds that we advise are registered with, have been licensed by or have obtained authorizations to operate in their respective jurisdictions outside of the United States. These registrations, licenses or authorizations relate to providing investment advice, broker-dealer activities, marketing of securities and other regulated activities. Failure to comply with the laws and regulations governing these subsidiaries and funds that have been registered, licensed or authorized could expose us to liability and/or damage our reputation.

In Canada, KKR Capital Markets LLC and MCS Capital Markets LLC are also registered as an international dealer under the Securities Act (Ontario). This registration permits us to trade in non-Canadian equity and debt securities with certain types of investors located in Ontario, Canada.

In Japan, KKR Capital Markets Japan Ltd., a joint stock corporation, is registered as a Type I and Type II Financial Instruments Business Operator (broker-dealer) under the Financial Instruments and Exchange Act of Japan, and a money lender under the Money Lending Business Act of Japan.

Table of Contents

In the United Arab Emirates, KKR MENA Limited, a Dubai International Financial Centre company, is licensed to arrange deals in investments, advise on financial products and arrange custody, and is regulated by the Dubai Financial Services Authority.

In Saudi Arabia, KKR Saudi Limited is licensed by the Capital Market Authority of Saudi Arabia and is authorized for the activity of arranging in the securities business.

In Australia, KKR Australia Pty Limited and KKR Australia Investment Management Pty Limited are Australian financial services licensed and are authorized to provide advice on and deal in financial products for wholesale clients, and are regulated by the Australian Securities and Investments Commission.

In Hong Kong, KKR Capital Markets Asia Limited is licensed by the Securities and Futures Commission in Hong Kong to carry on dealing in securities and advising on securities regulated activities.

In Singapore, KKR Singapore Pte. Ltd. holds a capital markets services license to conduct fund management for qualified investors only, and is regulated by Monetary Authority of Singapore.

In Mauritius, KKR Holdings Mauritius, Ltd. and KKR Account Adviser (Mauritius), Ltd. are unrestricted investment advisers authorized to manage portfolios of securities and give advice on securities transactions, and are regulated by the Financial Services Commission, Mauritius.

In India, we have subsidiaries that are registered with the Securities Exchange Board of India ("SEBI") (i) as a foreign portfolio investor or a foreign venture capital investor to make investments in Indian securities, (ii) as a merchant bank to execute capital market mandates, underwrite issues, offer investment advisory and other consultancy services in connection with securities, and (iii) as an investment manager and sponsor of alternative investment funds. In addition, certain subsidiaries are registered with the Reserve Bank of India as non-deposit taking non-banking financial companies and are authorized to undertake lending and financing activities.

From time to time, one or more of our investment funds or their related investment vehicles may be regulated as a mutual fund by the Cayman Islands Monetary Authority, regulated as an investment limited partnership by CBI, listed on the Irish Stock Exchange, notified with the Financial Services Agency of Japan for sale pursuant to certain private placement exemptions and/or for investment pursuant to certain exemption, registered with the Financial Supervisory Service of the Republic of Korea, licensed by or granted in principal approval from SEBI, subject to the regulatory supervision of the Commission de Surveillance du Secteur Financier of Luxembourg, notified with the Netherlands Authority for Financial Markets for sale pursuant to certain private placement exemptions, or registered under the Investment Company Act.

There are a number of legislative and regulatory initiatives in the United States and in Europe that could significantly affect our business. See "Risk Factors—Risks Related to Our Business—Extensive regulation of our businesses affects our activities and creates the potential for significant liabilities and penalties. The possibility of increased regulatory focus or legislative or regulatory changes could materially and adversely affect our business."

Website and Availability of SEC Filings

Our website address is www.kkr.com. Information on our website is not incorporated by reference herein and is not a part of this report. We make available free of charge on our website or provide a link on our website to our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, as soon as reasonably practicable after those reports are electronically filed with, or furnished to, the SEC. To access these filings, go to the "Stockholder (KKR & Co. Inc.)" section of our "Investor Center" page on our website, then click on "SEC Filings." In addition, these reports and the other documents we file with the SEC are available at a website maintained by the SEC at www.sec.gov.

From time to time, we may use our website as a channel of distribution of material information. Financial and other material information regarding our company is routinely posted on and accessible at www.kkr.com. In addition, you may automatically receive e-mail alerts and other information about our company by enrolling your e-mail address by visiting the "Email Alerts" section under the "Stockholder (KKR & Co. Inc.)" section of the "Investor Center" page at www.kkr.com.

ITEM 1A. RISK FACTORS

Investing in our securities involves risk. Persons investing in our securities should carefully consider the risks described below and the other information contained in this report and other filings that we make from time to time with the SEC, including our consolidated financial statements and accompanying notes. Any of the following risks could materially and adversely affect our business, financial condition or results of operations. Our business, financial condition or results of operations could also be materially and adversely affected by additional factors that apply to all companies generally, as well as other risks that are not currently known to us or that we currently view to be immaterial. In any such case, the trading price of our securities could decline and you may lose all or part of your original investment. While we attempt to mitigate known risks to the extent we believe to be practicable and reasonable, we can provide no assurance, and we make no representation, that our mitigation efforts will be successful.

Risks Related to Our Business

Difficult market and economic conditions can adversely affect our business in many ways, including by reducing the value or performance of the investments that we manage or by reducing the ability of our funds to raise or deploy capital, each of which could negatively impact our net income and cash flow and adversely affect our financial prospects and condition.

Our business and the businesses of the companies in which we invest are materially affected by financial markets and economic conditions or events throughout the world, such as interest rates, availability of credit, inflation rates, economic uncertainty, changes in laws (including laws relating to taxation), trade barriers, commodity prices, currency exchange rates and controls and national and international political circumstances (including wars, terrorist acts or security operations). For example, rising trade tensions between the United States and China, growing uncertainty regarding Brexit, and the decision by the U.S. Federal Reserve to raise its benchmark interest rate in September and December of 2018 have contributed to the volatility in the U.S. stock markets in late 2018 and early 2019, which have adversely impacted the valuations of certain of our investments as of December 31, 2018. In addition, the unprecedented turmoil in the global financial markets during 2008 and 2009 provoked significant volatility of securities prices, contraction in the availability of credit and the failure of a number of companies, including leading financial institutions, and had a material adverse effect on our businesses and the businesses of the companies in which we invest. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Business Environment" for a discussion of recent developments in market and business conditions that may affect our business.

Such financial markets and economic conditions are outside our control and may affect the level and volatility of securities prices and liquidity and as a result, the value of our investments and our financial results. In addition, we

may not be able to or may choose not to manage our exposure to these conditions and/or events. If not otherwise offset, declines in the equity, commodity and debt in the markets would likely cause us to write down our investments and the investments of our funds. For example, during the global financial crisis in 2008 and 2009, valuations of our private equity funds declined across all geographies, with investments in private equity funds marked down to as low as 67% of original cost and multiples of invested capital reaching as low as 0.5x, 0.6x, 0.7x and 0.8x for the European Fund II, European Fund III, 2006 Fund and Asian Fund, respectively, as of March 31, 2009. Our profitability may also be materially and adversely affected by our fixed costs and the possibility that we would be unable to scale back other costs within a time frame sufficient to match any decreases in net income relating to a downturn in market and economic conditions.

Table of Contents

Unfavorable market and economic conditions may reduce opportunities for our funds to make, exit and realize value from their investments. Challenging market and economic conditions, including those caused by changes in tax laws and other regulatory restrictions, may make it difficult for us to find suitable investments for our funds or secure financing for investments on attractive terms. Such conditions may also result in reduced opportunities for our funds to exit and realize value from their existing investments and lower-than-expected returns on existing investments. Although the equity markets are not the only means by which we exit investments, in challenging equity markets, our funds may experience greater difficulty in realizing value from investments. In addition, when financing is not available or becomes too costly, it is difficult for potential buyers to raise sufficient capital to purchase our funds' investments. Consequently, we may earn lower-than-expected returns on investments, which could cause us to realize diminished or no carried interest.

We generally raise capital for a successor fund following the substantial and successful deployment of capital from the existing fund. In the event of poor performance by existing funds, our ability to raise new funds is impaired. Our fundraising may also be negatively impacted by any change in or rebalancing of fund investors' asset allocation policies. During periods of unfavorable fundraising conditions, fund investors may negotiate for lower fees, different fee sharing arrangements for transaction or other fees, and other concessions. The outcome of such negotiations could result in our agreement to terms that are materially less favorable to us than for prior funds we have managed. Our current funds, including all our recent private equity funds, have performance hurdles, which require us to generate a specified return on investment prior to our right to receive carried interest. This requirement will likely be in all our future funds, and the hurdle rate could increase for our future funds. In addition, successor funds raised by us when such unfavorable circumstances described above exist would also likely result in smaller funds than our comparable predecessor funds. Fund investors may also seek to redeploy capital away from certain of our credit or other non-private equity investment vehicles, which permit redemptions on relatively short notice, in order to meet liquidity needs or invest in other asset classes or with other managers. Any of these developments could materially and adversely affect our future revenues, net income, cash flow, financial condition or ability to retain our employees. See "—Our inability to raise additional or successor funds (or raise successor funds of a comparable size as our predecessor funds) could have a material adverse impact on our business" and "—Our investors in future funds may negotiate to pay us lower management fees, reimburse us for fewer expenses or change the economic terms of our future funds, including with respect to transaction fees, management fees or monitoring fees, to be less favorable to us than those of our existing funds, which could materially and adversely affect our revenues or profitability."

During periods of difficult market or economic conditions or slowdowns (which may occur across one or more industries, sectors or geographies), companies in which we have invested may experience decreased revenues, financial losses, credit rating downgrades, difficulty in obtaining access to financing and increased funding costs. These companies may also have difficulty in expanding their businesses and operations or be unable to meet their debt service obligations or pay other expenses as they become due, including amounts payable to us. Negative financial results in our funds' portfolio companies may result in lower investment returns for our investment funds, which could materially and adversely affect our operating results and cash flow. To the extent the operating performance of such portfolio companies (as well as valuation multiples) deteriorate or do not improve, our funds may sell those assets at values that are less than we projected or even at a loss, thereby significantly affecting those funds' performance and consequently our operating results and cash flow and resulting in lower or no carried interest being paid to us. Adverse conditions may also increase the risk of default with respect to private equity, credit and other investments that we manage or the abandonment or foreclosure of our real asset investments. Even if economic and market conditions do improve broadly, adverse conditions in particular sectors may also cause our performance to suffer. Finally, low interest rates related to monetary stimulus, economic stagnation or deflation may negatively impact expected returns on all types of investments as the demand for relatively higher return assets increases and the supply decreases.

In addition, our capital markets business generates fees through a variety of activities in connection with the issuance and placement of equity and debt securities and credit facilities, with the size of fees generally correlated to overall transaction sizes. As a result, adverse conditions in financial markets as described above, as well as lower level of

transaction activities involving our funds' investments, which can be unpredictable and outside our control, may negatively impact both the frequency and size of fees generated by our capital markets business.

Changes in the debt financing markets may negatively impact the ability of our investment funds, their portfolio companies and strategies pursued with our balance sheet assets to obtain attractive financing for their investments or to refinance existing debt and may increase the cost of such financing or refinancing if it is obtained, which could lead to lower-yielding investments and potentially decrease our net income.

In the event that our funds are unable to obtain committed debt financing for potential acquisitions or can only obtain debt at an increased interest rate or on unfavorable terms, our funds may have difficulty completing otherwise profitable acquisitions or may generate profits that are lower than would otherwise be the case, either of which could lead to a decrease in the investment income earned by us. Any failure by lenders to provide previously committed financing can also expose us to

Table of Contents

potential claims by sellers of businesses that we may have contracted to purchase. Similarly, certain of the strategies pursued with our balance sheet assets rely on the use of leverage, including the issuance of CLOs, and other secured and unsecured borrowings. Our ability to generate returns on these assets would be reduced to the extent that changes in market conditions, including continued increase by the U.S. Federal Reserve of its benchmark interest rate, cause the cost of our financing to increase relative to the income that can be derived from the assets acquired and financed. Similarly, our portfolio companies regularly utilize the corporate debt markets in order to obtain financing for their operations. To the extent that credit markets render such financing difficult to obtain or more expensive, this may negatively impact the operating performance of those portfolio companies and, therefore, the investment returns on our funds. In addition, to the extent that conditions in the credit markets impair the ability of our portfolio companies to refinance or extend maturities on their outstanding debt, either on favorable terms or at all, the operating performance of those portfolio companies may be negatively impacted, which could impair the value of our investment in those portfolio companies and lead to a decrease in the investment income earned by us. In some cases, the inability of our portfolio companies to refinance or extend maturities may result in the inability of those companies to repay debt at maturity or pay interests when due, and may cause the companies to sell assets, undergo a recapitalization or seek bankruptcy protection, any of which would also likely impair the value of our investment and lead to a decrease in investment income earned by us.

Transition away from LIBOR as a benchmark reference for interest rates may affect the cost of capital and may require amending or restructuring existing debt instruments and related hedging arrangements for us, our investment funds and our portfolio companies, and may impact the value of floating rate securities based on LIBOR we or our investment funds hold or may hold in the future, which may result in additional costs or adversely affect our or our funds' liquidity, results of operations and financial condition.

A substantial portion of the long-term indebtedness incurred by us, our investment funds and our portfolio companies bears interest at fluctuating interest rates, primarily based on the London interbank offered rate ("LIBOR"). In July 2017, the U.K. Financial Conduct Authority (the authority that regulates LIBOR) announced that it intends to stop compelling banks to submit rates for the calculation of LIBOR after 2021. It is unclear whether new methods of calculating LIBOR will be established such that it continues to exist after 2021 and has indicated that market participants should not rely on LIBOR being available after 2021. As an alternative to LIBOR, for example, the U.S. Federal Reserve, in conjunction with the Alternative Reference Rates Committee, a steering committee comprised of large U.S. financial institutions, is considering replacing U.S.-dollar LIBOR with the Secured Overnight Financing Rate ("SOFR"), a new index calculated by short-term repurchase agreements, backed by Treasury securities. Although there have been a few issuances utilizing SOFR or the Sterling Over Night Index Average, an alternative reference rate that is based on transactions, it is unknown whether any of these alternative reference rates will attain market acceptance as replacements for LIBOR. There is currently no definitive successor reference rate to LIBOR and various industry organizations are still working to develop workable transition mechanisms. As such, it is not possible to predict all potential effects of these changes on U.S. and global credit markets. If LIBOR ceases to exist, we, our investment funds and our portfolio companies may need to amend or restructure our existing LIBOR-based debt instruments and any related hedging arrangements that extend beyond 2021, which may be difficult, costly and time consuming. In addition, from time to time our funds invest in floating rate loans and investment securities whose interest rates are indexed to LIBOR. Uncertainty as to the nature of alternative reference rates and as to potential changes or other reforms to LIBOR, or any changes announced with respect to such reforms, may result in a sudden or prolonged increase or decrease in the reported LIBOR rates and the value of LIBOR-based loans and securities, including those of other issuers we or our funds currently own or may in the future own, and may impact the availability and cost of hedging instruments and borrowings, including potentially, an increase to our and our funds' interest expense and cost of capital. Any increased costs or reduced profits as a result of the foregoing may adversely affect our liquidity, results of operations and financial condition.

We have significant liquidity requirements, and adverse market and economic conditions may adversely affect our sources of liquidity, which could adversely affect our business operations in the future.

We expect that our primary liquidity needs will consist of cash required to:

continue to grow our business lines, including seeding new strategies, funding our capital commitments made to existing and future funds, co-investments and any net capital requirements of our capital markets companies and otherwise supporting investment vehicles that we sponsor;

warehouse investments in portfolio companies or other investments for the benefit of one or more of our funds, accounts or CLOs pending the contribution of committed capital by the investors in such vehicles, and advancing capital to them for operational or other needs;

Table of Contents

service debt obligations including the payment of obligations at maturity, on interest payment dates or upon redemption, as well as any contingent liabilities that may give rise to future cash payments;

fund cash operating expenses and contingencies, including for litigation matters;

payment of additional corporate income taxes following the Conversion;

pay amounts that may become due under our tax receivable agreement with KKR Holdings;

pay cash dividends in accordance with our dividend policy for our Class A common stock or the terms of our preferred stock;

underwrite commitments, advance loan proceeds and fund syndication commitments within our capital markets business;

make future purchase price payments in connection with our proprietary acquisitions, such as our hedge fund partnership with Marshall Wace and our purchase of incremental equity interest in Corporate Capital Trust, Inc., to the extent not paid by newly issued Class A common stock;

acquire other assets for our Principal Activities business line, including our office space, other businesses, investments and assets, some of which may be required to satisfy regulatory requirements for our capital markets business or risk retention requirements for CLOs (to the extent it continues to apply); and

repurchase our Class A common stock pursuant to the share repurchase program or other securities issued by us.

These liquidity requirements are significant and, in some cases, involve capital that will remain invested for extended periods of time. As of December 31, 2018, we have approximately \$5.3 billion of remaining unfunded capital commitments to our investment funds. Our commitments to our funds will require significant cash outlays over time, and there can be no assurance that we will be able to generate sufficient cash flows from realizations of investments to fund them. We have also used our balance sheet to provide credit support to our general partner's obligations to our funds and to support certain transactions by our funds.

In addition, as of December 31, 2018, we had \$22.3 billion of indebtedness outstanding under our credit facilities and debt securities on a GAAP basis and \$3.3 billion of indebtedness outstanding under our credit facilities and debt securities on a segment basis, and \$1.8 billion of cash and cash equivalents on a GAAP basis and \$2.5 billion of cash and short-term investments on a segment basis. The segment-based measures exclude the assets and liabilities of our investment funds, CLOs and CMBS, and other consolidated entities that are not subsidiaries of KKR & Co. Inc., but include KKR Financial Holdings LLC's ("KFN") debt obligations, which as of December 31, 2018, consisted of \$948.5 million, which do not provide for recourse to KKR beyond the assets of KFN. Our \$1.0 billion corporate revolving credit facility is scheduled to mature in 2023. Depending on market conditions, we may not be able to refinance or renew all or part of these senior notes or our corporate revolving credit facility, or find alternate sources of financing (including issuing equity), on commercially reasonable terms or at all. Furthermore, the incurrence of additional debt by us or our subsidiaries in the future could result in downgrades of our existing corporate credit ratings, which could limit the availability of future financing and increase our costs of borrowing.

In addition, the underwriting commitments for our capital markets business may require significant cash obligations, and these commitments may also put pressure on our liquidity. The holding company for our capital markets business has entered into a credit agreement that provides for revolving borrowings of up to \$500 million, which can only be used in connection with our capital markets business, including placing and underwriting securities offerings, and a 364-day revolving credit agreement that provides for revolving borrowings of up to \$750 million, which can only be used to facilitate the settlement of debt transaction syndicated by our capital markets business. To the extent we commit to buy and sell an issue of securities in firm commitment underwritings or otherwise, we may be required to borrow under these revolving credit facilities to fund such obligations, which, depending on the size and timing of the obligations, may limit our ability to enter into other underwriting arrangements or similar activities, service existing debt obligations or otherwise grow our business. Further, these facilities are scheduled to mature in 2021 and 2019, respectively, and depending on the market conditions, we may not be able to refinance or renew them on commercially reasonable terms or at all. Regulatory net capital requirements may also limit the ability of our broker-dealer subsidiaries to participate in underwriting or other transactions or to allocate our capital more efficiently across our businesses.

Table of Contents

Our other liquidity requirements include potential future purchase price payments in connection with strategic partnerships with third-party hedge fund managers like Marshall Wace, based on the respective performance of these businesses or the exercise of certain options. In the fourth quarter of 2018, due to the exercise of one of the options agreed to between Marshall Wace and KKR, we acquired an additional 5.0% interest in Marshall Wace, for which we paid a combination of cash and shares of our Class A common stock. In addition, in connection with the development of a new KKR office in New York City, we will be required to pay for our acquisition of the property in 2019 and to pay for the construction of the office, which is expected to be completed in 2020.

In the event that our liquidity requirements were to exceed available liquid assets for the reasons specified above or for any other reasons, we could be forced to sell assets or seek to raise debt or equity capital on unfavorable terms. For further discussion of our liquidity needs, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity."

The "clawback" provisions in our governing agreements may give rise to a contingent obligation that may require us to return or contribute amounts to our funds and fund investors.

The partnership documents governing our carry-paying funds, including funds relating to private equity, growth equity, infrastructure, energy, real estate, special situations, private credit opportunities, direct lending, revolving credit and core investments, generally include a "clawback" provision that, if triggered, may give rise to a contingent obligation requiring the general partner to return amounts to the fund for distribution to the fund investors at the end of the life of the fund. Under a clawback obligation, upon the liquidation of a fund, the general partner is required to return, typically on an after-tax basis, previously distributed carry to the extent that, due to the diminished performance of later investments, the aggregate amount of carry distributions received by the general partner during the term of the fund exceed the amount to which the general partner was ultimately entitled, including the effects of any performance thresholds. We would continue to be subject to the clawback obligation even if carry has been distributed to current or former employees or other personnel through our carry pool, and we would be required to seek other sources of liquidity to fund such an obligation if such carry is not returned to us by them. As of December 31, 2018, no carried interest with respect to funds for which we are responsible for repayment was subject to this clawback obligation, assuming that all such carry-paying funds were liquidated at their December 31, 2018 fair values. Had the investments in such carry-paying funds been liquidated at zero value, the clawback obligation would have been \$2.0 billion.

Carry distributions may give rise to clawback obligations that may be allocated to us and our principals who participate in the carry pool. In addition, guarantees of or similar arrangements relating to clawback obligations in favor of third-party investors in an individual investment partnership by entities we own may limit distributions of carried interest more generally.

Strategic investor partnerships have longer investment periods and invest in multiple strategies, which may increase the possibility of a "netting hole," which will result in less carried interest for us, as well as clawback liabilities. We have entered into strategic partnerships with certain investors, generally through separately managed accounts, which have longer investment periods, often of 20 years or more, and provide for investments across different investment strategies (which we refer to as "strategic investor partnerships"). Compared to our traditional private equity fund structure, these partnerships may offer reduced fees for fund investors and may require netting across various funds in which they invest. Generally, if a fund's investments have fair values above cost overall, but one or more of its investments has a fair value that is below cost, the shortfall between cost and fair value for such investment (which we refer to as a "netting hole") must be "filled" by returning invested capital to such fund's limited partners in an amount equal to such shortfall before any realized gains on individual investments can be distributed to the general partner as carried interest. The longer investment period and cross-fund netting feature of the strategic investor partnerships increase the possibility of netting holes compared to our traditional private equity fund structure, which, if present, will reduce the carried interest we otherwise would earn. Similarly, the longer duration of these partnerships can increase the risk of clawback, because over a longer investment period, a period of reduced performance following periods of performance adequate to realize carried interest is more likely to occur. See "—The 'clawback' provisions in our governing agreements may give rise to a contingent obligation that may require us to

return or contribute amounts to our funds and fund investors."

Our earnings and cash flow are highly variable due to the nature of our business and we do not intend to provide earnings guidance, each of which may cause the value of interests in our business to be volatile.

Our earnings are highly variable from quarter to quarter due to the volatility of investment returns of most of our funds, other investment vehicles and our balance sheet assets and the fees earned from our businesses. We recognize earnings on investments in our funds based on our allocable share of realized and unrealized gains (or losses) reported by such funds and for certain of our recent funds, when a performance hurdle is achieved. During times of market volatility the fair value of our

Table of Contents

funds and our balance sheet assets are more variable, and as publicly traded equity securities currently represent a significant proportion of the assets of many of our funds and balance sheet assets, volatility in the equity markets may have a significant impact on our reported results. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies—Fair Value Measurements" for a discussion of the impact of equity markets on the value of private equity investments. A decline in realized or unrealized gains, a failure to achieve a performance hurdle or an increase in realized or unrealized losses, would adversely affect our net income. Fee income, which we recognize when contractually earned, can vary due to fluctuations in AUM, the number of investment transactions made by our funds, the number of portfolio companies we manage, the fee provisions contained in our funds and other investment products and transactions by our capital markets business. In any particular quarter, fee income may vary significantly due to the variances in size and frequency of monitoring fees (including termination payments), transaction fees or fees received by our capital markets business. Our total management, monitoring and transaction fees (net of fee credits) for the years ended December 31, 2018, 2017 and 2016 were \$1,569.1 million, \$1,309.0 million and \$906.0 million, respectively, on a GAAP basis, and \$1,853.9 million, \$1,502.0 million and \$1,074.9 million, respectively, on a segment basis. We may create new funds or investment products or vary the terms of our funds or investment products (for example our funds now include performance hurdles), which may alter the composition or mix of our income from time to time. In particular, in our newer private equity and other funds, we have agreed to return to our fund investors all monitoring and transaction fees generated by the fund's investments, which resulted in a decrease of our monitoring and transaction fee income. We may also experience fluctuations in our results from quarter to quarter, including our revenue and net income, due to a number of other factors, including changes in the values of our funds' investments, changes in the amount of distributions or interest earned in respect of investments, changes in our operating expenses, the degree to which we encounter competition and general market and economic conditions. In addition, our earnings and cash flows are dependent in part on the performance of KFN, a specialty finance company that we acquired in 2014, and are subject to the risks to KFN's businesses as described elsewhere in the report. Although KFN is a subsidiary of KKR, KFN has its own indebtedness outstanding. The terms of its indebtedness impose limitations on KFN's current and future operations and may restrict its ability to make distributions to KKR. For the years ended December 31, 2018, 2017 and 2016, our net income attributable to KKR & Co. Inc. Class A Common Stockholders on a GAAP basis was \$1,097.7 million, \$984.9 million and \$287.1 million, respectively, and our after-tax distributable earnings on a segment basis was \$1,597.2 million, \$1,355.6 million and \$1,341.5 million, respectively. Such fluctuations may lead to variability in the value of interests in our business and cause our results for a particular period not to be indicative of our performance in future periods. It may be difficult for us to achieve steady growth in net income and cash flow on a quarterly basis, which could in turn lead to large adverse movements in the value of interests in our business. The timing and receipt of carried interest from our investment funds are unpredictable and will contribute to the volatility of our cash flows. For example, with respect to our private equity funds, carried interest is distributed to the general partner of a private equity fund with a clawback provision only after all of the following are met: (i) a realization event has occurred (e.g., sale of a portfolio company, dividend, etc.); (ii) the fund has achieved positive overall investment returns since its inception, in excess of performance hurdles where applicable; and (iii) with respect to investments with a fair value below cost (which we refer to as a netting hole), cost has been returned to fund investors in an amount sufficient to reduce remaining cost to the investments' fair value. Carried interest payments from investments depend on our funds' performance and opportunities for realizing gains, which may be limited. It takes a substantial period of time to identify attractive investment opportunities, to raise all the funds needed to make an investment and then to realize the cash value (or other proceeds) of an investment through a sale, public offering or other exit. To the extent an investment is not profitable, no carried interest will be received from our funds with respect to that investment and, to the extent such investment remains unprofitable, we will only be entitled to a management fee on that investment. Furthermore, certain vehicles and separately managed accounts may not provide for the payment of any carried interest at all. Even if an investment proves to be profitable, it may be several years before any profits can be realized in cash. We cannot predict when, or if, any realization of investments will occur. In addition, if finance providers, such as commercial and investment banks, make it difficult for potential purchasers to

secure financing to purchase companies in our investment funds' portfolio, it may decrease potential realization events and the potential to earn carried interest. A downturn in the equity markets would also make it more difficult to exit investments by selling equity securities. If we were to have a realization event in a particular quarter, the event may have a significant impact on our cash flows during the quarter that may not be replicated in subsequent quarters. A decline in realized or unrealized gains, or an increase in realized or unrealized losses, would adversely affect our investment income, which could further increase the volatility of our quarterly results.

The timing and receipt of carried interest also vary with the life cycle of certain of our funds. Our carry-paying funds that have completed their investment periods and are able to realize mature investments, sometimes referred to as being in a "harvesting period," are more likely to make larger distributions than our carry-paying funds that are in their fund raising or investment periods that precede the harvesting period. During times when a significant portion of our AUM is attributable to carry-paying funds that are not in their harvesting periods, we may receive substantially lower carried interest distributions.

Table of Contents

In addition, we have formed strategic partnerships with third-party hedge fund managers in which KKR owns a minority stake (which we refer to as "hedge fund partnerships"). These third-party hedge fund managers offer a variety of investment strategies, including hedge fund-of-funds, equity hedge funds and credit hedge funds. As a result, we are indirectly exposed to the volatility and fluctuations in financial results of these hedge fund managers. For example, certain funds managed by the hedge fund managers have "high-water mark" provisions whereby if the funds have experienced losses in prior periods, the fund managers will not be able to earn incentive fees with respect to a fund investor's account until the net asset value of the fund investor's account exceeds the highest period end value on which incentive fees were previously paid. The incentive fees the hedge fund managers earn are therefore dependent on the net asset value of these funds, which could add to volatility in our quarterly results and cash flow. A decline in the pace or size of investment by our funds would result in our receiving less revenue from fees. The transaction and management or monitoring fees that we earn are driven in part by the pace at which our funds make investments and the size of those investments. Any decline in that pace or the size of investments would reduce our revenue from transaction and management or monitoring fees. Likewise, during an attractive selling environment, our funds may capitalize on increased opportunities to exit investments. Any increase in the pace at which our funds exit investments, if not offset by new commitments and investments, would reduce future management fees. Additionally, in certain of our funds that derive management fees only on the basis of invested capital, the pace at which we make investments, the length of time we hold such investment and the timing of disposition will directly impact our revenues. Many factors could cause such a decline in the pace of investment or the transaction and management or monitoring fees we receive, including:

- the inability of our investment professionals to identify attractive investment opportunities;
- competition for such opportunities among other potential acquirers;
- unfavorable market and economic conditions;
- decreased availability of capital or financing on attractive terms;
- our failure to consummate identified investment opportunities because of business, regulatory or legal complexities and adverse developments in the U.S. or global economy or financial markets;
- terms we may agree with or provide to our fund investors or investors in separately managed accounts with respect to fees such as increasing the percentage of transaction or other fees we may share with our fund investors; and
- new regulations, guidance or other actions provided or taken by regulatory authorities.

Our inability to raise additional or successor funds (or raise successor funds of a comparable size as our predecessor funds) could have a material adverse impact on our business.

Our current private equity funds and certain other funds and investment vehicles have a finite life and a finite amount of commitments from fund investors. Once a fund nears the end of its investment period, our success depends on our ability to raise additional or successor funds in order to keep making investments and, over the long term, earning management fees (although our funds and investment vehicles continue to earn management fees after the expiration of their investment periods, they are generally at a reduced rate). Even if we are successful in raising successor funds, to the extent we are unable to raise successor funds of a comparable size to our predecessor funds or the extent that we are delayed in raising such successor funds, our revenues may decrease as the investment period of our predecessor funds expire and associated fees decrease. For example, European Fund IV was smaller than its predecessor fund and North America Fund XI was smaller than its predecessor fund. The performance of our funds also impacts our ability to raise capital, and deterioration in the performance of our funds would result in challenges to future fundraising. The evolving preferences of our fund investors may necessitate that alternatives to the traditional investment fund structure, such as separately managed accounts, smaller funds and co-investment vehicles, become a larger part of our business going forward. This could increase our cost of raising capital at the scale we have historically achieved. Furthermore, in order to raise capital for new strategies and products without drawing capital away from our existing products, we will need to seek new sources of capital such as individual investors.

Our ability to raise new funds could also be hampered if the general appeal of private equity and alternative investments were to decline. An investment in a limited partner interest in a private equity fund is less liquid than an exchange traded instrument and the returns on such investment may be more volatile than an investment in securities

for which there is a more active and transparent market. Private equity and alternative investments could fall into disfavor as a result of concerns about

38

Table of Contents

liquidity and short-term performance. Institutional investors in private equity funds that have suffered from decreasing returns, liquidity pressure, increased volatility or difficulty maintaining target asset allocations may materially decrease or temporarily suspend making new investments in private equity funds. Such concerns could be exhibited, in particular, by public pension funds, which have historically been among the largest investors in alternative assets. Many public pension funds are significantly underfunded and their funding problems have been, and may in the future be, exacerbated by economic downturn. Concerns with liquidity could cause such public pension funds to reevaluate the appropriateness of alternative investments, and other institutional investors may reduce their overall portfolio allocations to alternative investments. This could result in a smaller overall pool of available capital in our industry. There is no assurance that the amount of commitments investors are making to alternative investment funds will continue at recent levels or that our ability to raise capital from investors will not be hampered.

In addition, the asset allocation rules or regulations or investment policies to which such third-party investors are subject could inhibit or restrict the ability of third-party investors to make investments in our investment funds. Coupled with a lack of distributions from their existing investment portfolios, many of these investors may have been left with disproportionately outsized remaining commitments to, and invested capital in, a number of investment funds, which may significantly limit their ability to make new commitments to third-party managed investment funds such as those advised by us.

Fund investors may also seek to redeploy capital away from certain of our credit or other non-private equity investment vehicles, which permit redemptions on relatively short notice in order to meet liquidity needs or invest in other asset classes. We believe that our ability to avoid excessive redemption levels primarily depends on our funds' continued satisfactory performance, although redemptions may also be driven by other factors important to our fund investors, including their need for liquidity and compliance with investment mandates, even if our performance is superior. Investors' liquidity needs tend to be more pronounced during periods of market volatility. Any such redemptions would decrease our AUM and revenues.

In addition, the Dodd Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), under what has become known as the "Volcker Rule," broadly prohibits depository institution holding companies (including foreign banks with U.S. branches, agencies or commercial lending companies and certain insurance companies), insured depository institutions and their subsidiaries and controlled affiliates, or "banking entities," from investing in "covered funds," including third-party private equity funds like ours. As a result, banking entities, subject to certain limited exemptions, had to conform their existing covered fund investments and relationships to the Volcker Rule, and will be limited in their ability to undertake new contractual commitments to private equity funds like ours. In addition to federal law, changes in state and local law may limit investment activities of state pension plans and insurance companies.

The number of funds raising capital varies from year to year, and in years where relatively few funds are raising capital, the growth of our AUM, FPAUM and associated fees may be significantly lower. There is no assurance that fundraises for new strategies or successor funds will experience similar success as our existing or predecessor funds in the future.

Our investors in future funds may negotiate to pay us lower management fees, reimburse us for fewer expenses or change the economic terms of our future funds, including with respect to transaction fees, management fees or monitoring fees, to be less favorable to us than those of our existing funds, which could materially and adversely affect our revenues or profitability.

In connection with raising new funds or securing additional investments in existing funds, we negotiate terms for such funds and investments with our fund limited partners. The outcome of such negotiations could result in our agreement to terms that are materially less favorable to us than the terms of prior funds we have advised or funds advised by our competitors. Such terms could restrict our ability to raise investment funds with investment objectives or strategies that compete with existing funds, reduce fee revenues we earn, reduce the percentage of profits on third-party capital in which we share, increase the performance hurdle required to be generated on investment prior to our right to receive carried interest, add expenses and obligations for us in managing the fund or increase our potential liabilities. Furthermore, as institutional investors increasingly consolidate their relationships with investment firms and

competition becomes more acute, we may receive more requests to modify the terms in our new funds. Certain of our newer funds also include more favorable terms for fund investors that commit to early closes for our funds.

Additionally, in certain funds, we have agreed to charge management fees based on invested capital or net asset value as opposed to charging management fees based on committed capital. In certain cases, we have provided "fee holidays" to certain investors during which we do not charge management fees for a fixed period of time (such as the first six months). Agreement to terms that are materially less favorable to us could result in a material decrease in our profitability.

Certain institutional investors have also publicly criticized certain fund fee and expense structures, including monitoring fees and transaction fees. We have received and expect to continue to receive requests from a variety of fund investors and

Table of Contents

groups representing such investors to decrease fees and to modify our carried interest and incentive fee structures, which could result in a reduction or delay in the timing of receipt of the fees and carried interest and incentive fees we earn. The SEC has focused on certain fund fees and expenses, including whether such fees and expenses were appropriately disclosed to fund limited partners, and such focus may lead to increased publicity that could cause fund investors to further resist our receipt of certain fees and expense reimbursements. In our recent flagship private equity funds, we have increased the percentage of transaction and monitoring fees that are credited against fund management fees to 100% of the amount of the transaction and monitoring fees attributable to that fund.

In addition, certain institutional investors, including sovereign wealth funds and public pension funds, have demonstrated an increased preference for alternatives to the traditional investment fund structure, such as separately managed accounts, specialized funds and co-investment vehicles. We also have entered into strategic investor partnerships with specific investors whereby we manage that investor's capital across a variety of our products on separately negotiated terms. There can be no assurance that such alternatives will be as profitable to us as the traditional investment fund structure, and the impact such a trend could have on our results of operations, if widely implemented, is unclear. Moreover, certain institutional investors are demonstrating a preference to in-source their own investment professionals and to make direct investments in alternative assets without the assistance of investment advisers like us. Such institutional investors may become our competitors and could cease to be our clients. Any agreement to or changes in terms less favorable to us could materially and adversely affect our revenues and profitability.

The investment management business is intensely competitive, which could have a material adverse impact on our business.

We compete as an investment manager for both fund investors and investment opportunities. The investment management business is highly fragmented, with our competitors consisting primarily of sponsors of public and private investment funds, real estate development companies, BDCs, investment banks, commercial finance companies and operating companies acting as strategic buyers of businesses. We believe that competition for fund investors is based primarily on:

- investment performance;
- investor liquidity and willingness to invest;
- investor perception of investment managers' drive, focus and alignment of interest;
- business reputation;
 - the duration of relationships with fund investors;
- the quality of services provided to fund investors;
- pricing;
- fund terms (including fees); and
- the relative attractiveness of the types of investments that have been or will be made.

We believe that competition for investment opportunities is based primarily on the pricing, terms and structure of a proposed investment and certainty of execution.

A number of factors serve to increase our competitive risks:

- a number of our competitors in some of our businesses may have greater financial, technical, marketing and other resources and more personnel than we do, and, in the case of some asset classes or geographic regions, longer operating histories, more established relationships, greater expertise or better reputation;
- fund investors may materially decrease their allocations in new funds due to their experiences following an economic downturn, the limited availability of capital, regulatory requirements or a desire to consolidate their relationships with investment firms;

Table of Contents

some of our competitors may have agreed to terms on their investment funds or products that are more favorable to fund investors than our funds or products, such as lower management fees, greater fee sharing or higher performance hurdles for carried interest, and therefore we may be forced to match or otherwise revise our terms to be less favorable to us than they have been in the past;

some of our funds may not perform as well as competitors' funds or other available investment products;

our competitors have raised or may raise significant amounts of capital, and many of them have similar investment objectives and strategies to our funds, which may create additional competition for investment opportunities and may reduce the size and duration of pricing inefficiencies that many alternative investment strategies seek to exploit;

some of these competitors may also have a lower cost of capital and access to funding sources that are not available to us, which may create competitive disadvantages for us with respect to investment opportunities;

some of our competitors may have higher risk tolerances, different risk assessments or lower return thresholds, which could allow them to consider a wider variety of investments and to bid more aggressively than us for investments;

some of our competitors may be subject to less regulation or less regulatory scrutiny and accordingly may have more flexibility to undertake and execute certain businesses or investments than we do and/or bear less expense to comply with such regulations than we do;

there are relatively few barriers to entry impeding the formation of new funds, including a relatively low cost of entering these businesses, and the successful efforts of new entrants into our various lines of business, including major commercial and investment banks and other financial institutions, have resulted in increased competition;

some fund investors may prefer to invest with an investment manager that is not publicly traded, is smaller or manages fewer investment products; and

other industry participants will from time to time seek to recruit our investment professionals and other employees away from us.

We may lose investment opportunities in the future if we do not match investment prices, structures and terms offered by competitors. Our competitors that are corporate buyers may be able to achieve synergistic cost savings in respect of an investment, which may provide them with a competitive advantage in bidding for an investment. Alternatively, we may experience decreased investment returns and increased risks of loss if we match investment prices, structures and terms offered by competitors. Moreover, as a result, if we are forced to compete with other investment firms on the basis of price, we may not be able to maintain our current fund fee, carried interest or other terms. There is a risk that fees and carried interest in the alternative investment management industry will decline, without regard to the historical performance of a manager. Fee or carried interest income reductions on existing or future funds, without corresponding decreases in our cost structure, could materially and adversely affect our revenues and profitability. In addition, if interest rates were to rise or if market conditions for competing investment products become or are more favorable and such products begin to offer rates of return superior to those achieved by our funds, the attractiveness of our funds relative to investments in other investment products could decrease. This competitive pressure could materially and adversely affect our ability to make successful investments and limit our ability to raise future funds, either of which would adversely impact our business, results of operations and cash flow.

Changes in relevant tax laws, regulations or treaties or an adverse interpretation of these items by tax authorities could adversely impact our effective tax rate and tax liability.

Our effective tax rate and tax liability is based on the application of current income tax laws, regulations and treaties. These laws, regulations and treaties are complex, and the manner which they apply to us and our funds is sometimes open to interpretation. Significant management judgment is required in determining our provision for income taxes, our deferred tax assets and liabilities and any valuation allowance recorded against our net deferred tax assets.

Although management believes its application of current laws, regulations and treaties to be correct and sustainable upon examination by the tax authorities, the tax authorities could challenge our interpretation resulting in additional tax liability or adjustment to our income tax provision that could increase our effective tax rate. Regarding the impact of the Conversion on our income taxes, see Item 8. Financial Statements and Supplementary Data—Note 11 "Income Taxes."

In addition, tax laws, regulations or treaties newly enacted or enacted in the future may cause us to revalue our net deferred tax assets and have a material change to our effective tax rate and tax liabilities. For example, the Tax Cuts and Jobs Act, which

Table of Contents

was enacted in December 2017 and amended various aspects of U.S. federal income tax legislation (the "2017 Tax Act"), has resulted in various changes to U.S. tax laws, including meaningful reduction to the U.S. federal corporate income tax rate and a partial limitation on the deductibility of business interest expense, which could have a material effect on our business operations and our funds' investment activities. These and other changes from the 2017 Tax Act, including the changes to the carryback and carryforward of net operating losses, U.S. taxation on earnings from international business operations and certain modifications to the Section 162(m) of the Code, could also have a significant effect on the business of our portfolio companies. Additionally, foreign and state and local governments may enact tax laws in response to the 2017 Tax Act that could result in further changes to foreign and state and local taxation and materially affect our financial position and results of operations.

The U.S. Congress, the Organization for Economic Co-operation and Development (the "OECD") and other government agencies in jurisdictions in which we and our affiliates invest or do business have maintained a focus on issues related to the taxation of multinational companies, such as KKR. The OECD has made changes to numerous long-standing tax principles through its base erosion and profit shifting ("BEPS") project, which looks at various different ways in which domestic tax rules around the world, and the bilateral double tax treaties that govern the interplay between them, could be amended to address perceived profit shifting among affiliated entities. Several of the proposed measures, including measures covering treaty abuse (including an anti-abuse "principal purpose" test that would deny treaty benefits to the extent that obtaining such benefit was one of the principal purposes of any arrangement or transaction that resulted directly or indirectly in such benefit), the deductibility of interest expense, local nexus requirements, transfer pricing and hybrid mismatch arrangements are potentially relevant to some of our structures and could have an adverse tax impact on our funds, investors and/or our portfolio companies. Some member countries have been moving forward on the BEPS agenda but, because timing of implementation and the specific measures adopted will vary among participating states, significant uncertainty remains regarding the impact of BEPS proposals. If implemented, these and other proposals could result in a loss of tax treaty benefits and increased taxes on income from our investments.

We depend on our founders and other key personnel, the loss of whose services could have a material adverse effect on our business, results of operations and financial condition.

We depend on the efforts, skills, reputations and business contacts of our employees, including our founders, Henry Kravis and George Roberts, and other key personnel, the information and deal flow they and others generate during the normal course of their activities and the synergies among the diverse fields of expertise and knowledge held by our professionals. Accordingly, our success depends on the continued service of these individuals, who are not obligated to remain employed with us. The loss of the services of any of them could have a material adverse effect on our revenues, net income and cash flows and could harm our ability to maintain or grow AUM in existing funds or raise additional funds in the future.

Our employees and other key personnel possess substantial experience and expertise and have strong business relationships with investors in our funds and other members of the business community. As a result, the loss of these personnel could jeopardize our relationships with investors in our funds and members of the business community and result in the reduction of AUM or fewer investment opportunities. For example, if any of our key personnel were to join or form a competing firm, our business, results of operations and financial condition could suffer.

Furthermore, the agreements governing our committed capital funds generally provide that in the event certain "key persons" (for example, investment professionals who are named as "key executives" for certain geographically or product focused funds) cease to actively manage a fund or be substantially involved in KKR activities, investors in the fund will be entitled to reduce, in whole or in part, their capital commitments available for further investments on an investor-by-investor basis. In the case of certain of our fully paid-up funds, investors may be permitted to terminate their investment in the event a "key persons" provision is triggered, which could possibly lead to a liquidation of those funds. In addition, the occurrence of such a "key person" event could cause us to agree to less favorable ongoing terms with respect to the affected fund. Although we periodically engage in discussions with the limited partners of our funds regarding a waiver of such provisions with respect to executives involved in geographically or product focused funds whose departures have occurred or are anticipated, such waiver is not guaranteed, and our limited partners'

refusal to provide a waiver may have a material adverse effect on our revenue, net income and cash flow. If we cannot retain and motivate our employees and other key personnel and recruit, retain and motivate new employees and other key personnel, our business, results of operations and financial condition could be materially and adversely affected.

Our most important asset is our people, and our continued success is highly dependent upon the efforts of our employees and other key personnel, and to a substantial degree on our ability to retain and motivate our employees and other key personnel and to strategically recruit, retain and motivate new talented employees, including qualified investment professionals. However, we may not be successful in these efforts as the market for talented and qualified candidates is extremely competitive. Our ability to recruit, retain and motivate our employees is dependent on our ability to offer highly attractive incentive

Table of Contents

opportunities. Under the 2017 Tax Act, investments must be held for more than three years, rather than the prior requirement of more than one year, for carried interest to be treated for U.S. federal income tax purposes as capital gain. The longer holding period requirement may result in some of our carried interest being treated as ordinary income, which would materially increase the amount of taxes that our employees and other key personnel would be required to pay, thereby adversely affecting our ability to offer attractive incentive opportunities. In addition, following the 2017 Tax Act, the tax treatment of carried interest may continue to be an area of focus for policymakers and government officials, which could result in a further regulatory action by federal or state governments. For example, certain states, including New York and California, have proposed legislation to levy additional state tax on carried interest, which may also negatively affect our ability to attract and retain employees and key personnel. Similarly, changes in the United Kingdom with respect to the taxation of carried interest, including the treatment of certain carried interest returns as income, which became effective from April 6, 2016, may impact our ability to recruit, retain and motivate employees and key personnel in the United Kingdom. In addition, there have been proposed laws and regulations that sought to regulate the compensation of certain of our employees. See "—Extensive regulation of our business affects our activities and creates the potential for significant liabilities and penalties. The possibility of increased regulatory focus or legislative or regulatory changes could materially and adversely affect our business." The loss of even a small number of our investment professionals could jeopardize the performance of our funds and other investment products, which would have a material adverse effect on our results of operations. Efforts to retain or attract employees, including our investment professionals, may result in significant additional expenses, which could materially and adversely affect our profitability.

Many of our employees hold interests in our business through KKR Holdings. These individuals historically received financial benefits from our business in the form of distributions and amounts funded by KKR Holdings and through their direct and indirect participation in the value of KKR Group Partnership Units held by KKR Holdings. While all of our employees receive base salaries from us, annual cash bonuses for certain employees were historically borne by KKR Holdings from its cash reserves based upon distributions on a portion of KKR Group Partnership Units held by KKR Holdings. However, substantially all units in KKR Holdings have been allocated to certain employees and non-employee operating consultants, and upon their vesting, distributions on vested units would belong to such unitholders and not be available to fund annual cash bonuses. In addition, under its dividend policy, KKR intends to make equal quarterly dividends to holders of its Class A common stock in a fixed amount per share per quarter. In 2018, no annual cash bonuses were borne by KKR Holdings. Although KKR Holdings may fund a portion of the cash bonus payments from its cash reserves, if any, in future periods, we likely will continue to utilize our own funds for most, if not all, of the cash bonus payments. In that event, either our profit margins or our employee retention or both may be adversely impacted. There can be no assurance that the carry pool will have sufficient cash available to continue to make such cash payments in the future and fluctuations from the distributions generated from the carry pool, if not offset by funds from other sources, including other performance-based income, could render our compensation less attractive. In any of these circumstances, a higher percentage of our revenue would be paid out in the form of cash compensation, which could have a material adverse impact on our profit margins. Currently 40% or 43%, as applicable, of the carried interest earned from our investment funds is allocated to our carry pool. We are not permitted under our certificate of incorporation to increase the percentage of carried interest allocable to the carry pool without the consent of a majority of our independent directors.

We have granted equity awards from our Equity Incentive Plan and expect to grant equity awards from our New Equity Incentive Plan, which has caused and will cause dilution. If we increase the use of equity awards in the future, expense associated with equity-based compensation may increase materially. For example, in connection with compensation in 2018, we allocated equity awards relating to 5.5 million shares of Class A common stock under our Equity Incentive Plan and KKR Holdings granted 0.5 million KKR Holdings units to certain senior employees. These KKR Holdings awards were granted from outstanding but previously unallocated units of KKR Holdings, and consequently these grants did not increase the number of KKR Holdings units outstanding or outstanding shares of KKR Class A common stock on a fully-diluted basis. The value of our Class A common stock may drop in value or be volatile, which may make our equity less attractive to our employees.

In July 2015, the SEC proposed rules, as mandated by the Dodd-Frank Act, requiring companies to develop and enforce recovery policies that in the event of an accounting restatement, "claw back" from current and former executive officers incentive-based compensation they would not have received based on the restatement. In April and May 2016, the SEC also issued for public comment revised proposed rules designed to prohibit certain incentive-based compensation arrangements deemed to encourage inappropriate risk taking by covered financial institutions by providing "excessive" compensation, fees or benefits or that could lead to material losses. To date, however, the SEC has not adopted the proposed rules. Depending on the outcome of the rule making process, the application of these rules to us could require us to substantially revise our compensation strategy, increase our compensation and other costs, and materially and adversely affect our ability to recruit and retain qualified employees. In addition, less carried interest from the carry pool may be allocated to certain of our employees, which may result in less cash payments to such employees. To the extent our equity incentive or carry pool programs are not effective, we may be limited in our ability to attract, retain and motivate talented employees and other key personnel and we may need to increase the level of cash compensation that we pay.

Table of Contents

In addition, there is no guarantee that the confidentiality and restrictive covenant agreements to which our employees and other key personnel are subject, together with our other arrangements with them, will prevent them from leaving us, joining our competitors or otherwise competing with us. Depending on which entity is a party to these agreements and/or the laws applicable to them, we may not be able to, or may choose not to, enforce them or become subject to lawsuits or other claims, and certain of these agreements might be waived, modified or amended at any time without our consent. Even when enforceable, these agreements expire after a certain period of time, at which point each of our employees and other key personnel are free to compete against us and solicit our fund investors and employees. See "Certain Relationships and Related Transactions, and Director Independence—Confidentiality and Restrictive Covenant Agreements."

We strive to maintain a work environment that reinforces our culture of collaboration, motivation and alignment of interests with fund investors. If we do not continue to develop and implement the right processes and tools to manage our changing enterprise and maintain our culture, our ability to compete successfully and achieve our business objectives could be impaired, which could materially and adversely affect our business, results of operations and financial condition.

Operational risks and data security breaches may disrupt our businesses, result in losses or limit our growth.

We rely heavily on our financial, accounting and other data processing systems and on the systems of third parties who provide services to us. If any of these systems do not operate properly or are disabled, we could suffer financial loss, a disruption of our businesses, liability to our funds, regulatory intervention or reputational damage. In addition, we operate in businesses that are highly dependent on information systems and technology. For example, we face operational risk from errors made in the execution, confirmation or settlement of transactions. We also face operational risk from transactions not being properly recorded, evaluated or accounted for in our funds. In particular, our Public Markets business line is highly dependent on our ability to process and evaluate, on a daily basis, transactions across markets and geographies in a time-sensitive, efficient and accurate manner. Our and our third-party service providers' information systems and technology may not continue to be able to accommodate our growth, may not be suitable for new products and strategies and may be subject to security risks, and the cost of maintaining such systems and technology may increase from our current level. Such a failure to accommodate growth, or an increase in costs related to such information systems and technology, could have a material adverse effect on our business. Furthermore, most of our administrative personnel and our information system and technology infrastructure are located in our New York City office, and any disruption in the operation of, or inability to access, our New York City office could have a significant impact on our business. We are also dependent on an increasingly concentrated group of third-party vendors that we do not control for hosting solutions and technologies. A disaster or a disruption in technology or infrastructure that supports our businesses, including a disruption involving electronic communications or other services used by us, our vendors or third parties with whom we conduct business, or directly affecting our principal offices, could have a material adverse impact on our ability to continue to operate our business without interruption. Our business continuation or disaster recovery programs may not be sufficient to mitigate the harm that may result from such a disaster or disruption. In addition, insurance and other safeguards might only partially reimburse us for our losses, if at all.

Our operations rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. We face various security threats on a regular basis, including ongoing cyber-security threats to and attacks on our information technology infrastructure that are intended to gain access to our proprietary information, destroy data or disable, degrade or sabotage our systems. Although we take protective measures and endeavor to modify them as circumstances warrant, our computer systems, software and networks may be vulnerable to unauthorized access, theft, misuse, computer viruses or other malicious code, and other events that could have a security impact. We may be exposed to a more significant risk if these acts are taken by state actors. We and our employees have been and expect to continue to be the target of fraudulent calls and emails, and the subject of impersonations and fraudulent requests for money, and other forms of activities. The costs related to cyber or other security threats or disruptions may not be fully insured or indemnified by other means. In addition, cyber-security has become a top priority for regulators around the world. Many jurisdictions in which we operate have laws and

regulations relating to data privacy, cyber-security and protection of personal information, including the General Data Protection Regulation in the European Union that became effective in May 2018. Some jurisdictions have also enacted laws requiring companies to notify individuals of data security breaches involving certain types of personal data. Breaches in security could potentially jeopardize our, our employees' or our fund investors' or counterparties' confidential and other information processed and stored in, and transmitted through, our computer systems and networks, or otherwise cause interruptions or malfunctions in our, our employees', our fund investors', our counterparties' or third parties' operations, which could result in significant losses, increased costs, disruption of our business, liability to our fund investors and other counterparties, regulatory intervention or reputational damage. Furthermore, if we experience a cyber-security incident and fail to comply with the relevant laws and regulations, it could result in regulatory investigations and penalties, which could lead to negative publicity and may cause our fund investors and clients to lose confidence in the effectiveness of our security measures. Finally, we rely on third-party service providers for certain aspects of our business, including for certain information systems, legal services, technology, administration, tax and compliance matters. These third-party service providers could also

Table of Contents

experience any of the above cyber-security threats, fraudulent activities or security breaches, and as a result, unauthorized individuals could improperly gain access to our confidential data. Any interruption or deterioration in the performance of these third parties or cyber-security incidents involving these third parties could impair the quality of our and our funds' operations and could impact our reputation and materially and adversely affect our businesses and limit our ability to grow.

Our portfolio companies also rely on data processing systems and the secure processing, storage and transmission of information, including payment and health information. A disruption or compromise of these systems could have a material adverse effect on the value of these businesses. Our funds may invest in strategic assets having a national or regional profile or in infrastructure, the nature of which could expose them to a greater risk of being subject to a terrorist attack or security breach than other assets or businesses. Such an event may have material adverse consequences on our investment or assets of the same type or may require portfolio companies to increase preventative security measures or expand insurance coverage.

Our organizational documents do not limit our ability to enter into new lines of businesses, and we may expand into new investment strategies, geographic markets and businesses, each of which may result in additional risks and uncertainties in our businesses.

We intend, to the extent that market conditions warrant, to seek to grow our businesses by increasing AUM in existing businesses, pursuing new investment strategies (including investment opportunities in new asset classes), developing new types of investment structures and products (such as separately managed accounts and structured products), and expanding into new geographic markets and businesses. We have in the past opened offices in Asia and the Middle East, and also developed a capital markets business in the United States, Europe, the Middle East and Asia-Pacific, which we intend to grow and diversify. We have also launched a number of new investment initiatives in areas such as real estate, energy, infrastructure, growth equity and core investments. Introducing new types of investment structures and products could increase the complexities involved in managing such investments, including to ensure compliance with regulatory requirements and terms of the investment. See "—We may not be successful in executing upon or managing the complexities of new investment strategies, markets and businesses, which could adversely affect our business, results of operations and financial condition."

Our organic growth strategy focuses on providing resources to foster the development of new product offerings and business strategies by our investment professionals and launching successor and related products, such that our new strategies achieve a level of scale and profitability. Given our diverse platform, these initiatives could create conflicts of interests with existing products, increase our costs and expose us to new market risks, and legal and regulatory requirements. The success of our organic growth strategy will also depend on, among other things, our ability to correctly identify and create products that appeal to the limited partners of our funds and vehicles. While we have made significant expenditures to develop these new strategies and products, there is no assurance that they will achieve a satisfactory level of scale and profitability. To raise new funds and pursue new strategies, we have and expect to continue to use our balance sheet to warehouse seed investments, which may decrease the liquidity available for other parts of our business. If a new strategy or fund does not develop as anticipated and such investments are not ultimately transferred to a fund, we may be forced to realize losses on these retained investments.

We have and may continue to pursue growth through acquisitions of other investment management companies, acquisitions of critical business partners, strategic partnerships or other strategic initiatives, which may include entering into new lines of business. In addition, we expect opportunities will arise to acquire other alternative or traditional investment managers. For example, we have expanded our European credit business with our acquisition of Avoca in 2014. We have also made minority investments in hedge fund managers, and we have entered into joint ventures with third parties to participate in new real estate investment strategies. On April 2018, we completed our transaction to form FS/KKR Advisor, a strategic BDC partnership with FS Investments, to provide investment advisory services to BDCs previously advised by us and FS Investments. To the extent we make strategic investments or acquisitions, undertake other strategic initiatives or enter into a new line of business, we will face numerous risks and uncertainties, including risks associated with:

our ability to successfully negotiate and enter into beneficial arrangements with our counterparties;
the required investment of capital and other resources;
the incurrence of substantial transaction-related costs including non-recurring transaction-related costs;
delays or failure to complete an acquisition or other transaction in a timely manner or at all due to a failure to obtain
shareholder or regulatory approvals or satisfy any other closing conditions, which may subject us to damages or
require us to pay significant costs;

45

Table of Contents

lawsuits challenging an acquisition or unfavorable judgments in such lawsuits, which may prevent the closing of the transaction, cause delays, or require us to incur substantial costs including in costs associated with the indemnification of directors;

the possibility that we have insufficient expertise to engage in such activities profitably or without incurring inappropriate amounts of risk or liability or have not appropriately planned for such activities;

the possibility of diversion of management's time and attention from our core business;

the possibility of disruption of our ongoing business;

the failure to realize the anticipated benefits from an acquired business or strategic partnership in a timely manner, if at all;

combining, integrating or developing operational and management systems and controls including an acquired business's internal controls and procedures;

integration of the businesses including the employees of an acquired business;

potential increase in concentration of the investors in our funds;

disagreements with joint venture partners or other stakeholders in strategic partnerships;

- the additional business risks of the acquired business and the broadening of our geographic footprint, including the risks associated with conducting operations in foreign jurisdictions such as taxation;

properly managing conflicts of interests;

our ability to obtain requisite regulatory approvals and licenses without undue cost or delay and without being

required to comply with material restrictions or material conditions that would be detrimental to us or to the combined organization; and

regulatory scrutiny or litigation exposure due to the activities of the acquired business, hedge fund partners or joint venture partners.

Entry into new strategies or certain lines of business may subject us to new laws and regulations with which we are not familiar, or from which we are currently exempt, and may lead to increased litigation and regulatory risk and costs. If a new business generates insufficient revenues or if we are unable to efficiently manage our expanded operations, our results of operations will be adversely affected. Our strategic initiatives include joint ventures or the acquisition of minority interests in third parties, in which case we will be subject to additional risks and uncertainties in that we may be dependent upon, and subject to liability, losses or reputational damage relating to, systems, controls and personnel that are not under our control.

We may not be successful in executing upon or managing the complexities of new investment strategies, markets and businesses, which could adversely affect our business, results of operations and financial condition.

Our growth strategy is based, in part, on the expansion of our platform through selective investment in, and development or acquisition of, businesses and investment strategies complementary to our business. The expansion into new products and geographies has demanded greater management attention and dedication of resources to manage the increasing complexity of operations and regulatory compliance. This growth strategy involves a number of risks, including the risk that: the expected synergies from a newly developed product or strategic alliance will not be realized; the expected results will not be achieved; new strategies are not appropriately planned for or integrated into the firm; the new strategies may conflict, detract from or compete against our existing businesses; the investment process, controls and procedures that we have developed around our existing platform will prove insufficient or inadequate; or our information systems and technology, including related security systems, may prove to be inadequate. We have also entered into strategic investor partnerships and established separately managed accounts, which lack the scale of our traditional funds and are more costly to administer. The prevalence of these accounts may also present conflicts and introduce complexity in the deployment of capital. The offering of investment products to retail investors, including any funds registered under the Investment Company Act, our BDCs and KREF, may result in increased compliance and litigation costs. We may also incur significant charges in connection with such investments, which ultimately may result in significant losses and costs. Such losses could adversely impact our business, results of operations and financial condition, as well as harm our professional reputation.

Table of Contents

If we are unable to syndicate the securities or indebtedness or realize returns on investments financed with our balance sheet assets, our liquidity, business, results of operations and financial condition could be materially and adversely affected.

Our balance sheet assets provide us with a significant source of capital to grow and expand our business, increase our participation in our transactions and underwrite commitments in our capital markets business. We have used our balance sheet assets to underwrite loans, securities or other financial instruments, which we generally expect to syndicate to third parties. We also entered into an arrangement with a third party that reduces our risk associated with holding unsold securities when underwriting certain debt transactions, which enables our capital markets business to underwrite a larger amount. To the extent that we are unable to syndicate our commitments to third parties or our risk reduction arrangement does not fully perform as anticipated, we may be required to sell such investments at a significant loss or hold them indefinitely. If we are required to retain investments on our balance sheet for an extended period of time, our results would be directly impacted by the performance of such investments and it would also impair our capital markets business' ability to complete additional transactions, either of which could materially and adversely affect our business, results of operations and financial condition.

We generally have a larger balance sheet than many of our competitors, and consequently, the performance of these balance sheet assets has a greater impact on our results of operations. Our success in deploying our balance sheet assets and generating returns on this capital will depend, among other things, on the availability of suitable opportunities after giving priority in investment opportunities to our advised investment funds, the level of competition from other companies that may have greater financial resources and our ability to value potential development or acquisition opportunities accurately and negotiate acceptable terms for those opportunities. To the extent we are unsuccessful in deploying our balance sheet assets, our business and financial results may suffer. In addition, as our balance sheet assets have been a significant source of capital for new strategies, to the extent that such strategies are not successful or our balance sheet assets cease to provide adequate liquidity, we would be limited in our ability to seed new businesses or support our existing business as effectively as contemplated. See "—We may not be successful in executing upon or managing the complexities of new investment strategies, markets and businesses, which could adversely affect our business, results of operations and financial condition."

Extensive regulation of our businesses affects our activities and creates the potential for significant liabilities and penalties. The possibility of increased regulatory focus or legislative or regulatory changes could materially and adversely affect our business.

Our business is subject to extensive regulation, including periodic examinations, inquiries and investigations by governmental and self-regulatory organizations in the jurisdictions in which we operate around the world. Many of these regulators, including U.S. federal and state and foreign government agencies and self-regulatory organizations, are empowered to impose fines, suspensions of personnel or other sanctions, including censure, the issuance of cease-and-desist orders or the suspension or expulsion of applicable licenses and memberships. Any of the foregoing may damage our relationships with existing fund investors, impair our ability to raise capital for successor funds, impair our ability to carry out certain investment strategies, or contravene provisions concerning compliance with law in agreements to which we are a party. Even if a sanction is not imposed or the sanction imposed against us or our personnel by a regulator were small in monetary amount, the adverse publicity relating to the regulatory activity or imposition of these sanctions could harm our reputation and cause us to lose existing fund investors or fail to gain new fund investors.

In addition, actions by regulators against other investment managers can cause changes in business practices that could materially and adversely affect our business, results of operations and financial condition. In recent years, the private equity industry has come under increased regulatory and news media scrutiny with governmental officials and regulators, including the SEC, focusing on the private equity industry's fees, allocation of expenses to funds, valuation practices, allocation of fund investment opportunities, particularly co-investment opportunities, and disclosures to fund investors. In recent years, the SEC's focus areas included, among others, the acceleration of monitoring fees, the allocation of broken-deal expenses, the disclosure, use and compensation of operating partners or consultants, outside business activities of firm principals and employees, group purchasing arrangements, disclosure of affiliated service

providers, general conflicts of interest disclosures, electronic messaging, cyber-security, data privacy and protection, foreign bribery and corruption, and policies covering insider trading, business continuity and transition planning. While it is unclear whether the SEC will continue its pursuit of these or other focus areas, the SEC's examination and enforcement program continues generally to focus on the alternative investment management industry in which we operate.

Any changes or potential changes in the regulatory framework applicable to our business, including the changes and potential changes described below, as well as adverse news media attention, may: impose additional expenses or capital requirements on us; limit our fundraising for our investment products; result in limitations in the manner in which our business is conducted; have an adverse impact upon our results of operations, financial condition, reputation or prospects; impair employee retention or recruitment; and require substantial attention by senior management. It is impossible to determine the extent of the impact of any new laws, regulations, initiatives or regulatory guidance that may be proposed or may become law

Table of Contents

on our business or the markets in which we operate. If enacted, any new law, regulation, initiatives or regulatory guidance could negatively impact our funds and us in a number of ways, including: increasing our costs and the cost for our funds of investing, borrowing, hedging or operating; increasing the funds' or our regulatory operating costs; imposing additional burdens on the funds' or our staff; and potentially requiring the disclosure of sensitive information. In addition, we may be materially and adversely affected by changes in the interpretation or enforcement of existing laws and rules by these governmental authorities and self-regulatory organizations. New laws, regulations, initiatives or regulatory guidance could make compliance more difficult or more expensive, affect the manner in which we conduct business and divert significant management and operational resources and attention from our business. Moreover, an increase in regulatory investigations and new or enhanced reporting requirements of the trading and other investment activities of alternative investment management funds and firms, including our funds and us, is possible. Such investigations and reporting requirements could impose additional expenses on us, require the attention of senior management, increase the complexity of managing our business, or result in fines or other sanctions if we or any of our funds are deemed to have violated any law or regulations.

Recent and Potential Regulatory Changes in the United States. In recent years, there have been a number of changes in the regulatory framework applicable to our business, including those required under the Dodd-Frank Act. These changes have, among other things: increased regulatory scrutiny of our industry; increased our recordkeeping, reporting and disclosure requirements; and placed restrictions on the growth or type of activities certain financial institutions may pursue. In addition, under the prior administration, regulatory agencies proposed several regulations that, if adopted as proposed, may increase our compliance costs and affect our profitability in various ways. Although the current administration is not presently pursuing all of these proposed regulatory actions, it or future administrations could redirect their attention to these or other areas at any time. We discuss below several recent or potential regulatory changes that may further impact our business.

Financial Stability Oversight Council ("FSOC"). Established under the Dodd-Frank Act, the FSOC is an inter-agency body charged with, among other things, designating systemically important nonbank financial companies for heightened prudential supervision and making recommendations regarding the imposition of enhanced regulatory standards regarding capital, leverage, conflicts and other requirements for financial firms deemed to pose a systemic threat to U.S. financial stability. The FSOC applies a three-stage review process to determine whether to designate a nonbank financial company as systemically important, with the level of scrutiny increasing at each stage. During the first stage, the FSOC applies a broad set of uniform quantitative metrics to identify nonbank financial companies that warrant additional review. In this first stage, the FSOC considers whether a nonbank financial company has at least \$50 billion in total consolidated assets and whether it meets other thresholds relating to credit default swaps ("CDS") outstanding, derivative liabilities, loans and bonds outstanding, a minimum leverage ratio of total consolidated assets to total equity of 15 to 1, and a short-term debt ratio of debt (with maturities less than 12 months) to total consolidated assets of 10%. A company that meets both the asset test and at least one of the other thresholds will be subject to additional review in Stage 2. There is little guidance that specifically addresses the FSOC's method of calculating the relevant thresholds. It is possible that the FSOC could determine that we have \$50 billion or more in total consolidated assets and that we satisfy one or more of the other Stage 1 criteria outlined above. Additional uncertainty is created because the FSOC retains authority to designate any nonbank financial company as systemically important, even if the company does not meet the Stage 1 criteria. Historically, the FSOC focused on potential systemic risks arising from asset management products and activities. It is unclear whether the FSOC will continue to focus on this area. More recently, the FSOC has discussed the potential adoption of an "activities-based approach for monitoring and addressing potential risks to U.S. financial stability," although no formal action has yet been taken to modify its interpretive guidance on nonbank financial company designations. Similarly, in a report issued on November 17, 2017, the U.S. Treasury Department recommended that the FSOC adopt an "activities-based or industry-wide approach," under which the FSOC would (1) review potential risks to financial stability arising from "activities and products," (2) work with relevant regulators to address any such risk identified by the FSOC, and (3) consider individual firms for designation only after consultation with relevant regulators. If the FSOC were to designate us as a systemically important nonbank financial company, we would become subject to supervision by the U.S. Federal

Reserve and a heightened degree of regulation, including more stringent standards relating to capital, leverage, liquidity, risk management, resolution planning, credit exposure reporting and concentration limits, restrictions on acquisitions, and annual stress testing by the U.S. Federal Reserve. There can be no assurance that nonbank financial firms such as us will not become subject to the aforementioned restrictions or other requirements for financial firms deemed to be systemically important to the financial stability of the U.S. economy.

On December 18, 2014, the FSOC issued a notice seeking public comment on potential systemic risks from asset management products and activities, focusing in particular on (1) liquidity and redemption risks, (2) use of leverage, (3) operational functions and (4) resolution-related issues. On November 16, 2016, the FSOC reiterated its focus on these risk areas, as well as securities lending, in a public statement on its review of asset management products and activities. According to the notice and statement, the FSOC has not made any final determination regarding the existence or nature of any potential risks to financial stability posed by the asset management industry.

Table of Contents

Regulation of Swaps. As mandated by the Dodd-Frank Act, the Commodity Futures Trading Commission (the "CFTC") has proposed or adopted a series of rules to establish a comprehensive new regulatory framework for swaps. Under Title VII of the Dodd-Frank Act, the CFTC has assumed regulatory authority over many types of swaps. As a result:

Operating pooled funds that trade swaps, or providing investment advice to clients that trade swaps is a basis for registration with the CFTC, absent an applicable exemption. Although not mandated by the Dodd-Frank Act, the CFTC in 2012 issued a final rule that rescinded an exemption from CFTC registration for commodity pool operators in connection with privately offered funds. Operating our funds in a manner consistent with one or more exemptions from registration with the CFTC may limit the activities of certain of our funds, and monitoring and analysis of these exemptions requires management and operational resources and attention. Registration with the CFTC, if required, could impact our operations and add additional costs associated with ongoing compliance.

The Dodd-Frank Act also imposes regulatory requirements on the trading of swaps, including requirements that most swaps be executed on an exchange or "swap execution facility" and cleared through a central clearing house. Although these requirements presently apply only to certain classes of interest rate swaps and CDS, the CFTC may mandate central execution and clearing with respect to additional classes of swaps in the future.

CFTC regulations employ quantitative tests and thresholds to determine whether entities are "swap dealers" or "major swap participants" that must register in the appropriate category and comply with capital, margin, record keeping, reporting and business conduct rules. Our funds could become subject to the requirement to register as major swap participants due to changes to the funds' investment strategy or valuations, or revisions to the thresholds for registration.

On December 5, 2016, the CFTC re-proposed rules instituting position limits on certain physical commodity futures contracts that, if finalized as proposed, would limit positions in futures contracts on 25 agricultural, energy and metals commodities, including swaps and options that are economically equivalent to those commodity futures contracts. On the same day, the CFTC finalized rules updating and restating its requirement that commonly owned and commonly controlled accounts and entities aggregate positions, absent an exemption, for position limit purposes. While these final aggregation rules currently expressly apply only to agricultural products for CFTC purposes, the CFTC may determine to expand them, and registered futures exchanges currently apply essentially identical rules to cover oil and gas and other commodities. If the proposed position limits rules are adopted in substantially the form proposed and if the aggregation rules are applied by the CFTC or the exchanges in a way such that we do not qualify for an exemption, we could be required to aggregate the positions of our various investment funds and the positions of our portfolio companies for which we control trading, which in turn may require us and our portfolio companies to limit our trading activities, and impact the ability of our investment funds to invest or remain invested in certain derivatives, or engage in otherwise profitable acquisitions in particular industries. The Dodd-Frank Act also requires the SEC to establish position limits on security-based swaps, which rules could have a similar impact on our business. The CFTC and banking regulators have adopted, and the SEC has proposed, rules regarding margin and capital requirements for most uncleared or "over-the-counter" swaps. These rules generally require swap dealers and major swap participants to collect and post a minimum amount of margin when trading with other covered entities and financial end-users. These requirements could increase the cost of trading in the derivative markets, which could in turn make it more expensive and difficult for us or our funds to enter into swaps and other derivatives in the normal course of our business and reduce the effectiveness of the funds' and our investment strategies. In certain cases, using non-deliverable forward transactions to hedge non-deliverable currencies such as the Indian rupee, South Korean won, Malaysian ringgit and Indonesian rupiah may be cost prohibitive or impractical to execute, because of the margin requirements or capital reserve required to be held against potential derivative liabilities. These rules could also adversely impact liquidity in derivatives markets, which could expose our funds and us to greater risks and reduce hedging opportunities in connection with their trading activities. Variation margin requirements for uncleared swaps became effective in 2017, and initial margin requirements for uncleared swaps are expected to be phased in through 2020, depending on the aggregate notional amount of over-the-counter swaps traded by the funds and us.

In September 2016, the U.S. Federal Reserve issued for public comment a proposed rule that, if adopted as proposed, would impose significant capital and other prudential requirements on the physical commodities activities of certain banking organizations. The implementation of these or other new regulations could increase the cost of trading in the commodities and derivative markets, which could in turn make it more expensive and difficult for us or our funds to enter into swaps and other derivatives in the normal course of our business. Moreover, these increased regulatory responsibilities and increased costs could reduce trading levels in the commodities and derivative markets by a number of market participants, which could in turn adversely impact liquidity in the markets and expose our funds to greater risks in connection with their trading activities.

Table of Contents

Other Regulations under the Dodd-Frank Act. The Dodd-Frank Act amended the Exchange Act to compensate and protect whistleblowers who voluntarily provide original information to the SEC and establishes a fund to be used to pay whistleblowers who will be entitled to receive a payment equal to between 10% and 30% of certain monetary sanctions imposed in a successful government action resulting from the information provided by the whistleblower. The CFTC has adopted a similar whistleblower program. In addition, in October 2011, the SEC adopted a rule requiring certain advisers to private funds to periodically file reports on Form PF, as required under the Dodd-Frank Act. Large private fund advisers including advisers with at least \$1.5 billion in assets under management attributable to hedge funds and advisers with at least \$2 billion in assets under management attributable to private equity funds are subject to more detailed and in certain cases more frequent reporting requirements. The information is to be used by the FSOC in monitoring risks to the U.S. financial system. These regulations increase our compliance costs and could result in adverse regulatory actions against us.

Although it is possible that Congress or the current administration could modify and relax regulatory requirements and restrictions that were adopted in response to the financial crisis, the timing and scope of such modifications remain uncertain and may not materialize.

EU-Wide Regulations. The EU Alternative Investment Fund Managers Directive (the "AIFMD"), which became effective on July 22, 2013, established a comprehensive regulatory and supervisory framework for alternative investment fund managers ("AIFMs") managing or marketing alternative investment funds ("AIFs") in the European Union. The AIFMD imposes various substantive regulatory requirements on AIFMs, which could have a material adverse effect on our businesses by (i) imposing disclosure obligations and restrictions on distributions by EU portfolio companies, (ii) requiring changes to our compensation structures for key personnel, thereby potentially affecting our ability to recruit and retain these personnel, (iii) increasing the cost and complexity of raising capital for our funds, which may slow the pace of fundraising, and (iv) generally increasing our compliance costs. In addition, there are areas of the AIFMD that are subject to legal uncertainty, including the scope of the legal structures qualifying as AIFs subject to AIFMD. Failure to comply with AIFMD, even in areas where there is legal uncertainty, can result in enforcement action, including, but not limited to, fines.

Although a subsidiary of ours is registered as an AIFM with the Central Bank of Ireland, we may not be able to benefit from an "EU passport" under the AIFMD to market all of our funds to professional investors throughout the European Union, and the EU marketing passport may not apply to marketing to investors in the United Kingdom when its withdrawal from the European Union becomes effective. See "—Brexit" below.

The AIFMD is currently subject to a legislative review by the European Commission. It is not clear at this time what changes to the AIFMD, if any, may be implemented and what impact any such changes would have on our business. In July 2014, revisions to the Markets in Financial Instruments Directive (known as "MiFID I"), consisting of the revised directive, "MiFID II," and a new related regulation, "MiFIR," came into force. MiFID II and MiFIR began applying to our European operations since January 2018. MiFID II and MiFIR introduced a number of new requirements for providing investment services and trading financial instruments in regards to transaction reporting, transparency, market infrastructure, securities and derivatives trading, and conduct of business rules, including new harmonized rules for authorization of EU branches of third-country firms seeking to provide certain investment services in the European Union. The application of MiFID II and MiFIR increased regulatory burdens on a number of our subsidiaries, which could result in increased costs, and any failure to comply with the requirements, even in areas where there is legal uncertainty, could result in enforcement action, including, but not limited to, fines.

In July 2016, the Market Abuse Regulation (known as "MAR") became effective. Under MAR, certain of our European subsidiaries are required to, among other things, implement systems and controls regarding inside information, follow record keeping and other prescribed procedures for market soundings, and provide conflicts of interest and other relevant disclosure when providing investment recommendations. These requirements may increase the regulatory and compliance burden for a number of our European subsidiaries, which could result in increased costs, and any failure to comply with the requirements could result in enforcement action, including, but not limited to, fines.

In the European Union, credit institutions and certain investment firms are subject to the provisions of the Capital Requirements Directive IV ("CRD IV") and the Capital Requirements Regulation. These pieces of legislation implement the capital and liquidity standards promulgated by the Basel Committee on Banking Supervision (commonly referred to as "Basel III"), and impose various governance and remuneration obligations. CRD IV has enhanced our financial reporting obligations and subjected us to new reporting requirements, which increases costs and the risk of non-compliance. Compliance with Basel III may result in significant costs to banking organizations, which, in turn, could result in higher borrowing costs for us and our portfolio companies, and may reduce access to certain types of credit.

Table of Contents

Three of our subsidiaries (established in the UK and Ireland) are subject to the remuneration-related requirements of CRD IV, as well as similar requirements under the AIFMD. Additionally, the European Banking Authority has published final guidelines on sound remuneration policies under CRD IV which set out the requirements for remuneration policies, group application and proportionality, along with criteria for the allocation of remuneration as fixed and variable and details on the disclosures required under the Capital Requirements Regulation. These measures required changes in our compensation structures for key personnel, thereby potentially affecting these subsidiaries' ability to recruit and retain these personnel.

Other EU bank regulatory initiatives that could result in higher borrowing costs for us and our portfolio companies or reduce access to certain types of credit include the European Banking Authority's guidelines on limits to exposures to shadow banking entities which carry out banking activities outside a regulated framework under EU law (including funds employing leverage on a substantial basis, within the meaning of AIFMD and its implementing rules, and credit funds), which entered into force on January 1, 2017, and guidelines on leveraged lending, proposed in November 2016 and modeled on U.S. leveraged lending guidelines.

In August 2012, the regulation on OTC Derivatives, Central Counterparties and Trade Repositories (also known as the European Market Infrastructure Regulation, or "EMIR") became effective. EMIR applies to derivatives transactions in which one of the parties is established in the European Union, and may in some circumstances apply to transactions between two non-EU counterparties where these contracts have a direct, substantial and foreseeable effect within the European Union. The European Commission adopted an equivalence decision for the United States in March 2016. However, ongoing regulatory uncertainty regarding the interaction between U.S. and EU requirements for central clearing and related activities could result in duplicative regulatory obligations in the two jurisdictions and could increase our costs of compliance. The implementation of any new regulations could increase the cost of trading in the commodities and derivative markets, which could in turn make it more expensive and difficult for us or our funds to enter into swaps and other derivatives in the normal course of our business. Moreover, these increased regulatory responsibilities and increased costs could reduce trading levels in the commodities and derivative markets by a number of market participants, which could in turn adversely impact liquidity in the markets and expose our funds to greater risks in connection with their trading activities.

A number of other EU financial regulatory initiatives have the potential to materially and adversely affect our business. For example, the new Securitisation Regulation that became effective in 2019 established requirements for, among other things, due diligence, risk retention and disclosure regarding certain of our European investments, subsidiaries and CLOs. Also, future acquisitions by KKR or our funds could lead to application of the European Union's Financial Conglomerates Directive, which establishes a prudential regime for financial conglomerates to address perceived risks associated with large cross-sector businesses, and could increase the costs of investing in insurance companies, investment firms and banks located in the European Union. Other EU financial regulatory initiatives such as the Short Selling Regulation, which limits naked short selling of sovereign bonds and stocks, the Bank Recovery and Resolution Directive, which established a recovery and resolution framework for EU credit institutions and investment firms, and a new regulation on reporting and transparency of securities financing transactions, which requires all such transactions to be reported to trade repositories, places additional reporting requirements on investment managers and introduces prior risk disclosures and written consent before assets are rehypothecated, may all impact the complexity and cost of conducting our business in the European Union. The European Union has adopted, and may in the future adopt, additional risk retention and due diligence requirements in respect of various types of EU-regulated investors that, among other things, restrict investors from taking positions in securitization, increase the capital costs of originator, sponsor or original lender of a securitization, and require retaining a larger net economic interest in the securitization, which may adversely affect the profitability of us, our funds or our CLOs and the leveraged loan market generally. The implementation of these new requirements could increase our and our funds' or CLOs' costs and the complexity of managing our business and could result in fines if we or any of our funds or CLOs were deemed to have violated any of the new regulations.

The General Data Protection Regulation, which became effective in May 2018, imposes stringent data protection requirements and provides for significant penalties for noncompliance. Any inability, or perceived inability, to

adequately address privacy and data protection concerns, or comply with applicable laws, regulations, policies, industry standards, contractual obligations, or other legal obligations, even if unfounded, could result in additional cost and liability and could damage our reputation and materially and adversely affect our business.

Brexit. On March 29, 2017, the government of the United Kingdom made a formal notification to the European Council under Article 50 of the Treaty of the European Union, which triggered a two-year period during which the terms of the United Kingdom's exit from the European Union, commonly known as "Brexit," were negotiated. The U.K. government's draft agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union was defeated in the House of Commons on January 15, 2019. As a result, the final terms of the United Kingdom's exit from the European Union are, and will remain for the immediate future, unclear. The United Kingdom may leave the European Union

Table of Contents

without any agreement as to the terms of its withdrawal or the future economic relationship between the United Kingdom and the European Union (a so-called "No Deal" Brexit). It is also possible that the United Kingdom will withdraw its notification to leave the European Union or that there will be a second referendum on Brexit. The resulting legal and regulatory uncertainty in this regard may impact our business in a number of ways, not all of which are currently readily apparent, with the materiality of any risks dependent in large part on actions to be taken by the United Kingdom and the European Union. This uncertainty may adversely affect our ability to source investments and the value of our investments that are located in the United Kingdom, or those that conduct business in or derive revenues from, the United Kingdom. Following Brexit, our subsidiaries that are authorized and regulated by the U.K. Financial Conduct Authority may no longer be able to avail themselves of passporting rights to provide services in other EU Member States, while our Central Bank of Ireland-authorized alternative investment fund manager may no longer benefit from the EU marketing passport to market products to investors in the United Kingdom. While we have sought to take protective measures to allow us to continue to conduct our business in both the United Kingdom and the European Union, Brexit may increase our cost of raising capital, underwriting and distributing securities and conducting business generally and interfere with our ability to market our products and provide our services. Changes in regulation may also impair our ability to recruit, retain and motivate new employees and retain key employees. The United Kingdom's exit could also lead to instability in the European Union, including potential withdrawal by other Member States, which would greatly amplify the adverse events described in this paragraph.

Other Regulations of the Financial Markets. Certain requirements imposed by regulators are designed primarily to ensure the integrity of the financial markets and are not designed to protect holders of interests in our business or our funds. Consequently, these regulations often serve to limit our activities. In addition to many of the regulations and proposed regulations described above under "—Recent and Potential Regulatory Changes in the United States" and "—EU-Wide Regulations," U.S. federal bank regulatory agencies and the European Central Bank have issued leveraged lending guidance covering transactions characterized by a degree of financial leverage, although in the United States, the status of this guidance is uncertain as the U.S. Government Accountability Office determined, in October 2017, that the guidance is subject to review under the Congressional Review Act. If applied by the U.S. federal bank regulatory agencies in its current form, such guidance would limit the amount or availability of debt financing available to borrowers and may increase the cost of financing we are able to obtain for our transactions and may cause the returns on our investments to suffer.

In 2016, the SEC proposed a rule that would require registered investment advisers to adopt and implement written business continuity plans and transition plans based upon the particular risks associated with the individual adviser's operations and address several specified factors. Under the current administration, there is some uncertainty as to whether the proposed rule will be adopted as proposed or at all. While it remains to be seen what the final rule, if adopted, will require, compliance with such a rule may impose additional costs on us.

In April 2018, the SEC proposed a rule that would require a broker-dealer, or a natural person who is an associated person of a broker-dealer, to act in the best interest of a retail customer when making a recommendation of any securities transaction or investment strategy involving securities, without placing the financial or other interest of the broker, dealer or natural person who is an associated person of a broker-dealer making the recommendation ahead of the interest of the retail customer. The term "retail customer" is defined in the proposal as a person (including an entity) who uses such a recommendation primarily for personal, family or household purposes, without reference to investor sophistication or net worth. The "best interest" standard would be satisfied through compliance with certain disclosure, duty of care, and conflict of interest mitigation obligations. While it is unclear whether the proposed rule will be adopted in its current form or at all, if adopted, compliance with such a rule will impose additional costs to us, in particular with respect to our product offerings and investment platforms that include retail investors.

Certain of the funds we manage that engage in originating, lending and/or servicing loans, may consider investments that would subject us to state and federal regulation, borrower disclosure requirements, limits on fees and interest rates on some loans, state lender licensing requirements and other regulatory requirements in the conduct of their business. If our funds make these investments, they may also be subject to consumer disclosures and substantive requirements

on consumer loan terms and other federal regulatory requirements applicable to consumer lending that are administered by the Consumer Financial Protection Bureau. These state and federal regulatory programs are designed to protect borrowers.

State and federal regulators and other governmental entities have authority to bring administrative enforcement actions or litigation to enforce compliance with applicable lending or consumer protection laws, with remedies that can include fines and monetary penalties, restitution of borrowers, injunctions to conform to law, or limitation or revocation of licenses and other remedies and penalties. In addition, lenders and servicers may be subject to litigation brought by or on behalf of borrowers for violations of laws or unfair or deceptive practices. If we enter into transactions that subject us to these risks, failure to conform to applicable regulatory and legal requirements could be costly and have a detrimental impact on certain of our funds and ultimately on us

Table of Contents

Portfolio Company Legal and Regulatory Environment. We are subject to certain laws, such as certain environmental laws, takeover laws, anti-bribery, trade sanctions, trade control, anti-money laundering and anti-corruption laws, escheat or abandoned property laws, antitrust laws and data privacy and data protection laws that may impose requirements on us and our portfolio companies as an affiliated group. As a result, we could become jointly and severally liable for all or part of fines imposed on our portfolio companies or be fined directly for violations committed by portfolio companies, and such fines imposed directly on us could be greater than those imposed on the portfolio company. Moreover, portfolio companies may seek to hold us responsible if any fine imposed on them is increased because of their membership in a larger group of affiliated companies. For example, on April 2, 2014, the European Commission announced that it had fined 11 producers of underground and submarine high voltage power cables a total of 302 million euro for participation in a ten-year market and customer sharing cartel. Fines were also imposed on parent companies of the producers involved, including Goldman Sachs, the former parent company of one of the cartel members. Similarly, on February 16, 2018, the U.S. Department of Justice named a private equity sponsor as a co-defendant in a False Claims Act case against one of its portfolio companies, alleging that the private equity sponsor had an active involvement in managing the company and in developing its strategy to use illegal kickback payments to increase reimbursements. In addition, compliance with certain laws or contracts could also require us to commit significant resources and capital towards information gathering and monitoring thereby increasing our operating costs. For example, because we may indirectly hold voting securities in public utilities subject to regulation by the Federal Energy Regulatory Commission ("FERC"), including entities that may hold FERC authorization to charge market-based rates for sales of wholesale power and energy, we may be subject to certain FERC regulations, including regulations requiring us and our portfolio companies to collect, report and keep updated substantial information concerning our ownership of such voting interests and voting interests in other related energy companies, corporate officers, and our direct and indirect investment in such utilities and related companies. Such rules may subject our portfolio companies and us to costly and burdensome data collection and reporting requirements.

In the United States, certain statutes may subject us or our funds to the liabilities of our portfolio companies. The Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), also referred to as the "Superfund," requires cleanup of sites from which there has been a release or threatened release of hazardous substances, and authorizes the U.S. Environmental Protection Agency to take any necessary response action at Superfund sites, including ordering potentially responsible parties liable for the release to pay for such actions. Potentially responsible parties are broadly defined under CERCLA and could include us.

In addition, we or certain of our investment funds could potentially be held liable under U.S. Employee Retirement Income Security Act of 1974 ("ERISA") for the pension obligations of one or more of our portfolio companies if we or the investment fund were determined to be a "trade or business" under ERISA and deemed part of the same "controlled group" as the portfolio company under such rules, and the pension obligations of any particular portfolio company could be material. On March 28, 2016, a Federal District Court judge in Massachusetts ruled that two private equity funds affiliated with Sun Capital were jointly and severally responsible for unfunded pension liabilities of a Sun Capital portfolio company. While neither fund held more than an 80% ownership interest of the portfolio company, the percentage required under existing regulations to find liability, the court found the funds had formed a partnership-in-fact conducting a trade or business and that as a result each fund was jointly and severally liable for the portfolio company's unfunded pension liabilities. If the rationale of this decision were to be applied by other courts, we or certain of our investment funds could be held liable under ERISA for certain pension obligations of portfolio companies. In addition, if the rationale of this decision were expanded to apply also for U.S. federal income tax purposes, then certain of our investors could be subject to increased U.S. income tax liability or filing obligations in certain contexts. Similar laws that could be applied with similar results also exist outside of the United States. Similarly, our portfolio companies may be subject to contractual obligations which may impose obligations or restrictions on their affiliates. The interpretation of such contractual provisions will depend on local laws. Given that we do not control all of our portfolio companies and that our portfolio companies generally operate independently of each other, there is a risk that we could contravene one or more of such laws, regulations and contractual

arrangements due to limited access and opportunities to monitor compliance. In addition, compliance with these laws or contracts could require us to commit significant resources and capital towards information gathering and monitoring thereby increasing our operating costs.

Complex regulations may limit our ability to raise capital, increase the costs of our capital raising activities and may subject us to penalties.

We regularly rely on exemptions in the United States from various requirements of the Securities Act, the Exchange Act, the Investment Company Act, the Commodity Exchange Act and ERISA in conducting our investment management activities. These exemptions are sometimes highly complex and may in certain circumstances depend on compliance by third parties whom we do not control. If for any reason these exemptions were to become unavailable to us, we could become subject to additional restrictive and costly registration requirements, regulatory action or third-party claims and our business could be

Table of Contents

materially and adversely affected. For example, in raising new funds, we typically rely on private placement exemptions from registration under the Securities Act, including Rule 506 of Regulation D. However, Rule 506 becomes unavailable to issuers (including our funds) if the issuer or any of its "covered persons" (certain officers and directors and also certain third parties including, among others, promoters, placement agents and beneficial owners of 20% of outstanding voting securities of the issuer) has been the subject of a "disqualifying event," which includes a variety of criminal, regulatory and civil matters (so-called "bad actor" disqualification). If our funds or any of the covered persons associated with our funds is subject to a disqualifying event, one or more of our funds could lose the ability to raise capital in a Rule 506 private offering for a significant period of time, which could significantly impair our ability to raise new funds, and, therefore, could materially and adversely affect our business, results of operations and financial condition. In addition, if certain of our employees or any potential significant investor has been the subject of a disqualifying event, we could be required to reassign or terminate such an employee or we could be required to refuse the investment of such an investor, which could impair our relationships with investors, harm our reputation or make it more difficult to raise new funds. See "—Risks Related to Our Organizational Structure—If we were deemed to be an 'investment company' subject to regulation under the Investment Company Act, applicable restrictions could make it impractical for us to continue our business as contemplated and could have a material adverse effect on our business."

We are and will become further subject to additional regulatory and compliance burdens as we expand our product offerings and investment platform to include retail investors. For example, funds in our Public Markets business line are registered under the Investment Company Act as investment companies. These funds and KKR Credit Advisors (US) LLC, which currently serves as their investment adviser, are subject to the Investment Company Act and the rules thereunder, which, among other things, regulate the relationship between a registered investment company and its investment adviser and prohibit or severely restrict principal transactions and joint transactions. On April 2018, we completed our transaction to form FS/KKR Advisor, a strategic BDC partnership with FS Investments, to provide investment advisory services to BDCs previously advised by us and FS Investments. BDCs are subject to certain restrictions and prohibitions under the Investment Company Act. If any of the BDCs advised by FS/KKR Advisor fails to meet the requirements for a BDC, it may be regulated as a closed-end investment company under the Investment Company Act and become subject to substantially more regulatory restrictions, which could limit its operating flexibility and in turn result in decreased profitability for FS/KKR Advisor. As our business expands we may be required to make additional registrations under the Investment Company Act or similar laws, including in jurisdictions outside the United States. Compliance with these rules will increase our compliance costs and create potential for additional liabilities and penalties the management of which would divert management's attention from our business and investments.

Rule 206(4)-5 under the Investment Advisers Act regulates "pay to play" practices by investment advisers involving campaign contributions and other payments to elected officials or candidates for political office who are able to exert influence on government clients. Among other restrictions, the rule prohibits investment advisers from providing advisory services for compensation to a government client for two years, subject to very limited exceptions, after the investment adviser, its senior executives or its personnel involved in soliciting investments from government entities make contributions to certain candidates and officials in position to influence the hiring of an investment adviser by such government client. Advisers are required to implement compliance policies designed, among other matters, to track contributions by certain of the adviser's employees and engagements of third parties that solicit government entities and to keep certain records in order to enable the SEC to determine compliance with the rule. There has also been similar rule-making on a state-level regarding "pay to play" practices by investment advisers, including in California and New York. FINRA has released its own set of "pay to play" regulations that effectively prohibit the receipt of compensation from state or local government agencies for solicitation and distribution activities within two years of a prohibited contribution by a broker-dealer or one of its covered associates. Any failure on our part to comply with these rules could cause us to lose compensation for our advisory services or expose us to significant penalties and reputational damage.

Federal, state and foreign anti-corruption and trade sanctions laws applicable to us and our portfolio companies create the potential for significant liabilities and penalties and reputational harm.

We are subject to a number of laws and regulations governing payments and contributions to political persons or other third parties, including restrictions imposed by the Foreign Corrupt Practices Act ("FCPA"), as well as trade sanctions and trade control laws administered by the Office of Foreign Assets Control ("OFAC"), the U.S. Department of Commerce and the U.S. Department of State. The FCPA is intended to prohibit bribery of foreign governments and their officials and political parties, and requires public companies in the United States to keep books and records that accurately and fairly reflect those companies' transactions. OFAC, the U.S. Department of Commerce and the U.S. Department of State administer and enforce various trade control laws and regulations, including economic and trade sanctions based on U.S. foreign policy and national security goals against targeted foreign states, organizations and individuals. These laws and regulations implicate a number of aspects of our business, including servicing existing fund investors, finding new fund investors, and sourcing new investments, as well as

Table of Contents

activities by the portfolio companies in our investment portfolio or other controlled investments. Some of these regulations provide that penalties can be imposed on us for the conduct of a portfolio company, even if we have not ourselves violated any regulation.

The Iran Threat Reduction and Syrian Human Rights Act of 2012 ("ITRA") expanded the scope of U.S. sanctions against Iran and requires public reporting companies to disclose in their annual or quarterly reports certain dealings or transactions the company or its affiliates "knowingly" engaged in during the previous reporting period involving Iran or other individuals and entities targeted by certain OFAC sanctions. In some cases, ITRA requires companies to disclose these types of dealings or transactions even if they are permissible under U.S. law or are conducted outside of the United States by a foreign affiliate. If any such activities are disclosed in a periodic report, we are required to separately file, concurrently with such report, a notice of such disclosure. The SEC is required to post this notice on its website and send the report to the U.S. President and certain U.S. Congressional committees. The U.S. President thereafter is required to initiate an investigation and, within 180 days of initiating such an investigation, to determine whether sanctions should be imposed. Disclosure of such activity, even if such activity is not subject to sanctions under applicable law, and any sanctions actually imposed on us or our affiliates as a result of these activities, could harm our reputation and have a negative impact on our business.

Similar laws in non-U.S. jurisdictions, such as EU sanctions or the U.K. Bribery Act, as well as other applicable anti-bribery, anti-corruption, anti-money laundering, or sanction or other export control laws in the United States and abroad, may also impose stricter or more onerous requirements than the FCPA, OFAC, the U.S. Department of Commerce and the U.S. Department of State, and implementing them may disrupt our business or cause us to incur significantly more costs to comply with those laws. Different laws may also contain conflicting provisions, making compliance with all laws more difficult. If we fail to comply with these laws and regulations, we could be exposed to claims for damages, civil or criminal financial penalties, reputational harm, incarceration of our employees, restrictions on our operations and other liabilities, which could materially and adversely affect our business, results of operations and financial condition. In addition, we may be subject to successor liability for FCPA violations or other acts of bribery, or violations of applicable sanctions or other export control laws committed by companies in which we or our funds invest or which we or our funds acquire.

We face significant liabilities and damage to our professional reputation as a result of litigation allegations and negative publicity.

The activities of our businesses, including the investment decisions we make and the activities of our employees in connection with our portfolio companies, may subject us and them to the risk of litigation by third parties, including fund investors dissatisfied with the performance or management of our funds, holders of our or our portfolio companies' debt or equity, and a variety of other potential litigants. See Item 8. Financial Statements and Supplementary Data—Note 18 "Commitments and Contingencies—Litigation." For example, we, our funds and certain of our employees are each exposed to the risks of litigation relating to investment activities of our funds and actions taken by the officers and directors (some of whom may be KKR employees) of portfolio companies, such as lawsuits by other shareholders of our public portfolio companies or holders of debt instruments of companies in which our funds have significant investments. We are also exposed to risks of litigation, investigation or negative publicity in the event of any transactions that are alleged not to have been properly considered and approved under applicable law. Although investors in our funds do not have legal remedies against us, the general partners of our funds, our funds, our employees or our affiliates solely based on their dissatisfaction with the investment performance of those funds, such investor may have remedies against us, the general partners of our funds, our funds, our employees or our affiliates to the extent any losses result from fraud, negligence, willful misconduct or other similar misconduct. While the general partners and investment advisers to our investment funds, including their directors, officers, employees and affiliates, are generally indemnified to the fullest extent permitted by law with respect to their conduct in connection with the management of the business and affairs of our investment funds, such indemnity generally does not extend to actions determined to have involved fraud, gross negligence, willful misconduct or other similar misconduct. If any civil or criminal lawsuits were brought against us and resulted in a finding of substantial legal liability or culpability, the lawsuit could materially and adversely affect our business, results of operations and

financial condition or cause significant reputational harm to us, which could seriously impact our business. Furthermore, the current rise of populist political movements could result in negative public sentiment toward globalization, free trade, capitalism and financial institutions, which may lead to heightened scrutiny and criticisms of our business and our investments. The risk of reputational harm is elevated by the prevalence of Internet and social media usage and the increased public focus on behaviors and externalities of business activities. We depend to a large extent on our business relationships and our reputation for integrity and high-caliber professional services to attract and retain fund investors and qualified professionals and to pursue investment opportunities for our funds. As a result, allegations of improper conduct by private litigants or regulators, whether the ultimate outcome is favorable or unfavorable to us, as well as negative publicity and

Table of Contents

press speculation about us, our investment activities or the private equity industry in general, whether or not valid, may harm our reputation, which may be more damaging to our business than to other types of businesses.

With a workforce composed of many highly-paid professionals, we face the risk of litigation relating to claims for compensation or other damages, which may, individually or in the aggregate, be significant in amount. The cost of settling any such claims could negatively impact our business, results of operations and financial condition.

Certain types of investment vehicles may subject us to additional risk of litigation and regulatory scrutiny.

We have formed and may continue to form investment vehicles seeking investment from retail investors, which may subject us to additional risk of litigation and regulatory scrutiny. See "—Extensive regulation of our businesses affects our activities and creates the potential for significant liabilities and penalties. The possibility of increased regulatory focus or legislative or regulatory changes could materially and adversely affect our business." We have and expect to continue to distribute products through new channels, including through unaffiliated firms, and we may not be able to effectively monitor or control the manner of their distribution, which could result in litigation against us, including with respect to, among other things, claims that products distributed through such channels are distributed to customers for whom they are unsuitable or distributed in any other inappropriate manner. The distribution of products through new channels whether directly or through market intermediaries, including in the retail channel, could expose us to additional regulatory risk in the form of allegations of improper conduct and/or actions by state and federal regulators against us with respect to, among other things, product suitability, conflicts of interest and the adequacy of disclosure to customers to whom our products are distributed through those channels.

In addition, investment adviser subsidiaries of KKR externally manage a number of publicly traded permanent capital vehicles, including KREF (a REIT listed on the NYSE) and KKR Income Opportunities Fund (a closed-end management investment company). FS KKR Capital Corp. (a BDC listed on the NYSE) is advised by FS/KKR Advisor, in which we own a 50% interest. We may enter into new investment management agreements with other publicly traded permanent capital vehicles in the future. Publicly traded permanent capital vehicles allow us to invest in longer-term strategies and secure stable fee streams, while providing liquidity to such vehicle's equity investors. However, these vehicles are subject to the heightened regulatory requirements applicable to public companies, including compliance with the laws and regulations of the SEC, the Exchange Act, the Sarbanes-Oxley Act of 2002 and the national securities exchanges on which their securities are listed, among others. These requirements will place increased demands on senior employees, require administrative, operational and accounting resources, and incur significant expenses. Failure to comply with these requirements could result in a civil lawsuit, regulatory penalties, enforcement actions, or potentially lead to suspension of trading or de-listing from an exchange. Furthermore, if the shareholders of these vehicles were to be dissatisfied with the investment performance or disagree with investment strategies employed by us, they may seek to cause the board of directors of the relevant vehicle to terminate the investment management agreement with us or change the terms of such agreement in a manner that is less favorable to us. As publicly traded entities, these permanent capital vehicles also face additional litigation risk, including class actions and other shareholder lawsuits, which would distract senior employees, including investment professionals. Misconduct of our employees, consultants or sub-contractors or by our portfolio companies could harm us by impairing our ability to attract and retain clients and subjecting us to significant legal liability and reputational harm. There is a risk that our employees, consultants or sub-contractors could engage in misconduct that adversely affects our business. We are subject to a number of obligations and standards arising from our business and our authority over the assets we manage. The violation of these obligations and standards by any of our employees, consultants or sub-contractors would adversely affect our clients and us. We may also be adversely affected if there is misconduct by senior management of portfolio companies in which we invest, even though we may be unable to control or mitigate such misconduct. Such misconduct may also negatively affect the valuation of the investments in such portfolio companies. Our current and former employees, consultants or sub-contractors and those of our portfolio companies may also become subject to allegations of sexual harassment, racial and gender discrimination or other similar misconduct, which, regardless of the ultimate outcome, may result in adverse publicity that could significantly harm our and such portfolio company's brand and reputation. Furthermore, our business often requires that we deal with confidential matters of great significance to companies in which we may invest. If our employees, consultants or

sub-contractors were improperly to use or disclose confidential information, we could suffer serious harm to our reputation, financial position and current and future business relationships, as well as face potentially significant litigation or investigation. It is not always possible to detect or deter such misconduct, and the precautions we take may not be effective in all cases. If any of our employees, consultants or sub-contractors or the employees of portfolio companies were to engage in misconduct or were to be accused of such misconduct, our business and our reputation could be materially and adversely affected.

Table of Contents

Underwriting, syndicating and securities placement activities expose us to risks.

KKR Capital Markets LLC and our other broker-dealer subsidiaries may act as an underwriter, syndicator or placement agent in securities offerings and, through affiliated entities, loan syndications. We may incur losses and be subject to reputational harm to the extent that, for any reason, we are unable to sell securities or indebtedness we purchased or placed as an underwriter, syndicator or placement agent at the anticipated price levels or at all. As an underwriter, syndicator or placement agent, we also may be subject to potential liability for material misstatements or omissions in prospectuses and other offering documents relating to offerings our broker-dealer subsidiaries underwrite, syndicate or place. In certain situations, our broker-dealer subsidiaries may have liabilities arising from transactions in which our investment fund may participate as a purchaser of securities, which could constitute a conflict of interest or subject us to damages or reputational harm.

We are subject to risks in using third-party service providers, including prime brokers, custodians, administrators and other agents.

Certain of our investment funds and our principal trading activities depend on the services of third-party service providers, including prime brokers, custodians, administrators and other agents, to carry out administrative or other services, including valuations, securities transactions, tax preparation and government filings. We are subject to risks of errors and mistakes made by these third parties, which may be attributed to us and subject us or our fund investors to reputational damage, penalties or losses. We may be unsuccessful in seeking reimbursement or indemnification from these third-party service providers.

Furthermore, in the event of the insolvency of a prime broker and/or custodian, our funds may not be able to recover equivalent assets in full as they will rank among the prime broker's and custodian's unsecured creditors in relation to assets that the prime broker or custodian borrows, lends or otherwise uses. In addition, our and our funds' cash held with a prime broker or custodian may not be segregated from the prime broker's or custodian's own cash, and our funds therefore may rank as unsecured creditors in relation to that cash. The inability to recover assets from the prime broker or custodian could have a material adverse impact on the performance of our funds and our business, results of operations and financial condition. Counterparties have generally reacted to recent market volatility by tightening their underwriting standards and increasing their margin requirements for all categories of financing, which has the result of decreasing the overall amount of leverage available and increasing the costs of borrowing. Many of our funds have credit lines, and if a lender under one or more of these credit lines were to become insolvent, we may have difficulty replacing the credit line and one or more of our funds may face liquidity problems.

Default risk may arise from events or circumstances that are difficult to detect, foresee or evaluate. In addition, concerns about, or a default by, one large market participant could lead to significant liquidity problems for other market participants, which may in turn expose us to significant losses. We may not accurately anticipate the impact of market stress or counterparty financial condition, and as a result, we may not have taken sufficient action to reduce these risks effectively, which, if left unmitigated, could have a material adverse effect on our business, results of operations and financial condition.

Risks Related to the Assets We Manage

As an investment manager, we sponsor and manage funds that make investments worldwide on behalf of third-party investors and, in connection with those activities, are required to deploy our own capital in those investments. The investments of these funds are subject to many risks and uncertainties which, to the extent they are material, are discussed below. In addition, we have investments on our balance sheet, which we manage for our own behalf. These risks, as they apply to our balance sheet investments, may have a greater impact on our results of operations and financial conditions as we directly bear the full risk of our balance sheet investments. As a result, the gains and losses on such assets are reflected in our net income and the risks set forth below relating to the assets that we manage will directly affect our operating performance.

The historical returns attributable to our funds, including those presented in this report, should not be considered as indicative of the future results of our funds or our balance sheet investments, of our future results or the performance of our common stock.

We have presented in this report certain information relating to our investment returns, such as net and gross IRRs, multiples of invested capital and realized and unrealized investment values for funds that we have sponsored and managed. The historical and potential future returns of the funds that we manage are not directly linked to returns on KKR Group Partnership Units.

Moreover, historical returns of our funds may not be indicative of the future results that you should expect from our funds or our balance sheet investments. In particular, the future results may differ significantly from their historical results for the following reasons, among others:

57

Table of Contents

the rates of returns of our funds reflect unrealized gains as of the applicable valuation date that may never be realized, which may adversely affect the ultimate value realized from those funds' investments;

the historical returns that we present in this report derive largely from the performance of our earlier private equity funds, whereas future fund returns will depend increasingly on the performance of our newer funds, which may have little or no investment track record, and in particular, you will not benefit from any value that was created in our funds prior to the KPE Transaction to the extent such value has been realized and we may be required to repay excess amounts previously received in respect of carried interest in our funds if, upon liquidation of the fund, we have received carried interest distributions in excess of the amount to which we were entitled;

the future performance of our funds will be affected by macroeconomic factors, including negative factors arising from disruptions in the global financial markets that may not have been prevalent in the periods relevant to the historical return data included in this report;

in some historical periods, the rates of return of some of our funds have been positively influenced by a number of investments that experienced a substantial decrease in the average holding period of such investments and rapid and substantial increases in value following the dates on which those investments were made; those trends and rates of return may not be repeated in the future as the actual or expected length of holding periods related to investments is likely longer than such historical periods;

our newly established funds may generate lower returns during the period that they take to deploy their capital;

our funds' returns have benefited from investment opportunities and general market conditions in certain historical periods that may not repeat themselves, and there can be no assurance that our current or future funds will be able to avail themselves of comparable investment opportunities or market conditions; and

we may create new funds and investment products in the future that reflect a different asset mix in terms of allocations among funds, investment strategies, geographic and industry exposure, vintage year and economic terms.

In addition, our historical rates of return reflect our historical cost structure, which has varied and may vary further in the future. Certain of our newer funds, for example, have lower fee structures and also have performance hurdles. Future returns will also be affected by the risks described elsewhere in this report, including risks of the industry sectors and businesses in which a particular fund invests and changes in laws. See "—Risks Related to Our Business—Difficult market and economic conditions can adversely affect our business in many ways, including by reducing the value or performance of the investments that we manage or by reducing the ability of our funds to raise or deploy capital, each of which could negatively impact our net income and cash flow and adversely affect our financial prospects and condition."

Valuation methodologies for certain assets in our funds and on our balance sheet can be subjective and the fair value of assets established pursuant to such methodologies may never be realized, which could result in significant losses for our funds and us.

There are no readily ascertainable market prices for a substantial majority of illiquid investments of our investment funds, our finance vehicles or other assets on our balance sheet. When determining fair values of investments, we use the last reported market price as of the statement of financial condition date for investments that have readily observable market prices. When an investment does not have a readily available market price, the fair value of the investment represents the value, as determined by us in good faith, at which the investment could be sold in an orderly disposition over a reasonable period of time between willing parties other than in a forced or liquidation sale. There is no single standard for determining fair value in good faith and in many cases fair value is best expressed as a range of fair values from which a single estimate may be derived. When making fair value determinations for our private equity investments, we typically use a market multiples approach that considers a specified financial measure (such as EBITDA) and/or a discounted cash flow analysis. Real asset investments in infrastructure, energy and real estate are valued using one or more of the discounted cash flow analysis, market comparables analysis and direct income capitalization, which in each case incorporates significant assumptions and judgments, and in certain cases may utilize the services of independent valuation firms. Credit investments are valued using values obtained from dealers or market makers, and where these values are not available, credit investments are valued by us based on ranges of valuations determined by an independent valuation firm.

Each of these methodologies requires estimates of key inputs and significant assumptions and judgments. We also consider a range of additional factors that we deem relevant, including the applicability of a control premium or illiquidity discount, the presence of significant unconsolidated assets and liabilities, any favorable or unfavorable tax attributes, the method of likely

Table of Contents

exit, financial projections, estimates of assumed growth rates, terminal values, discount rates including risk free rates, capital structure, risk premiums, commodity prices and other factors, and determining these factors may involve a significant degree of our management's judgment and the judgment of management of our portfolio companies. Because valuations, and in particular valuations of investments for which market quotations are not readily available, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, determinations of fair value may differ materially from the values that would have resulted if a ready market had existed. Even if market quotations are available for our investments, such quotations may not reflect the value that we would actually be able to realize because of various factors, including possible illiquidity associated with a large ownership position, subsequent illiquidity in the market for a company's securities, future market price volatility or the potential for a future loss in market value based on poor industry conditions or the market's view of overall company and management performance. Our stockholders' equity could be adversely affected if the values of investments that we record is materially higher than the values that are ultimately realized upon the disposal of the investments and changes in values attributed to investments from quarter to quarter may result in volatility in our AUM and such changes could materially affect the results of operations that we report from period to period. There can be no assurance that the investment values that we record from time to time will ultimately be realized and that we will be able to realize the investment values that are presented in this report.

Because there is significant uncertainty in the valuation of, or in the stability of the value of, illiquid investments, the fair values of investments reflected in an investment fund's or finance vehicle's net asset value ("NAV") do not necessarily reflect the prices that would actually be obtained by us on behalf of the fund or finance vehicle when such investments are realized. For example, there may be liabilities such as unknown or uncertain tax exposures with respect to investments, especially those outside the United States, which may not be fully reflected in valuations. Realizations at values significantly lower than the values at which investments have been reflected in prior fund NAVs would result in losses for the applicable fund and the loss of potential carried interest and other fees. Also, if realizations of our investments produce values materially different than the carrying values reflected in prior fund NAVs, fund investors may lose confidence in us, which could in turn result in difficulty in raising capital for future funds.

In addition, because we value our entire portfolio only on a quarterly basis, subsequent events that may have a material impact on those valuations may not be reflected until the next quarterly valuation date.

Our investments are impacted by various economic conditions that are difficult to quantify or predict, which may have a significant impact on the valuation of our investments and, therefore, on the investment income we realize and our results of operations and financial condition.

Our investments are impacted by various economic conditions that are difficult to quantify or predict, which may have a significant impact on the valuation of our investments and, therefore, on the investment income we realize and our results of operations and financial condition. For example:

Global equity markets, which may be volatile, significantly impact the valuation of our portfolio companies and, therefore, the investment income that we recognize. For our investments that are publicly listed and thus have readily observable market prices, global equity markets have a direct impact on valuation. For other investments, these markets have an indirect impact on valuation as we typically utilize market multiples (i.e. stock price of comparable companies divided by earnings or cash flow) as a critical input to ascertain fair value of our investments that do not have readily observable market prices. In addition, the valuation for any particular period may not be realized at the time of disposition. For example, because our private equity funds often hold very large amounts of the securities of their portfolio companies, the disposition of these securities often takes place over a long period of time, which can further expose us to volatility risk. In addition, the receptivity of equity markets to initial public offerings, as well as subsequent secondary equity offerings by companies already public, impacts our ability to realize investment gains. Unfavorable market conditions, market volatility and other factors may also adversely impact our strategic partnerships with third-party hedge fund managers by influencing the level or pace of subscriptions or redemptions from the funds managed by our partners.

-

Changes in credit markets can also impact valuations and may have offsetting results depending on the valuation methodology used. For example, we typically use a discounted cash flow analysis as one of the methodologies to ascertain the fair value of our investments that do not have readily observable market prices. If applicable interest rates rise, then the assumed cost of capital for those portfolio companies would be expected to increase under the discounted cash flow analysis, and this effect would negatively impact their valuations if not offset by other factors. Rising U.S. interest rates may also negatively impact certain foreign currencies that depend on foreign capital flows. Conversely, a fall in interest rates can positively impact valuations of certain portfolio companies if not offset by other factors. These

Table of Contents

impacts could be substantial depending upon the magnitude of the change in interest rates. In certain cases, the valuations obtained from the discounted cash flow analysis and the other primary methodology we use, the market multiples approach, may yield different and offsetting results. For example, the positive impact of falling interest rates on discounted cash flow valuations may offset the negative impact of the market multiples valuation approach and may result in less of a decline in value than for those investments that had a readily observable market price. Finally, low interest rates related to monetary stimulus and economic stagnation may also negatively impact expected returns on all investments, as the demand for relatively higher return assets increases and supply decreases.

Foreign exchange rates can materially impact the valuations of our investments that are denominated in currencies other than the U.S. dollar. For example, U.S. dollar appreciation relative to other currencies is likely to cause a decrease in the dollar value of non-U.S. investments to the extent unhedged.

Conditions in commodity markets impact the performance of our portfolio companies and other investments in a variety of ways, including through the direct or indirect impact on the cost of the inputs used in their operations as well as the pricing and profitability of the products or services that they sell. The price of commodities has historically been subject to substantial volatility, which among other things, could be driven by economic, monetary, political or weather related factors. If our funds' operator or our portfolio companies are unable to raise prices to offset increases in the cost of raw materials or other inputs, or if consumers defer purchases of or seek substitutes for the products of our funds or such portfolio companies, our funds or such portfolio companies could experience lower operating income which may in turn reduce the valuation of such funds' investments or those portfolio companies. The value of energy investments generally increase or decrease with the increase or decrease, respectively, of energy commodity prices and in particular with long-term forecasts for such energy commodity prices. Given our investments in oil and gas companies and assets, the value of this portfolio and the investment income we realize is sensitive to oil and gas prices. The volatility of commodity prices also makes it difficult to predict commodity price movements. Apart from our energy investments, a number of our other investments may be dependent to varying degrees on the energy sector through, for example, the provision of equipment and services used in energy exploration and production. These companies may benefit from an increase or suffer from a decline in commodity prices.

Changes in these factors can have a significant effect on the results of the valuation methodologies used to value our portfolio, and our reported fair values for these assets could vary materially if these factors from prior quarters were to change significantly. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Business Environment."

Global and regional economic conditions have a substantial impact on the value of investments. See "—Risks Related to Our Business—Difficult market and economic conditions—can adversely affect our business in many ways, including by reducing the value or performance of the investments that we manage or by reducing the ability of our funds to raise or deploy capital, each of which could negatively impact our net income and cash flow and adversely affect our financial prospects and condition."

Dependence on significant leverage in investments by our funds and our balance sheet assets could adversely affect our ability to achieve attractive rates of return on those investments.

Because many of our funds' investments and our balance sheet investments often rely heavily on the use of leverage, our ability to achieve attractive rates of return will depend on our continued ability to access sufficient sources of indebtedness at attractive rates. For example, our credit funds use varying degrees of leverage when making investments. Similarly, in many private equity investments, indebtedness may constitute 70% or more of a portfolio company's total debt and equity capitalization, including debt that may be incurred in connection with the investment, and a portfolio company's indebtedness may also increase in recapitalization transactions subsequent to the company's acquisition. The absence of available sources of sufficient debt financing for extended periods of time could therefore materially and adversely affect our funds and our portfolio companies. U.S. federal bank regulatory agencies and the European Central Bank have issued leveraged lending guidance covering transactions characterized by a degree of financial leverage. Such guidance may limit the amount or availability of debt financing and may increase the cost of financing we are able to obtain for our transactions and may cause the returns on our investments to suffer. See "—Risks Related to Our Business—Extensive regulation of our businesses affects our activities and creates the potential for

significant liabilities and penalties. The possibility of increased regulatory focus or legislative or regulatory changes could materially and adversely affect our business."

An increase in either the general levels of interest rates or in the risk spread demanded by sources of indebtedness such as we experienced during the global financial crisis in 2008 and 2009 would make it more expensive to finance those investments. In addition, increases in interest rates could decrease the value of fixed-rate debt investments that our balance sheet assets,

Table of Contents

finance vehicles or our funds make. Increases in interest rates could also make it more difficult to locate and consummate private equity and other investments because other potential buyers, including operating companies acting as strategic buyers, may be able to bid for an asset at a higher price due to a lower overall cost of capital or their ability to benefit from a higher amount of cost savings following the acquisition of the asset. In addition, a portion of the indebtedness used to finance private equity investments often includes high-yield debt securities issued in the capital markets. Capital markets are volatile, and there may be times when we might not be able to access those markets at attractive rates, or at all, when completing an investment.

Investments in highly leveraged entities are also inherently more sensitive to declines in revenues, increases in expenses and interest rates and adverse economic, market and industry developments. The incurrence of a significant amount of indebtedness by an entity could, among other things:

- subject the entity to a number of restrictive covenants, terms and conditions, any violation of which would be viewed by creditors as an event of default and could materially impact our ability to realize value from our investment;
- allow even moderate reductions in operating cash flow to render it unable to service its indebtedness;
- give rise to an obligation to make mandatory prepayments of debt using excess cash flow, which might limit the entity's ability to respond to changing industry conditions to the extent additional cash is needed for the response, to make unplanned but necessary capital expenditures or to take advantage of growth opportunities;
- limit the entity's ability to adjust to changing market conditions, thereby placing it at a competitive disadvantage compared to its competitors who have relatively less debt;
- limit the entity's ability to engage in strategic acquisitions that might be necessary to generate attractive returns or further growth; and
- limit the entity's ability to obtain additional financing or increase the cost of obtaining such financing, including for capital expenditures, working capital or other general corporate purposes.

A leveraged company's income and equity also tend to increase or decrease at a greater rate than would otherwise be the case if money had not been borrowed. As a result, the risk of loss associated with a leveraged company is generally greater than for comparable companies with comparatively less debt. For example, leveraged companies could default on their debt obligations due to a decrease in revenues and cash flow precipitated by an economic downturn or by poor relative performance at such a company. Similarly, the leveraged nature of some of our investments in real assets increases the risk that a decline in the fair value of the underlying real asset will result in their abandonment or foreclosure. For example, if the property-level debt on a particular investment has reached its maturity and the underlying asset value has declined below its debt-level, we may, in absence of cooperation by the lender in regards to a partial debt-write-off, be forced to put the investment into liquidation. In addition, the 2017 Tax Act partially limits the tax deductibility of interest, which could have a material adverse effect on our funds' investment activities and on operations of a leveraged company.

When our existing portfolio investments reach the point when debt incurred to finance those investments matures in significant amounts and must be either repaid or refinanced, those investments may materially suffer if they have generated insufficient cash flow to repay maturing debt and there is insufficient capacity and availability in the financing markets to permit them to refinance maturing debt on satisfactory terms, or at all. If the financing for such purposes were to be unavailable or uneconomic when significant amounts of the debt incurred to finance our existing portfolio investments start to come due, these investments could be materially and adversely affected. In the event of default or potential default under applicable financing arrangements, one or more of our portfolio companies may go bankrupt, which could give rise to substantial investment losses, adverse claims or litigation against us or our employees and damage to our reputation.

Among the sectors particularly challenged by downturns in the global credit markets (such as the global financial crisis in 2008 and 2009) are the CLO and leveraged finance markets. We have significant exposure to these markets through our CLO subsidiaries, which we principally acquired in the acquisitions of KFN and Avoca. As of December 31, 2018, we indirectly hold below investment grade corporate loans and securities with a \$12.7 billion estimated fair market value through our CLO subsidiaries. Each of these subsidiaries is a special purpose company that issued to us and other investors notes secured by a pool of collateral consisting primarily of corporate leveraged

loans. In most cases, our CLO holdings are deeply subordinated, representing the CLO subsidiary's substantial leverage, which increases both the opportunity for higher returns as well as the magnitude of losses when compared to holders or investors that rank more senior to us in right of payment. These loans and bonds also generally involve a higher degree of risk than investment grade rated debt, including the risks described in the paragraphs above. Our CLO subsidiaries have historically experienced an increase in downgrades, depreciations in market

Table of Contents

value and defaults in respect of leveraged loans in their collateral during downturns in credit markets. The CLOs' portfolio profile tests set limits on the amount of discounted obligations a CLO can hold. During any time that a CLO issuer exceeds such a limit, the ability of the CLO's manager to sell assets and reinvest available principal proceeds into substitute assets is restricted. In such circumstances, CLOs may fail certain over-collateralization tests, which would cause diversions of cash flows away from us as holders of the more junior CLO, which may impact our cash flows. The ability of the CLOs to make interest payments to the holders of the senior notes of those structures is highly dependent upon the performance of the CLO collateral. If the collateral in those structures were to experience a significant decrease in cash flow due to an increased default level, payment of all principal and interest outstanding may be accelerated as a result of an event of default or by holders of the senior notes. There can be no assurance that market conditions giving rise to these types of consequences will not occur, re-occur, subsist or become more acute in the future. Because our CLO structures involve complex collateral and other arrangements, the documentation for such structures is complex, is subject to differing interpretations and involves legal risk. These CLOs have served as long-term, non-recourse financing for debt investments and as a way to reduce refinancing risk, reduce maturity risk and secure a fixed cost of funds over an underlying market interest rate. An inability to continue to utilize CLOs or other similar financing vehicles successfully could limit our ability to fund future investments, grow our business or fully execute our business strategy and our results of operations may be materially and adversely affected.

Our CLO subsidiaries regularly use significant leverage to finance their assets. An inability of such subsidiaries to continue to raise or utilize leverage, to refinance or extend the maturities of their outstanding indebtedness or to maintain adequate levels of collateral under the terms of their CLOs could limit their ability to grow their business, reinvest principal cash, distribute cash to us or fully execute their business strategy, and our results of operations may be materially and adversely affected. If these subsidiaries are unable to maintain their operating results and access to capital resources, they could face substantial liquidity problems and might be required to dispose of material assets or operations to meet debt service and other obligations. These CLO strategies and the value of the assets of such CLO subsidiaries are also sensitive to changes in interest rates because these strategies rely on borrowed money and because the value of the underlying portfolio loans can fall when interest rates rise. If interest rates on CLO borrowings increase and the interest rates on the portfolio loans do not also increase, the CLO strategy is unlikely to achieve its projected returns. Also, if interest rates increase in the future, our CLO portfolio will likely experience a reduction in value because it would hold assets receiving below market rates of interest.

Our credit-oriented funds and CLOs may choose to use leverage as part of their respective investment programs and regularly borrow a substantial amount of their capital. The use of leverage poses a significant degree of risk and enhances the possibility of a significant loss in the value of the investment portfolio. A fund may borrow money from time to time to purchase or carry securities or debt obligations or may enter into derivative transactions (such as total return swaps) with counterparties that have embedded leverage. The interest expense and other costs incurred in connection with such borrowing may not be recovered by appreciation in the securities or debt obligations purchased or carried and will be lost—and the timing and magnitude of such losses may be accelerated or exacerbated—in the event of a decline in the market value of such securities or debt obligations. Gains realized with borrowed funds may cause the fund's NAV to increase at a faster rate than would be the case without borrowings. However, if investment results fail to cover the cost of borrowings, the fund's NAV could also decrease faster than if there had been no borrowings. Any of the foregoing circumstances could have a material adverse effect on our results of operations, financial condition and cash flow.

The due diligence process that we undertake in connection with our investments may not reveal all facts that may be relevant in connection with an investment.

Before making our investments, we conduct due diligence that we deem reasonable and appropriate based on the facts and circumstances applicable to each investment. The objective of the due diligence process is to identify attractive investment opportunities based on the facts and circumstances surrounding an investment, to identify possible risks associated with that investment and, in the case of private equity investments, to prepare a framework that may be used from the date of an acquisition to drive operational achievement and value creation. When conducting due diligence, we typically evaluate a number of important business, financial, tax, accounting, environmental,

technological, regulatory and legal issues in determining whether or not to proceed with an investment. Outside consultants, legal advisors, accountants and investment banks are involved in the due diligence process in varying degrees depending on the type of investment. Nevertheless, when conducting due diligence and making an assessment regarding an investment, we rely on resources available to us, including information provided by the target of the investment and, in some circumstances, third-party investigations. The due diligence process may at times be subjective with respect to newly organized companies or carve-out transactions for which only limited information is available.

Table of Contents

Instances of bribery, fraud, accounting irregularities and other improper, illegal or corrupt practices can be difficult to detect, and fraud and other deceptive practices can be widespread in certain jurisdictions. Several of our funds invest in emerging market countries that may not have established laws and regulations that are as stringent as in more developed nations, or where existing laws and regulations may not be consistently enforced. For example, our funds invest throughout jurisdictions that have material perceptions of corruption according to international rating standards (such as Transparency International's Corruption Perceptions Index) such as China, India, Indonesia, Latin America, the Middle East and Africa. Due diligence on investment opportunities in these jurisdictions is frequently more complicated because consistent and uniform commercial practices in such locations may not have developed. Bribery, fraud, accounting irregularities and corrupt practices can be especially difficult to detect in such locations.

The due diligence conducted for certain of our credit strategies, as well as certain private equity and real asset investments, is limited to publicly available information. Accordingly, we cannot be certain that the due diligence investigation that we will carry out with respect to any investment opportunity will reveal or highlight all relevant facts (including fraud, bribery and other illegal activities and contingent liabilities) that may be necessary or helpful in evaluating such investment opportunity, including the existence of contingent liabilities. We also cannot be certain that our due diligence investigations will result in investments being successful or that the actual financial performance of an investment will not fall short of the financial projections we used when evaluating that investment. Our investment management activities involve investments in relatively high-risk, illiquid assets, and we may fail to realize any profits from these activities for a considerable period of time or lose some or all of the capital invested. Many of our funds and our balance sheet may hold investments in securities that are not publicly traded. In many cases, our funds or we may be prohibited by contract or by applicable securities laws from selling such securities at many points in time. Our funds or we will generally not be able to sell these securities publicly unless their sale is registered under applicable securities laws, or unless an exemption from such registration is available, and then only at such times when we do not possess material nonpublic information. The ability of many of our funds or us to dispose of investments is heavily dependent on the capital markets and in particular the public equity markets. For example, the ability to realize any value from an investment may depend upon the ability to complete an initial public offering of the portfolio company in which such investment is made. Even if the securities are publicly traded, large holdings of securities can often be disposed of only over a substantial length of time, exposing our investment returns to risks of downward movement in market prices during the intended disposition period. Moreover, because the investment strategy of many of our funds, particularly our private equity funds, often entails having representation on our funds' public portfolio company boards, our funds may be restricted in their ability to effect such sales during certain time periods. As many of our funds have a finite term, we could also be forced to dispose of investments sooner than otherwise desirable. Accordingly, under certain conditions, our funds may be forced to either sell securities at lower prices than they had expected to realize or defer sales that they had planned to make, potentially for a considerable period of time. Moreover, we may determine that we may be required to sell our balance sheet assets alongside our funds' investments at such times. We have made and expect to continue to make significant capital investments in our current and future funds and other strategies. Contributing capital to these funds is risky, and we may lose some or all of the principal amount of our investments.

Our investments are subject to a number of inherent risks.

Our results are highly dependent on our continued ability to generate attractive returns from our investments.

Investments made by our private equity, credit or other investments involve a number of significant risks inherent to private equity, credit and other investing, including the following:

- companies in which investments are made may have limited financial resources and may be unable to meet their obligations under their securities, which may be accompanied by a deterioration in the value of their equity securities or any collateral or guarantees provided with respect to their debt;
- companies in which investments are made are more likely to depend on the management talents and efforts of a small group of persons and, as a result, the death, disability, resignation or termination of one or more of those persons could have a material adverse impact on their business and prospects;

companies in which private equity investments are made may be businesses or divisions acquired from larger operating entities that may require a rebuilding or replacement of financial reporting, information technology, operational and other functions;

Table of Contents

companies in which investments are made may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position;

instances of bribery, fraud and other deceptive practices committed by senior management of portfolio companies in which our funds or we invest may undermine our due diligence efforts with respect to such companies, and if such bribery, fraud or other deceptive practices are discovered, negatively affect the valuation of a fund's investments as well as contribute to overall market volatility that can negatively impact a fund's or our investment program; our funds may make investments that they do not advantageously dispose of prior to the date the applicable fund is dissolved, either by expiration of such fund's term or otherwise, resulting in a lower than expected return on the investments and, potentially, on the fund itself;

our portfolio companies generally have capital structures established on the basis of financial projections based primarily on management's judgments and assumptions, and general economic conditions and other factors may cause actual performance to fall short of these financial projections, which could cause a substantial decrease in the value of our equity holdings in the portfolio company and cause our funds' or our performance to fall short of our expectations; executive officers, directors and employees of an equity sponsor may be named as defendants in litigation involving a company in which an investment is made or is being made, and we or our funds may indemnify such executive officers, directors or employees for liability relating to such litigation;

we advise funds that invest in businesses that operate in a variety of industries that are subject to extensive domestic and foreign regulation (including companies that supply services to governmental agencies), such as the telecommunications industry, the defense and government services industry, the healthcare industry, oil and gas industry, the waste management industry and the food industry, which may involve greater risk due to rapidly changing market and governmental conditions in those sectors;

our transactions involve complex tax structuring that could be challenged or disregarded, which may result in losing treaty benefits or would otherwise adversely impact our investments; and

significant failures of our portfolio companies to comply with laws and regulations applicable to them could affect the ability of our funds or us to invest in other companies in certain industries in the future and could harm our reputation. For additional risks that rise from the types of investment vehicles used in an investment, see "—Risks Related to Our Business—Certain types of investment vehicles may subject us to additional risk of litigation and regulatory scrutiny." Our investments in real assets such as real estate, infrastructure and energy may expose us to increased risks and liabilities and may expose our stockholders to adverse consequences.

Investments in real assets, which may include real estate, infrastructure, oil and gas properties and other energy assets, may expose us to increased risks and liabilities that are inherent in the ownership of real assets. For example:

Ownership of real assets in our funds or vehicles may increase our risk of liability under environmental laws that impose, regardless of fault, joint and several liability for the cost of remediating contamination and compensation for damages. In addition, changes in environmental laws or regulations or the environmental condition of an investment may create liabilities that did not exist at the time of acquisition that would not have been foreseen. Even in cases where we are indemnified by a seller with respect to an investment against liabilities arising out of violations of environmental laws and regulations, there can be no assurance as to the financial viability of the seller to satisfy such indemnities or our ability to achieve enforcement of such indemnities;

Ownership of real assets may also present additional risk of liability for personal and property injury or impose significant operating challenges and costs, for example with respect to compliance with zoning, environmental or other applicable laws;

Real asset investments may face construction risks, including without limitation: (i) labor disputes, shortages of material and skilled labor, or work stoppages; (ii) slower than projected construction progress and the unavailability or late delivery of necessary equipment; (iii) less than optimal coordination with public utilities in the relocation of their facilities; (iv) adverse weather conditions and unexpected construction conditions; (v) accidents or the breakdown or

Table of Contents

failure of construction equipment or processes; (vi) catastrophic events such as explosions, fires and terrorist activities, and other similar events and (vii) risks associated with holding direct or indirect interests in undeveloped land or underdeveloped real property. These risks could result in substantial unanticipated delays or expenses (which may exceed expected or forecasted budgets) and, under certain circumstances, could prevent completion of construction activities once undertaken. Certain real asset investments may remain in construction phases for a prolonged period and, accordingly, may not be cash generative for a prolonged period. Recourse against the contractor may be subject to liability caps or may be subject to default or insolvency on the part of the contractor;

The operation of real assets is exposed to potential unplanned interruptions caused by significant catastrophic or force majeure events. These risks could, among other effects, adversely impact the cash flows available from investments in real assets, cause personal injury or loss of life, damage property, or instigate disruptions of service. In addition, the cost of repairing or replacing damaged assets could be considerable. Repeated or prolonged service interruptions may result in permanent loss of customers, litigation, or penalties for regulatory or contractual non-compliance. Force majeure events that are incapable of, or too costly to, cure may also have a permanent adverse effect on an investment; and

The management of the business or operations of a real asset may be contracted to a third-party management company unaffiliated with us. Although it would be possible to replace any such operator, the failure of such an operator to adequately perform its duties or to act in ways that are in the best interest of the investment, or the breach by an operator of applicable agreements or laws, rules and regulations, could have an adverse effect on the investment's results of operations and financial condition. Real asset investments may involve the subcontracting of design and construction activities in respect of projects, and as a result our investments are subject to the risk that contractual provisions passing liabilities to a subcontractor could be ineffective, the subcontractor fails to perform services that it has agreed to provide and, in cases where a single subcontractor provides services to various investments, the subcontractor becomes insolvent.

Without limiting the foregoing risks, we note that investments that we have made and will continue to make in the oil and gas industries may present specific environmental, safety and other inherent risks. Such investments are subject to stringent and complex foreign, federal, state and local laws, ordinances and regulations specific to oil and gas industries, including, for example, those governing transportation, exploration and production of oil and natural gas. There are also various conservation laws and regulations applicable to oil and natural gas production and related operations, in addition to regulations governing occupational health and safety, the discharge of materials into the environment and other practices relating to environmental protection. Failure to comply with applicable laws, ordinances and regulations may result in the assessment of administrative, civil and criminal penalties, the imposition of remedial obligations and the issuance of orders enjoining some or all of our operations in affected areas. These laws, ordinances and regulations may also restrict the rate of oil and natural gas production below the rate that would otherwise be possible and increase the cost of production, thereby reducing profitability. Our oil and gas investments are subject to other risks, such as:

- Volatility in the prices of oil and gas properties may make it difficult to ensure that our acquisition of interest in such properties is at appropriate prices;

- Currently unforeseen environmental incidents may occur or past non-compliance with environmental laws or regulations may be discovered making it difficult to predict the future costs or impact of compliance;

- The oil and gas industries present inherent risk of personal and property injury, for which we may not be fully insured or indemnified;

- There may be unforeseen or increased regulatory and environmental risks stemming from the use of new technologies, including hydraulic fracturing;

Our estimated oil, natural gas, and natural gas liquids reserve quantities and future production rates are based on many assumptions that may prove to be inaccurate. Any material inaccuracies in these reserve estimates or the underlying assumptions will materially affect the quantities and value of our reserves;

- The performance of our energy investments depend on the skill, ability and decisions of third-party operators. The success of our investment will depend on their exploitation, development, construction and drilling activities and the

timing and cost of drilling, completing and operating wells. Failure of such operators to comply with applicable laws, rules and regulations could result in liabilities to us, reduce the value of our interest in the oil and natural gas properties, and materially and adversely affect our cash flows and results of operations; and

Table of Contents

If commodity prices decline and remain depressed for a prolonged period, a significant portion of our development projects may become uneconomic and cause write-downs of the value of our oil and gas properties, which may reduce the value of our energy investments, have a negative impact on our ability to use these investments as collateral or otherwise have a material adverse effect on our results of operations.

Investments in real estate are subject to the risks inherent in the ownership and operation of real estate and real estate-related businesses and assets. These risks include those associated with the burdens of ownership of real property; general and local economic conditions; changes in supply of and demand for competing properties in an area (as a result, for instance, of overbuilding); fluctuations in the average occupancy; the financial resources of tenants; changes in building, environmental and other laws; energy and supply shortages; various uninsured or uninsurable risks; natural disasters; changes in government regulations (such as rent control); changes in real property tax rates; changes in interest rates; the reduced availability of mortgage funds that may render the sale or refinancing of properties difficult or impracticable; negative developments in the economy that depress travel activity; environmental liabilities; contingent liabilities on disposition of assets; and terrorist attacks, war and other factors that are beyond our control. Our real estate investments are also subject to additional risks, including but not limited to the following:

The success of certain investments will depend on the ability to restructure and effect improvements in the operations of the applicable properties, and there is no assurance that we will be successful in identifying or implementing such restructuring programs and improvements.

If we acquire direct or indirect interests in undeveloped land or underdeveloped real property, which may often be non-income producing, they will be subject to the risks normally associated with such assets and development activities, including risks relating to the availability and timely receipt of zoning and other regulatory or environmental approvals, the cost and timely completion of construction (including risks beyond the control of us or our fund, such as weather or labor conditions or material shortages) and the availability of both construction and permanent financing on favorable terms.

The strategy of our real estate funds may be based, in part, on the availability for purchase of assets at favorable prices followed by the continuation or improvement of market conditions or on the availability of refinancing. No assurance can be given that the real estate businesses or assets can be acquired or disposed of at favorable prices or that refinancing will be available.

Lenders in commercial real estate financing customarily will require a "bad boy" guarantee, which typically provides that the lender can recover losses from the guarantors for certain bad acts, such as fraud or intentional misrepresentation, intentional waste, willful misconduct, criminal acts, misappropriation of funds, voluntary incurrence of prohibited debt and environmental losses sustained by lender. For our acquisitions, "bad boy" guarantees would generally be extended by our funds, our balance sheet or a combination of both depending on the ownership of the relevant asset. In addition, "bad boy" guarantees typically provide that the loan will be a full personal recourse obligation of the guarantor, for certain actions, such as prohibited transfers of the collateral or changes of control and voluntary bankruptcy of the borrower. It is expected that commercial real estate financing arrangements generally will require "bad boy" guarantees and in the event that such a guarantee is called, a fund's or our assets could be materially and adversely affected. Moreover, "bad boy" guarantees could apply to actions of the joint venture partners associated with the investments, and in certain cases the acts of such joint venture partner could result in liability to our funds or us under such guarantees.

The acquisition, ownership and disposition of real properties carry certain specific litigation risks. Litigation may be commenced with respect to a property acquired in relation to activities that took place prior to the acquisition of such property. In addition, at the time of disposition, other potential buyers may bring claims related to the asset or for due diligence expenses or other damages. After the sale of a real estate asset, buyers may later sue our funds or us for losses associated with latent defects or other problems not uncovered in due diligence.

Our funds or we may be subject to certain risks associated with investments in particular assets. REITs may be affected by changes in the value of their underlying properties and by defaults by borrowers or tenants. REITs depend on their ability to generate cash flow to make distributions and may be impacted by changes in tax laws or by a failure

to qualify for tax-free pass through income. Investments in real estate debt investments may be unsecured and subordinated to a substantial amount of indebtedness. Such debt investments may not be protected by financial covenants. Non-performing real estate loans may require a substantial amount of workout negotiations and/or restructuring, which may entail, among other things, a substantial reduction in the interest rate and a substantial write-down of the principal of such loan. Investments in commercial mortgage loans are subject to risks of delinquency, foreclosure and loss of principal. In the event of any default under a mortgage loan held directly by our fund or us, our

Table of Contents

fund or we will bear a risk of loss of principal to the extent of any deficiency between the value of the collateral and the principal and accrued interest of the loan. Investments in assets or businesses that are distressed may have little or no near-term cash flow and involve a high degree of risk. Such investments subject to bankruptcy or insolvency could be subordinated or disallowed.

Infrastructure investments often involve an ongoing commitment to a municipal, state, federal or foreign government or regulatory agencies. The nature of these obligations exposes the owners of infrastructure investments to a higher level of regulatory control than typically imposed on other businesses. They may also rely on complex government licenses, concessions, leases or contracts, which may be difficult to obtain or maintain. Infrastructure investments may require operators to manage such investments, and such operators' failure to comply with laws, including prohibitions against bribing of government officials, may materially and adversely affect the value of such investments and cause us serious reputational and legal harm. Revenues for such investments may rely on contractual agreements for the provision of services with a limited number of counterparties, and are consequently subject to heightened counterparty default risk. The operations and cash flow of infrastructure investments are also more sensitive to inflation and, in certain cases, commodity price risk. Furthermore, services provided by infrastructure investments may be subject to rate regulations by government entities that determine or limit prices that may be charged. Similarly, users of applicable services, or government entities in response to such users, may react negatively to any adjustments in rates, which may reduce the profitability of such infrastructure investments.

Our growth equity strategy invests in emerging and less established companies that are heavily dependent on new technologies.

Our growth equity funds may make investments in companies that are in a conceptual or early stage of development. These companies are often characterized by short operating histories, new technologies and products, quickly evolving markets, management teams that may have limited experience working together and in many cases, negative cash flow, all of which enhance the difficulty of evaluating these investment opportunities and the ultimate success of such investments. Other substantial operational risks to which such companies are subject include: uncertain market acceptance of the company's products or services; a high degree of regulatory risk for new or untried or untested business models, products and services; high levels of competition among similarly situated companies; new competing products and technology; lower barriers to entry and downward pricing pressure; lower capitalizations and fewer financial resources; the potential for rapid organizational or strategic change; and susceptibility to personal misconduct by or departure of key executives or founders. In addition, growth equity companies may be more susceptible to macroeconomic effects and industry downturns, and their valuations may be more volatile depending on the achievement of milestones, such as receiving a governmental license or approval. Growth equity companies also generally depend heavily on intellectual property rights, including patents, trademarks and proprietary products or processes. The ability to effectively enforce patent, trademark and other intellectual property laws in a cost-effective manner will affect the value of many of these companies. The presence of patents or other intellectual property rights belonging to other parties may lead to the termination of the research and development of a portfolio company's particular product. In addition, if a portfolio company infringes on third-party patents or other intellectual property rights, it could be prevented from using certain third-party technologies or forced to acquire licenses in order to obtain access to such technologies at a high cost.

Certain of our funds and CLOs, and our firm through our balance sheet, hold high-yield, below investment grade or unrated debt, or securities of companies that are experiencing significant financial or business difficulties, which generally entail greater risk, and if those risks are realized, it could materially and adversely affect our results of operations, financial condition and cash flow.

Certain of our funds and CLOs, and our firm through our balance sheet, invest in high-yield, below investment grade or unrated debt, including corporate loans and bonds, each of which generally involves a higher degree of risk than investment grade rated debt, and may be less liquid. Issuers of high yield, below investment grade or unrated debt may be highly leveraged, and their relatively high debt-to-equity ratios create increased risks that their operations might not generate sufficient cash flow to service their debt obligations. As a result, high yield, below investment grade or unrated debt is often less liquid than investment grade rated debt. Also, investments may be made in loans and other

forms of debt that are not marketable securities and therefore are not liquid. In the absence of appropriate hedging measures, changes in interest rates generally will also cause the value of fixed rate debt investments to vary inversely to such changes. The obligor of a debt security or instrument may not be able or willing to pay interest or to repay principal when due in accordance with the terms of the associated agreement and collateral may not be available or sufficient to cover such liabilities. Commercial bank lenders and other creditors may be able to contest payments to the holders of other debt obligations of the same obligor in the event of default under their commercial bank loan agreements. Sub-participation interests in syndicated debt may be subject to certain risks as a result of having no direct contractual relationship with underlying borrowers. Debt securities and instruments may be rated below investment grade by recognized rating agencies or unrated and face ongoing uncertainties and exposure to adverse business, financial or economic conditions and the issuer's failure to make timely interest and principal payments.

Table of Contents

Certain of our investment funds, especially in our special situations strategy, and our firm through our balance sheet may hold interests in business enterprises involved in work-outs, liquidations, reorganizations, bankruptcies and similar transactions and may purchase high-risk receivables. An investment in such business enterprises entails the risk that the transaction in which such business enterprise is involved either will be unsuccessful, will take considerable time or will result in a distribution of cash or a new security the value of which will be less than the purchase price to the fund of the security or other financial instrument in respect of which such distribution is received. In addition, if an anticipated transaction does not in fact occur, we or the fund may be required to sell the investment at a loss. Investments in troubled companies may also be adversely affected by U.S. federal and state and non-U.S. laws relating to, among other things, fraudulent conveyances, voidable preferences, lender liability and a bankruptcy court's discretionary power to disallow, subordinate or disenfranchise particular claims. Investments in securities and private claims of troubled companies made in connection with an attempt to influence a restructuring proposal or plan of reorganization in a bankruptcy case may also involve substantial litigation, which has the potential to adversely impact us or unrelated funds or portfolio companies. Companies that were not in financial distress at the time we or our funds made investments may in the future require work-outs, liquidations, reorganizations, bankruptcies or similar transactions, and as a result, become subject to the same risks described above. Because there is substantial uncertainty concerning the outcome of transactions involving financially troubled companies, there is a potential risk of loss of the entire investment in such company. Such investments involve a substantial degree of risk, and a decline in value of the assets would have a material adverse effect on our financial performance.

We often pursue investment opportunities that involve business, regulatory, legal or other complexities.

As an element of our investment style, we often pursue complex investment opportunities. This can often take the form of substantial business, regulatory or legal complexity that would deter other investment managers. Our tolerance for complexity presents risks, as such transactions can be more difficult, expensive and time consuming to finance and execute; it can be more difficult to manage or realize value from the assets acquired in such transactions; and such transactions sometimes entail a higher level of regulatory scrutiny, the application of complex tax laws or a greater risk of contingent liabilities. Our transactions involve complex tax structures that are costly to establish, monitor and maintain, and as we pursue a larger number of transactions across multiple assets classes and in multiple jurisdictions, such costs will increase and the risk that a tax matter is overlooked or inadequately or inconsistently addressed will increase. Consequently, we may fail to achieve the desired tax benefit or otherwise decrease the returns of our investments or damage the reputation of our firm. Changes in law and regulation and in the enforcement of existing law and regulation, such as antitrust laws and tax laws, also add complexity and risk to our business. Further, we, directly or through our funds, may acquire an investment that is subject to contingent liabilities, which could be unknown to us at the time of acquisition or, if they are known to us, we may not accurately assess or protect against the risks that they present. Acquired contingent liabilities could thus result in unforeseen losses for us or our funds. In addition, in connection with the disposition of an investment in a portfolio company, we or a fund may be required to make representations about the business and financial affairs of such portfolio company typical of those made in connection with the sale of a business. We or a fund may also be required to indemnify the purchasers of such investment to the extent that any such representations are inaccurate. These arrangements may result in the incurrence of contingent liabilities by us or a fund, even after the disposition of an investment. Any of these risks could harm the performance of us or our funds.

Our private equity investments are typically among the largest in the industry, which involves certain complexities and risks that are not encountered in small- and medium-sized investments.

Our private equity funds make investments in companies with relatively large capitalizations, which involves certain complexities and risks that are not encountered in small- and medium-sized investments. For example, larger transactions may be more difficult to finance and exiting larger deals may present incremental challenges. In addition, larger transactions may pose greater challenges in implementing changes in the company's management, culture, finances or operations, and may entail greater scrutiny by regulators, interest groups and other third parties. These constituencies may be more active in opposing larger investments by certain private equity firms.

In some transactions, the amount of equity capital that is required to complete a large capitalization private equity transaction may be significant and are required to be structured as a consortium transaction. A consortium transaction involves an equity investment in which two or more private equity firms serve together or collectively as equity sponsors. While we have sought to limit where possible the amount of consortium transactions in which we have been involved, we have participated in a significant number of those transactions. Consortium transactions generally entail a reduced level of control by our firm over the investment because governance rights must be shared with the other consortium investors. Accordingly, we may not be able to control decisions relating to a consortium investment, including decisions relating to the management and operation of the company and the timing and nature of any exit, which could result in the risks described in "—We and our funds have made investments in companies that we do not control, exposing us to the risk of decisions made by others with which we may not agree." Any of these factors could increase the risk that our larger investments could be less successful. The consequences to

Table of Contents

our investment funds of an unsuccessful larger investment could be more severe given the size of the investment. Moreover, we have significant capital of our own committed in such large investments. For certain large private equity transactions, we may seek to syndicate a portion of our capital commitment to third parties; however, if we are unable to syndicate all or part of such commitment, we may be required to fund the remaining commitment amount from our balance sheet. If we are required to keep on our balance sheet a large portion of the capital commitment that could not be syndicated to third parties, poor performance of such large investment may have a material adverse impact on our financial results. See "—Risks Related to Our Business—If we are unable to syndicate the securities or indebtedness or realize returns on investments financed with our balance sheet assets, our liquidity, business, results of operations and financial condition could be materially and adversely affected" and "—Our funds and our firm through our balance sheet may make a limited number of investments, or investments that are concentrated in certain issuers, geographic regions or asset types, which could negatively affect our performance or the performance of our funds to the extent those concentrated assets perform poorly."

We and our funds have made investments in companies that we do not control, exposing us to the risk of decisions made by others with which we may not agree.

We and our funds hold investments that include debt instruments and equity securities of companies that we do not control, and such investments may comprise an increasing part of our business. Such instruments and securities may be acquired by our funds through trading activities or through purchases of securities from the issuer or we may purchase such instruments and securities on a principal basis. In addition, our funds may acquire minority equity interests, particularly when making private equity investments in Asia, making growth equity investments or sponsoring investments as part of a large investor consortium or through many of our credit funds. Our funds may also dispose of a portion of their majority equity investments in portfolio companies over time in a manner that results in the funds retaining a minority investment. We and our funds, including our newer private equity funds, have made certain minority investments in publicly traded companies.

We have also made minority investments in companies including hedge fund managers on our balance sheet. For example, we have investments in Marshall Wace, BlackGold and PAAMCO Prisma. We also have investments in real estate managers like Drawbridge Realty and German Estate Group AG.

Transactions made by companies we do not control could be viewed as unwanted, damage our reputation, and consequently impair our ability to source transactions in the future. Those investments will be subject to the risk that the company in which the investment is made may make business, financial or management decisions with which we do not agree or that the majority stakeholders or the management of the company may take risks or otherwise act in a manner that does not serve our interests. These companies may be subject to complex regulatory requirements and instances of non-compliance by them may subject us to reputational harm or in certain cases, liability. We are also reliant on the systems and processes of these companies for, among other, financial information and valuations of our investments in or with them, including hedge fund managers and their funds, but we do not control the decisions and judgments made during such processes. Our investments in hedge fund managers may subject us to additional regulatory complexities or scrutiny if we are deemed to control the company for regulatory purposes, despite our minority interest. These asset managers may also be dependent on their founders and other key persons, and the loss of these key personnel could adversely impact our investment. If any of the foregoing were to occur, the value of the investments held by our funds or by us could decrease and our results of operations, financial condition and cash flow could be materially and adversely affected.

We make investments in companies that are based outside of the United States, which may expose us to additional risks not typically associated with investing in companies that are based in the United States.

Many of our funds invest or have the flexibility to invest a significant portion of their assets in the equity, debt, loans or other securities of issuers that are based outside of the United States. A substantial amount of these investments consist of private equity investments made by our private equity funds and growth equity funds. For example, as of December 31, 2018, approximately 49% of the capital invested in those funds (European Fund and subsequent funds) was attributable to non-U.S. investments. Investing in companies that are based or have significant operations in countries outside of the United States and, in particular, in emerging markets such as China and India, Eastern Europe,

South and Southeast Asia, Latin America and Africa, involves risks and considerations that are not typically associated with investments in companies established in the United States. These risks may include the following:

- the possibility of exchange control regulations;
- restrictions on repatriation of profit on investments or of capital invested;
- the imposition of non-U.S. taxes and changes in tax law;

Table of Contents

differences in the legal and regulatory environment, such as the recognition of information barriers, or enhanced legal and regulatory compliance;

greater levels of corruption and potential exposure to the FCPA and other laws that prohibit improper payments or offers of payments to foreign governments, their officials and other third parties;

violations of trade sanctions or trade control regimes;

limitations on borrowings to be used to fund acquisitions or dividends;

limitations on permissible counterparties in our transactions or consolidation rules that effectively restrict the types of businesses in which we may invest;

political risks generally, including political and social instability, nationalization, expropriation of assets or political hostility to investments by foreign or private equity investors;

less liquid markets;

reliance on a more limited number of commodity inputs, service providers and/or distribution mechanisms;

adverse fluctuations in currency exchange rates and costs associated with conversion of investment principal and income from one currency into another;

higher rates of inflation;

less available current information about an issuer;

higher transaction costs;

less government supervision of exchanges, brokers and issuers;

less developed bankruptcy and other laws;

greater application of concepts like equitable subordination, which may, in bankruptcy or insolvency, result in the subordination of debt or other senior interests held by our investment funds, vehicles or accounts in companies in which our investment funds, vehicles or accounts also hold equity interests;

difficulty in enforcing contractual obligations;

lack of uniform accounting, auditing and financial reporting standards;

less stringent requirements relating to fiduciary duties;

fewer investor protections; and

greater price volatility.

As a result of the complexity of and lack of clear laws, precedent or authority with respect to the application of various income tax laws to our structures, the application of rules governing how transactions and structures should be reported is also subject to differing interpretations. In particular, certain jurisdictions have either proposed or adopted rules that seek to limit the amount of interest that may be deductible where the lender and the borrower are related parties (or where third-party borrowings have been guaranteed by a related party) and in some cases, without regard to whether the lender is a related party, or may seek to interpret existing rules in a more restrictive manner. In addition, the tax authorities of certain countries have sought to disallow tax deductions for transaction and certain other costs at the portfolio company level either on the basis that the entity claiming the deduction does not benefit from the costs incurred or on other grounds. These measures will most likely adversely affect portfolio companies in those jurisdictions in which our investment funds have investments, and limit the benefits of additional investments in those countries. Our business is also subject to the risk that similar measures might be introduced in other countries in which our investment funds currently have investments or plan to invest in the future, or that

Table of Contents

other legislative or regulatory measures that negatively affect their respective portfolio investments might be promulgated in any of the countries in which they invest.

In addition, certain countries such as Australia, China, India, Japan, Brazil and South Korea, where we have made investments, have sought to tax investment gains derived by nonresident investors, including private equity funds, from the disposition of the equity in companies operating in those countries. In some cases this development is the result of new legislation or changes in the interpretation of existing legislation and local authority assertions that investors have a local taxable presence or are holding companies for trading purposes rather than for capital purposes, or are not otherwise entitled to treaty benefits.

Further, the tax authorities in certain countries, such as Australia, Belgium, China, India, Japan, Denmark, Germany and South Korea have sought to deny the benefits of income tax treaties or EU Directives with respect to withholding taxes on interest and dividends and capital gains of nonresident entities. Benefits of income tax treaties or EU Directives could be denied under each country's general anti-avoidance rules or on the basis that the entity benefiting from such treaty or Directive is not the owner of the income, is a mere conduit inserted primarily to access treaty benefits or Directives, or otherwise lacks substance.

These various proposals and initiatives could result in an increase in taxes paid by our funds and/or increased tax withholding with respect to our fund investors. See "—Risks Related to Our Business—Changes in relevant tax laws, regulations or treaties or an adverse interpretation of these items by tax authorities could adversely impact our effective tax rate and tax liability."

As a result of the complexity of our structures, foreign jurisdictions may seek to tax an additional portion of the fee income associated with our management advisory activity. Foreign jurisdictions may assert that an additional amount of fee income is subject to local tax, potentially reducing our profits associated with such income, although this risk may be mitigated by the availability of foreign tax credits. We or our funds may also inadvertently establish a taxable presence in a jurisdiction because of activities conducted there. Compliance with tax laws and structures in these jurisdictions and the costs of adapting to changes in tax policies require significant oversight and cost.

Although we expect that much of the capital commitments of our funds will be denominated in U.S. dollars, our investments and capital commitments that are denominated in a foreign currency, such as euro, will be subject to the risk that the value of a particular currency will change in relation to one or more other currencies. A depreciation of foreign currencies against the U.S. dollar, if not adequately hedged, would reduce the value of our investments in the relevant region, which could adversely impact our financial results. Factors that may affect currency values include trade balances, the ability of countries to pay their national debt, levels of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation and political developments. We may employ hedging techniques to reduce these risks, but we can offer no assurance that such strategies will be effective or even available at all. If we engage in hedging transactions, we may be exposed to additional risks associated with such transactions. See "—Risk management activities may adversely affect the return on our investments." In addition, various countries and regulatory bodies may implement controls on foreign exchange and outbound remittances of currency, which could impact not only the timing and amount of capital contributions that are required to be made to our funds but also the value, in U.S. dollars, of our investments and investment proceeds. See "Risks Related to Our Business—Difficult market and economic conditions can adversely affect our business in many ways, including by reducing the value or performance of the investments that we manage or by reducing the ability of our funds to raise or deploy capital, each of which could negatively impact our net income and cash flow and adversely affect our financial prospects and condition" and "Risks Related to Our Business—Extensive regulation of our businesses affects our activities and creates the potential for significant liabilities and penalties. The possibility of increased regulatory focus or legislative or regulatory changes could materially and adversely affect our business." See also "Management's Discussion and Analysis of Financial Condition and Results of Operations—Business Environment" for a discussion of recent developments in market and business conditions that may affect our business.

Third-party investors in our funds with commitment-based structures may not satisfy their contractual obligation to fund capital calls when requested by us, which could adversely affect a fund's operations and performance.

Investors in certain of our funds make capital commitments to those funds that the funds are entitled to call from those investors at any time during prescribed periods. We depend on fund investors fulfilling their commitments when we call capital from them in order for such funds to consummate investments and otherwise pay their obligations (for example, management fees) when due. Any fund investor that did not fund a capital call would generally be subject to several possible penalties, including having a significant amount of existing investment forfeited in that fund. However, the impact of the penalty is directly correlated to the amount of capital previously invested by the investor in the fund and if an investor has invested little

Table of Contents

or no capital, for instance early in the life of the fund, then the forfeiture penalty may not be as meaningful. Investors may in the future also negotiate for lesser or reduced penalties at the outset of the fund, thereby inhibiting our ability to enforce the funding of a capital call. If our fund investors were to fail to satisfy a significant amount of capital calls for any particular fund or funds, the operation and performance of those funds could be materially and adversely affected.

Our equity investments and many of our debt investments often rank junior to investments made by others, exposing us to greater risk of losing our investment.

In many cases, the companies in which we or our funds invest have, or are permitted to have, outstanding indebtedness or equity securities that rank senior to our or our fund's investment. By their terms, such instruments may provide that their holders are entitled to receive payments of distributions, interest or principal on or before the dates on which payments are to be made in respect of our or our fund's investment. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a company in which an investment is made, holders of securities ranking senior to our investment would typically be entitled to receive payment in full before distributions could be made in respect of our investment. In addition, debt investments made by us or our funds in our portfolio companies may be equitably subordinated to the debt investments made by third parties in our portfolio companies. After repaying senior security holders, the company may not have any remaining assets to use for repaying amounts owed in respect of our investment. To the extent that any assets remain, holders of claims that rank equally with our investment would be entitled to share on an equal and ratable basis in distributions that are made out of those assets. Also, during periods of financial distress or following insolvency, the ability of us or our funds to influence a company's affairs and to take actions to protect an investment may be substantially less than that of the senior creditors.

Risk management activities may adversely affect the return on our investments.

When managing exposure to market risks, we employ hedging strategies or certain forms of derivative instruments to limit our exposure to changes in the relative values of investments that may result from market developments, including changes in prevailing interest rates, currency exchange rates and commodity prices. The scope of risk management activities undertaken by us is selective and varies based on the level and volatility of interest rates, prevailing foreign currency exchange rates, the types of investments that are made and other changing market conditions. We do not seek to hedge our exposure in all currencies or all investments, which means that our exposure to certain market risks are not limited. Where applicable, we use hedging transactions and other derivative instruments to reduce the effects of a decline in the value of a position, but they do not eliminate the possibility of fluctuations in the value of the position or prevent losses if the value of the position declines. However, such activities can establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of the position. Such transactions may also limit the opportunity for gain if the value of a position increases. Moreover, it may not be possible to limit the exposure to a market development that is so generally anticipated that a hedging or other derivative transaction cannot be entered into at an acceptable price.

The success of any hedging or other derivative transactions that we enter into generally will depend on our ability to correctly predict market changes. As a result, while we may enter into such transactions in order to reduce our exposure to market risks, unanticipated market changes may result in poorer overall investment performance than if the hedging or other derivative transaction had not been executed. In addition, the degree of correlation between price movements of the instruments used in connection with hedging activities and price movements in a position being hedged may vary. Moreover, for a variety of reasons, we may not seek or be successful in establishing a perfect correlation between the instruments used in hedging or other derivative transactions and the positions being hedged. An imperfect correlation could prevent us from achieving the intended result and could give rise to a loss. In addition, it may not be possible to fully or perfectly limit our exposure against all changes in the value of its investments, because the value of investments is likely to fluctuate as a result of a number of factors, some of which will be beyond our control or ability to hedge.

While hedging arrangements may reduce certain risks, such arrangements themselves may entail certain other risks. These arrangements may require the posting of cash collateral, including at a time when a fund has insufficient cash or

illiquid assets such that the posting of the cash is either impossible or requires the sale of assets at prices that do not reflect their underlying value. Moreover, these hedging arrangements may generate significant transaction costs, including potential tax costs, that reduce the returns generated by a fund. The CFTC has proposed or adopted regulations governing swaps and security-based swaps, which may limit our trading activities and our ability to implement effective hedging strategies or increase the costs of compliance. See "Risks Related to Our Business—Extensive regulation of our businesses affects our activities and creates the potential for significant liabilities and penalties. The possibility of increased regulatory focus or legislative or regulatory changes could materially and adversely affect our business."

Table of Contents

Our funds and our firm through our balance sheet may make a limited number of investments, or investments that are concentrated in certain issuers, geographic regions or asset types, which could negatively affect our performance or the performance of our funds to the extent those concentrated assets perform poorly.

The governing agreements of our funds contain only limited investment restrictions and only limited requirements as to diversification of fund investments, either by geographic region or asset type. Our private equity funds generally permit up to 20% of the fund to be invested in a single company. We also advise funds that invest in a single industry such as growth equity, energy, infrastructure or real estate or funds that focus on particular geographic region. During periods of difficult market conditions or slowdowns in these sectors or geographic regions, decreased revenues, difficulty in obtaining access to financing and increased funding costs may be exacerbated by this concentration of investments, which would result in lower investment returns. Because a significant portion of a fund's capital may be invested in a single investment or portfolio company, a loss with respect to such investment or portfolio company could have a material adverse impact on such fund's capital. Accordingly, a lack of diversification on the part of a fund could materially and adversely affect a fund's performance and therefore, our results of operations and financial condition.

Similarly, our balance sheet has significant exposures to certain issuers, industries or asset classes. Because we hold interests in some of our portfolio companies both through our balance sheet investments in our private equity funds and direct co-investments, fluctuation in the fair values of these portfolio companies may have a disproportionate impact on the investment income earned by us as compared to other portfolio companies. In these circumstances, as was the case with energy investments beginning in late 2014 through and into 2018, losses may have an even greater impact on our results of operations and financial condition, as we would directly bear the full extent of such losses. Our balance sheet also has significant exposures to a small group of companies, with our investment in First Data Corporation (NYSE: FDC) representing approximately 10.1% and our top five investments representing approximately 26.3% of our balance sheet's total investments as of December 31, 2018. As a result, our investment income is subject to greater volatility depending on such companies' operating results and other idiosyncratic factors specific to such companies, and in the case of publicly traded companies, our operating results would be impacted by volatility in the public markets generally and in the stock price of such companies. See "—Management's Discussion and Analysis of Financial Condition and Results of Operations—Segment Analysis—Segment Balance Sheet" for information on significant investments held on our balance sheet.

Our business activities may give rise to a conflict of interest with our funds.

As we have expanded and as we continue to expand the number and scope of our businesses, we increasingly confront potential conflicts of interest relating to investment activities among our various funds and also our own account. For example:

- In pursuing the interest of our fund investors, we may take actions that could reduce our AUM or our profits that we could otherwise realize in the short term;

- We may be required to allocate investment opportunities among investment vehicles that may have overlapping investment objectives, including vehicles that may have different fee structures, and among KKR co-investment vehicles (including vehicles in which KKR employees may investment) and third-party co-investors;

- We may, on behalf of our funds or KKR itself, buy, sell, hold or otherwise deal with securities or other investments that may be purchased, sold or held by our other funds or that are otherwise issued by a portfolio company in which our funds invest. Conflicts of interest may arise between a fund, on one hand, and KKR on the other or among our funds including but not limited to those relating to the purchase or sale of investments, the structuring of, or exercise of rights with respect to investment transactions and the advice we provide to our funds. For example we may sell an investment at a different time or for different consideration than our funds;

- We may invest on behalf of our fund or for our own account in a portfolio company of one fund that is a competitor, service provider, supplier, customer, or other counterparty with respect to a portfolio company of another fund;

- We may structure an investment in a manner that may be attractive to fund investors or to KKR Holdings from a tax perspective even though KKR is required to pay corporate taxes;

-

A decision to acquire material non-public information about a company while pursuing an investment opportunity for a particular fund or our own account may result in our having to restrict the ability of other funds to take any action with regards to that company or its securities;

Our fiduciary obligations to our fund investors may preclude us from pursuing attractive proprietary investment opportunities, in particular as we enter into strategic relationships with broad investment mandates similar to the

Table of Contents

investments we make with our balance sheet. Notwithstanding the foregoing, we also allocate certain investments that we believe are not suitable for our funds to our balance sheet;

Conflicts may arise in allocating investments, time, services, expenses or resources among the investment activities of our funds, KKR, other KKR-affiliated entities and the employees of KKR;

Our principals have made personal investments in a variety of our investment funds, which may result in conflicts of interest among investors of our funds or stockholders regarding investment decisions for these funds;

The general partner's entitlement to receive carried interest from many of our funds may create an incentive for that general partner to make riskier and more speculative investments on behalf of a fund than would be the case in the absence of such an arrangement. In addition, for our funds that pay carried interest based on accrued rather than realized gains, the amount of carried interest to which the general partner is entitled and the timing of its receipt of carried interest will depend on the valuation by the general partner of the fund's investment;

Under the 2017 Tax Act, investments must be held for more than three years, rather than the prior requirement of more than one year, for carried interest to be treated for U.S. federal income tax purposes as capital gain, which may create a conflict of interest between the limited partner investors (whose investments would receive such capital gain treatment after a holding period of only one year) and the general partner on the execution, closing or timing of sales of a fund's investments in connection with the receipt of carried interest;

From time to time, one of our funds or other investment vehicles (including CLOs) may seek to effect a purchase or sale of an investment with one or more of our other funds or other investment vehicles in a so-called "cross transaction," or we as a principal may seek to effect a purchase or sale of our investment with one or more of our funds or other investment vehicles in a so-called "principal transaction";

A dispute may arise between our portfolio companies, and if such dispute is not resolved amicably or results in litigation, it could cause significant reputational harm to us, and our fund investors may become dissatisfied with our handling of the dispute;

The investors in our investment vehicles are based in a wide variety of jurisdictions and take a wide variety of forms, and consequently have diverging interests among themselves from a regulatory, tax or legal perspective or with respect to investment policies and target risk/return profiles; and

We or our affiliates, including our capital markets business, may receive fees or other compensation in connection with specific transactions or different clients that may give rise to conflicts. The decision to take on an opportunity in one of our businesses may, as a practical matter, also limit the ability of one or our other businesses to take advantage of other related opportunities.

In addition, our funds also invest in a broad range of asset classes throughout the corporate capital structure. These investments include investments in corporate loans and debt securities, preferred equity securities and common equity securities. In certain cases, we may manage separate funds that invest in different parts of the same company's capital structure. For example, our credit funds may invest in different classes of the same company's debt and may make debt investments in a company that is owned by one of our private equity funds. In those cases, the interests of our funds may not always be aligned, which could create actual or potential conflicts of interest or the appearance of such conflicts. For example, one of our private equity funds could have an interest in pursuing an acquisition, divestiture or other transaction that, in its judgment, could enhance the value of the private equity investment, even though the proposed transaction would subject one of our credit fund's debt investments to additional or increased risks. Finally, our ability to effectively implement a public securities strategy may be limited to the extent that contractual obligations entered into in the ordinary course of our private equity business impose restrictions on our engaging in transactions that we may be interested in otherwise pursuing.

We may also cause different investment funds to invest in a single portfolio company, for example where the fund that made an initial investment no longer has capital available to invest. Conflicts may also arise where we make balance sheet investments for our own account or permit employees to invest alongside our investment vehicles or our balance sheet for their own account. In certain cases, we may require that a transaction or investment be approved by fund investors or their advisory committees, be approved by an independent valuation expert, be subject to a fairness opinion, be based on arm's-length pricing data or be calculated in accordance with a formula provided for in a fund's

governing documents prior to the completion of the relevant transaction or investment to address potential conflicts of interest. Such instances include principal transactions where we or our affiliates warehouse an investment in a portfolio company for the benefit of one or more of our funds pending the

74

Table of Contents

contribution of committed capital by the investors in such funds, follow-on investments by a fund other than a fund that made an initial investment in a company, or transactions in which we arrange for one of our funds to buy a security from, or sell a security to, another one of our funds.

Appropriately dealing with conflicts of interest is complex and difficult and we could suffer reputational damage or potential liability if we fail, or appear to fail, to deal appropriately with conflicts as they arise. Regulatory scrutiny of, or litigation in connection with, conflicts of interest could have a material adverse effect on our reputation which could in turn materially and adversely affect our business in a number of ways, including as a result of an inability to raise additional funds and a reluctance of counterparties to do business with us.

Investors in certain funds in our Public Markets business line may redeem their investments in these funds with minimal notice.

Investors in our funds in certain of our leveraged credit investment vehicles may generally submit redemptions to redeem their investments on a quarterly or monthly basis following the expiration of a specified period of time or in certain cases capital may be withdrawn earlier subject to a fee, in each case subject to the applicable fund's specific redemption provisions. Factors that could result in investors leaving our funds include changes in interest rates that make other investments more attractive, changes in or rebalancing due to investors' asset allocation policy, changes in investor perception regarding our focus or alignment of interest, unhappiness with a fund's performance or investment strategy, changes in our reputation, departures or changes in responsibilities of key investment professionals, and performance and liquidity needs of fund investors. In a declining market or period of economic disruption or uncertainty, the pace of redemptions and consequent reduction in our AUM could accelerate. The decrease in revenues that would result from significant redemptions from our funds or other similar investment vehicles could have a material adverse effect on our business, revenues, net income and cash flows.

A portion of assets invested in our funds in the Public Markets business line are managed through separately managed accounts or entities structured for investment by one investor or related investors whereby we earn management and incentive fees, and we intend to continue to seek additional separately managed account or single entity mandates. The investment management agreements we enter into in connection with managing separately managed accounts or entities on behalf of certain clients may be terminated by such clients on as little as 30 days' prior written notice, or less in certain prescribed circumstances. In addition, the boards of directors of certain funds we manage could terminate our advisory engagement of those companies, on as little as 30 days' prior written notice. Similarly, we provide sub-advisory services to other investment advisors and managers. Such investment advisors and managers could terminate our sub-advisory agreements on as little as 30 days' prior written notice. In the case of any such terminations, the management and incentive fees we earn in connection with managing such account or company would immediately cease, which could result in a material adverse impact on our revenues.

In addition, certain funds in our Public Markets business line are registered under the Investment Company Act as management investment companies. These funds and KKR Credit Advisors (US) LLC, which serves as their investment adviser, are subject to the Investment Company Act and the rules thereunder. One of these funds is a NYSE-listed closed-end fund. BDCs in our BDC platform are also registered under the Investment Company Act, including FS KKR Capital Corp., a BDC listed on the NYSE. In addition, the management fees we are paid for managing investment companies will generally be subject to contractual rights the company's board of directors (or, in the case of the BDCs, the investment adviser) has to terminate our management of an account on as short as 60 days' prior notice. Termination of these agreements would reduce the fees we earn from the relevant funds, which could have a material adverse effect on our results of operations.

Our stakes in our hedge fund partnerships subject us to numerous additional risks.

Our stakes in our hedge fund partnerships subject us to numerous additional risks applicable to hedge funds and funds of funds, including the following:

- Generally, there are few limitations on the execution of investment strategies of a hedge fund or fund of funds, which are subject to the sole discretion of the management company or the general partner of such funds;
- A fund of funds is subject to risks related to the limited rights it has to withdraw, redeem, transfer or otherwise liquidate its investments from the underlying hedge funds or other funds in which it invests. It may be impossible or

costly for hedge funds or such other funds to liquidate positions rapidly in order to meet margin calls, withdrawal requests, redemption requests or otherwise, particularly if there are other market participants seeking to dispose of similar assets at the same time or the relevant market is otherwise moving against a position or in the event of trading halts or daily price movement limits on the market or otherwise. In addition, terms of the governing documents of the

Table of Contents

relevant portfolio funds may limit withdrawal, redemption, transfer or liquidation of investments, including restrictions on the redemption of capital for an initial period, restrictions on the amount of redemptions and the frequency with which redemptions can be made and investment minimums that must be maintained. Portfolio funds also typically reserve the right to reduce ("gate") or suspend redemptions, to set aside ("side pocket") capital that cannot be redeemed for so long as an event or circumstance has not occurred or ceased to exist, respectively, and to satisfy redemptions by making distributions in-kind, under certain circumstances. Moreover, these risks may be exacerbated for funds of funds. For example, if a fund of funds were to invest a significant portion of its assets in two or more hedge funds that each had illiquid positions in the same issuer, the illiquidity risk for such fund of funds would be compounded.

Hedge funds may engage in short selling, which is subject to theoretically unlimited loss, in that the price of the underlying security could theoretically increase without limit, thus increasing the cost of buying those securities to cover the short position. There can be no assurance that the security necessary to cover a short position will be available for purchase. Purchasing securities to close out the short position can itself cause the prices of the securities to rise further, thereby exacerbating the loss;

Hedge funds may enter into CDS as investments or hedges. CDS involve greater risks than investing in the reference obligation directly. In addition to general market risks, CDS are subject to risks related to changes in interest rates, credit spreads, credit quality and expected recovery rates of the underlying credit instrument;

Hedge funds are exposed to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the fund to suffer a loss. Counterparty risk is accentuated for contracts with longer maturities where events may intervene to prevent settlement, or where the fund has concentrated its transactions with a single or small group of counterparties. Generally, hedge funds are not restricted from dealing with any particular counterparty or from concentrating any or all of their transactions with one counterparty. Moreover, the fund's internal consideration of the creditworthiness of their counterparties may prove insufficient. The absence of a regulated market to facilitate settlement may increase the potential for losses;

The efficacy of investment and trading strategies depends largely on the ability to establish and maintain an overall market position in a combination of financial instruments. A hedge fund's trading orders may not be executed in a timely and efficient manner due to various circumstances, including systems failures or human error. In such event, the funds might only be able to acquire some but not all of the components of the position, or if the overall position were to need adjustment, the funds might not be able to make such adjustment. As a result, the funds would not be able to achieve the market position selected by the management company or general partner of such funds, and might incur a loss in liquidating their position;

Hedge funds may make investments that they do not advantageously dispose of prior to the date the applicable fund is dissolved, either by expiration of such fund's term or otherwise. Although we generally expect that investments will be disposed of prior to dissolution or be suitable for in-kind distribution at dissolution, these funds may have to sell, distribute or otherwise dispose of investments at a disadvantageous time as a result of dissolution. This would result in a lower than expected return on the investments and, perhaps, on the fund itself;

Hedge funds may rely on computer programs, internal infrastructure and services, quantitative models (both proprietary models and those supplied by third parties) and information and data provided by third parties to trade, clear and settle securities and other transactions, among other activities, that are critical to the oversight of certain funds' activities. If any such models, information or data prove to be incorrect or incomplete, any decisions made in reliance thereon could expose the funds to potential risks. Any hedging based on faulty models, information or data may prove to be unsuccessful and adversely impact a fund's profits; and

Hedge fund investments are also subject to risks relating to investments in commodities, futures, options and other derivatives, the prices of which are highly volatile and may be subject to the theoretically unlimited risk of loss in certain circumstances, including if the fund writes a call option. Price movements of commodities, futures and options contracts and payments pursuant to swap agreements are influenced by, among other things, interest rates, changing supply and demand relationships, trade, fiscal, monetary and exchange control programs and policies of governments

and national and international political and economic events and policies. The value of futures, options and swap agreements also depends upon the price of the commodities underlying them. In addition, hedge funds' assets are subject to the risk of the failure of any of the exchanges on which their positions trade or of their clearinghouses or counterparties. Most U.S. commodities exchanges limit fluctuations in certain commodity interest prices during a single day by imposing "daily price fluctuation limits" or "daily limits," the existence of which may reduce liquidity or

76

Table of Contents

effectively curtail trading in particular markets. Hedge funds and funds of these hedge funds may also be subject to extensive regulations, including those of CFTC.

To the extent the financial condition of PAAMCO Prisma or other third-party hedge fund managers with which we have hedge fund partnerships is adversely affected by these risks, our revenues, AUM and FPAUM may also decline.

Risks Related to Our Common Stock

Our Class A common stock is generally non-voting, except as provided in our certificate of incorporation and bylaws or required by Delaware law or the rules of the NYSE.

Holders of our Class A common stock generally have no voting rights, unless provided in our certificate of incorporation and bylaws or required by Delaware law or the rules of the NYSE. As a result, practically all matters submitted to stockholders will be decided by the vote of the holder of the sole share of the Class B Stockholder. Our certificate of incorporation provides for holders of our Class A common stock, voting together with the holders of our Class C common stock as a single class, unless required otherwise by Delaware law, to have the right to vote only with respect to any increase in the number of authorized shares of Class B common stock, certain sales of all or substantially all of our assets, a merger, consolidation or other business combination and any amendment to our certificate of incorporation that would have a material adverse effect on our Class A common stock relative to the other classes of our stock. Our certificate of incorporation also provides that the number of authorized shares of our Class A common stock may be increased solely with the approval of the Class B Stockholder. As a result, holders of our Class A common stock will have very limited or no ability to influence stockholder decisions, including decisions regarding our business.

The voting rights of holders of our Class A common stock are further restricted by provisions in our certificate of incorporation stating that any of our shares of stock held by a person that beneficially owns 20% or more of any class of stock then outstanding (other than the Class B Stockholder or its affiliates, or a direct or subsequently approved transferee of the Class B Stockholder or its affiliates) cannot be voted on any matter. KKR Holdings, the holder of our Class C common stock, is exempt from this limitation. Our certificate of incorporation and our bylaws also contain provisions limiting the ability of the holders of our Class A common stock to call meetings, to acquire information about our operations and to influence the manner or direction of our management.

These limits on the ability of the holders of the Class A common stock to exercising voting rights restrict the ability of the holders of our Class A common stock to influence matters subject to the vote of our stockholders.

As a "controlled company," we qualify for some exemptions from the corporate governance and other requirements of the NYSE.

We are a "controlled company" within the meaning of the corporate governance standards of the NYSE. As a "controlled company" we have elected not to comply with certain corporate governance requirements of the NYSE, including the requirements: (i) that the listed company have a nominating and corporate governance committee that is composed entirely of independent directors, (ii) that the listed company have a compensation committee that is composed entirely of independent directors and (iii) that the compensation committee be required to consider certain independence factors when engaging compensation consultants, legal counsel and other committee advisers. Accordingly, holders of our Class A common stock do not have the same protections afforded to stockholders of companies that are subject to all of the corporate governance requirements of the NYSE.

Our founders are able to significantly influence the outcome of any matter that may be submitted for a vote of holders of our Class A common stock.

To the extent that any matters are required to be submitted to a vote of the holders of our Class A common stock, they will generally require the approval of a majority or more of all the outstanding designated stock, which currently consists of our Class A common stock and Class C common stock voting together. Matters that require a vote of a majority or more of all outstanding designated stock include any increase in the number of authorized shares of Class B common stock, certain sales of all or substantially all of our assets, a merger, consolidation or other business combination and any amendment to our certificate of incorporation that would have a material adverse effect on our Class A common stock relative to the other classes of our stock. As a result, the holders of our Class C common stock will vote on an equivalent basis with the holders of our Class A common stock on such matters. As of February 12, 2019, KKR Holdings owned 299,081,239 shares of Class C common stock, representing approximately 35.9% of the total combined voting power of the Class A common stock and Class C common

Table of Contents

stock, taken together. This voting power may be sufficient to substantially influence matters subject to a vote of our outstanding designated stock, including amendments that could materially and adversely affect the holders of our Class A common stock.

Because our Class A common stock is generally non-voting, we are not required to comply with certain provisions of U.S. securities laws relating to proxy statements and other annual meeting materials.

Our Class A common stock is registered under Section 12 of the Exchange Act and is generally non-voting. As a result, we are not required to file proxy statements or information statements under Section 14 of the Exchange Act, unless a vote of holders of our Class A common stock is required by applicable law or the rules of the NYSE. Accordingly, legal causes of action and remedies under Section 14 of the Exchange Act for inadequate or misleading information in proxy statements will not generally be available to holders of our Class A common stock. If we do not deliver any proxy statements, information statements, annual reports, and other information and reports to the Class B Stockholder, then we will similarly not provide any of this information to the holders of our Class A common stock. In addition, we will generally not be subject to the "say-on-pay" and "say-on-frequency" provisions of the Dodd-Frank Act. As a result, our stockholders will not have an opportunity to provide a non-binding vote on the compensation of our named executive officers. Moreover, holders of our Class A common stock will be unable to bring matters before our annual meeting of stockholders or nominate directors at such meeting, nor can they generally submit stockholder proposals under Rule 14a-8 of the Exchange Act.

Our certificate of incorporation states that the Class B Stockholder is under no obligation to consider the separate interests of the other stockholders and contains provisions limiting the liability of the Class B Stockholder.

Our Class A common stock is generally non-voting. As a result, all or nearly all matters required to be submitted to stockholders will be determined solely by the vote of the Class B Stockholder. Subject to applicable law, our certificate of incorporation contains provisions limiting the duties owed by the Class B Stockholder and contains provisions allowing the Class B Stockholder to favor its own interests and the interests of its controlling persons over us and the holders of our Class A common stock. Our certificate of incorporation contains provisions stating that the Class B Stockholder is under no obligation to consider the separate interests of the other stockholders (including the tax consequences to such stockholders) in deciding whether or not to authorize us to take (or decline to authorize us to take) any action as well as provisions stating that the Class B Stockholder shall not be liable to the other stockholders for damages or equitable relief for any losses, liabilities or benefits not derived by such stockholders in connection with such decisions. See "—Potential conflicts of interest may arise among the Class B Stockholder and the holders of our Class A common stock."

The Class B Stockholder will not be liable to KKR or holders of our Class A common stock for any acts, or omissions unless there has been a final and non-appealable judgment determining that the Class B Stockholder acted in bad faith or engaged in fraud or willful misconduct and we have also agreed to indemnify the Class B Stockholder to a similar extent.

Even if there is deemed to be a breach of the obligations set forth in our certificate of incorporation, our certificate of incorporation provides that the Class B Stockholder will not be liable to us or the holders of our Class A common stock for any acts or omissions unless there has been a final and non-appealable judgment by a court of competent jurisdiction determining that the Class B Stockholder or its officers and directors acted in bad faith or engaged in fraud or willful misconduct. These provisions are detrimental to the holders of our Class A common stock because they restrict the remedies available to stockholders for actions of the Class B Stockholder.

In addition, we have agreed to indemnify the Class B Stockholder and its affiliates and any member, partner, Tax Matters Partner (as defined in U.S. Internal Revenue Code of 1986, as amended (the "Code"), as in effect prior to 2018), Partnership Representative (as defined in the Code), officer, director, employee agent, fiduciary or trustee of any of KKR or its subsidiaries, any KKR Group Partnership, the Class B Stockholder or any of our or the Class B Stockholder's affiliates and certain other specified persons (collectively, the "Indemnitees"), to the fullest extent permitted by law, against any and all losses, claims, damages, liabilities, joint or several, expenses (including legal fees and expenses), judgments, fines, penalties, interest, settlements or other amounts incurred by any Indemnitee. We have agreed to provide this indemnification unless there has been a final and non-appealable judgment by a court of competent jurisdiction determining that the Indemnitee acted in bad faith or engaged in fraud or willful misconduct. We have also agreed to provide this indemnification for criminal proceedings.

The provision of our certificate of incorporation requiring exclusive venue in the Court of Chancery in the State of Delaware for certain types of lawsuits may have the effect of discouraging lawsuits against us and our directors, officers and stockholders.

Our certificate of incorporation requires, to the fullest extent permitted by law, that any claims, suits, actions or proceedings arising out of or relating in any way to our certificate of incorporation may only be brought in the Court of

Table of Contents

Chancery of the State of Delaware or, if such court does not have subject matter jurisdiction thereof, any other court in the State of Delaware with subject matter jurisdiction. This provision may have the effect of discouraging lawsuits against us and our directors, officers and stockholders.

The market price and trading volume of our Class A common stock may be volatile, which could result in rapid and substantial losses for our Class A common stockholders.

The market price of our Class A common stock may be highly volatile, could be subject to wide fluctuations and could decline significantly in the future. In addition, the trading volume in our Class A common stock may fluctuate and cause significant price variations to occur. If the market price of our Class A common stock declines significantly, you may be unable to sell your shares at an attractive price, if at all. Some of the factors that could negatively affect the price of our Class A common stock or result in fluctuations in the price or trading volume of our Class A common stock include:

- variations in our quarterly operating results, including the accrual and payment of corporate taxes following the Conversion, which may be substantial;
- changes in the amount of our dividends or our dividend policy;
- taking a long-term perspective on making investment, operational and strategic decisions, which may result in significant and unpredictable variations in our quarterly returns;
- failure to meet analysts' earnings estimates;
- publication of research reports about us or the investment management industry or the failure of securities analysts to cover our Class A common stock sufficiently;
- additions or departures of our key management and investment personnel;
- adverse market reaction to any acquisitions, joint ventures, reorganizations and other transactions, including incurrence of debt or issuance of securities in the future;
- changes in market valuations of similar companies;
- speculation in the press or investment community;
- changes or proposed changes in laws or regulations or differing interpretations thereof affecting our business or enforcement of these laws and regulations, or announcements relating to these matters;
- a concentrated ownership of our Class A common stock or ownership by short-term investors;
- a lack of liquidity in the trading of our Class A common stock;
- adverse publicity about the investment management or private equity industry generally or individual scandals, specifically; and
- general market and economic conditions.

An investment in our Class A common stock is not an investment in any of our funds, and the assets and revenues of our funds are not directly available to us.

Our Class A common stock is only securities of KKR & Co. Inc., the holding company of the KKR business. While our historical consolidated financial statements include financial information, including assets and revenues, of certain funds on a consolidated basis, and our future financial statements will continue to consolidate certain of these funds, such assets and revenues are available to the fund and not to us except to a limited extent through management fees, carried interest or other incentive income, distributions and other proceeds arising from agreements with funds, as discussed in more detail in this report.

Table of Contents

Our Class A common stock price may decline due to the large number of shares eligible for future sale or for exchange, and issued or issuable pursuant to our equity incentive plans or as consideration in acquisitions.

The market price of our Class A common stock could decline as a result of sales of a large number of shares in the market or the perception that such sales could occur. These sales, or the possibility that these sales may occur, also might make it more difficult for us to sell shares of Class A common stock in the future at a time and at a price that we deem appropriate. As of February 12, 2019, we have 533,486,948 shares of Class A common stock outstanding, which amount excludes shares beneficially owned by KKR Holdings in the form of KKR Group Partnership Units discussed below and shares available for future issuance under our Equity Incentive Plan or our New Equity Incentive Plan.

As of February 12, 2019, KKR Holdings owns 299,081,239 KKR Group Partnership Units that may be exchanged, on a quarterly basis, for our shares of Class A common stock on a one-for-one basis, subject to customary conversion rate adjustments for splits, unit distributions and reclassifications. The market price of our Class A common stock could decline as a result of the exchange or the perception that an exchange may occur of a large number of KKR Group Partnership Units for shares of our Class A common stock. These exchanges, or the possibility that these exchanges may occur, also might make it more difficult for holders of our Class A common stock to sell shares of our Class A common stock in the future at a time and at a price that they deem appropriate.

In addition, we will continue to issue additional shares of Class A common stock pursuant to our equity incentive plans, and such issuances may increase in the future as equity awards granted by KKR Holdings decrease. See "Risks Related to Our Business—If we cannot retain and motivate our employees and other key personnel and recruit, retain and motivate new employees and other key personnel, our business, results of operations and financial condition could be materially and adversely affected." As of March 29, 2019, the effective date of our New Equity Incentive Plan, 125,090,771 shares of Class A common stock, representing 15% of the aggregate number of shares of Class A common stock and KKR Group Partnership Units (excluding KKR Group Partnership Units held by KKR & Co. Inc. or its wholly-owned subsidiaries) outstanding at the close of business on December 31, 2018, will be available for issuance in respect of outstanding awards and the grant of future awards, in each case, under our New Equity Incentive Plan. Thereafter, on the first day of each fiscal year beginning in 2020, the number of shares of Class A common stock available for issuance of future awards under our New Equity Incentive Plan will be adjusted upwards to 15% of the aggregate number of shares of Class A common stock and KKR Group Partnership Units (excluding KKR Group Partnership Units held by KKR & Co. Inc. or its wholly-owned subsidiaries) outstanding at the close of business on the last day of the immediately preceding fiscal year, minus the number of shares underlying any outstanding equity awards granted under our New Equity Incentive Plan that have not yet been delivered upon vesting. In addition, previously issued awards that were canceled or are canceled in the future, or in certain cases, withheld in respect of tax withholding obligations, are or will become available for further grant under the terms of our New Equity Incentive Plan. See "Executive Compensation—KKR & Co. Inc. Equity Incentive Plan." In the past, we have issued and sold KKR & Co. Inc. Class A common stock to generate cash proceeds to pay withholding taxes, social benefit payments or similar payments payable by us in respect of awards granted pursuant to our Equity Incentive Plan or the amount of cash delivered in respect of awards granted pursuant to our Equity Incentive Plan that are settled in cash instead of Class A common stock. We may issue and sell shares of our Class A common stock in the future for similar purposes.

We have used and in the future may continue to use Class A common stock as consideration in acquisitions and strategic investments. For example, in connection with KKR's acquisition of KFN, we issued the equivalent of approximately 104.3 million shares of our Class A common stock, in connection with KKR's acquisition of Avoca, we issued the equivalent of approximately 4.9 million shares of our Class A common stock and in connection with KKR's initial acquisition and subsequent increase in ownership of Marshall Wace, we have to date issued the equivalent of approximately 17.3 million shares of our Class A common stock. In addition, in connection with the Marshall Wace transaction or other investments or acquisitions, we may make certain future contingent payments in the form of Class A common stock. If our valuations of these transactions are not accurate or if the value of these acquisitions and investments is not realized, the value of our Class A common stock as well as our dividend per share of Class A common stock may decline.

Our issuance of preferred stock may cause the price of our Class A common stock to decline, which may negatively impact our Class A common stockholders.

Our board of directors is authorized to issue series of shares of preferred stock without any action on the part of our stockholders and, with respect to each such series, fix, without stockholder approval (except as may be required by our certificate of incorporation or any certificate of designation relating to any outstanding series of preferred stock), the designation of such series, the powers (including voting powers), preferences and relative, participating, optional and other special rights, and the qualifications, limitations or restrictions thereof, of such series of preferred stock and the number of shares of such series. Any series of preferred stock we may issue in the future will rank senior to all of our Class A common

80

Table of Contents

stock with respect to the payment of dividends or upon our liquidation, dissolution, or winding-up. If we issue cumulative preferred stock in the future that has preference over our Class A common stock with respect to the payment of dividends or upon our liquidation, dissolution, or winding up, or if we issue preferred stock with voting rights that dilute the voting power of our Class A common stockholders in the limited instances in which they have the right to vote, the market price of our Class A common stock could decrease. Similarly, the limited partnership agreements of the KKR Group Partnerships authorize the general partners of the KKR Group Partnerships to issue an unlimited number of additional securities of the KKR Group Partnerships with such designations, preferences, rights, powers and duties that are different from, and may be senior to, those applicable to the KKR Group Partnerships Units, and which may be exchangeable for KKR Group Partnership Units. For example, in March and June of 2016, KKR issued 13,800,000 Series A preferred units (which have subsequently been converted to shares of Series A Preferred Stock) and 6,200,000 Series B preferred units (which have subsequently been converted to shares of Series B Preferred Stock), respectively, and in connection with such issuances, the KKR Group Partnerships issued preferred units with economic terms designed to mirror KKR's respective preferred units.

Our certificate of incorporation also provides us with a right to acquire all of the then outstanding shares of Class A common stock under specified circumstances, which may adversely affect the price of our shares of Class A common stock and the ability of holders of shares of Class A common stock to participate in further growth in our stock price. Our certificate of incorporation provides that, if at any time, either (i) less than 10% of the total shares of any class our stock then outstanding (other than Class B common stock, Class C common stock and preferred stock) is held by persons other than the Class B Stockholder and its affiliates or (ii) we are subjected to registration under the provisions of the Investment Company Act, we may exercise our right to call and purchase all of the then outstanding shares of Class A common stock held by persons other than the Class B Stockholder or its affiliates or assign this right to the Class B Stockholder or any of its affiliates. As a result, a stockholder may have his or her shares of Class A common stock purchased from him or her at an undesirable time or price and in a manner which adversely affects the ability of a stockholder to participate in further growth in our stock price.

Risks Related to Our Organizational Structure

Potential conflicts of interest may arise among the Class B Stockholder and the holders of our Class A common stock.

The Class B Stockholder is controlled by our senior employees. Our founders, who also serve as our Co-Chairmen and Co-Chief Executive Officers, are the designated members of the Class B Stockholder and are deemed to represent a majority of the total voting power of the Class B Stockholder when acting together. As a result, conflicts of interest may arise among the Class B Stockholder and its controlling persons, on the one hand, and us and the holders of our Class A common stock, on the other hand.

The Class B Stockholder has the ability to influence our business and affairs through its ownership of the sole share of voting stock of KKR & Co. Inc., the Class B Stockholder's general ability to appoint our board of directors, and provisions under our certificate of incorporation requiring Class B Stockholder approval for certain corporate actions (in addition to approval by our board of directors). See "—Certain actions by our board of directors require the approval of the Class B Stockholder, which is controlled by our senior employees." If the holders of our Class A common stock are dissatisfied with the performance of our board of directors, they have no ability to remove any of our directors, with or without cause.

Further, through its ability to elect our board of directors, the Class B Stockholder has the ability to indirectly influence the determination of the amount and timing of the KKR Group Partnerships' investments and dispositions, cash expenditures, including those relating to compensation, indebtedness, issuances of additional partner interests, tax liabilities and amounts of reserves, each of which can affect the amount of cash that is available for distribution to holders of KKR Group Partnership Units.

In addition, conflicts may arise relating to the selection, structuring and disposition of investments and other transactions, declaring dividends and other distributions and other matters due to the fact that our senior principals indirectly hold KKR Group Partnership Units through KKR Holdings and its subsidiaries, which are pass-through entities that are not subject to corporate income taxation.

Table of Contents

Certain actions by our board of directors require the approval of the Class B Stockholder, which is controlled by our senior employees.

Although the affirmative vote of a majority of our directors is required for any action to be taken by our board of directors, certain specified actions will also require the approval of the Class B Stockholder, which is controlled by our senior employees. These actions consist of the following:

- the entry into a debt financing arrangement by us in an amount in excess of 10% of our then existing long-term indebtedness (other than the entry into certain intercompany debt financing arrangements);
- the issuance by us or our subsidiaries of any securities that would (i) represent, after such issuance, or upon conversion, exchange or exercise, as the case may be, at least 5% on a fully diluted, as converted, exchanged or exercised basis, of any class of our or their equity securities or (ii) have designations, preferences, rights, priorities or powers that are more favorable than those of the Class A common stock;
- the adoption by us of a shareholder rights plan;
- the amendment of our certificate of incorporation, certain provisions of our bylaws relating to our board of directors and officers or the operating agreements of the KKR Group Partnerships;
- the exchange or disposition of all or substantially all of our assets or the assets of any KKR Group Partnership;
- the merger, sale or other combination of our company or any KKR Group Partnership with or into any other person;
- the transfer, mortgage, pledge, hypothecation or grant of a security interest in all or substantially all of the assets of the KKR Group Partnerships;
- the appointment or removal of our Chief Executive Officer or a Co-Chief Executive Officer;
- the termination of our employment of any of our officers or the officers of any of our subsidiaries or the termination of the association of a partner with any of our subsidiaries, in each case, without cause;
- the liquidation or dissolution of us or any KKR Group Partnership; and
- the withdrawal, removal or substitution of any person as the general partner of a KKR Group Partnership or the transfer of beneficial ownership of all or any part of a general partner interest in a KKR Group Partnership to any person other than a wholly-owned subsidiary.

The Class B Stockholder may transfer its interest in the sole share of Class B Common Stock which could materially alter our operations.

The Class B Stockholder may transfer the sole outstanding share of our Class B common stock held by it to a third party upon receipt of approval to do so by our board of directors and satisfaction of certain other requirements, and without the consent of the holders of our Class A common stock and Class C common stock. Further, the members of the Class B Stockholder may sell or transfer all or part of their limited liability company interests in the Class B Stockholder at any time without KKR's approval. A new holder of our Class B common stock or new controlling members of the Class B Stockholder may appoint directors to our board of directors who have a different philosophy and/or investment objectives from those of our current directors. A new holder of our Class B common stock, new controlling members of the Class B Stockholder and/or the directors they appoint to our board of directors could also have a different philosophy for the management of our business, including the hiring and compensation of our investment professionals. If any of the foregoing were to occur, we could experience difficulty in forming new funds and other investment vehicles and in making new investments, and the value of our existing investments, our business, our results of operations and our financial condition could materially suffer.

We intend to pay periodic dividends to the holders of our Class A common stock and preferred stock, but our ability to do so may be limited by our holding company structure and contractual restrictions.

We intend to pay cash dividends on a quarterly basis. We are a holding company and have no material assets other than the KKR Group Partnership Units that we hold through wholly-owned subsidiaries and have no independent means of generating income. Accordingly, we intend to cause the KKR Group Partnerships to make distributions on the KKR Group Partnership Units, including KKR Group Partnership Units that we directly or indirectly hold, in order to provide us with sufficient amounts to fund dividends we may declare. If the KKR Group Partnerships make such distributions, other holders of KKR Group Partnership Units, including KKR Holdings, will be entitled to receive

equivalent distributions pro rata based on their KKR Group Partnership Units.

82

Table of Contents

The declaration and payment of dividends to our Class A common stockholders will be at the sole discretion of our board of directors, and our dividend policy may be changed at any time. The declaration and payment of dividends is subject to legal, contractual and regulatory restrictions on the payment of distributions by us or our subsidiaries, including restrictions contained in our debt agreements, the terms of our certificate of incorporation, and such other factors as the board of directors considers relevant including, among others: our available cash and current and anticipated cash needs, including funding of investment commitments and debt service and future debt repayment obligations; general economic and business conditions; our strategic plans and prospects; our results of operations and financial condition; and our capital requirements. Under Section 170 of the Delaware General Corporation Law ("DGCL"), our board of directors may only declare and pay dividends either out of our surplus (as defined in DGCL) or in case there is no such surplus, out of our net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year. However, dividends may not be declared out of net profits if our capital, computed in accordance with DGCL, shall have been diminished by depreciation in the value of our property, or by losses, or otherwise, to an amount less than the aggregate amount of the capital represented by the issued and outstanding stock of all classes having a preference upon the distribution of assets. Furthermore, by paying cash dividends rather than investing that cash in our businesses, we risk slowing the pace of our growth, or not having a sufficient amount of cash to fund our operations, new investments or unanticipated capital expenditures, should the need arise. Our preferred stock ranks senior to our Class A common stock with respect to the payment of dividends. Unless dividends have been declared and paid or declared and set apart for payment on the preferred stock for a quarterly dividend period, during the remainder of that dividend period we may not declare or pay or set apart payment for dividends on any class of stock of KKR & Co. Inc. that are junior to the preferred stock, including our Class A common stock, and we may not repurchase any such junior stock.

Dividends on the preferred stock are discretionary and non-cumulative. Holders of preferred stock will only receive dividends on their shares of preferred stock when, as and if declared by our board of directors. If dividends on a series of the preferred stock have not been declared and paid for the equivalent of six or more quarterly dividend periods, whether or not consecutive, holders of the preferred stock, together as a class with holders of any other series of parity stock with like voting rights, will be entitled to vote for the election of two additional directors to our board of directors. When quarterly dividends have been declared and paid on such series of the preferred stock for four consecutive quarters following such a nonpayment event, the right of the holders of the preferred stock and such parity stock to elect these two additional directors will cease, the terms of office of these two directors will forthwith terminate and the number of directors constituting our board of directors will be reduced accordingly. Additional risks related to our Series A Preferred Stock and Series B Preferred Stock are contained in the prospectus supplement relating to the respective securities.

We will be required to pay our principals for most of the benefits relating to our use of tax attributes we receive from prior and future exchanges of our Class A common stock for KKR Group Partnership Units and related transactions. We are required to acquire KKR Group Partnership Units from time to time pursuant to our exchange agreement with KKR Holdings. Certain of these exchanges are expected to result in an increase in our share of the tax basis of the tangible and intangible assets of the KKR Group Partnerships, primarily attributable to a portion of the goodwill inherent in our business that would not otherwise have been available. This increase in tax basis may increase (for tax purposes) depreciation and amortization and therefore reduce the amount of income tax we would otherwise be required to pay in the future. This increase in tax basis may also decrease gain (or increase loss) on future dispositions of certain capital assets to the extent tax basis is allocated to those capital assets.

We have entered into a tax receivable agreement with KKR Holdings, which requires us to pay to KKR Holdings or to current and former principals who have exchanged KKR Holdings units for shares of Class A common stock as transferees of KKR Group Partnership Units, 85% of the amount of cash tax savings, if any, in U.S. federal, state and local income tax that we realize as a result of this increase in tax basis, as well as 85% of the amount of any such savings we actually realize as a result of increases in tax basis that arise due to future payments under the agreement. A termination of the agreement or a change of control could give rise to similar payments based on tax savings that we would be deemed to realize in connection with such events. These payment obligations are obligations of KKR & Co.

Inc. and certain of its intermediate holding companies and not of any KKR Group Partnership. While the actual increase in tax basis, as well as the amount and timing of any payments under the tax receivable agreement, will vary depending upon a number of factors, including the timing of exchanges, the price of our Class A common stock at the time of the exchange, the extent to which such exchanges are taxable and the amount and timing of our taxable income, we expect that as a result of the size of the increases in the tax basis of the tangible and intangible assets of the KKR Group Partnerships, the payments that we may be required to make to KKR Holdings or transferees of its KKR Group Partnership Units will be substantial.

We recorded \$117.9 million in our consolidated statements of financial condition as of December 31, 2018, representing the estimated aggregate future payment amount, on an undiscounted basis, under the tax receivable agreement as of such date

Table of Contents

for previously exchanged KKR Holdings units. See Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity—Other Liquidity Needs—Contractual Obligations, Commitments and Contingencies." As of December 31, 2018, 299.1 million KKR Holdings units (the "Remaining KKR Holdings Units") remained available for exchange into shares of our Class A common stock. The present value of our aggregate cash tax savings is highly dependent on the assumed discount rate used for its calculation. Assuming (i) all of the Remaining KKR Holdings Units had been exchanged for shares of our Class A common stock on December 31, 2018, (ii) all such exchanges were taxable to the exchanging unitholders, (iii) the market value of our Class A common stock was \$19.63 per share (which was the closing price on December 31, 2018), and (iv) our effective tax rate, for federal, state and local income tax combined, was 23.25%, we estimate that the present value of our aggregate cash tax savings over the next 15 years attributable to such hypothetical exchange of the Remaining KKR Holdings Units would have been approximately \$807 million assuming a 7% per annum discount rate and approximately \$529 million assuming a 15% per annum discount rate. Using the assumptions above, we estimate our payments under the tax receivable agreement to KKR Holdings and current and former principals who exchange KKR Holdings units in the future to be 85% of the foregoing amounts, or \$686 million using a 7% discount rate and \$450 million using a 15% discount rate. The estimates above also assume that we would have taxable income sufficient to fully utilize the deductions arising from the increase in tax basis and any interest imputed with respect to our payment obligations under the tax receivable agreement, and that there would be no future changes to federal, state or local income tax rates. The assumptions and estimates described above are for illustrative purposes only. These estimates are not intended to be a projection of any future financial results, and the actual increases in tax basis and any payments under the tax receivable agreement resulting from any exchanges of KKR Holdings units that occur in the future are expected to vary materially from these estimates. Moreover, the method for calculating the estimated aggregate future payment amount recorded in our financial statements differs in material respects from the assumptions used to calculate the present value of our aggregate cash tax savings over the next 15 years attributable to the hypothetical exchange of all Remaining KKR Holding Units. For example, no discount rate has been applied to the estimated aggregate future payment amount for previously exchanged KKR Holdings units.

We may need to incur debt to finance payments under the tax receivable agreement to the extent our cash resources are insufficient to meet our obligations under the tax receivable agreement as a result of timing discrepancies or otherwise. In particular, our obligations under the tax receivable agreement would be effectively accelerated in the event of an early termination of the tax receivable agreement by us or in the event of certain mergers, asset sales and other forms of business combinations or other changes of control. In these situations, we would be required to pay an early termination payment based upon the net present value of all tax benefits that would be required to be paid by us to KKR Holdings and current and former principals who have exchanged KKR Holdings units. The method used to calculate the early termination payment is prescribed in the tax receivable agreement and the assumptions used for this purpose, including an applicable discount rate, which currently is LIBOR (as defined) plus 1% (LIBOR plus 1% was 3.50269% as of December 31, 2018), differ in material respects from the assumptions used to calculate the estimated present value of our aggregate cash tax savings for the hypothetical exchange of all Remaining KKR Holdings Units or the estimated payment amount for previously exchanged KKR Holdings units that is recorded in our financial statements. Accordingly, as of December 31, 2018, the amount of early termination payment would have been significantly larger than the present value of the estimated payments under the tax receivable agreement described above. At the time of the filing of this Annual Report, we have no intention to exercise the early termination right. Payments under the tax receivable agreement will be based upon the tax reporting positions that we will determine. We are not aware of any issue that would cause the Internal Revenue Service (the "IRS") to challenge a tax basis increase. However, neither KKR Holdings nor its transferees will reimburse us for any payments previously made under the tax receivable agreement if such tax basis increase, or the tax benefits we claim arising from such increase, is successfully challenged by the IRS. As a result, in certain circumstances, payments to KKR Holdings or its transferees under the tax receivable agreement could be in excess of our cash tax savings. Our ability to achieve benefits from any tax basis increase, and the payments to be made under the tax receivable agreement, will depend upon a number of factors, as discussed above, including the timing and amount of our future income.

If we were deemed to be an "investment company" subject to regulation under the Investment Company Act, applicable restrictions could make it impractical for us to continue our business as contemplated and could have a material adverse effect on our business.

A person will generally be deemed to be an "investment company" for purposes of the Investment Company Act if:

- it is or holds itself out as being engaged primarily, or proposes to engage primarily, in the business of investing, reinvesting or trading in securities; or
- absent an applicable exemption, it owns or proposes to acquire investment securities having a value exceeding 40% of the value of its total assets (exclusive of U.S. government securities and cash items) on an unconsolidated basis.

Table of Contents

We believe that we are engaged primarily in the business of providing investment management services and not in the business of investing, reinvesting or trading in securities. We regard ourselves as an investment management firm and do not propose to engage primarily in the business of investing, reinvesting or trading in securities. Accordingly, we do not believe that we are an "orthodox" investment company as defined in Section 3(a)(1)(A) of the Investment Company Act and described in the first bullet point above.

With regard to the provision described in the second bullet point above, we have no material assets other than our equity interests in subsidiaries, which in turn have no material assets other than equity interests, directly or indirectly, in the KKR Group Partnerships. Through these interests, we indirectly are the sole general partners of the KKR Group Partnerships and indirectly are vested with all management and control over the KKR Group Partnerships. We do not believe our equity interests in our subsidiaries are investment securities, and we believe that the capital interests of the general partners of our funds in their respective funds are neither securities nor investment securities. Accordingly, based on our determination, less than 40% of the partnership's total assets (exclusive of U.S. government securities and cash items) on an unconsolidated basis are comprised of assets that could be considered investment securities. However, our subsidiaries have a significant number of investment securities, and we expect to make investments in other investment securities from time to time. We monitor these holdings regularly to confirm our continued compliance with the 40% test described in the second bullet point above. The need to comply with this 40% test may cause us to restrict our business and subsidiaries with respect to the assets in which we can invest and/or the types of securities we may issue, sell investment securities, including on unfavorable terms, acquire assets or businesses that could change the nature of our business or potentially take other actions that may be viewed as adverse by the holders of our Class A common stock, in order to ensure conformity with exceptions provided by, and rules and regulations promulgated under, the Investment Company Act.

The Investment Company Act and the rules and regulations thereunder contain detailed parameters for the organization and operation of investment companies. Among other things, the Investment Company Act and the rules and regulations thereunder limit or prohibit transactions with affiliates, impose limitations on the issuance of debt and equity securities, generally prohibit the issuance of options and impose certain governance requirements. We intend to conduct our operations so that we will not be deemed to be an investment company under the Investment Company Act. If anything were to happen which would cause us to be deemed to be an investment company under the Investment Company Act, requirements imposed by the Investment Company Act, including limitations on our capital structure, ability to transact business with affiliates and ability to compensate key employees, would make it impractical for us to continue our business as currently conducted, impair the agreements and arrangements between and among us, including the KKR Group Partnerships, and KKR Holdings, and materially and adversely affect our business, results of operations and financial condition. In addition, we may be required to limit the amount of investments that we make as a principal, potentially divest of our investments or otherwise conduct our business in a manner that does not subject us to the registration and other requirements of the Investment Company Act.

With respect to our subsidiary KFN, we believe it is not and does not propose to be primarily engaged in the business of investing, reinvesting or trading in securities, and we do not believe that KFN has held itself out as such. KFN conducts its operations primarily through its majority-owned subsidiaries, each of which is either outside of the definition of an investment company as defined in the Investment Company Act or excepted from such definition under the Investment Company Act. KFN monitors its holdings regularly to confirm its continued compliance with the 40% test described in the second bullet point above, and restricts its subsidiaries with respect to the assets in which each of them can invest and/or the types of securities each of them may issue in order to ensure conformity with exceptions provided by, and rules and regulations promulgated under, the Investment Company Act. If the SEC were to disagree with KFN's treatment of one or more of its subsidiaries as being excepted from the Investment Company Act, with its determination that one or more of its other holdings are not investment securities for purposes of the 40% test, or with its determinations as to the nature of its business or the manner in which it holds itself out, KFN and/or one or more of its subsidiaries could be required either (i) to change substantially the manner in which it conducts its operations to avoid being subject to the Investment Company Act or (ii) to register as an investment company. Either of these would likely have a material adverse effect on KFN, its ability to service its indebtedness and to make

distributions on its shares, and on the market price of its securities, and could thereby materially and adversely affect our business, results of operations and financial condition.

On August 31, 2011 the SEC published an advance notice of proposed rulemaking regarding Rule 3a-7 under the Investment Company Act and a concept release seeking information on Section 3(c)(5)(C) of the Investment Company Act, two provisions with which KKR's subsidiaries, including KFN, must comply under the 40% test described above. Among the issues for which the SEC has requested comment is whether Rule 3a-7 should be modified so that parent companies of subsidiaries that rely on Rule 3a-7 should treat their interests in such subsidiaries as investment securities for purposes of the 40% test. The SEC is also seeking information about the nature of entities that invest in mortgages and mortgage-related pools and how the SEC staff's interpretive positions in connection with Section 3(c)(5)(C) affect these entities. Although no further action has been taken by the SEC, any guidance or action from the SEC or its staff, including changes that the SEC may ultimately propose and

Table of Contents

adopt to the way Rule 3a-7 applies to entities or new or modified interpretive positions related to Section 3(c)(5)(C), could further inhibit KKR's ability, or the ability of any of its subsidiaries, including KFN, to pursue its current or future operating strategies, which could have a material adverse effect on us.

We may from time to time undertake internal reorganizations that may adversely impact our business and results of operations.

On July 1, 2018, we converted from a Delaware limited partnership to a Delaware corporation. From time to time, we may undertake other internal reorganizations in an effort to simplify our organizational structure, streamline our operations or for other operational reasons. Such internal reorganization may involve, among other things, the combination or dissolution of certain of our existing subsidiaries and the creation of new subsidiaries. These transactions could be disruptive to our business, result in significant expense, require regulatory approvals, and fail to result in the intended or expected benefits, any of which could adversely impact our business and results of operations.

Other anti-takeover provisions in our charter documents could delay or prevent a change in control.

In addition to the provisions described elsewhere relating to the Class B Stockholder's control, other provisions in our certificate of incorporation and bylaws may discourage, delay or prevent a merger or acquisition that a stockholder may consider favorable by, for example:

- permitting our board of directors to issue one or more series of preferred stock;
- requiring advance notice for stockholder proposals and nominations if they are ever permitted by applicable law; and
- placing limitations on convening stockholder meetings.

These provisions may also discourage acquisition proposals or delay or prevent a change in control.

Table of Contents

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our principal executive offices are located in leased office space at 9 West 57th Street, New York, New York. We also lease space for our other offices. We consider these facilities to be suitable and adequate for the management and operations of our business.

On October 29, 2015, we entered into agreements relating to the construction and development of office space at 30 Hudson Yards in New York, New York to serve as our principal executive offices beginning in 2020. Upon the satisfaction of the conditions specified in the development agreement, we will take delivery of the completed office space in 2019.

ITEM 3. LEGAL PROCEEDINGS.

The section entitled "Litigation" appearing in Note 16 "Commitments and Contingencies" to our consolidated financial statements included elsewhere in this report is incorporated herein by reference.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

Table of Contents

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

Shares of our Class A common stock are listed on the NYSE under the symbol "KKR."

The number of holders of record of our Class A common stock as of February 12, 2019 was 28. This does not include the number of stockholders that hold shares in "street-name" through banks or broker-dealers.

Dividend Policy

Under our dividend policy for Class A common stock, we expect to pay our Class A common stockholders an annualized dividend of \$0.50 per share of Class A common stock, equal to a quarterly dividend of \$0.125 per share of Class A common stock. Our regular dividend of \$0.125 per share of Class A common stock was declared on February 1, 2019 for the quarter ended December 31, 2018.

Because we make our investment in our business through a holding company structure and the applicable holding companies do not own any material cash-generating assets other than their direct and indirect holdings in KKR Group Partnership Units, dividends are expected to be funded in the following manner:

First, the KKR Group Partnerships will make distributions to holders of KKR Group Partnership Units, including the holding companies through which we invest, in proportion to their percentage interests in the KKR Group Partnerships;

Second, the holding companies through which we invest will distribute to us the amount of any distributions that they receive from the KKR Group Partnerships, after deducting any applicable taxes; and

Third, we will distribute to holders of our Class A common stock, Series A Preferred Stock and Series B Preferred Stock the amount of dividends declared by our board of directors from the distributions that we receive from our holding companies through which we invest.

The limited partnership agreements of the KKR Group Partnerships provide for cash distributions, which are referred to as "tax distributions," to the partners of such partnerships if we determine that the taxable income of the relevant partnership will give rise to taxable income for its partners, including indirectly KKR Holdings. The KKR Group Partnerships may make tax distributions in the future, from time to time, to provide distributions to pay for the U.S. or non-U.S. tax liabilities of the partners of KKR Holdings.

The declaration and payment of any dividends to holders of our Class A common stock, Series A Preferred Stock or Series B Preferred Stock are subject to the discretion of our board of directors, which may change our dividend policy at any time or from time to time, and the terms of our certificate of incorporation. There can be no assurance that dividends will be made as intended or at all or that any particular dividend policy will be maintained. When KKR & Co. Inc. receives distributions from the KKR Group Partnerships (the holding companies of the KKR business), KKR Holdings receives its pro rata share of such distributions from the KKR Group Partnerships. Furthermore, the declaration and payment of distributions and dividends is subject to legal, contractual and regulatory restrictions on the payment of dividends and distributions by us or our subsidiaries, including restrictions contained in our debt agreements, the terms of our preferred stock, and such other factors as the board of directors considers relevant including, among others: our available cash and current and anticipated cash needs, including funding of

investment commitments and debt service and future debt repayment obligations; general economic and business conditions; our strategic plans and prospects; our results of operations and financial condition; and our capital requirements. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity—Sources of Cash." In addition, under Section 170 of the DGCL, our board of directors may only declare and pay dividends either out of our surplus (as defined in DGCL) or in case there is no such surplus, out of our net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year.

Class A Common Stock Repurchases in the Fourth Quarter of 2018

On May 3, 2018, we announced an increase to the available amount under our repurchase program to \$500 million, which represented an increase of approximately \$209 million from amounts then remaining under the program.

Table of Contents

Under the current repurchase program, KKR is authorized to repurchase its Class A common stock from time to time in open market transactions, in privately negotiated transactions or otherwise. The timing, manner, price and amount of any Class A common stock repurchases will be determined by KKR in its discretion and will depend on a variety of factors, including legal requirements, price and economic and market conditions. KKR expects that the program, which has no expiration date, will be in effect until the maximum approved dollar amount has been used. The program does not require KKR to repurchase any specific number of shares of Class A common stock, and the program may be suspended, extended, modified or discontinued at any time.

In addition to the repurchases of Class A common stock described above, subsequent to May 3, 2018, the repurchase program will be used for the retirement (by cash settlement or the payment of tax withholding amounts upon net settlement) of equity awards issued pursuant to our Equity Incentive Plan (and any successor equity plan thereto) representing the right to receive shares of Class A common stock. During the year ended December 31, 2018, KKR paid approximately \$99 million in cash to satisfy tax withholding and cash settlement obligations in lieu of issuing shares of Class A common stock or its equivalent upon the vesting of equity awards representing 4.2 million shares of Class A common stock. From October 27, 2015 through December 31, 2018, KKR has paid approximately \$236 million in cash to satisfy tax withholding and cash settlement obligations in lieu of issuing shares of Class A common stock or its equivalent upon the vesting of equity awards representing 12.6 million shares of Class A common stock. Of these amounts, equity awards representing 11.0 million shares of Class A common stock or its equivalent were retired for \$190 million prior to May 3, 2018 and did not count against the amounts remaining under the repurchase program.

The table below sets forth the information with respect to repurchases made by or on behalf of KKR & Co. Inc. or any "affiliated purchaser" (as defined in Rule 10b-18(a)(3) under the Exchange Act) of our Class A common stock during the fourth quarter of 2018. 4,182,217 shares of Class A common stock were repurchased during the fourth quarter of 2018. From inception of the repurchase program through December 31, 2018, we have repurchased a total of approximately 39.2 million shares of Class A common stock under the program at an average price of approximately \$16.11 per share.

Issuer Purchases of Class A common stock
(amounts in thousands, except share and per share amounts)

Month #1 (October 1, 2018 to October 31, 2018)	Total Number of Shares Purchased	Average Price Paid Per Share	Cumulative Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs ⁽¹⁾
Month #1 (October 1, 2018 to October 31, 2018)	527,515	\$ 24.78	35,560,011	\$ 360,806
Month #2 (November 1, 2018 to November 30, 2018)	1,849,400	\$ 22.70	37,409,411	\$ 318,827
Month #3 (December 1, 2018 to	1,805,302	\$ 20.73	39,214,713	\$ 281,397

December 31, 2018)

Total through December 31, 2018 4,182,217

(1) In addition to share repurchases, amounts have been reduced for any retirement (by cash settlement or the payment of tax withholding amounts upon net settlement) of equity awards issued pursuant to our Equity Incentive Plan as described above.

Unregistered Sale of Equity Securities

As of December 31, 2018, all remaining exchangeable securities issued in connection with the acquisition of Avoca were exchanged for an equal number of shares of our Class A common stock.

On November 30, 2018, KKR acquired an additional 5.0% interest in Marshall Wace after the exercise of one of the options agreed to between Marshall Wace and KKR. As partial consideration, KKR issued 5,238,889 shares of Class A common stock to affiliates of Marshall Wace in a private transaction exempt from registration in reliance on Section 4(a)(2) of the Securities Act. For a further discussion of the transaction, see Item 8. Financial Statements and Supplementary Data—Note 4 "Investments—Equity Method."

Table of Contents

Other Equity Securities

During the fourth quarter of 2018, 4,025,754 KKR Group Partnership Units were exchanged by KKR Holdings for an equal number of shares of our Class A common stock. This resulted in an increase in our ownership of the KKR Group Partnerships and a corresponding decrease in the ownership of the KKR Group Partnerships by KKR Holdings. On February 13, 2019, approximately 0.4 million KKR Group Partnership Units were exchanged by KKR Holdings into an equal number of shares of our Class A common stock.

ITEM 6. SELECTED FINANCIAL DATA

The following tables set forth our selected historical consolidated financial data as of and for the years ended December 31, 2018, 2017, 2016, 2015 and 2014. We derived the selected historical consolidated financial data as of December 31, 2018 and 2017 and for the years ending December 31, 2018, 2017 and 2016 from the audited consolidated financial statements included elsewhere in this report. We derived the selected historical consolidated financial data as of December 31, 2016, 2015, and 2014 and for the years ended December 31, 2015 and 2014 from our audited consolidated financial statements, which are not included in this report. You should read the following data together with "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements and related notes included elsewhere in this report.

On January 1, 2016, KKR adopted ASU No. 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis ("ASU 2015-02"), which resulted in the de-consolidation of most of KKR's investment funds that had been consolidated prior to such date. Effective with the adoption of ASU 2015-02, assets, liabilities, and noncontrolling interests from our investment funds that had previously been consolidated are no longer included in the statement of financial condition. Additionally, when an investment fund is consolidated, management fees, fee credits and carried interest earned from consolidated funds are eliminated in consolidation and as such are not recorded in Fees and Other. The economic impact of these management fees, fee credits and carried interests that are eliminated is reflected as an adjustment to noncontrolling interests and has no impact to Net Income Attributable to KKR & Co. Inc. KKR adopted this guidance using the modified retrospective method. As a result, no retrospective adjustment is required and prior periods presented under GAAP have not been impacted.

Prior to January 1, 2018, to the extent an investment fund was not consolidated, KKR accounted for carried interest within Revenues separately from its general partner capital interest, which was included within Investment Income (Loss) in the consolidated statements of operations. Effective January 1, 2018, the carried interest component of the general partner interest and the capital interest KKR holds in its investment funds as the general partner are accounted for as a single unit of account and reported within Revenues in the consolidated statements of operations. This change in accounting principle has been applied on a full retrospective basis. See Note 2 "Summary of Significant Accounting Policies" to the consolidated financial statements included elsewhere in this report.

(1) Total KKR & Co. Inc. stockholders' equity (including Series A and B preferred stock) reflects only the portion of equity attributable to KKR & Co. Inc. (64.1% interest in the KKR Group Partnerships as of December 31, 2018) and differs from book value reported on a segment basis primarily as a result of the exclusion of the allocations of equity to KKR Holdings. KKR Holdings' 35.9% interest in the KKR Group Partnerships as of December 31, 2018

is reflected as noncontrolling interests and is not included in total KKR & Co. Inc. stockholders' equity. For periods prior to December 31, 2018, equity attributable to KKR & Co. Inc. differs from book value reported on a segment basis primarily as a result of the exclusion of the equity impact of KKR Management Holdings Corp. and allocations of equity to KKR Holdings.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with the consolidated financial statements of KKR & Co. Inc., together with its consolidated subsidiaries, and the related notes included elsewhere in this report. The historical consolidated financial data discussed below reflects the historical results and financial position of KKR. In addition, this discussion and analysis contains forward-looking statements and involves numerous risks and uncertainties, including those described under "Cautionary Note Regarding Forward-looking Statements" and "Risk Factors." Actual results may differ materially from those contained in any forward-looking statements.

Overview of Business

For a discussion about our business lines, our reportable segment, and our firm, see Item 1. "Business."

Business Environment

Economic and Market Conditions

Economic Conditions. As a global investment firm, we are affected by financial and economic conditions globally. Global and regional economic conditions have a substantial impact on our financial condition and results of operations, impacting the values of the investments we make, our ability to exit these investments profitably, our ability to raise capital from investors, and our ability to make new investments. Financial and economic conditions in the United States, European Union, Japan, China, and other major economies are significant contributors to the global economy.

As of December 31, 2018, key economic indicators of U.S. economic growth, including GDP growth, unemployment and inflation, remained at healthy levels despite the volatility of the U.S. stock market at the end of 2018. However, economic projections presented at a meeting of the Federal Open Market Committee in December 2018 signaled an expected slow-down in U.S. GDP growth in 2019 compared to 2018. The U.S. Federal Reserve suspended its plans to continue raising its benchmark interest rate and held the rate steady in January 2019, after four rate increases in 2018. In the United States, real GDP growth is estimated to be 2.9% for the full year ended December 31, 2018, compared to 2.2% in the prior year; the U.S. unemployment rate was 3.9% as of December 31, 2018, down from 4.1% as of December 31, 2017; U.S. core consumer price index was 2.2% on a year-over-year basis as of December 31, 2018, up from 1.8% on a year-over-year basis as of December 31, 2017; and the effective federal funds rate set by the U.S. Federal Reserve was 2.4% as of December 31, 2018, up from 1.3% as of December 31, 2017.

As of December 31, 2018, the European Union showed signs of slow-down in economic growth, with concerns of a potential recession in Italy and rising uncertainty over the terms of Britain's exit from the European Union. The European Central Bank decided to end its quantitative easing program at the end of December 2018, which added to the concern about the slowing economic growth in the region. In the Euro Area, real GDP growth is estimated to be 1.9% for the year ended December 31, 2018 down from 2.4% in the prior year; the Euro Area unemployment rate was 7.9% as of December 31, 2018, down from 8.6% as of December 31, 2017; Euro Area core inflation was 1.0% on a year-over-year basis as of December 31, 2018, up from 0.9% as of December 31, 2017; and the short-term benchmark interest rate set by the European Central Bank was 0.0% as of December 31, 2018, unchanged from December 31, 2017.

As of December 31, 2018, the Bank of Japan maintained its accommodative monetary policy and projected a continued "expanding trend" for the economy through 2020. Chinese economic growth slowed during the fourth quarter of 2018 amid China's ongoing trade conflicts with the United States. In Japan, the short-term benchmark interest rate set by the Bank of Japan was -0.1% as of December 31, 2018, unchanged from December 31, 2017; and in China, reported real GDP is estimated to be 6.6% in the year ended December 31, 2018, below the 6.8% reported

for the year ended December 31, 2017.

These and other key issues could have repercussions across regional and global financial markets, which could adversely affect the valuations of our investments. Other key issues include (i) political uncertainty caused by, among other things, populist political parties and economic nationalist sentiments, (ii) regulatory changes regarding, for example, taxation, international trade, cross-border investments, immigration, and austerity programs, (iii) increased volatility in stock markets, (iv) the U.S. Federal Reserve potentially raising its benchmark interest rates again and (v) technological advancements and innovations that may disrupt marketplaces and businesses. For a further discussion of how market conditions may affect our businesses, see "Risk Factors—Risks Related to Our Business—Difficult market and economic conditions can adversely affect our business in many ways, including by reducing the value or performance of the investments that we manage or by reducing

Table of Contents

the ability of our funds to raise or deploy capital, each of which could negatively impact our net income and cash flow and adversely affect our financial condition."

Equity and Credit Markets. Global equity and credit markets have a substantial effect on our financial condition and results of operations. In general, a climate of reasonable interest rates and high levels of liquidity in the debt and equity capital markets provide a positive environment for us to generate attractive investment returns, which also impacts our ability to generate incentive fees and carried interest. Periods of volatility and dislocation in the capital markets present substantial risks, but also can present us with opportunities to invest at reduced valuations that position us for future growth and investment returns. Low interest rates related to monetary stimulus and economic stagnation may negatively impact expected returns on all types of investments. Higher interest rates in conjunction with slower growth or weaker currencies in some emerging market economies have caused, and may further cause, the default risk of these countries to increase, and this could impact the operations or value of our investments that operate in these regions. Areas such as Japan, which have ongoing central bank quantitative easing campaigns and comparatively low interest rates relative to the United States, could potentially experience further currency volatility and weakness relative to the U.S. dollar.

Many of our investments are in equities, so a change in global equity prices or in market volatility directly impacts the value of our investments and our profitability as well as our ability to realize investment gains and the receptiveness of fund investors to our investment products. For the year ended December 31, 2018, global equity markets were negative, with the S&P 500 Index down 4.4% and the MSCI World Index down 8.2% on a total return basis including dividends. Equity market volatility as evidenced by the Chicago Board Options Exchange Market Volatility Index (the "VIX"), a measure of volatility, ended at 25.4 as of December 31, 2018, increasing from 11.0 as of December 31, 2017. However, since December 31, 2018, the U.S. equity market has experienced a significant rebound, coinciding with a decrease in volatility. For a discussion of our valuation methods, see "Risk Factors—Risks Related to the Assets We Manage—Our investments are impacted by various economic conditions that are difficult to quantify or predict, which may have a significant impact on the valuation of our investments and, therefore, on the investment income we realize and our results of operations and financial condition" and "—Critical Accounting Policies—Fair Value Measurements—Level III Valuation Methodologies."

Many of our investments are also in non-investment grade credit instruments, and our funds and our portfolio companies also rely on credit financing and the ability to refinance existing debt. Consequently, any decrease in the value of credit instruments that we have invested in or any increase in the cost of credit financing reduces our returns and decreases our net income. In particular due in part to holdings of credit instruments such as CLOs on our balance sheet, the performance of the credit markets has had an amplified impact on our financial results, as we directly bear the full extent of losses from credit instruments on our balance sheet. Credit markets can also impact valuations because a discounted cash flow analysis is generally used as one of the methodologies to ascertain the fair value of our investments that do not have readily observable market prices. In addition, with respect to our credit instruments, tightening credit spreads are generally expected to lead to an increase, and widening credit spreads are generally expected to lead to a decrease, in the value of these credit investments, if not offset by hedging or other factors. In addition, the significant widening of credit spreads is also typically expected to negatively impact equity markets, which in turn would negatively impact our portfolio and us as noted above. During the year ended December 31, 2018, U.S. investment grade corporate bond spreads (BofA Merrill Lynch US Corporate Index) widened by 60 basis points and U.S. high-yield corporate bond spreads (BofAML HY Master II Index) widened by 170 basis points. The non-investment grade credit indices were mixed during the year ended December 31, 2018, with the S&P/LSTA Leveraged Loan Index up 0.4% and the BofAML HY Master II Index down 2.3%. During the year ended December 31, 2018, 10-year government bond yields rose 28 basis points in the United States, rose 9 basis points in the United Kingdom, fell 19 basis points in Germany, fell 58 basis points in China, and fell 5 basis points in Japan. For a further discussion of how market conditions may affect our businesses, see "Risk Factors—Risks Related to Our Business—Difficult market and economic conditions can adversely affect our business in many ways, including by reducing the value or performance of the investments that we manage or by reducing the ability of our funds to raise

or deploy capital, each of which could negatively impact our net income and cash flow and adversely affect our financial condition" and "Risk Factors—Risks Related to the Assets We Manage—Our investments are impacted by various economic conditions that are difficult to quantify or predict, which may have a significant impact on the valuation of our investments and, therefore, on the investment income we realize and our results of operations and financial condition."

For further discussion of the impact of global credit markets on our financial condition and results of operations, see "Risk Factors—Risks Related to the Assets We Manage—Changes in the debt financing markets may negatively impact the ability of our investment funds, their portfolio companies and strategies pursued with our balance sheet assets to obtain attractive financing for their investments or to refinance existing debt and may increase the cost of such financing or refinancing if it is obtained, which could lead to lower-yielding investments and potentially decrease our net income," "Risk Factors—Risks Related to the Assets We Manage—Our investments are impacted by various economic conditions that are difficult to quantify or predict, which may have a significant impact on the valuation of our investments and, therefore, on the investment income

Table of Contents

we realize and our results of operations and financial condition" and "Risk Factors—Risks Related to the Assets We Manage—Our funds and our firm through our balance sheet may make a limited number of investments, or investments that are concentrated in certain issuers, geographic regions or asset types, which could negatively affect our performance or the performance of our funds to the extent those concentrated assets perform poorly." For a further discussion of our valuation methods, see "—Critical Accounting Policies—Fair Value Measurements—Level III Valuation Methodologies."

Foreign Exchange Rates. Foreign exchange rates have a substantial impact on the valuations of our investments that are denominated in currencies other than the U.S. dollar. Currency volatility can also affect our businesses and investments that deal in cross-border trade. The appreciation or depreciation of the U.S. dollar is expected to contribute to a decrease or increase, respectively, in the U.S. dollar value of our non-U.S. investments to the extent unhedged. In addition, an appreciating U.S. dollar would be expected to make the exports of U.S. based companies less competitive, which may lead to a decline in their export revenues, if any, while a depreciating U.S. dollar would be expected to have the opposite effect. Moreover, when selecting investments for our investment funds that are denominated in U.S. dollars, an appreciating U.S. dollar may create opportunities to invest at more attractive U.S. dollar prices in certain countries outside of the United States, while a depreciating U.S. dollar would be expected to have the opposite effect. For our investments denominated in currencies other than the U.S. dollar, the depreciation in such currencies will generally contribute to the decrease in the valuation of such investments, to the extent unhedged, and adversely affect the U.S. dollar equivalent revenues of portfolio companies with substantial revenues denominated in such currencies, while the appreciation in such currencies would be expected to have the opposite effect. For the year ended December 31, 2018, the euro fell 4.5%, the British pound fell 5.6%, the Japanese yen rose 2.7%, and the Chinese renminbi fell 5.4%, respectively, relative to the U.S. dollar. For additional information regarding our foreign exchange rate risk, see "—Quantitative and Qualitative Disclosure About Market Risk—Exchange Rate Risk."

Commodity Markets. Our Private Markets portfolio contains energy real asset investments, and certain of our other Private Markets and Public Markets strategies and products, including private equity, direct lending, special situations and CLOs, also have meaningful investments in the energy sector. The value of these investments is heavily influenced by the price of natural gas and oil. During the year ended December 31, 2018, the long-term price of WTI crude oil decreased approximately 6%, while the long-term price of natural gas decreased approximately 8%. The long-term price of WTI crude oil decreased from approximately \$53 per barrel to \$50 per barrel, and the long-term price of natural gas decreased from approximately \$2.82 per mcf to \$2.60 per mcf as of December 31, 2017 and December 31, 2018, respectively. When commodity prices decline or if a decline is not offset by other factors, we would expect the value of our energy real asset investments to be adversely impacted, to the extent unhedged. In addition, because we hold certain energy assets, which had a fair value of \$0.7 billion as of December 31, 2018 on our balance sheet, these price movements would have an amplified impact on our financial results, to the extent unhedged, as we would directly bear the full extent of such gains or losses. For additional information regarding our energy real assets, see "—Critical Accounting Policies—Fair Value Measurements—Level III Valuation Methodologies—Real Asset Investments" and "Risk Factors—Risks Related to the Assets We Manage—Our funds and our firm through our balance sheet may make a limited number of investments, or investments that are concentrated in certain issuers, geographic regions or asset types, which could negatively affect our performance or the performance of our funds to the extent those concentrated assets perform poorly."

Business Conditions

Our segment revenues consist of fees, performance income and investment income. Our ability to grow our revenues depends in part on our ability to attract new capital and investors, our successful deployment of capital including from our balance sheet and our ability to realize investments at a profit.

Our ability to attract new capital and investors. Our ability to attract new capital and investors in our funds is driven, in part, by the extent to which they continue to see the alternative asset management industry generally, and our investment products specifically, as an attractive vehicle for capital appreciation or income. Since 2010, we have

expanded into strategies such as energy, infrastructure, real estate, growth equity, core, credit and, through hedge fund partnerships, hedge funds. In several of these strategies, our first time funds have begun raising successor funds, and we expect the cost of raising such successor funds to be lower. We have also reached out to new fund investors, including retail and high net worth investors. However, fundraising continues to be competitive. While our Americas Fund XII, Asian Fund III and our Real Estate Partners Americas II fund exceeded the size of their respective predecessor funds, there is no assurance that fundraises for our other flagship private equity funds or for our newer strategies and their successor funds will experience similar success. If we are unable to successfully raise comparably sized or larger funds, our AUM, FPAUM, and associated fees attributable to new capital raised in future periods may be lower than in prior years. New capital organically raised in AUM for the fiscal years ended December 31, 2018, 2017 and 2016 were \$34.0 billion, \$38.7 billion and \$28.8 billion, respectively. See "Risk Factors—Risks Related to Our Business—Our inability to raise additional or successor funds (or raise successor funds of a comparable size as our predecessor funds) could have a material adverse impact on our business."

Table of Contents

Our ability to successfully deploy capital. Our ability to maintain and grow our revenue base is dependent upon our ability to successfully deploy the capital available to us and participate in capital markets transactions. Greater competition, high valuations, increased overall cost of credit and other general market conditions may impact our ability to identify and execute attractive investments. Additionally, because we seek to make investments that have an ability to achieve our targeted returns while taking on a reasonable level of risk, we may experience periods of reduced investment activity. We have a long-term investment horizon and the capital deployed in any one quarter may vary significantly from the capital deployed in any other quarter or the quarterly average of capital deployed in any given year. Reduced levels of transaction activity also tends to result in reduced potential future investment gains, lower transaction fees and lower fees for our Capital Markets business line, which may earn fees in the syndication of equity or debt. Capital invested for the fiscal years ended December 31, 2018, 2017 and 2016 were \$20.2 billion, \$18.4 billion and \$11.0 billion, respectively, and syndicated capital for the fiscal years ended December 31, 2018, 2017 and 2016 were \$6.3 billion, \$4.7 billion and \$1.2 billion, respectively.

Our ability to realize investments. Challenging market and economic conditions may adversely affect our ability to exit and realize value from our investments and result in lower-than-expected returns. Although the equity markets are not the only means by which we exit investments, the strength and liquidity of the U.S. and relevant global equity markets generally, and the initial public offering market specifically, affect the valuation of, and our ability to successfully exit, our equity positions in our private equity portfolio companies in a timely manner. We may also realize investments through strategic sales. When financing is not available or becomes too costly, it may be more difficult to find a buyer that can successfully raise sufficient capital to purchase our investments. For the years ended December 31, 2018, 2017 and 2016, through exit activity in our investments, we realized investment income of \$651.8 million, \$479.7 million, and \$694.4 million, respectively, and carried interest of \$1.2 billion, \$1.2 billion and \$1.3 billion, respectively in each case on a segment basis.

Basis of Accounting

We consolidate the financial results of the KKR Group Partnerships and their consolidated entities, which include the accounts of our investment management and capital markets companies, the general partners of unconsolidated funds and vehicles, general partners of certain funds that are consolidated and their respective consolidated funds and certain other entities including certain CLOs and CMBS. We refer to CLOs and CMBS as collateralized financing entities ("CFEs").

When an entity is consolidated, we reflect the accounts of the consolidated entity, including its assets, liabilities, revenues, expenses, investment income, cash flows and other amounts, on a gross basis. While the consolidation of a consolidated fund or entity does not have an effect on the amounts of Net Income Attributable to KKR or KKR's stockholders' capital that KKR reports, the consolidation does significantly impact the financial statement presentation under GAAP. This is due to the fact that the accounts of the consolidated entities are reflected on a gross basis while the allocable share of those amounts that are attributable to third parties are reflected as single line items. The single line items in which the accounts attributable to third parties are recorded are presented as noncontrolling interests on the consolidated statements of financial condition and net income attributable to noncontrolling interests on the consolidated statements of operations.

For a further discussion of our consolidation policies, see Item 8. Financial Statements and Supplementary Data—Note 2 "Summary of Significant Accounting Policies."

Key Financial Measures Under GAAP

Revenues

Fees and Other

Fees and other consist primarily of (i) management and incentive fees from providing investment management services to unconsolidated funds, CLOs, other vehicles, and separately managed accounts; (ii) transaction fees earned in connection with successful investment transactions and from capital markets activities; (iii) monitoring fees from providing services to portfolio companies; (iv) expense reimbursements from certain investment funds and portfolio companies; (v) revenue earned by oil and gas-producing entities that are consolidated; and (vi) consulting fees earned by consolidated entities that employ non-employee operating consultants. These fees are based on the contractual terms of the governing agreements and are recognized when earned, which coincides with the period during which the related services are performed and in the case of transaction fees, upon closing of the transaction. Monitoring fees may provide for a termination payment following an initial public offering or change of control. These termination payments are recognized in the period when the related transaction closes.

Table of Contents

Capital Allocation-Based Income

Capital allocation-based income is earned from those arrangements whereby KKR serves as general partner and includes income from KKR's capital interest as well as "carried interest" which entitles KKR to a disproportionate allocation of investment income from investment funds' limited partners.

For a further discussion of our revenue policies, see Item 8. Financial Statements and Supplementary Data—Note 2 "Summary of Significant Accounting Policies."

Expenses

Compensation and Benefits

Compensation and benefits expense includes cash compensation consisting of salaries, bonuses, and benefits, as well as equity-based compensation consisting of charges associated with the vesting of equity-based awards, carry pool allocations, and other performance-based income compensation. The amounts allocated to the carry pool and other performance-based income compensation are accounted for as compensatory profit-sharing arrangements and recorded as compensation and benefits expenses.

All employees and employees of certain consolidated entities receive a base salary that is paid by KKR or its consolidated entities, and is accounted for as compensation and benefits expense. These employees are also eligible to receive discretionary cash bonuses based on performance, overall profitability, and other matters. While cash bonuses paid to most employees are borne by KKR and certain consolidated entities and result in customary compensation and benefits expense, in the past cash bonuses that are paid to certain employees have been borne by KKR Holdings. These bonuses have historically been funded with distributions that KKR Holdings receives on KKR Group Partnership Units held by KKR Holdings but are not then passed on to holders of unvested units of KKR Holdings. Because employees are not entitled to receive distributions on units that are unvested, any amounts allocated to employees in excess of an employee's vested equity interests are reflected as employee compensation and benefits expense. These compensation charges are currently recorded based on the amount of cash expected to be paid by KKR Holdings. Because KKR makes only fixed quarterly dividends, the distributions made on KKR Group Partnership Units underlying any unvested KKR Holdings units are generally insufficient to fund annual cash bonus compensation to the same extent as in periods prior to the fourth quarter of 2015. In addition, substantially all remaining units in KKR Holdings have been allocated and, while subject to a 5 year vesting period, will become fully vested by 2021, thus decreasing the amount of distributions received by KKR Holdings that are available for annual cash bonus compensation. We, therefore, expect to pay all or substantially all of the cash bonus payments from KKR's cash from operations and the carry pool; although, from time to time, KKR Holdings may contribute to the cash bonus payments in the future. For the year ending December 31, 2018, no cash bonuses were contributed by KKR Holdings and all amounts paid were funded from other sources, including cash from our operations and the carry pool. See "Risks Related to Our Business—If we cannot retain and motivate our principals and other key personnel and recruit, retain and motivate new principals and other key personnel, our business, results and financial condition could be adversely affected" regarding the adequacy of such distributions to fund future discretionary cash bonuses.

KKR uses several methods, which are designed to yield comparable results, to allocate carried interest and other performance income compensation. With respect to KKR's investment funds that provide for carried interest without a preferred return, KKR allocates 40% of the carried interest received from such funds to its carry pool for employees and non-employee operating consultants. Beginning with the quarter ended September 30, 2016, for investment funds that provide for carried interest with a preferred return and have accrued carried interest as of June 30, 2016, KKR also includes 40% of the management fees that would have been subject to a management fee refund as performance

income compensation. Because of the different ways management fees are refunded in preferred return and non-preferred return funds that provide for carried interest, this calculation of 40% of the portion of the management fees subject to refund for funds that have a preferred return is designed to allocate to compensation an amount comparable to the amount that would have been allocated to the carry pool had the fund not had a preferred return. Beginning with the quarter ended September 30, 2017, for then-current and future carry generating funds with a preferred return and no or minimal accrued carried interest as of June 30, 2017, KKR allocates 43% of the carried interest to the carry pool instead of 40% of carried interest. For impacted funds, the incremental 3% replaces the allocation of management fee refunds that would have been calculated for those funds and is designed, based on a historical financial analysis of certain investment funds, to allocate an amount for preferred return funds that is comparable to the management fee refunds that would have been allocated as performance income compensation for those funds. The percentage of carried interest, management fee refunds, and incentive fees allocable to the carry pool or as performance income compensation is subject to change from time to time. For a discussion of how management fees are refunded for preferred

Table of Contents

return funds and non-preferred funds see "—Fair Value Measurements—Recognition of Carried Interest in the Statement of Operations."

General, Administrative and Other

General, administrative and other expense consists primarily of professional fees paid to legal advisors, accountants, advisors and consultants, insurance costs, travel and related expenses, communications and information services, depreciation and amortization charges, expenses (including impairment charges) incurred by oil and gas-producing entities that are consolidated, costs incurred in connection with pursuing potential investments that do not result in completed transactions ("broken-deal expenses"), and other general operating expenses. A portion of these general administrative and other expenses, in particular broken-deal expenses, are borne by fund investors.

Investment Income (Loss)

Net Gains (Losses) from Investment Activities

Net gains (losses) from investment activities consist of realized and unrealized gains and losses arising from our investment activities as well as income earned from certain equity method investments. Fluctuations in net gains (losses) from investment activities between reporting periods is driven primarily by changes in the fair value of our investment portfolio as well as the realization of investments. The fair value of, as well as the ability to recognize gains from, our investments is significantly impacted by the global financial markets, which, in turn, affects the net gains (losses) from investment activities recognized in any given period. Upon the disposition of an investment, previously recognized unrealized gains and losses are reversed and an offsetting realized gain or loss is recognized in the current period. Since our investments are carried at fair value, fluctuations between periods could be significant due to changes to the inputs to our valuation process over time. For a further discussion of our fair value measurements and fair value of investments, see "—Critical Accounting Policies—Fair Value Measurements."

Dividend Income

Dividend income consists primarily of distributions that we and our consolidated investment funds receive from portfolio companies in which they invest. Dividend income is recognized primarily in connection with (i) dispositions of operations by portfolio companies, (ii) distributions of cash generated from operations from portfolio investments, and (iii) other significant financings undertaken by portfolio investments.

Interest Income

Interest income consists primarily of interest that is received on our credit instruments in which we and our consolidated funds and other entities invest as well as interest on our cash balances and other investments.

Interest Expense

Interest expense is incurred from debt issued by KKR, including debt issued by KFN, credit facilities entered into by KKR, debt securities issued by consolidated CFEs, and financing arrangements at our consolidated funds entered into primarily with the objective of managing cash flow. KFN's debt obligations are non-recourse to KKR beyond the assets of KFN. Debt securities issued by consolidated CFEs are supported solely by the investments held at the CFE and are not collateralized by assets of any other KKR entity. Our obligations under financing arrangements at our consolidated funds are generally limited to our pro rata equity interest in such funds. However, in some circumstances, we may provide limited guarantees of the obligations of our general partners in an amount equal to its pro rata equity interest in such funds. Our management companies bear no obligations with respect to financing arrangements at our

consolidated funds. We also may provide other kinds of guarantees. See "—Liquidity."

Table of Contents

Income Taxes

On July 1, 2018, we converted from a Delaware limited partnership to a Delaware corporation. Prior to the Conversion, KKR's investment income and carried interest generally were not subject to U.S. corporate income taxes. Subsequent to the Conversion, all income earned by KKR is subject to U.S. corporate income taxes, resulting in an overall higher income tax expense (or benefit) in periods subsequent to the Conversion.

KKR & Co. Inc. is a corporation for U.S. federal income tax purposes and thus is subject to U.S. federal, state and local corporate income taxes at the entity level on KKR's share of net taxable income. In addition, the KKR Group Partnerships and certain of their subsidiaries operate in the United States as partnerships for U.S. federal income tax purposes and as corporate entities in certain non-U.S. jurisdictions. These entities, in some cases, are subject to U.S. state or local income taxes or non-U.S. income taxes.

As a result of the Conversion, KKR recognized a partial step-up in the tax basis of certain assets that will be recovered as those assets are sold or the basis is amortized. On the date of the Conversion, we recorded an estimated net tax benefit and estimated net deferred tax asset of \$257.1 million relating to this partial step-up in tax basis. The actual amount of the partial step-up in tax basis when it is finally determined is expected to differ, possibly materially, from the current estimate, which in turn is expected to cause our income tax provision and effective tax rate under GAAP to differ, possibly to a material extent, from the current estimate. See Item 8. Financial Statements and Supplementary Data—Note 11 "Income Taxes."

Tax laws are complex and subject to different interpretations by the taxpayer and respective governmental taxing authorities. Significant judgment is required in determining tax expense and in evaluating tax positions including evaluating uncertainties. We review our tax positions quarterly and adjust our tax balances as new information becomes available.

For a further discussion of our income tax policies, see Item 8. Financial Statements and Supplementary Data—Note 2 "Summary of Significant Accounting Policies" and Note 11 "Income Taxes."

Net Income (Loss) Attributable to Noncontrolling Interests

Net income (loss) attributable to noncontrolling interests primarily represents the ownership interests that certain third parties hold in entities that are consolidated in the financial statements as well as the ownership interests in our KKR Group Partnerships that are held by KKR Holdings. The allocable share of income and expense attributable to these interests is accounted for as net income (loss) attributable to noncontrolling interests. Given the consolidation of certain of our investment funds and the significant ownership interests in our KKR Group Partnerships held by KKR Holdings, we expect a portion of net income (loss) will continue to be attributed to noncontrolling interests in our business.

For a further discussion of our noncontrolling interests policies, see Item 8. Financial Statements and Supplementary Data—Note 2 "Summary of Significant Accounting Policies."

Table of Contents

Key Segment and Other Operating and Performance Measures

The key performance measures that follow are used by management in making operational and resource deployment decisions as well as assessing the overall performance of KKR's businesses. KKR's segment reporting is presented prior to giving effect to the allocation of income (loss) between KKR & Co. Inc. and KKR Holdings L.P. and as such represents the business in total. In addition, KKR's segment reporting is presented without giving effect to the consolidation of the investment funds and CFEs that KKR manages as well as other consolidated entities that are not subsidiaries of KKR & Co. Inc.

We disclose certain financial measures in this report that are calculated and presented using methodologies other than in accordance with GAAP. We believe that providing these performance measures on a supplemental basis to our GAAP results is helpful to stockholders in assessing the overall performance of KKR's businesses. These financial measures should not be considered as a substitute for similar financial measures calculated in accordance with GAAP, if available. We caution readers that these non-GAAP financial measures may differ from the calculations of other investment managers, and as a result, may not be comparable to similar measures presented by other investment managers. Reconciliations of these non-GAAP financial measures to the most directly comparable financial measures calculated and presented in accordance with GAAP, where applicable, are included within Item 8. Financial Statements and Supplementary Data—Note 14 "Segment Reporting" and under "—Segment Balance Sheet."

Adjusted Shares

Adjusted shares are used as a measure of the total common equity ownership of KKR that is held by KKR & Co. Inc. (including equity awards issued under the Amended and Restated KKR & Co. Inc. 2010 Equity Incentive Plan (the "Equity Incentive Plan"), but excluding preferred stock), KKR Holdings and other holders of securities exchangeable into Class A common stock of KKR & Co. Inc. and represent the fully diluted share count of Class A common stock using the if-converted method. We believe this measure is useful to stockholders as it provides an indication of the total common equity ownership of KKR as if all outstanding KKR Holdings units, equity awards issued under the Equity Incentive Plan and other exchangeable securities had been exchanged for Class A common stock of KKR & Co. Inc. The 6.75% Series A Preferred Stock ("Series A Preferred Stock") and 6.50% Series B Preferred Stock ("Series B Preferred Stock") are not exchangeable for Class A common stock of KKR & Co. Inc.

Adjusted Shares Eligible for Distribution

Adjusted shares eligible for distribution represents the portion of total adjusted shares that are eligible to receive a dividend. We believe this measure is useful to stockholders as it provides insight into the calculation of amounts available for distribution as dividends on a per share basis. Weighted average adjusted shares eligible for distribution is used in the calculation of after-tax distributable earnings per share.

After-tax Distributable Earnings

After-tax distributable earnings is a performance measure of KKR's earnings on a segment basis excluding mark-to-market gains (losses). Starting with the second quarter of 2018, it is defined as the amount of net realized earnings of KKR for a given reporting period, after deducting equity-based compensation. KKR revised the definition of after-tax distributable earnings starting in the second quarter of 2018, because it reflects how the chief operating decision makers allocate resources and assess performance of KKR's business. KKR believes that after-tax distributable earnings is useful to stockholders as it aligns KKR's net realization performance with the manner in which KKR receives its revenues and determines the compensation of its employees. After-tax distributable earnings does not represent and is not used to calculate actual dividends under KKR's dividend policy. Historically,

equity-based compensation expense relating to the Equity Incentive Plan was not reflected in our calculation of after-tax distributable earnings. Under KKR's segment presentation, equity-based compensation expense is included in after-tax distributable earnings as a component of compensation expense in order to reflect the dilutive nature of these non-cash equity-based awards. For comparability, after-tax distributable earnings for the comparable prior periods have been calculated using this definition.

Assets Under Management ("AUM")

Assets under management represent the assets managed or advised by KKR from which KKR is entitled to receive fees or a carried interest (either currently or upon deployment of capital), general partner capital, and assets managed or advised by strategic BDC partnership and hedge fund managers in which KKR holds a minority ownership interest. We believe this measure is useful to stockholders as it provides additional insight into the capital raising activities of KKR and its hedge fund managers and the overall activity in their investment funds and other managed capital. KKR calculates the amount of AUM as

100

Table of Contents

of any date as the sum of: (i) the fair value of the investments of KKR's investment funds; (ii) uncalled capital commitments from these funds, including uncalled capital commitments from which KKR is currently not earning management fees or carried interest; (iii) the fair value of investments in KKR's co-investment vehicles; (iv) the par value of outstanding CLOs (excluding CLOs wholly-owned by KKR); (v) KKR's pro rata portion of the AUM of hedge fund managers in which KKR holds a minority ownership interest; (vi) all AUM of the strategic BDC partnership with FS Investments; and (vii) the fair value of other assets managed by KKR. The pro rata portion of the AUM of hedge fund managers is calculated based on KKR's percentage ownership interest in such entities multiplied by such entity's respective AUM. KKR's definition of AUM is not based on any definition of AUM that may be set forth in the agreements governing the investment funds, vehicles or accounts that it manages or calculated pursuant to any regulatory definitions.

Book Value

Book value is a measure of the net assets of KKR's reportable segment and is used by management primarily in assessing the unrealized value of KKR's investments and other assets, including carried interest. We believe this measure is useful to stockholders as it provides additional insight into the assets and liabilities of KKR excluding the assets and liabilities that are allocated to noncontrolling interest holders and to the holders of the Series A and Series B Preferred Stock. As of September 30, 2018 and following the Conversion, KKR's segment balance sheet reflects KKR's tax assets and liabilities as prepared under GAAP.

Capital Invested

Capital invested is the aggregate amount of capital invested by (i) KKR's investment funds, (ii) KKR's Principal Activities business line as a co-investment, if any, alongside KKR's investment funds, and (iii) KKR's Principal Activities business line in connection with a syndication transaction conducted by KKR's Capital Markets business line, if any. Capital invested is used as a measure of investment activity at KKR during a given period. We believe this measure is useful to stockholders as it provides a measure of capital deployment across KKR's business lines. Capital invested includes investments made using investment financing arrangements like credit facilities, as applicable. Capital invested excludes (i) investments in certain leveraged credit strategies, (ii) capital invested by KKR's Principal Activities business line that is not a co-investment alongside KKR's investment funds, and (iii) capital invested by KKR's Principal Activities business line that is not invested in connection with a syndication transaction by KKR's Capital Markets business line. Capital syndicated by KKR's Capital Markets business line to third parties other than KKR's investment funds or Principal Activities business line is not included in capital invested. See also "—Syndicated Capital."

Fee Paying AUM ("FPAUM")

Fee paying AUM ("FPAUM") represents only the AUM from which KKR receives management fees. We believe this measure is useful to stockholders as it provides additional insight into the capital base upon which KKR earns management fees. FPAUM is the sum of all of the individual fee bases that are used to calculate KKR's and its hedge fund and BDC partnership management fees and differs from AUM in the following respects: (i) assets and commitments from which KKR does not receive a management fee are excluded (e.g., assets and commitments with respect to which it receives only carried interest or is otherwise not currently receiving a management fee) and (ii) certain assets, primarily in its private equity funds, are reflected based on capital commitments and invested capital as opposed to fair value because fees are not impacted by changes in the fair value of underlying investments.

Fee Related Earnings ("FRE")

Fee related earnings is a supplemental measure of earnings of KKR on a segment basis before performance income and investment income. KKR believes this measure may be useful to stockholders as it provides additional insight into the profitability of KKR's fee generating management companies and capital markets businesses. Starting with the second quarter of 2018, fee related earnings is calculated as KKR's total Fees and Other, Net, multiplied by KKR's segment operating margin. For purposes of the fee related earnings calculation, segment operating margin is calculated as Segment Operating Earnings, before equity-based compensation, divided by total segment revenues. Historically, fee related earnings was calculated as operating earnings of KKR on a segment basis before performance income, related performance income compensation and investment income. KKR revised the definition of fee related earnings starting in the second quarter of 2018 to provide supplemental information about fees generated from KKR's management companies and capital markets business because KKR believes it provides increased transparency on KKR's underlying financial results to the stockholders. Fee related earnings for the comparable prior periods have been calculated using this definition.

Table of Contents

Income Taxes Paid

Income taxes paid represents the estimated total tax impact on KKR's distributable earnings before taxes. This amount is the implied amount of income taxes that would be paid assuming that all pre-tax distributable earnings were allocated to KKR & Co. Inc., which would occur following an exchange of all KKR Holdings units for Class A common stock of KKR & Co. Inc.

Outstanding Adjusted Shares

Outstanding adjusted shares represents the portion of total adjusted shares that would receive assets of KKR if it were to be liquidated as of a particular date. Outstanding adjusted shares is used to calculate book value per outstanding adjusted share, which we believe is useful to stockholders as it provides a measure of net assets of KKR's reportable segment on a per share basis.

Segment Operating Earnings

Segment operating earnings represents segment earnings before interest expense, preferred dividends, income attributable to noncontrolling interests and income taxes paid. We believe segment operating earnings is useful to stockholders as it provides a supplemental measure of our operating performance without taking into account items that we do not believe relate directly to operations.

Syndicated Capital

Syndicated capital is the aggregate amount of capital in transactions originated by KKR and its investment funds and carry-yielding co-investment vehicles, which has been distributed to third parties, generally in exchange for a fee. It does not include (i) capital invested in such transactions by KKR investment funds and carry-yielding co-investment vehicles, which is instead reported in capital invested, (ii) debt capital that is arranged as part of the acquisition financing of transactions originated by KKR investment funds, and (iii) debt capital that is either underwritten or arranged on a best efforts basis. Syndicated capital is used as a measure of investment activity for KKR during a given period, and we believe that this measure is useful to stockholders as it provides additional insight into levels of syndication activity in KKR's Capital Markets business line and across KKR's investment platform.

Uncalled Commitments

Uncalled commitments are used as a measure of unfunded capital commitments that KKR's investment funds and carry-paying co-investment vehicles have received from partners to contribute capital to fund future investments. We believe this measure is useful to stockholders as it provides additional insight into the amount of capital that is available to KKR's investment funds to make future investments. Uncalled commitments are not reduced for investments completed using fund-level investment financing arrangements.

Table of Contents

Consolidated Results of Operations

The following is a discussion of our consolidated results of operations for the years ended December 31, 2018 and 2017. You should read this discussion in conjunction with the consolidated financial statements and related notes included elsewhere in this report. For a more detailed discussion of the factors that affected the results of operations of our reportable segment in these periods, see "—Segment Analysis."

Year ended December 31, 2018 compared to year ended December 31, 2017

	Year Ended		Change
	December 31, 2018	December 31, 2017	
	(\$ in thousands)		
Revenues			
Fees and Other	\$1,841,326	\$1,541,604	\$299,722

Table of Contents

Revenues

For the years ended December 31, 2018 and 2017, revenues consisted of the following:

	Year Ended		Change
	December 31, 2018	December 31, 2017	
	(\$ in thousands)		
Management Fees	\$724,558	\$700,245	\$24,313
Fee Credits	(231,943)	(257,401)	25,458
Transaction Fees	988,954	783,952	205,002
Monitoring Fees	87,545	82,238	5,307
Incentive Fees	14,038	4,601	9,437
Expense Reimbursements	146,989	121,927	25,062
Oil and Gas Revenue	51,465	63,460	(11,995)
Consulting Fees	59,720	42,582	17,138
Total Fees and Other	1,841,326	1,541,604	299,722
Carried Interest	441,529	1,740,661	(1,299,132)
General Partner Capital Interest	112,981	275,015	(162,034)
Total Capital Allocation-Based Income	554,510	2,015,676	(1,461,166)
Total Revenues	\$2,395,836	\$3,557,280	\$(1,161,444)

Prior to January 1, 2018, to the extent an investment fund was not consolidated, KKR accounted for carried interest within Fees and Other separately from its general partner capital interest, which was included in Net Gains (Losses) from Investment Activities in the consolidated statements of operations. Effective January 1, 2018, the carried interest component of the general partner interest and the capital interest KKR holds in its investment funds as the general partner are accounted for as a single unit of account and reported in capital allocation-based income within Revenues in the consolidated statements of operations. This change in accounting principle has been applied on a full retrospective basis. See Note 2 "Summary of Significant Accounting Policies" to the consolidated financial statements included elsewhere in this report.

Total Fees and Other for the year ended December 31, 2018 increased compared to the year ended December 31, 2017 primarily as a result of an increase in transaction fees, management fees and expense reimbursements, and a decrease in fee credits. Fee credits owed to consolidated investment funds are eliminated upon consolidation under GAAP. Transaction and monitoring fees earned that generate these fee credits are not eliminated upon consolidation because those fees are earned from KKR portfolio companies which are not consolidated. Accordingly, certain transaction and monitoring fees are reflected in revenues without a corresponding fee credit. These increases were partially offset by a decrease in oil and gas revenue.

For a more detailed discussion of the factors that affected our transaction fees and monitoring fees during the period, see "—Segment Results—Segment Revenues."

The increase in management fees during the year ended December 31, 2018 compared to the prior period was due primarily to management fees earned from our Asian Fund III and Global Infrastructure Investors III Fund which entered their investment periods in the second quarter of 2017 and the second quarter of 2018, respectively. This increase was partially offset by a reduction in management fees from (i) our BDC platform as a result of the FS

Investments Transaction that closed in the second quarter of 2018, as is further explained in the next paragraph, (ii) Prisma Capital Partners LP ("Prisma") as a result of the transaction to combine Pacific Alternative Asset Management Company, LLC ("PAAMCO") and Prisma to create PAAMCO Prisma (the "PAAMCO Prisma transaction") that closed in the second quarter of 2017, as is further explained in the next paragraph, (iii) lower management fees calculated based on lower levels of invested capital as a result of realizations primarily in our European Fund III, 2006 Fund and Asian Fund and (iv) lower management fees paid by our Asian Fund II when it entered its post-investment period in the second quarter of 2017, in which it pays fees at a lower rate than during the investment period and based on capital invested at the time rather than total committed capital.

Table of Contents

KKR reports its investment in FS/KKR Advisor and PAAMCO Prisma using the equity method of accounting, and as such, KKR reflects its allocation of the net income of these entities as investment income. Accordingly, the management fees of the BDCs and Prisma that had been reported in management fee revenues prior to the closing of the transactions described above are now reflected on a net basis as part of our allocation of the net income of these entities in 2018 resulting in a decrease in our reported gross management fees when compared to the prior period.

The decrease in carried interest and general partner capital interest during the year ended December 31, 2018 compared to the prior period was due primarily to a lower level of net appreciation in the value of our private equity investment portfolio as compared to the year ended December 31, 2017.

Compensation and Benefits Expenses

The decrease was primarily due to a decrease in compensation resulting from a lower level of net carried interest in our investment funds as compared to the prior period. Partially offsetting this decrease was an increase in other compensation due to a higher level of fees during the year ended December 31, 2018 compared to the year ended December 31, 2017 as well as higher equity-based compensation charges resulting from an increase in the weighted average number of unvested shares outstanding.

General, Administrative and Other Expenses

The increase for the year ended December 31, 2018 compared to the year ended December 31, 2017 was primarily due to (i) an increase in professional fees and travel expenses incurred, the most significant of which were professional fees incurred in connection with the Conversion, (ii) an increase in expenses reimbursable by investment funds, (iii) a higher level of expenses that are creditable to our investment funds, which includes broken-deal expenses and (vi) a higher level of financing costs incurred related to debt at new consolidated CLOs as compared to the prior period. These increases were partially offset by (i) a decrease in depreciation, depletion and amortization of our consolidated oil and gas-producing entities compared to the prior period primarily caused by lower production and the sale of an oil and gas producing entity during the second quarter of 2018 and (ii) expenses of Prisma that had been reported on a gross basis prior to the closing of the PAAMCO Prisma transaction on June 1, 2017 and that are now reflected as part of our allocation of the net income of PAAMCO Prisma after June 1, 2017, resulting in a decrease in our reported General, Administrative and Other Expenses as compared to the prior period.

Net Gains (Losses) from Investment Activities

The following is a summary of net gains (losses) from investment activities:

	Year Ended	
	December 31, 2018	December 31, 2017
	(\$ in thousands)	
Private Equity	\$893,384	\$562,288
Credit	(774,524)	(46,884)
Investments of Consolidated CFEs	(536,050)	(96,777)
Real Assets	160,884	200,006
Equity Method - Other	335,036	130,158
Other Investments	(673,618)	(730,832)
Debt Obligations and Other	909,171	101,486
Other Net Gains (Losses) from Investment Activities	940,549	808,699
Net Gains (Losses) from Investment Activities	\$1,254,832	\$928,144

Prior to January 1, 2018, to the extent an investment fund was not consolidated, KKR accounted for its general partner capital interest in Net Gains (Losses) from Investment Activities in the consolidated statements of operations.

Effective January 1, 2018, the general partner capital interest and the carried interest component of the general partner interest are accounted for as a single unit of account and reported within Revenues in the consolidated statements of operations. This change in accounting has been applied on a full retrospective basis. See Item 8. Financial Statements and Supplementary Data—Note 2 "Summary of Significant Accounting Policies."

Table of Contents

Net Gains (Losses) from Investment Activities for the year ended December 31, 2018

The net gains from investment activities for the year ended December 31, 2018 were comprised of net realized gains of \$534.7 million and net unrealized gains of \$720.2 million.

Realized Gains from Investment Activities

For the year ended December 31, 2018, realized gains related primarily to (i) the sale of assets in our consolidated special situations funds, (ii) the FS Investments Transaction, (iii) the sale of our equity interest in Nephila, (iv) the sale of real estate investments held through certain consolidated entities, and (v) the partial sale of our investment in First Data Corporation (NYSE: FDC) in the third quarter of 2018 which is held in part as a direct co-investment by KKR.

Realized Losses from Investment Activities

Partially offsetting these realized gains were realized losses primarily relating (i) the write-off of Trinity Holdings LLC (energy sector) and certain CLOs during the year ended December 31, 2018 and (ii) the partial write-off of our investment in Preferred Proppants, LLC (manufacturing sector) which is held directly by KKR and in our consolidated special situations funds.

Unrealized Gains from Investment Activities

For the year ended December 31, 2018, unrealized gains were driven primarily by (i) mark-to-market gains in portfolio companies in our core investment strategy, the most significant of which were USI, Inc. (financial services sector), PetVet Care Centers, LLC (health care sector), and Heartland Dental LLC (health care sector), (ii) mark-to-market gains in our growth equity investments held directly by KKR and certain consolidated entities, (iii) an increase in our allocation of the net income of our hedge fund partnerships and BDC platform, (iv) the reversal of previously recognized unrealized losses related to the write-off of Trinity Holdings LLC and certain CLOs and the partial write-off of Preferred Proppants, LLC as described above, and (v) mark-to-market gains on investments in our energy portfolio held through certain consolidated funds.

Unrealized Losses from Investment Activities

Partially offsetting the unrealized gains above were unrealized losses relating to (i) the reversal of previously recognized unrealized gains relating to assets sold in our consolidated special situations funds, the partial sale of First Data Corporation in the third quarter of 2018 which is held as a direct co-investment by KKR and the sale of real estate investments held through certain consolidated entities and (ii) mark-to-market losses on certain investments held in our consolidated special situations funds and investments held at our India debt financing company.

For a discussion of other factors that affected KKR's realized investment income, see "—Segment Analysis." For a detailed discussion of the factors that affected our net gains (losses) from investment activities for the year ended December 31, 2017, see our discussion for the year ended December 31, 2017 compared to the year ended December 31, 2016.

Dividend Income

During the year ended December 31, 2018, the most significant dividends received included \$52.7 million from our consolidated energy funds, \$34.7 million from our consolidated special situations funds, and \$32.4 million from our consolidated real estate funds. During the year ended December 31, 2017, the most significant dividends received

included \$88.5 million from our consolidated special situations funds and \$43.5 million from our consolidated real estate funds. Significant dividends from portfolio companies or consolidated funds are generally not recurring quarterly dividends, and while they may occur in the future, their size and frequency are variable. For a discussion of other factors that affected KKR's dividend income, see "—Segment Results—Segment Revenues—Principal Activities Revenues—Realized Investment Income."

Interest Income

The increase in interest income during the year ended December 31, 2018 compared to the year ended December 31, 2017 was primarily due to a higher level of interest earned related to (i) the closing of seven additional consolidated CLOs subsequent to the year ended December 31, 2017, (ii) an increase in capital deployed in investments held by KREF which is consolidated and (iii) an increase in the amount of investments held in our consolidated credit funds compared to the prior period. These increases were partially offset by a decrease in interest income earned as a result of the sale of KKR's beneficial

Table of Contents

interest in four consolidated CMBS vehicles held by KREF that resulted in the deconsolidation of such vehicles subsequent to December 31, 2017. For a discussion of other factors that affected KKR's interest income, see "—Segment Results—Segment Revenues—Principal Activities Revenues—Realized Investment Income."

Interest Expense

The increase in interest expense during the year ended December 31, 2018 compared to the year ended December 31, 2017 was primarily due to the impact of (i) the closing of seven additional consolidated CLOs subsequent to the year ended December 31, 2017, (ii) increased interest on amounts under KREF's lending facilities used to finance investments in commercial loans and (iii) increased borrowings at KFN. These increases were partially offset by a decrease in (i) interest expense incurred as a result of the sale of KKR's beneficial interest in four consolidated CMBS vehicles held by KREF that resulted in the deconsolidation of such vehicles subsequent to December 31, 2017 and (ii) interest expense associated with certain notes issued by consolidated CLOs being called for redemption subsequent to December 31, 2017. For a discussion of other factors that affected KKR's interest expense, see "—Segment Analysis—Segment Expenses—Interest Expense."

Income (Loss) Before Taxes

The decrease in income (loss) before taxes for the year ended December 31, 2018 compared to the year ended December 31, 2017 was due primarily to a lower level of carried interest and general partner capital interest, partially offset by (i) a higher level of net gains from investment activities, (ii) a higher level of fees and (iii) a lower level of compensation and benefits expense, in each case as described above.

Income Taxes

For the year ended December 31, 2018 there was a net income tax benefit of \$194.1 million which was driven primarily by tax benefits recorded on the date of the Conversion. The tax benefit was partially offset by a higher level of income that is subject to corporate taxes following the Conversion. Prior to the Conversion, KKR & Co. L.P.'s investment income and carried interest generally were not subject to U.S. corporate income taxes. Subsequent to the Conversion, all income earned by KKR & Co. Inc. is subject to U.S. corporate income taxes, which we believe will result in an overall higher income tax expense (or benefit) when compared to periods prior to the Conversion. Our effective tax rate under GAAP for the year ended December 31, 2018 was (8.6)%. As a result of the Conversion KKR recognized a partial step-up in the tax basis of certain assets that will be recovered as those assets are sold or the basis is amortized. This generally results in a lower level of taxable gains upon realization of carried interest and investment income for those assets that existed on the date of the Conversion. Over time as these assets with higher tax basis are realized, we expect that our income tax expense and effective tax rate will increase. The pace of such increase is not currently known and is dependent on a variety of factors including the pace at which the assets with higher tax basis are realized and the mix of all assets realized in any given period. For a discussion of factors that impacted KKR's tax provision, see Item 8. Financial Statements and Supplementary Data—Note 2 "Summary of Significant Accounting Policies" and Note 11 "Income Taxes."

Net Income (Loss) Attributable to Noncontrolling Interests

Net income (loss) attributable to noncontrolling interests for the year ended December 31, 2018 relates primarily to net income attributable to KKR Holdings representing its ownership interests in the KKR Group Partnerships as well as third-party limited partner interests in those investment funds that we consolidate. The decrease from the prior period is due primarily to lower amounts attributed to KKR Holdings in connection with a lower level of income recognized for the year ended December 31, 2018 as compared to the prior period as well as a reduction in KKR

Holdings' ownership percentage in the KKR Group Partnerships. This decrease was partially offset by a higher level of income recorded by certain consolidated fund entities that is attributable to third party limited partners.

Net Income (Loss) Attributable to KKR & Co. Inc.

The increase in net income (loss) attributable to KKR & Co. Inc. for the year ended December 31, 2018 compared to the year ended December 31, 2017 was primarily due to an overall tax benefit in the current period as compared to tax expense in the prior period as well as a higher level of net investment gains and fees, partially offset by a lower level of carried interest gains in the current period as compared to the prior period.

Table of Contents

Year ended December 31, 2017 compared to year ended December 31, 2016

	Year Ended		Change

Table of Contents

Revenues

For the years ended December 31, 2017 and 2016, revenues consisted of the following:

	Year Ended		Change
	December 31, 2017	December 31, 2016	
	(\$ in thousands)		
Management Fees	\$700,245	\$619,243	\$81,002
Fee Credits	(257,401)	(128,707)	(128,694)
Transaction Fees	783,952	350,091	433,861
Monitoring Fees	82,238	65,418	16,820
Incentive Fees	4,601	8,709	(4,108)
Expense Reimbursements	121,927	81,549	40,378
Oil and Gas Revenue	63,460	65,754	(2,294)
Consulting Fees	42,582	42,851	(269)
Total Fees and Other	1,541,604	1,104,908	436,696
Carried Interest	1,740,661	803,185	937,476
General Partner Capital Interest	275,015	131,925	143,090
Total Capital Allocation-Based Income	2,015,676	935,110	1,080,566
Total Revenues	\$3,557,280	\$2,040,018	\$1,517,262

Total Fees and Other for the year ended December 31, 2017 increased compared to the year ended December 31, 2016 primarily as a result of an increase in transaction fees, management fees, monitoring fees and expense reimbursements. These increases were partially offset by an increase in fee credits.

For a more detailed discussion of the factors that affected our transaction fees and monitoring fees during the period, see "—Segment Results—Segment Revenues."

The increase in management fees during the year ended December 31, 2017 compared to the prior period was due primarily to management fees earned from our Americas Fund XII and Asian Fund III which entered their investment periods in the first and second quarter of 2017, respectively. This increase was partially offset by a reduction in management fees from (i) Prisma as a result of the PAAMCO Prisma transaction that closed in the second quarter of 2017 and (ii) lower management fees paid by our North America Fund XI and Asian Fund II when they entered their post-investment periods in the first and second quarter of 2017, respectively, in which they pay fees at a lower rate than during their investment periods and based on capital invested at the time rather than total committed capital.

The increase in carried interest and general partner capital interest earned during the year ended December 31, 2017 compared to the prior period was due primarily to increases in carried interest gains primarily reflecting a higher level of appreciation in the value of our private equity portfolio as compared to the prior period and to a lesser extent gains in our private credit portfolio during the year ended December 31, 2017 as compared to the year ended December 31, 2016.

Compensation and Benefits Expenses

The increase was primarily due to (i) a higher level of carry pool allocations reflecting higher appreciation in the value of our private equity and credit portfolios, (ii) an increase in cash compensation and benefits, and (iii) an increase in equity-based compensation resulting from new equity grants of KKR Holdings units during the year ended December 31, 2017 compared to the year ended December 31, 2016.

General, Administrative and Other Expenses

The increase was primarily due to (i) a reduction in the fair value of the contingent consideration liability during the year ended December 31, 2016 related to the acquisition of Prisma from \$46.6 million to zero since it was determined that it was no

Table of Contents

longer probable that the sellers of Prisma would be entitled to any future additional payment under the arrangement while no such reversal of expense was incurred during the current period and (ii) an increase in professional fees and other expenses incurred as compared to the prior period. These increases were partially offset by (i) a lower level of financing costs incurred relating to debt at new consolidated CLOs for which the fair value option has been elected, (ii) a decrease in depreciation, depletion and amortization of our consolidated oil and gas-producing entities primarily caused by a lower cost basis due to previously recorded impairments, resulting in a lower unit of production depletion rate compared to the prior period, and (iii) the write-off of intangible assets during the year ended December 31, 2016 in connection with the termination of management contracts for certain credit funds that were wound down while no such charge was incurred during the current period.

Net Gains (Losses) from Investment Activities

The following is a summary of net gains (losses) from investment activities:

	Year Ended	
	December 31, 2017	December 31, 2016
	(\$ in thousands)	
Private Equity	\$562,288	\$109,288
Credit	(46,884)	(95,748)
Investments of Consolidated CFEs	(96,777)	185,712
Real Assets	200,006	229,398
Equity Method - Other	130,158	(126,481)
Other Investments	(730,832)	(731,238)
Debt Obligations and Other	101,486	14,665
Other Net Gains (Losses) from Investment Activities	808,699	625,376
Net Gains (Losses) from Investment Activities	\$928,144	\$210,972

Net Gains (Losses) from Investment Activities for the year ended December 31, 2017

The net gains from investment activities for the year ended December 31, 2017 were comprised of net realized gains of \$38.3 million and net unrealized gains of \$889.8 million.

Realized Gains from Investment Activities

For the year ended December 31, 2017, realized gains were comprised primarily of realized gains related to the sale of private equity investments held by KKR's balance sheet, including the final sale of our investment in US Foods Holding Corp. (NYSE: USFD), HCA Holdings, Inc. (NYSE: HCA), and Galenica AG (VTX: GALN) and the partial sale of our investment in First Data Corporation.

Realized Losses from Investment Activities

Partially offsetting these realized gains were realized losses relating to (i) alternative credit assets in our consolidated special situations funds and KFN, (ii) the sale of investments held by our consolidated CLOs, and (iii) the sale of our investments in Fortune Creek Partnership (energy sector) and Aurora Eaglebine (energy sector) which are held in part by KKR's balance sheet in our energy portfolio.

Unrealized Gains from Investment Activities

For the year ended December 31, 2017, net unrealized gains were driven primarily by (i) mark-to-market gains on alternative credit assets in our consolidated special situations funds and KFN, (ii) mark-to-market gains in certain consolidated entities, the most significant of which were unrealized gains in our growth equity investments, (iii) mark-to-market gains in our private equity portfolio held by KKR's balance sheet, the most significant of which were unrealized gains in our investment in First Data Corporation, (iv) mark-to-market gains in our infrastructure portfolio held by KKR's balance sheet and (v) the reversal of unrealized losses on the sale of our investment in Fortune Creek Partnership and the restructuring of our investment in Aurora Eaglebine which are held by KKR's balance sheet in our energy portfolio. For the year ended December 31, 2017, unrealized gains from investment activities includes a gain of \$67.2 million relating to a remeasurement of the tax receivable agreement liability which arises from changes in the associated deferred tax balances related to the 2017 Tax Act.

Table of Contents

Unrealized Losses from Investment Activities

Partially offsetting the unrealized gains above were unrealized losses, the most significant of which were unrealized losses relating to (i) the reversal of unrealized gains on the final sale of our investments in US Foods Holding Corp., HCA Holdings, Inc., and Galenica AG and (ii) mark-to-market losses in certain consolidated entities, the most significant of which were unrealized losses in our growth equity investments.

For a discussion of other factors that affected KKR's realized investment income, see "—Segment Analysis."

Net Gains (Losses) from Investment Activities for the year ended December 31, 2016

The net gains from investment activities for the year ended December 31, 2016 were comprised of net realized gains of \$347.1 million and net unrealized losses of \$136.1 million. For the year ended December 31, 2016, net realized gains were comprised primarily of the net impact of (i) realized gains on sales of private equity investments held by KKR's balance sheet, including the partial sales of Walgreens Boots Alliance, Inc. (NASDAQ: WBA), Zimmer Biomet Holdings, Inc. (NYSE: ZBH) and HCA Holdings, Inc.; (ii) realized losses in connection with our investment in Samson Resources (energy sector); (iii) realized losses on assets held at consolidated CLOs; and (iv) realized gains on debt held at consolidated CLOs. For the year ended December 31, 2016, net unrealized losses were driven primarily by (i) mark-to-market losses in our private equity portfolio held by KKR's balance sheet including unrealized losses in First Data Corporation; (ii) mark-to-market losses on assets in our consolidated special situations funds; (iii) mark-to-market losses on debt held through consolidated CMBS; and (iv) the reversal of unrealized gains on the partial sales of Walgreens Boots Alliance, Inc., Zimmer Biomet Holdings, Inc. and HCA Holdings, Inc., as well as the reversal of unrealized gains on debt realizations at our consolidated CLOs. Offsetting these unrealized losses were unrealized gains, the most significant of which were unrealized gains relating to (i) the reversal of unrealized losses in connection with our investment in Samson Resources, (ii) reversals of unrealized losses on asset realizations in our consolidated CLOs and (iii) mark-to-market gains on investments held through consolidated CMBS structures.

For a discussion of other factors that affected KKR's realized investment income, see "—Segment Analysis."

Dividend Income

During the year ended December 31, 2017, the most significant dividends received included \$88.5 million from our consolidated special situations funds and \$43.5 million from our consolidated real estate funds. During the year ended December 31, 2016, the most significant dividends received included \$51.5 million from our consolidated special situations funds and dividends from US Foods Holding Corp. of \$23.4 million, Sedgwick Claims Management Services, Inc. (financial services sector) of \$12.7 million, and PRA Health Sciences, Inc. (NASDAQ: PRAH) of \$4.1 million. Significant dividends from portfolio companies are generally not recurring quarterly dividends, and while they may occur in the future, their size and frequency are variable. For a discussion of other factors that affected KKR's dividend income, see "—Segment Results—Segment Revenues—Principal Activities Revenues—Realized Investment Income."

Interest Income

The increase in interest income during the year ended December 31, 2017 was primarily due to a higher level of interest earned related to (i) an increase in the amount of investments in our consolidated special situations funds and other leveraged credit funds, (ii) the impact of the consolidation of three additional CLOs subsequent to the year ended December 31, 2016, (iii) an increase in the amount of investments held by KREF compared to the prior period and (iv) an increase in the amount of investments held at our India debt financing company. These increases were

partially offset by a decrease in interest income at KFN primarily due to a smaller portfolio generating recurring income as well as a decrease associated with the paydown of CLO 2007-01 in the second quarter of 2016. For a discussion of other factors that affected KKR's interest income, see "—Segment Results—Segment Revenues—Principal Activities Revenues—Realized Investment Income."

Interest Expense

The increase in interest expense during the year ended December 31, 2017 was primarily due to the impact of (i) the consolidation of three additional CLOs subsequent to the year ended December 31, 2016, (ii) increased borrowings at our India debt financing company, (iii) increased CMBS issuances by KREF and (iv) increased borrowings from asset backed financing vehicles managed by KKR. These increases were partially offset by a decrease in interest expense associated with certain notes issued by consolidated CLOs being called for redemption during the year ended December 31, 2016, which resulted in an increased level of interest expense during 2016. Specifically, as a result of a paydown made in August 2016, KKR recorded

Table of Contents

increased interest expense of \$59.9 million and an incremental \$8.7 million of accelerated accretion of debt discounts during the year ended December 31, 2016. The paydown of CLO 2007-01 during the year ended December 31, 2016 also contributed to the increased interest expense in the prior period. For a discussion of other factors that affected KKR's interest expense, see "—Segment Analysis—Interest Expense."

Income (Loss) Before Taxes

The increase in income (loss) before taxes was due primarily to higher carried interest gains in our private equity portfolio and higher net gains from investment activities, partially offset by an increase in expenses, in each case as described above.

Income Taxes

The increase in income taxes is due primarily to accounting for the impacts of the 2017 Tax Act which was enacted on December 22, 2017. The 2017 Tax Act, among other provisions, reduced the U.S. federal corporate tax rate from 35% to 21%. Certain income tax effects of the 2017 Tax Act, including \$97.9 million of tax expense recorded principally due to the remeasurement of our net deferred tax assets, are reflected in our financial results for the year ended December 31, 2017. This net write-down reduces our deferred tax assets and liabilities to a level that reflects the future tax benefit or liability that will be realized at the new U.S. federal corporate tax rate of 21%. For a discussion of factors that impacted KKR's tax provision, see Item 8. Financial Statements and Supplementary Data—Note 2 "Summary of Significant Accounting Policies" and Note 11 "Income Taxes."

Taxes also increased as a result of a higher level of fees earned by our management companies and capital markets companies during the year ended December 31, 2017 as compared to the prior period and to a lesser extent a higher level of carried interest gains accrued by certain general partner entities subject to corporate income tax.

Net Income (Loss) Attributable to Noncontrolling Interests

Net income attributable to noncontrolling interests for the year ended December 31, 2017 relates primarily to net income attributable to KKR Holdings representing its ownership interests in the KKR Group Partnerships as well as third-party limited partner interests in those investment funds that we consolidate. The increase from the prior period is due primarily to (i) higher amounts attributed to KKR Holdings in connection with higher income recognized for the year ended December 31, 2017 as compared to the prior period, partially offset by a reduction in KKR Holdings' ownership percentage in the KKR Group Partnerships and (ii) a higher level of income recorded by certain consolidated fund entities that is attributable to third-party limited partners.

Net Income (Loss) Attributable to KKR & Co. Inc.

The increase for the year ended December 31, 2017 was primarily due to increased fee income and to a lesser extent, higher carried interest gains and higher net investment gains from investment activities in the current period as compared to the prior period.

Table of Contents

Consolidated Statements of Financial Condition

The following table provides the Consolidated Statements of Financial Condition on a GAAP basis as of December 31, 2018 and December 31, 2017.

(Amounts in thousands, except per share amounts)

	As of December 31, 2018	As of December 31, 2017
Assets		
Cash and Cash Equivalents	\$ 1,751,287	\$ 1,876,687

Consolidated Statements of Cash Flows

The accompanying consolidated statements of cash flows include the cash flows of our consolidated entities which include certain consolidated investment funds and CFEs notwithstanding the fact that we may hold only a minority economic interest in those funds and CFEs.

The assets of our consolidated funds and CFEs, on a gross basis, can be substantially larger than the assets of our business and, accordingly, could have a substantial effect on the cash flows reflected in our consolidated statements of cash flows. The primary cash flow activities of our consolidated funds and CFEs involve: (i) capital contributions from fund investors; (ii) using the capital of fund investors to make investments; (iii) financing certain investments with indebtedness; (iv) generating cash flows through the realization of investments; and (v) distributing cash flows from the realization of investments to fund investors. Because our consolidated funds and CFEs are treated as investment companies for accounting purposes, certain of these cash flow amounts are included in our cash flows from operations.

On January 1, 2018, KKR adopted ASU No. 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash, which amends the guidance to add or clarify guidance on the classification and presentation of restricted cash in the statement of cash flows. Upon adoption, (i) Restricted Cash and Cash Equivalents and (ii) Cash and Cash Equivalents Held at Consolidated Entities were (a) included in the cash and cash-equivalents balances in the consolidated statements of cash flows and (b) disclosed in a reconciliation between the consolidated statements of financial condition and the consolidated statements of cash flows. This guidance has been applied on a full retrospective basis. For the years ended December 31, 2017 and 2016, \$97.9 million and \$121.0 million, respectively, of cash used by operating activities and \$155.9 million and \$1.4 million, respectively, of cash provided by investing activities were removed from net cash provided (used) by operating activities and net cash

Table of Contents

provided (used) by investing activities, respectively, and included in net increase/(decrease) in cash, cash-equivalents and restricted cash in the consolidated statements of cash flows.

Net Cash Provided (Used) by Operating Activities

Our net cash provided (used) by operating activities was \$(7.6) billion, \$(3.5) billion and \$(1.4) billion during the years ended December 31, 2018, 2017 and 2016, respectively. These amounts primarily included: (i) proceeds from investments net of investments purchased of \$(8.5) billion, \$(4.8) billion and \$(1.2) billion during the years ended December 31, 2018, 2017 and 2016, respectively; (ii) net realized gains (losses) on investments of \$534.7 million, \$38.3 million and \$347.1 million during the years ended December 31, 2018, 2017 and 2016, respectively; (iii) change in unrealized gains (losses) on investments of \$720.2 million, \$889.8 million and \$(136.1) million during the years ended December 31, 2018, 2017 and 2016 respectively and (iv) capital allocation-based income of \$554.5 million, \$2,015.7 million and \$935.1 million during the years ended December 31, 2018, 2017 and 2016, respectively. Investment funds are, for GAAP purposes, investment companies and reflect their investments and other financial instruments at fair value.

Net Cash Provided (Used) by Investing Activities

Our net cash provided (used) by investing activities was \$(78.6) million, \$(98.1) million and \$(63.9) million during the years ended December 31, 2018, 2017 and 2016, respectively. Our investing activities included: (i) the purchase of fixed assets of \$(102.7) million, \$(97.1) million and \$(62.7) million during the years ended December 31, 2018, 2017 and 2016, respectively; (ii) proceeds from sale of oil and natural gas properties of \$26.6 million and \$0.9 million for the years ended December 31, 2018 and 2016, respectively, and (iii) development of oil and natural gas properties of \$(2.6) million, \$(1.1) million and \$(2.1) million for the years ended December 31, 2018, 2017, and 2016, respectively.

Net Cash Provided (Used) by Financing Activities

Our net cash provided (used) by financing activities was \$6.6 billion, \$2.9 billion and \$3.1 billion during the years ended December 31, 2018, 2017 and 2016, respectively. Our financing activities primarily included: (i) distributions to, net of contributions by, our noncontrolling and redeemable noncontrolling interests of \$1.9 billion, \$1.2 billion and \$0.9 billion during the years ended December 31, 2018, 2017 and 2016, respectively; (ii) proceeds received net of repayment of debt obligations of \$5.4 billion, \$2.1 billion and \$2.4 billion during the years ended December 31, 2018, 2017 and 2016, respectively; (iii) common stock dividends of \$(322.3) million, \$(312.0) million and \$(285.4) million during the years ended December 31, 2018, 2017 and 2016, respectively; (iv) net delivery of Class A common stock of \$(98.8) million, \$(58.7) million and \$(50.5) million during the years ended December 31, 2018, 2017 and 2016, respectively; (v) repurchases of Class A common stock of \$(173.1) million and \$(296.8) million during the years ended December 31, 2018 and 2016, respectively; (vi) preferred stock dividends of \$(33.4) million, \$(33.4) million and \$(22.2) million during the years ended December 31, 2018, 2017 and 2016, respectively and (vii) issuance of preferred stock of \$482.6 million during the year ended December 31, 2016.

Segment Analysis

The following is a discussion of the results of our business on a segment basis for the years ended December 31, 2018, 2017, and 2016. You should read this discussion in conjunction with the information included under "—Basis of Accounting—Key Segment and Other Operating and Performance Measures" and the consolidated financial statements and related notes included elsewhere in this report.

In connection with a change of KKR's chief operating decision makers, KKR's management has reevaluated the manner in which it makes operational and resource deployment decisions and assesses the overall performance of KKR's business. As a result, KKR has modified the presentation of its segment financial information effective as of and for the three months ended June 30, 2018, with retrospective application to all prior periods presented. For a further discussion of the changes in our segment presentation, see Item 8. Financial Statements and Supplementary Data—Note 14 "Segment Reporting."

After-tax Distributable Earnings	\$1,597,240	\$1,355,600	\$241,640

Given the extraordinary nature of the Conversion, the reported segment financial results for the year ended (1) December 31, 2018 exclude approximately \$729.4 million of losses on certain investments which were realized in the second quarter in advance of the Conversion.

(2) Includes equity-based compensation of \$242,811 and \$204,308 for the years ended December 31, 2018 and December 31, 2017, respectively.

(3) For the year ended December 31, 2018, excludes approximately \$11.5 million of non-recurring costs in connection with the Conversion.

Table of Contents

Segment Revenues

The following sections discuss revenues for each of our business lines on a disaggregated basis for the years ended December 31, 2018 and 2017.

Private Markets Revenues

The following table presents Fees and Other, Net and Realized Performance Income in the Private Markets business line for the years ended December 31, 2018 and 2017:

	Year Ended		Change
	December 31, 2018	December 31, 2017	
	(\$ in thousands)		
Fees and Other, Net			
Management Fees	\$665,026	\$575,451	\$89,575
Transaction Fees	303,902	288,879	15,023
Monitoring Fees	87,520	81,021	6,499

Total Fees and Other, Net	817,007	724,641	92,366
Realized Performance Income (Loss)			
Carried Interest	1,208,747	1,198,981	9,766
Incentive Fees	1,041	—	1,041
Total Realized Performance Income (Loss)	\$1,209,788	\$1,198,981	\$10,807

Fees and Other, Net

The increase for the year ended December 31, 2018 as compared to the year ended December 31, 2017 was primarily due to an increase in management fees and transaction fees, partially offset by a corresponding increase in fee credits.

The increase in management fees was primarily due to (i) management fees earned from our Asian Fund III which entered its investment period in the second quarter of 2017 (partial year of revenue in 2017), (ii) management fees earned from our Global Infrastructure Fund III which entered its investment period in the second quarter of 2018 and (iii) management fees earned from our Real Estate Partners Americas II fund which entered its investment period in the second quarter of 2017 (partial year of revenue in 2017). This net increase was partially offset by decreases due to (i) lower management fees calculated based on lower levels of invested capital as a result of realizations primarily in our European Fund III, 2006 Fund and Asian Fund, (ii) lower management fees paid by our Asian Fund II when it entered its post-investment period in the second quarter of 2017, in which it pays fees at a lower rate than during the investment period and based on capital invested at the time rather than total committed capital, and (iii) lower management fees earned from our Real Estate Partners Americas fund which entered its post-investment period in the second quarter of 2017, in which it pays fees based on capital invested rather than remaining commitments and capital invested during the investment period. For each of our Asian Fund II and Real Estate Partners Americas fund, the reduction in fees in 2017 was for a partial year, whereas 2018 experienced a full year of reduced fees.

The increase in transaction fees was primarily attributable to an increase in the size of transaction fee-generating investments. During the year ended December 31, 2018, there were 41 transaction fee-generating investments that paid an average fee of \$7.4 million compared to 46 transaction fee-generating investments that paid an average fee of

\$6.3 million during the year ended December 31, 2017. For the year ended December 31, 2018, approximately 59% of these transaction fees were paid by companies located in North America, 22% were paid from companies located in the Asia-Pacific region and 19% were paid from companies in Europe. Transaction fees vary by investment based upon a number of factors, the most significant of which are transaction size, the particular agreements as to the amount of the fees, the complexity of the transaction and KKR's role in the transaction. Additionally, transaction fees are generally not earned with respect to energy and real estate investments. The increase in fee credits is due primarily to a higher level of transaction fees and monitoring fees reimbursable to the fund investors.

Table of Contents

The increase in monitoring fees was primarily attributable to an increase in recurring monitoring fees compared to the prior period, partially offset by lower termination payments. Recurring monitoring fees increased \$18.6 million, which was primarily the result of an increase in both the size and number of portfolio companies paying monitoring fees. For the year ended December 31, 2018, we had 71 portfolio companies that were paying an average monitoring fee of \$1.1 million compared with 66 portfolio companies that were paying an average monitoring fee of \$0.9 million for the year ended December 31, 2017. For the year ended December 31, 2018, we received termination payments of \$7.5 million in connection with the IPO of BrightView Holdings, Inc. (NYSE: BV) compared to \$19.6 million of termination payments received in the year ended December 31, 2017 relating to the IPO of Gardner Denver Holdings, Inc. (NYSE: GDI) and National Vision Holdings, Inc. (NASDAQ: EYE). These termination payments may occur in the future; however, they are infrequent in nature and are generally correlated with the IPO and other realization activity in our private equity portfolio, and are expected to continue to be smaller in size and number compared to prior periods.

Realized Performance Income

The following table presents realized carried interest by investment vehicle for the years ended December 31, 2018 and 2017:

	Year Ended	
	December 31, 2018	December 31, 2017
	(\$ in thousands)	
North America Fund XI	\$471,291	\$ 235,927
2006 Fund	297,173	557,888
European Fund III	192,715	182,386
Asian Fund II	92,011	65,534
Millennium Fund	64,614	28,266
Asian Fund	28,991	18,511
Co-Investment Vehicles and Other	19,192	40,156
Global Infrastructure Investors	16,653	14,772
Real Estate Partners Americas	12,189	15,160
China Growth Fund	11,759	20,130
European Fund II	2,159	20,251
Total Realized Carried Interest ⁽¹⁾	\$ 1,208,747	\$ 1,198,981

(1) The above table excludes any funds for which there was no realized carried interest during either of the periods presented.

The most significant realizations contributing to our realized carried interest for the year ended December 31, 2018, consisted of the partial sales of National Vision Holdings, Inc., GoDaddy Inc. (NYSE: GDDY), and Gardner Denver Holdings, Inc.

Realized carried interest for the year ended December 31, 2017, consisted primarily of realized gains from the sale of Capsugel S.A. (manufacturing sector) and the partial sales of US Foods Holding Corp. and PRA Health Sciences, Inc.

Table of Contents

Public Markets Revenues

The following table presents Fees and Other, Net and Realized Performance Income in the Public Markets business line for the year ended December 31, 2018 and 2017:

	Year Ended		
	December 31, 2018	December 31, 2017	Change
	(\$ in thousands)		
Fees and Other, Net			
Management Fees	\$404,048	\$ 329,737	\$74,311
Transaction Fees	42,531	48,370	(5,839)
Fee Credits	(40,695)	(40,719)	24
Total Fees and Other, Net	405,884	337,388	68,496
Realized Performance Income (Loss)			
Carried Interest	9,900	—	9,900
Incentive Fees	137,289	73,395	63,894
Total Realized Performance Income (Loss)	\$ 147,189	\$ 73,395	\$ 73,794

Fees and Other, Net

The increase for the year ended December 31, 2018 was primarily due to an increase in management fees, partially offset by a decrease in transaction fees, net of fee credits. The increase in management fees was primarily due to (i) an increase in fees earned from BDCs advised by FS/KKR Advisor resulting in part from the completion of the FS Investments Transaction in the second quarter of 2018, (ii) increased fees from our hedge fund partnerships as a result of greater FPAUM, and (iii) an increase in fees in our Special Situations Fund II as a result of increased capital invested. As a result of the closing of the FS Investments Transaction on April 9, 2018, KKR began receiving its portion of the management and incentive fees on an additional \$13.2 billion of FPAUM (relating to FS Investments' BDCs), which are reflected in our operating results beginning in the second quarter of 2018. These increases were partially offset by a reduction in management fees from Prisma as a result of the PAAMCO Prisma transaction that closed in the second quarter of 2017. KKR reports its investment in PAAMCO Prisma using the equity method of accounting, and on a segment basis, KKR reflects its allocation of the net income of PAAMCO Prisma as management fees and realized incentive fees. Accordingly, the management fees and other revenues and expenses of Prisma that had been reported on a gross basis prior to the closing of the transaction on June 1, 2017 are reflected on a net basis as part of our allocation of the net income of PAAMCO Prisma after June 1, 2017 resulting in a decrease in our reported gross management fees when compared to the prior period. The decrease in transaction fees was driven primarily by an \$18.5 million breakup fee received in the year ended December 31, 2017 in connection with a terminated transaction and included in transaction fees, compared to no such breakup fees in the year ended December 31, 2018. The net amount of this fee attributable to us after credits to our fund limited partners was \$4.6 million.

Realized Performance Income

The increase for the year ended December 31, 2018 compared to the prior period was primarily attributable to higher incentive fees received from BDCs advised or sub-advised by KKR driven in part by the completion of the FS Investments Transaction in the second quarter of 2018, and to a lesser extent, higher incentive fees earned in our hedge fund partnerships and realized carried interest earned in our special situations strategy.

Table of Contents

Capital Markets Revenues

The following table presents Transaction Fees in the Capital Markets business line for the years ended December 31, 2018 and 2017:

	Year Ended		Change
	December 31, 2018	December 31, 2017	
Transaction Fees	\$631,052	\$ 439,998	\$ 191,054

Transaction fees increased due primarily to an increase in both the size and number of capital markets transactions for the year ended December 31, 2018, compared to the year ended December 31, 2017. Overall, we completed 204 capital markets transactions for the year ended December 31, 2018, of which 28 represented equity offerings and 176 represented debt offerings, as compared to 193 transactions for the year ended December 31, 2017, of which 26 represented equity offerings and 167 represented debt offerings. Our capital markets fees are generated in connection with our Private Markets and Public Markets business lines as well as from third-party companies. For the year ended December 31, 2018, approximately 18% of our transaction fees were earned from unaffiliated third parties as compared to approximately 23% for the year ended December 31, 2017. Our transaction fees are comprised of fees earned from North America, Europe and Asia-Pacific. For the year ended December 31, 2018, approximately 30% of our transaction fees were generated outside of North America as compared to approximately 49% for the year ended December 31, 2017. Our Capital Markets business line is dependent on the overall capital markets environment, which is influenced by equity prices, credit spreads and volatility. Our Capital Markets business line does not generate management or monitoring fees.

Principal Activities Revenues

The following table presents Realized Investment Income in the Principal Activities business line for the years ended December 31, 2018 and 2017:

	Year Ended		Change
	December 31, 2018	December 31, 2017	
Realized Investment Income (Loss)			
Net Realized Gains (Losses) ⁽¹⁾	\$365,324	\$ 194,020	\$ 171,304
Interest Income and Dividends	286,468	285,696	772
Total Realized Investment Income (Loss)	\$651,792	\$ 479,716	\$ 172,076

Given the extraordinary nature of the Conversion, the reported segment financial results for the year ended (1)December 31, 2018 exclude approximately \$729.4 million of losses on certain investments which were realized in the second quarter in advance of the Conversion.

Realized Investment Income

The increase is primarily due to an increased level of net realized gains and an increase in interest income and dividends during the year ended December 31, 2018, compared to the prior period.

For the year ended December 31, 2018, net realized gains were comprised primarily of gains from the sale of Private Markets investments including the sales or partial sales of our investments in First Data Corporation, Next Issue Media LLC (technology sector), and National Vision Holdings, Inc., as well as the sale of our equity interest in

Nephila and the sale of our alternative credit investment in Amedisys, Inc. (NASDAQ: AMED). Offsetting these realized gains were realized losses, the most significant of which was a realized loss on Preferred Proppants, LLC. Given the extraordinary nature of the Conversion, the reported segment financial results for the year ended December 31, 2018 exclude approximately \$729.4 million of realized losses on certain investments, primarily credit and energy investments, which were realized in the second quarter of 2018 in advance of the Conversion.

For the year ended December 31, 2017, net realized gains were comprised of gains primarily from the sale of private equity investments including the sales or partial sales of HCA Holdings, Inc., Walgreens Boots Alliance, Inc., and Visma AS (technology sector), partially offset by losses on the sale of Fortune Creek Partnership and the restructurings of Algeco Scotsman (industrial sector) and Aurora Eaglebine.

Table of Contents

For the year ended December 31, 2018, interest income and dividends were comprised of (i) \$174.4 million of interest income which consists primarily of interest that is received from our Public Markets investments, including CLOs and other credit investments and, to a lesser extent, our Capital Markets business and our cash balances and (ii) \$112.1 million of dividend income from distributions received primarily through our real assets investments, including our real estate investment in KREF and our energy investments, as well as our credit investments.

For the year ended December 31, 2017, interest income and dividends were comprised of (i) \$163.4 million of interest income which consists primarily of interest that is received from our Public Markets investments, including CLOs and other credit investments and, to a lesser extent, our India debt financing company and our cash balances and (ii) \$122.3 million of dividend income from distributions received primarily through our private equity investments and real estate investments, including our investment in KREF.

Subsequent to December 31, 2018, we completed, or expect to complete sales, partial sales or secondary sales with respect to certain private equity portfolio companies and other investments as well as other realization activities such as the receipt of dividends and interest income across our broader portfolio. The most significant of these transactions are Sedgwick Claims Management Services, Inc., United Group B.V. (telecom sector), and MMI Holdings Limited (technology sector). These realization activities, if and when completed, are expected to result in realized performance income and realized investment income of approximately \$400 million. Some of these transactions are not complete, and are subject to the satisfaction of closing conditions; there can be no assurance if or when any of these transactions will be completed.

Segment Expenses

Compensation and Benefits

The increase for the year ended December 31, 2018 compared to the prior period was due primarily to higher compensation recorded in connection with higher total segment revenues and includes higher equity-based compensation charges resulting from an increase in the weighted average number of unvested shares outstanding.

Occupancy and Other Operating Expenses

The increase for the year ended December 31, 2018 compared to the prior period is primarily due to a higher level of expenses that are creditable to our investment funds, which includes broken-deal expenses, and a higher level of professional fees and other administrative costs in connection with the growth of the firm. The level of broken-deal expenses can vary significantly period to period based upon a number of factors, the most significant of which are the number of potential investments being pursued for our investment funds, the size and complexity of investments being pursued and the number of investment funds currently in their investment period.

Interest Expense

For the year ended December 31, 2018 and 2017 interest expense relates primarily to the senior notes outstanding for KKR and KFN. The increase in interest expense for the year ended December 31, 2018 compared to the prior period is due to overall higher levels of borrowings, in particular at our Capital Markets business line under a revolving credit agreement.

Income Taxes Paid

The increase in income taxes paid is primarily due to a higher level of income that is subject to corporate taxes following the Conversion. Prior to the Conversion, KKR's investment income and carried interest generally were not subject to U.S. corporate income taxes. Subsequent to the Conversion, all income earned by KKR is subject to U.S. corporate income taxes which we believe will result in an overall higher income taxes paid when compared to periods prior to the Conversion. As a result of the Conversion, KKR recognized a partial step-up in the tax basis of certain

assets that will be recovered as those assets are sold or the basis is amortized. This generally results in a lower level of taxable gains upon realization of carried interest and investment income for those assets that existed on the date of the Conversion. Over time as these assets with higher tax basis are realized, we expect that our income taxes paid and segment effective tax rate will increase. The pace of such increase is not currently known and is dependent on a variety of factors including the pace at which the assets with higher tax basis are realized and the mix of all assets realized in any given period. Therefore, we cannot predict what the increase, if any, in income taxes paid will be quarter-over-quarter or year-over-year.

Table of Contents

After-tax Distributable Earnings

The net increase in after-tax distributable earnings for the year ended December 31, 2018 compared to the prior period was due primarily to higher transaction fees, realized investment income, management fees and realized performance income, partially offset by a higher level of compensation expense and income taxes paid in the current period compared to the prior period.

Other Operating and Performance Measures

The following table presents certain key operating and performance metrics as of December 31, 2018 and December 31, 2017:

	As of		
	December 31,	December 31,	Change
	2018	2017	
	(\$ in thousands)		
Assets Under Management	\$194,720,400	\$168,470,600	\$26,249,800
Fee Paying Assets Under Management	\$141,007,700	\$117,437,500	\$23,570,200
Uncalled Commitments	\$57,959,000	\$56,553,100	\$1,405,900

The following table presents one of our key performance metrics for the years ended December 31, 2018 and 2017:

	Year Ended		
	December 31,	December 31,	Change
	2018	2017	
	(\$ in thousands)		
Capital Invested and Syndicated Capital	\$26,493,900	\$23,045,100	\$3,448,800

Assets Under Management

Private Markets

The following table reflects the changes in our Private Markets AUM from December 31, 2017 to December 31, 2018:

	(\$ in thousands)
December 31, 2017	\$97,527,100
New Capital Raised	14,755,500
Distributions and Other (12,751,000)	
Change in Value	3,864,900
December 31, 2018	\$103,396,500

AUM for the Private Markets business line was \$103.4 billion at December 31, 2018, an increase of \$5.9 billion, compared to \$97.5 billion at December 31, 2017.

The increase was primarily attributable to (i) new capital raised in our Global Infrastructure Investors III Fund and our European Fund V and (ii) to a lesser extent, an increase in the value of our Private Markets portfolio. These increases were partially offset by distributions to Private Markets fund investors primarily as a result of realizations, most notably in our North America Fund XI, 2006 Fund, and European Fund III.

The increase in the value of our Private Markets portfolio was driven primarily by net gains of \$0.4 billion in each of our European Fund IV, European Fund III, 2006 Fund and Asian Fund III and \$0.2 billion in each of our Global Infrastructure Investors II Fund, Americas Fund XII and Next Generation Technology Growth Fund.

For the year ended December 31, 2018, the value of our private equity investment portfolio increased 5.1%. This was comprised of a 12.3% increase in value of our privately held investments and a 7.9% decrease in the share prices of various publicly held or publicly indexed investments.

The most significant increases in value of our privately held investments for the year ended December 31, 2018 related to increases in Sedgwick Claims Management Services, Inc., Internet Brands, Inc. (technology sector), and Cognita Schools Ltd (education sector). These increases in value on our privately held investments were partially offset by decreases in value

Table of Contents

relating primarily to Arbor Pharmaceuticals, Inc. (health care sector), Resource Environmental Solutions, LLC (energy sector), and Mandala Energy Ltd. (energy sector). The increased valuations of individual companies in our privately held investments, in the aggregate, generally related to (i) in the case of Sedgwick Claims Management Services, Inc. and Cognita Schools Ltd, a valuation that reflects an agreement to sell these investments, (ii) an increase in the value of market comparables, and (iii) individual company performance. The decreased valuations of individual companies in our privately held investments, in the aggregate, generally related to (i) individual company performance or, in certain cases, an unfavorable business outlook and (ii) a decrease in the value of market comparables.

The most significant decreases in share prices for the year ended December 31, 2018 of various publicly held or publicly indexed investments were losses in Gardner Denver Holdings, Inc., BrightView Holdings, Inc., and National Vision Holdings, Inc. These decreases were partially offset by increases in share prices of various publicly held investments, the most significant of which were gains in First Data Corporation, Go Daddy Inc., and PT Japfa Comfeed Indonesia Tbk. (IDX: JPFA).

For the year ended December 31, 2017, the value of our private equity investment portfolio increased 23.3%. This was comprised of a 34.6% increase in the share prices of various publicly held or publicly indexed investments and a 16.7% increase in value of our privately held investments. Additionally, our infrastructure investment portfolio, which is comprised predominately of private investments, increased 21.7%.

The most significant increases in share prices of various publicly held or publicly indexed investments were gains in Gardner Denver Holdings, Inc., National Vision Holdings, Inc., and Qingdao Haier Co., Ltd. (CH: 600690) These increases were partially offset by decreased share prices of various publicly held investments, the most significant of which were losses in Fujian Sunner Development Co. Ltd. (SZ: 002299), Laureate Education, Inc. (NASDAQ: LAUR), and Engility Holdings, Inc. (NYSE: EGL).

Our privately held investments contributed the remainder of the change in value, the most significant of which were gains relating to Internet Brands, Inc., Weld North Holdings LLC (education sector), and Aricent Group (technology sector). The unrealized gains on our privately held investments were partially offset by unrealized losses relating primarily to Academy Ltd. (retail sector), Toys R Us, Inc. (retail sector), and Santanol Pty Ltd (forestry sector). The increased valuations of individual companies in our privately held investments, in the aggregate, generally related to (i) in the case of Weld North Holdings LLC and Aricent Group, valuations that reflect agreements to sell all or a portion of these investments, (ii) an increase in the value of market comparables and (iii) individual company performance. The decreased valuations of individual companies in our privately held investments, in the aggregate, generally related to (i) individual company performance or, in certain cases, an unfavorable business outlook and (ii) a decrease in the value of market comparables.

Certain investments included in our AUM are denominated in currencies other than the U.S. dollar. Those investments expose our AUM to the risk that the value of the investments will be affected by changes in exchange rates between the currency in which the investments are denominated and the currency in which the investments are made. We generally seek to reduce these risks by employing hedging techniques in connection with certain investments, including using foreign currency options and foreign exchange forward contracts to reduce exposure to changes in exchange rates when a meaningful amount of capital has been invested in currencies other than the currencies in which the investments are denominated. We do not, however, hedge our currency exposure in all currencies or for all investments. See "Quantitative and Qualitative Disclosures about Market Risk—Exchange Rate Risk" and "Risk Factors—Risks Related to the Assets We Manage—We make investments in companies that are based outside of the United States, which may expose us to additional risks not typically associated with investing in companies that are based in the United States."

Public Markets

The following table reflects the changes in our Public Markets AUM from December 31, 2017 to December 31, 2018:

	(\$ in thousands)
December 31, 2017	\$ 70,943,500
New Capital Raised	19,253,900
Impact of Other Transactions	12,039,600
Distributions	(3,532,600)
Redemptions	(5,746,400)
Change in Value	(1,634,100)
December 31, 2018	\$ 91,323,900

123

Table of Contents

AUM in our Public Markets business line totaled \$91.3 billion at December 31, 2018, an increase of \$20.4 billion compared to AUM of \$70.9 billion at December 31, 2017. The increases due to new capital raised were related to multiple strategies, most notably \$7.8 billion in certain leveraged credit strategies, \$5.7 billion in our hedge fund partnerships, \$2.7 billion in CLOs, and \$2.4 billion in our private credit strategies. The "Impact of Other Transactions" activity represents the net impact of (i) \$13.2 billion relating to AUM previously managed by FS Investments in connection with the completion of the FS Investments Transaction, (ii) a \$1.9 billion increase in our pro rata portion of AUM managed by Marshall Wace in connection with the acquisition of an additional 5% interest in this hedge fund partnership, and (iii) a \$3.1 billion decrease of AUM in connection with the sale of our equity interest in Nephila. Partially offsetting these increases were redemptions and distributions from certain investment vehicles across multiple strategies, primarily with our hedge fund partnerships, certain leveraged credit strategies and our private credit strategies. Change in value was driven primarily by net decreases in value of our hedge fund partnerships and our BDCs.

Fee Paying Assets Under Management

Private Markets

The following table reflects the changes in our Private Markets FPAUM from December 31, 2017 to December 31, 2018:

	(\$ in thousands)
December 31, 2017	\$ 61,678,600
New Capital Raised	11,079,900
Distributions and Other	(5,233,200)
Net Changes in Fee Base of Certain Funds	(1,040,300)
Change in Value	345,000
December 31, 2018	\$ 66,830,000

FPAUM in our Private Markets business line was \$66.8 billion at December 31, 2018, an increase of \$5.1 billion, compared to \$61.7 billion at December 31, 2017.

The increase was primarily attributable to new capital raised in our Global Infrastructure Investors III Fund and capital invested in our core investment vehicles. These increases were partially offset by (i) distributions primarily relating to realizations in our 2006 Fund, European Fund III, and North America Fund XI and (ii) net changes in the fee base of our Global Infrastructure Fund II and Energy Income and Growth Fund as a result of these funds entering their post-investment period. With respect to the Global Infrastructure Fund II, post-investment period fees are based on net asset value as compared to investment period fees, which are based on remaining commitments & net asset value. With respect to the Energy Income and Growth Fund, post-investment period fees are based on invested capital as compared to investment period fees, which are based on remaining commitments and invested capital.

Public Markets

The following table reflects the changes in our Public Markets FPAUM from December 31, 2017 to December 31, 2018:

	(\$ in thousands)
December 31, 2017	\$ 55,758,900
New Capital Raised	17,871,900
Impact of Other Transactions	12,039,600
Distributions	(3,820,600)

Redemptions	(5,746,400)
Change in Value	(1,925,700)
December 31, 2018	\$ 74,177,700

FPAUM in our Public Markets business line was \$74.2 billion at December 31, 2018, an increase of \$18.4 billion compared to FPAUM of \$55.8 billion at December 31, 2017. The increases due to new capital raised were related to multiple strategies, most notably \$7.7 billion in certain leveraged credit strategies, \$3.7 billion in our hedge fund partnerships, \$3.1 billion in our private credit strategies and \$2.7 billion in our CLOs. The "Impact of Other Transactions" activity represents (i) a \$13.2 billion increase relating to FPAUM previously managed by FS Investments in connection with the completion of the FS

Table of Contents

Investments Transaction, (ii) a \$1.9 billion increase in our pro rata portion of FPAUM managed by Marshall Wace in connection with the acquisition of an additional 5% interest in this hedge fund partnership and (iii) a \$3.1 billion decrease of FPAUM in connection with the sale of our equity interest in Nephila. Partially offsetting these increases were (i) redemptions and distributions from certain investment vehicles across multiple strategies, primarily with our hedge fund partnerships, our private credit strategies, and certain leveraged credit strategies and (ii) decreases in value relating primarily to our hedge fund partnerships and our BDCs.

Uncalled Commitments

Private Markets

As of December 31, 2018, our Private Markets business line had \$48.2 billion of remaining uncalled capital commitments that could be called for investments in new transactions as compared to \$47.4 billion as of December 31, 2017. The increase is due primarily to new capital raised in our Global Infrastructure Investors III Fund and European Fund V, partially offset by capital called from fund investors to make investments during the period.

Public Markets

As of December 31, 2018, our Public Markets business line had \$9.8 billion of uncalled capital commitments that could be called for investments in new transactions as compared to \$9.1 billion as of December 31, 2017. The increase is due to new capital raised primarily in our direct lending strategies, partially offset by capital called from fund investors to make investments during the period.

Capital Invested and Syndicated Capital

Private Markets Capital Invested

For the year ended December 31, 2018, Private Markets had \$13.2 billion of capital invested as compared to \$13.3 billion for the year ended December 31, 2017. The decrease was driven primarily by a \$0.4 billion decrease in capital invested in our private equity platform (including core investments and growth equity), partially offset by a \$0.3 billion increase in capital invested in our real assets platforms. Generally, the portfolio companies acquired through our private equity funds have higher transaction values and result in higher capital invested relative to transactions in our real assets funds. The number of large private equity investments made in any quarterly or year-to-date period is volatile and, consequently, a significant amount of capital invested in one period or a few periods may not be indicative of a similar level of capital deployment in future periods. During the year ended December 31, 2018, 64% of capital deployed in private equity, which includes core and growth equity investments, was in transactions in North America, 24% was in the Asia-Pacific region and 12% was in Europe. As of February 1, 2019, our Private Markets business line had announced transactions that were subject to closing conditions which aggregated approximately \$3.9 billion. These transactions are generally subject to the satisfaction of closing conditions prior to their completion, and there can be no assurance if or when any of these transactions will be completed.

Public Markets Capital Invested

For the year ended December 31, 2018, Public Markets had \$6.9 billion of capital invested as compared to \$5.0 billion for the year ended December 31, 2017. The increase was primarily due to a higher level of net capital deployed in our direct lending and private opportunistic credit strategies.

Capital Markets Syndicated Capital

For the year ended December 31, 2018, Capital Markets syndicated \$6.3 billion of capital as compared to \$4.7 billion for the year ended December 31, 2017. The increase was primarily due to an increase in the size and number of

syndication transactions in the year ended December 31, 2018 as compared to the year ended December 31, 2017. Overall, we completed 16 syndication transactions for the year ended December 31, 2018 as compared to 15 syndications for the year ended December 31, 2017. The size and frequency of syndication transactions depend in large part on market conditions and other factors that are unpredictable and outside our control, which may negatively impact the fees generated by our capital markets business from syndication transactions.

Table of Contents

Segment Revenues

The following sections discuss revenues for each of our business lines on a disaggregated basis for the years ended December 31, 2017 and 2016.

Private Markets Revenues

The following table presents Fees and Other, Net and Realized Performance Income in the Private Markets business line for the years ended December 31, 2017 and 2016:

	Year Ended		Change
	December 31, 2017	December 31, 2016	
	(\$ in thousands)		
Fees and Other, Net			
Management Fees	\$575,451	\$466,422	\$109,029
Transaction Fees	288,879	132,602	156,277
Monitoring Fees	81,021	64,354	16,667
Fee Credits	(220,710)	(103,579)	(117,131)
Total Fees and Other, Net	724,641	559,799	164,842
Realized Performance Income (Loss)			
Carried Interest	1,198,981	1,252,370	(53,389)
Incentive Fees	—	—	—
Total Realized Performance Income (Loss)	\$1,198,981	\$1,252,370	\$(53,389)

Fees and Other, Net

The net increase was primarily due to an increase in transaction fees, partially offset by a corresponding increase in fee credits, and an increase in management fees.

The increase in transaction fees was primarily attributable to an increase in both the number and size of transaction fee-generating investments. During the year ended December 31, 2017, there were 46 transaction fee-generating investments that paid an average fee of \$6.3 million compared to 35 transaction fee-generating investments paying an average fee of \$3.8 million during the year ended December 31, 2016. Approximately 44% of these transaction fees were paid by companies located in North America, 32% were paid from companies located in the Asia-Pacific region and 24% were paid from companies in Europe. Transaction fees vary by investment based upon a number of factors, the most significant of which are transaction size, the particular discussions as to the amount of the fees, the complexity of the transaction and KKR's role in the transaction. The increase in fee credits is due primarily to a higher level of transaction fees.

The increase in management fees was primarily due to (i) Americas Fund XII entering its investment period in the first quarter of 2017, in which it earns management fees on a larger pool of capital than its predecessor fund North America Fund XI, which entered its post-investment period, (ii) Asian Fund III entering its investment period in the second quarter of 2017, in which it earns management fees on a larger pool of capital than its predecessor fund Asian Fund II, which entered its post-investment period and (iii) new capital raised in our Health Care Strategic Growth Fund. This net increase was partially offset by decreases due to (i) North America Fund XI and Asian Fund II entering their post-investment periods during 2017, in which they earn fees at a lower rate and based on invested capital rather

than committed capital, and (ii) lower invested capital as a result of realizations primarily in our 2006 Fund, China Growth Fund and Asian Fund.

Recurring monitoring fees increased \$12.4 million, which was primarily the result of an increase in the number of portfolio companies paying monitoring fees. For the year ended December 31, 2017, we had 66 portfolio companies that were paying an average monitoring fee of \$0.9 million compared with 53 portfolio companies that were paying an average monitoring fee of \$0.9 million for the year ended December 31, 2016. For the year ended December 31, 2017, we also received termination payments of \$19.6 million in connection with the initial public offerings of Gardner Denver Holdings, Inc. and National Vision Holdings, Inc. compared to \$15.3 million of termination payments received in the year ended December 31, 2016 in connection with the initial public offering of US Foods Holding Corp. These termination payments may occur in the future; however, they

Table of Contents

are infrequent in nature and are generally correlated with the initial public offering and other realization activity in our private equity portfolio, and are expected to continue to be smaller in size and number compared to prior periods.

Realized Performance Income

The following table presents realized carried interest by investment vehicle for the years ended December 31, 2017 and 2016:

	Year Ended	
	December 31, 2017	December 31, 2016
	(\$ in thousands)	
2006 Fund	\$557,888	\$ 493,195
North America Fund XI	235,927	124,797
European Fund III	182,386	175,717
Asian Fund II	65,534	—
Co-Investment Vehicles and Other	40,156	10,381
Millennium Fund	28,266	60,257
European Fund II	20,251	172,645
China Growth Fund	20,130	2,858
Asian Fund	18,511	182,805
Real Estate Partners Americas	15,160	10,020
Global Infrastructure Investors	14,772	16,845
European Fund	—	2,850
Total Realized Carried Interest ⁽¹⁾	\$ 1,198,981	\$ 1,252,370

(1) The above table excludes any funds for which there was no realized carried interest during either of the periods presented.

Realized carried interest for the year ended December 31, 2017, consisted primarily of realized gains from the sale of Capsugel S.A. and the partial sales of US Foods Holding Corp. and PRA Health Sciences, Inc.

Realized carried interest for the year ended December 31, 2016 consisted primarily of realized gains from the sale or partial sale of Walgreens Boots Alliance, Inc., Alliance Tire Group B.V. (manufacturing sector), and HCA Holdings, Inc.

Table of Contents

Public Markets Revenues

The following table presents Fees and Other, Net and Realized Performance Income in the Public Markets business line for the years ended December 31, 2017 and 2016:

	Year Ended		Change
	December 31, 2017	December 31, 2016	
	(\$ in thousands)		
Fees and Other, Net			
Management Fees	\$329,737	\$ 331,440	\$(1,703)
Transaction Fees	48,370	30,155	18,215
Fee Credits	(40,719)	(28,049)	(12,670)
Total Fees and Other, Net	337,388	333,546	3,842
Realized Performance Income (Loss)			
Carried Interest	—	3,838	(3,838)
Incentive Fees	73,395	33,346	40,049
Total Realized Performance Income (Loss)	\$73,395	\$ 37,184	\$36,211

Fees and Other, Net

The net increase for the year ended December 31, 2017 was primarily due to an increase in transaction fees, partially offset by a corresponding increase in fee credits and a decrease in management fees. The increase in transaction fees was driven primarily by an \$18.5 million breakup fee received in the year ended December 31, 2017 in connection with a terminated transaction, compared to having received no such breakup fees in the year ended December 31, 2016. The net amount of this fee attributable to us after credits to our fund investors was \$4.6 million. The decrease in management fees related primarily to a reduction in management fees from Prisma as a result of the PAAMCO Prisma transaction that closed in the second quarter of 2017. KKR reports its investment in PAAMCO Prisma using the equity method of accounting, and on a segment basis, KKR reflects its allocation of the net income of PAAMCO Prisma as management fees and realized incentive fees. Accordingly, the management fees and other revenues and expenses of Prisma that had been reported on a gross basis prior to the closing of the transaction on June 1, 2017 are reflected on a net basis as part of our allocation of the net income of PAAMCO Prisma after June 1, 2017 resulting in a decrease in our reported gross management fees when compared to the prior period. This decrease was partially offset by capital invested in our Special Situations Fund II, Lending Partners II Fund, and Lending Partners Europe Fund as well as an increase in management fees in certain separately managed accounts and with our hedge fund partnerships.

Realized Performance Income

The net increase for the year ended December 31, 2017 compared to the prior period was primarily attributable to higher incentive fees earned in our hedge fund partnerships, which were partially offset by lower incentive fees received from BDCs advised or sub-advised by KKR and a lower level of realized carried interest.

Table of Contents

Capital Markets Revenues

The following table presents Transaction Fees in the Capital Markets business line for the years ended December 31, 2017 and 2016:

	Year Ended		Change
	December 31, 2017	December 31, 2016	
Transaction Fees	\$ 439,998	\$ 181,517	\$ 258,481

(\$ in thousands)

Transaction fees increased due primarily to an increase in both the size and number of capital markets transactions for the year ended December 31, 2017, compared to the year ended December 31, 2016. Overall, we completed 193 capital markets transactions for the year ended December 31, 2017, of which 26 represented equity offerings and 167 represented debt offerings, as compared to 117 transactions for the year ended December 31, 2016, of which 11 represented equity offerings and 106 represented debt offerings. We earned fees in connection with underwriting, syndication and other capital markets services. While each of the capital markets transactions that we undertake in this segment is separately negotiated, our fee rates are generally higher with respect to underwriting or syndicating equity offerings than with respect to debt offerings, and the amount of fees that we collect for like transactions generally correlates with overall transaction sizes. Our capital markets fees are generated in connection with our Private Markets and Public Markets businesses as well as from third-party companies. For the year ended December 31, 2017, approximately 23% of our transaction fees were earned from unaffiliated third parties as compared to approximately 28% for the year ended December 31, 2016. Our transaction fees are comprised of fees earned from North America, Europe, and Asia-Pacific, including India. For the year ended December 31, 2017, approximately 49% of our transaction fees were generated outside of North America as compared to approximately 34% for the year ended December 31, 2016. Our capital markets business line is dependent on the overall capital markets environment, which is influenced by equity prices, credit spreads and volatility. Our capital markets business line does not generate management or monitoring fees.

Principal Activities Revenues

The following table presents Realized Investment Income in the Principal Activities business line for the years ended December 31, 2017 and 2016:

	Year Ended		Change
	December 31, 2017	December 31, 2016	
Realized Investment Income (Loss)			
Net Realized Gains (Losses)	\$ 194,020	\$ 371,563	\$(177,543)
Interest Income and Dividends	285,696	322,857	(37,161)
Total Realized Investment Income (Loss)	\$ 479,716	\$ 694,420	\$(214,704)

(\$ in thousands)

Realized Investment Income

The decrease is primarily due to a lower level of net realized gains and, to a lesser extent, a decrease in interest income and dividends during the year ended December 31, 2017, compared to the prior period.

For the year ended December 31, 2017, net realized gains were comprised primarily of gains from the sale of Private Markets investments including the sales or partial sales of HCA Holdings, Inc., Walgreens Boots Alliance, Inc. and Visma AS, partially offset by losses on the sale of Fortune Creek Partnership and the restructurings of Algeco Scotsman and Aurora Eaglebine.

For the year ended December 31, 2016, net realized gains were primarily comprised of gains from the sale of private equity investments including the sales or partial sales of Walgreens Boots Alliance, Inc., HCA Holdings, Inc., and Zimmer Biomet Holdings, Inc., offset by our investment in Samson Resources of approximately \$254 million, the loss from the redemption of limited partner interests in a fund managed by BlackGold Capital Management, as well as certain CLOs being called. As of December 31, 2016, KKR no longer holds any limited partner interests in BlackGold Capital Management, although we continue to own an interest in its management company and fund general partner.

Table of Contents

For the year ended December 31, 2017, interest income and dividends were comprised of (i) \$163.4 million of interest income which consists primarily of interest that is received from our Public Markets investments including CLOs and other credit investments and to a lesser extent our Capital Markets business and our cash balances and (ii) \$122.3 million of dividend income from distributions received primarily through our private equity investments and real estate investments including our investment in KREF.

For the year ended December 31, 2016, interest income and dividends were comprised of (i) \$186.7 million of interest income which consists primarily of interest that is received from our Public Markets investments including CLOs and other credit investments and to a lesser extent our cash balances and other assets and (ii) \$136.2 million of dividend income from distributions received primarily through our private equity investments, real estate investments including our investment in KREF and Public Markets investments.

The decrease in interest income and dividends is due primarily to the impact of a lower amount of capital invested in CLOs as well as a lower level of dividends for the year ended December 31, 2017 compared to the prior period.

Segment Expenses

Compensation and Benefits

The increase for the year ended December 31, 2017 compared to the prior period was primarily due to higher compensation and benefits expenses recorded in connection with higher total segment revenues, as well as higher equity-based compensation charges resulting from an increase in the weighted average number of unvested shares outstanding.

Occupancy and Other Operating Expenses

The net increase for the year ended December 31, 2017 compared to the prior period was primarily due to higher professional fees and other administrative costs in connection with the growth of the firm, partially offset by a decrease in expenses that are creditable to our investment funds, which includes broken-deal expenses.

Interest Expense

For the year ended December 31, 2017 and 2016, interest expense relates primarily to the senior notes outstanding for KKR and KFN. The decrease in interest expense for the year ended December 31, 2017 compared to the prior period is due to the redemption of KFN's 8.375% senior notes due 2041 and other debt after the third quarter of 2016, a portion of which was replaced with the issuance of KFN's 5.200% senior notes due 2033, which bears a lower rate of interest.

After-tax Distributable Earnings

The net increase in after-tax distributable earnings for the year ended December 31, 2017 compared to the prior period was due primarily to higher transaction fees and management fees. These increases were partially offset primarily by a lower level of realized investment income and a higher level of compensation and benefits expense in the current period compared to the prior period.

Other Operating and Performance Measures

The following table presents certain key operating and performance metrics as of December 31, 2017 and December 31, 2016:

As of	Change
-------	--------

Edgar Filing: KKR & Co. Inc. - Form 10-K

	December 31, December 31,		
	2017	2016	
	(\$ in thousands)		
Assets Under Management	\$ 168,470,600	\$ 129,555,700	\$ 38,914,900
Fee Paying Assets Under Management	\$ 117,437,500	\$ 101,473,400	\$ 15,964,100

Table of Contents

The following table presents one of our key performance metrics for the year ended December 31, 2017 and 2016:

	Year Ended		Change
	December 31, 2017	December 31, 2016	
Capital Invested and Syndicated Capital	\$23,045,100	\$12,199,700	\$10,845,400

Assets Under Management

Private Markets

The following table reflects the changes in our Private Markets AUM from December 31, 2016 to December 31, 2017:

	(\$ in thousands)
December 31, 2016	\$73,815,500
New Capital Raised	25,455,400
Distributions and Other	(12,503,200)
Change in Value	10,759,400
December 31, 2017	\$97,527,100

AUM for the Private Markets segment was \$97.5 billion at December 31, 2017, an increase of \$23.7 billion, compared to \$73.8 billion at December 31, 2016.

The increase was primarily attributable to (i) new capital raised primarily in our Asian Fund III, our core investment vehicles, two new strategic investor partnerships, our Real Estate Partners Americas II fund and our Real Estate Credit Opportunity Partners fund and (ii) to a lesser extent, an increase in the value of our Private Markets portfolio.

These increases were partially offset by (i) distributions to Private Markets fund investors primarily as a result of realizations most notably in our 2006 Fund, European Fund III and North America Fund XI, and (ii) a decrease of \$0.8 billion reflecting expired commitments that are no longer eligible to be called for investments. Our flagship private equity funds, such as our Asian Fund III which represents \$9.0 billion of AUM at December 31, 2017, are raised only episodically toward the end of the investment period of their predecessor funds or when their predecessor funds' capital becomes largely invested or allocated for investment.

The increase in the value of our Private Markets portfolio was driven primarily by net gains of \$4.3 billion in our North America Fund XI, \$1.0 billion in each of our European Fund IV and European Fund III, \$0.9 billion in our 2006 Fund and \$0.8 billion in our Asian Fund II.

For the year ended December 31, 2017, the value of our private equity investment portfolio increased 23.3%. This was comprised of a 34.6% increase in the share prices of various publicly held or publicly indexed investments and a 16.7% increase in value of our privately held investments. Additionally, our infrastructure investment portfolio, which is comprised predominately of private investments, increased 21.7%.

The most significant increases in share prices of various publicly held or publicly indexed investments were gains in Gardner Denver Holdings, Inc., National Vision Holdings, Inc., and Qingdao Haier Co., Ltd. These increases were partially offset by decreased share prices of various publicly held investments, the most significant of which were losses in Fujian Sunner Development Co. Ltd., Laureate Education, Inc., and Engility Holdings, Inc.

Our privately held investments contributed the remainder of the change in value, the most significant of which were gains relating to Internet Brands, Inc., Weld North Holdings LLC, and Aricent Group. The unrealized gains on our privately held investments were partially offset by unrealized losses relating primarily to Academy Ltd., Toys R Us, Inc., and Santanol Pty Ltd (forestry sector). The increased valuations of individual companies in our privately held investments, in the aggregate, generally related to (i) in the case of Weld North and Aricent Group, valuations that reflect agreements to sell all or a portion of these investments, (ii) an increase in the value of market comparables, and (iii) individual company performance. The decreased valuations of individual companies in our privately held investments, in the aggregate, generally related to (i) individual company performance or, in certain cases, an unfavorable business outlook and (ii) a decrease in the value of market comparables.

Table of Contents

For the year ended December 31, 2016, the value of our private equity investment portfolio increased 11.9%. This was comprised of a 3.9% increase in the share prices of various publicly held or publicly indexed investments and an 18.4% increase in value of our privately held investments. The most significant increases in share prices of various publicly held or publicly indexed investments were gains in US Foods Holding Corp., PRA Health Sciences Inc. and HCA Holdings, Inc. These increases were partially offset by decreased share prices of various publicly held investments, the most significant of which were losses in First Data Corporation, Walgreens Boots Alliance, Inc. and Qingdao Haier Co., Ltd. Our privately held investments contributed the remainder of the change in value, the most significant of which were gains relating to Panasonic Healthcare Co. Ltd (health care sector), Capsugel S.A. and Sedgwick Claims Management Services, Inc. The unrealized gains on our privately held investments were partially offset by unrealized losses relating primarily to Aricent Group, OEG Management Partners Limited (energy sector), and Academy Ltd. The increased valuations of individual companies in our privately held investments, in the aggregate, generally related to (i) in the case of Panasonic Healthcare Co. Ltd, Capsugel S.A., and Sedgwick Claims Management Services Inc., valuations that reflect agreements to sell all or a portion of these investments, (ii) an increase in the value of market comparables and (iii) individual company performance. The decreased valuations of individual companies in our privately held investments, in the aggregate, generally related to (i) individual company performance or, in certain cases, an unfavorable business outlook and (ii) a decrease in the value of market comparables.

Certain investments included in our AUM are denominated in currencies other than the U.S. dollar. Those investments expose our AUM to the risk that the value of the investments will be affected by changes in exchange rates between the currency in which the investments are denominated and the currency in which the investments are made. Our policy is generally to reduce these risks in certain cases by employing hedging techniques, including using foreign currency options and foreign exchange forward contracts to reduce exposure to changes in exchange rates when a meaningful amount of capital has been invested in currencies other than the currencies in which the investments are denominated. We do not, however, hedge our currency exposure in all currencies or for all investments. See "—Quantitative and Qualitative Disclosures about Market Risk—Exchange Rate Risk" and "Risk Factors—Risks Related to the Assets We Manage—We make investments in companies that are based outside of the United States, which may expose us to additional risks not typically associated with investing in companies that are based in the United States."

Public Markets

The following table reflects the changes in our Public Markets AUM from December 31, 2016 to December 31, 2017:

	(\$ in thousands)
December 31, 2016	\$ 55,740,200
New Capital Raised	13,221,600
Acquisitions	1,794,800
Impact of Other Transactions	3,811,400
Distributions	(3,831,800)
Redemptions	(3,653,100)
Change in Value	3,860,400
December 31, 2017	\$ 70,943,500

AUM in our Public Markets segment totaled \$70.9 billion at December 31, 2017, an increase of \$15.2 billion compared to AUM of \$55.7 billion at December 31, 2016. The increase for the period was primarily due to new capital raised across multiple strategies most notably \$3.5 billion in certain leveraged credit strategies, \$2.9 billion with our hedge fund partnerships, \$2.4 billion in our CLOs, \$1.5 billion in our private opportunistic credit strategy, \$1.4 billion in two new strategic investor partnerships and \$0.8 billion in our Lending Partners III Fund. The "Impact of Other Transactions" represents the closing of the PAAMCO Prisma transaction. This resulted in a net increase of

approximately \$3.8 billion reflecting the excess of our pro rata portion of the AUM of PAAMCO Prisma over the historical AUM of Prisma. For the year ended December 31, 2017, new capital raised offset redemptions with our hedge fund partnerships. The "Acquisitions" activity represents the increase in our pro rata portion of the AUM of Marshall Wace in connection with the acquisition of an additional 5% interest in this hedge fund partnership. The increases due to change in value were driven primarily by our hedge fund partnerships, our domestic private credit strategies and our European CLOs and certain European leveraged credit strategies. Partially offsetting these increases were redemptions and distributions from certain investment vehicles across multiple strategies, primarily with our hedge fund partnerships, our private credit strategies and our CLOs.

Table of Contents

Fee Paying Assets Under Management

Private Markets

The following table reflects the changes in our Private Markets FPAUM from December 31, 2016 to December 31, 2017:

	(\$ in thousands)
December 31, 2016	\$ 52,204,800
New Capital Raised	16,868,600
Distributions and Other	(6,140,400)
Net Changes in Fee Base of Certain Funds	(2,418,800)
Change in Value	1,164,400
December 31, 2017	\$ 61,678,600

FPAUM in our Private Markets segment was \$61.7 billion at December 31, 2017, an increase of \$9.5 billion, compared to \$52.2 billion at December 31, 2016.

The increase was primarily attributable to new capital raised in our Asian Fund III and our Real Estate Partners Americas II fund and capital invested in our Asian Fund II and North America Fund XI. These increases were partially offset by (i) distributions and other activity primarily relating to realizations in our 2006 Fund and European Fund III and (ii) net changes in the fee base of our Asian Fund II as a result of it entering into its post-investment period, during which it earns fees at a lower rate based on invested capital rather than committed capital.

Public Markets

The following table reflects the changes in our Public Markets FPAUM from December 31, 2016 to December 31, 2017:

	(\$ in thousands)
December 31, 2016	\$ 49,268,600
New Capital Raised	12,048,200
Acquisitions	1,794,800
Impact of Other Transactions	(1,600,000)
Distributions	(5,012,000)
Redemptions	(3,653,100)
Change in Value	2,912,400
December 31, 2017	\$ 55,758,900

FPAUM in our Public Markets segment was \$55.8 billion at December 31, 2017, an increase of \$6.5 billion compared to FPAUM of \$49.3 billion at December 31, 2016. The increase was primarily due to new capital raised across multiple strategies, most notably \$2.9 billion with our hedge fund partnerships, \$2.7 billion in certain leveraged credit strategies, \$2.4 billion in our CLOs, \$1.1 billion in our Special Situations Fund II and \$1.2 billion in our direct lending strategies. New capital raised includes capital that was raised in previous periods but began earning fees upon deployment of capital. For the year ended December 31, 2017, new capital raised offset redemptions with our hedge fund partnerships. Change in value was driven primarily by \$1.1 billion through our hedge fund partnerships, \$0.7 billion in certain leveraged credit strategies and \$0.6 billion in our European CLOs. Partially offsetting these increases were redemptions and distributions from certain investment vehicles across multiple strategies driven by \$2.9 billion from our hedge fund partnerships, \$3.2 billion from our private credit strategies and \$1.3 billion from our CLOs. The "Impact of Other Transactions" represents the closing of the PAAMCO Prisma transaction. This resulted in a net

decrease of approximately \$1.6 billion reflecting the excess of our historical FPAUM of Prisma, over our pro rata portion of the FPAUM of PAAMCO Prisma. FPAUM excludes assets under advisement of PAAMCO Prisma. The "Acquisitions" activity represents the increase in our pro rata portion of the AUM of Marshall Wace in connection with the acquisition of an additional 5% interest in this hedge fund partnership.

Uncalled Commitments

Private Markets

As of December 31, 2017, our Private Markets segment had \$47.4 billion of remaining uncalled capital commitments that could be called for investments in new transactions. The increase from December 31, 2016 is due primarily to new capital

Table of Contents

raised in our Asian Fund III, our core investment vehicles, two new strategic investor partnerships and Real Estate Partners Americas II, partially offset by capital called from fund investors to fund investments during the period.

Public Markets

As of December 31, 2017, our Public Markets segment had \$9.1 billion of uncalled capital commitments that could be called for investments in new transactions. The increase from December 31, 2016 is due to new capital raised primarily in our private opportunistic credit strategy, two new strategic investor partnerships and Lending Partners III Fund, partially offset by capital called from fund investors to fund investments during the period.

Capital Invested and Syndicated Capital

Private Markets Capital Invested

The increase was driven primarily by a \$4.5 billion increase in capital invested in our private equity platform, which includes an increase in core equity investments of \$1.0 billion consisting of an investment in USI, Inc. and a \$2.5 billion increase in capital invested in our real assets and other platforms. Generally, the portfolio companies acquired through our private equity funds have higher transaction values and result in higher capital invested relative to transactions in our real assets funds. The number of large private equity investments made in any quarter is volatile and consequently, a significant amount of capital invested in one quarter or a few quarters may not be indicative of a similar level of capital deployment in future quarters. During the year ended December 31, 2017, 41% of capital deployed in private equity, which does not include core investments, was in transactions in North America, 37% was in the Asia-Pacific region and 22% was in Europe.

Public Markets Capital Invested

Capital invested increased for the year ended December 31, 2017, compared to the year ended December 31, 2016. The increase is primarily due to a higher level of net capital deployed in our direct lending and special situations strategies.

Capital Markets Syndicated Capital

The increase is primarily due to an increase in the size and number of syndication transactions in the year ended December 31, 2017 as compared to the year ended December 31, 2016. Overall, we completed 15 syndication transactions for the year ended December 31, 2017 as compared to eight syndications for the year ended December 31, 2016.

Reconciliations to GAAP Measures

For the reconciliations of the most directly comparable financial measures calculated and presented in accordance with GAAP to total segment revenues, total segment expenses, and after-tax distributable earnings, see Item 8. Financial Statements and Supplementary Data—Note 14 "Segment Reporting."

Segment Balance Sheet

Our segment balance sheet is the balance sheet of KKR & Co. Inc. and its subsidiaries on a segment basis which includes, but is not limited to, our investment management companies, broker-dealer companies, general partners of our investment funds, and KFN. Our segment balance sheet excludes the assets and liabilities of our investment funds

and CFEs and other consolidated entities that are not subsidiaries of KKR & Co. Inc.

Investments

Investments is a term used solely for purposes of financial presentation of a portion of KKR's balance sheet and includes majority ownership of subsidiaries that operate KKR's asset management and other businesses, including the general partner interests of KKR's investment funds.

Cash and Short-Term Investments

Cash and short-term investments represent cash and liquid short-term investments in high-grade, short-duration cash management strategies used by KKR to generate additional yield on our excess liquidity and is used by management in evaluating KKR's liquidity position. We believe this measure is useful to stockholders as it provides additional insight into KKR's available liquidity. Cash and short-term investments differ from cash and cash equivalents on a GAAP basis as a result

135

Table of Contents

of the inclusion of liquid short-term investments in cash and short-term investments. The impact that these liquid short-term investments have on cash and cash equivalents on a GAAP basis is reflected in the consolidated statements of cash flows within cash flows from operating activities. Accordingly, the exclusion of these investments from cash and cash equivalents on a GAAP basis has no impact on cash provided (used) by operating activities, investing activities or financing activities.

The following tables present information with respect to our segment balance sheet as of December 31, 2018 and December 31, 2017:

	As of December 31, 2018	As of December 31, 2017
	(\$ in thousands, except per share amounts)	
Cash and Short-term Investments	\$ 2,502,239	\$ 3,214,794
Investments	9,847,464	8,488,606
Unrealized Carried Interest ⁽¹⁾	1,223,084	1,620,401

Book Value	\$ 12,980,560	\$ 11,673,909
Book Value Per Outstanding Adjusted Share	\$ 15.57	\$ 14.20
⁽¹⁾ Unrealized Carried Interest		
Private Markets Business Line	\$ 1,083,163	\$ 1,480,142
Public Markets Business Line	139,921	140,259
Total	\$ 1,223,084	\$ 1,620,401

Book Value Per Outstanding Adjusted Share

Book value per outstanding adjusted share increased 9.6% from December 31, 2017. This increase was due primarily to a broad-based increase in the value of KKR's investment portfolio, including investments held directly by KKR as well as investments held through investment funds, such as KKR's private equity funds, where KKR is entitled to earn carried interest. For the year ended December 31, 2018, the value of KKR's balance sheet portfolio, on a segment basis, increased 7.1% and KKR's private equity portfolio increased 5.1%. The increase in KKR's balance sheet portfolio was primarily due to mark-to-market gains in our portfolio companies. For a further discussion, see "—Consolidated Results of Operations—Unrealized Gains from Investment Activities" and "—Consolidated Results of Operations—Unrealized Losses from Investment Activities." For a discussion of the changes in KKR's private equity

portfolio, see "—Segment Analysis—Other Operating and Performance Measures—AUM." The increase in book value per outstanding adjusted share was also due to approximately \$1.6 billion of after-tax distributable earnings which were partially offset by dividends to Class A common stockholders during the year ended December 31, 2018. Effective as of September 30, 2018, KKR's segment balance sheet reflects KKR's tax assets and liabilities as prepared under GAAP, which increased book value by approximately \$160 million as of such date. For a discussion of factors that impacted KKR's after-tax distributable earnings, see "—Segment Analysis—Segment Results."

Table of Contents

The following table presents the holdings of our segment balance sheet by asset class as of December 31, 2018. To the extent investments on our segment balance sheet are realized at values below their cost in future periods, after-tax distributable earnings would be adversely affected by the amount of such loss, if any, during the period in which the realization event occurs.

Investments	As of December 31, 2018

Table of Contents

The following table provides reconciliations of KKR's GAAP Shares of Class A Common Stock Outstanding to Adjusted Shares Eligible for Distribution and Outstanding Adjusted Shares:

	As of December 31, 2018	As of December 31, 2017
GAAP Shares of Class A Common Stock Outstanding	534,857,237	486,174,736
Adjustments:		
Other Securities ⁽¹⁾	—	2,299,421
KKR Holdings Units ⁽²⁾	299,081,239	335,971,334
Adjusted Shares Eligible for Distribution ⁽³⁾	833,938,476	824,445,491
Adjustments:		
Other Securities	—	(2,299,421)
Outstanding Adjusted Shares	833,938,476	822,146,070
Unvested Shares of Class A Common Stock ⁽⁴⁾	33,408,491	46,475,176

Represents vested other securities that are exchangeable into shares of Class A common stock. The issuance of (1) shares of Class A common stock pursuant to such other securities dilutes KKR common stockholders and KKR Holdings pro rata in accordance with their respective percentage interests in the KKR business.

(2) Class A common stock that may be issued by KKR & Co. Inc. upon exchange of units in KKR Holdings for Class A common stock.

(3) Amounts exclude unvested equity awards granted under the Equity Incentive Plan.

(4) Represents equity awards granted under the Equity Incentive Plan. The issuance of Class A common stock of KKR & Co. Inc. pursuant to awards under the Equity Incentive Plan dilutes KKR Class A common stockholders and KKR Holdings pro rata in accordance with their respective percentage interests in the KKR business. Excludes the award of 2,500,000 restricted stock units granted to each of our Co-Presidents/Co-Chief Operating Officers during 2017 that have not met their market-price based vesting condition as of December 31, 2018 or December 31, 2017. See Item 8. Financial Statements and Supplementary Data—Note 12 "Equity Based Compensation."

Liquidity

We manage our liquidity and capital requirements by focusing on our cash flows before the consolidation of our funds and CFEs and the effect of changes in short term assets and liabilities, which we anticipate will be settled for cash within one year. Our primary cash flow activities on a segment basis typically involve: (i) generating cash flow from operations; (ii) generating income from investment activities, by investing in investments that generate yield (namely interest and dividends), as well as the sale of investments and other assets; (iii) funding capital commitments that we have made to, and advancing capital to, our funds and CLOs; (iv) developing and funding new investment strategies, investment products, and other growth initiatives, including acquisitions of other investments, assets, and businesses; (v) underwriting and funding commitments in our capital markets business; (vi) distributing cash flow to our stockholders and holders of our Series A and Series B Preferred Stock; and (vii) paying borrowings, interest payments, and repayments under credit agreements, our senior notes, and other borrowing arrangements. See "—Liquidity—Liquidity Needs—Dividends."

Sources of Liquidity

Our primary sources of liquidity consist of amounts received from: (i) our operating activities, including the fees earned from our funds, portfolio companies, and capital markets transactions; (ii) realizations on carried interest from

our investment funds; (iii) interest and dividends from investments that generate yield, including our investments in CLOs; (iv) realizations on and sales of investments and other assets, including the transfers of investments for fund formations; and (v) borrowings under our credit facilities, debt offerings, and other borrowing arrangements. In addition, we may generate cash proceeds from sales of our equity securities.

Many of our investment funds provide carried interest. With respect to our private equity funds, carried interest is distributed to the general partner of a private equity fund with a clawback provision only after all of the following are met: (i) a realization event has occurred (e.g., sale of a portfolio company, dividend, etc.); (ii) the vehicle has achieved positive overall investment returns since its inception, in excess of performance hurdles where applicable; and (iii) with respect to investments with a fair value below cost, cost has been returned to fund investors in an amount sufficient to reduce remaining cost to the investments' fair value. As of December 31, 2018, certain of our funds had met the first and second criteria, as described above,

Table of Contents

but did not meet the third criteria. In these cases, carried interest accrues on the consolidated statement of operations, but will not be distributed in cash to us as the general partner of an investment fund upon a realization event. For a fund that has a fair value above cost, overall, but has one or more investments where fair value is below cost, the shortfall between cost and fair value for such investments is referred to as a "netting hole." When netting holes are present, realized gains on individual investments that would otherwise allow the general partner to receive carried interest distributions are instead used to return invested capital to our funds' limited partners in an amount equal to the netting hole. Once netting holes have been filled with either (a) return of capital equal to the netting hole for those investments where fair value is below cost or (b) increases in the fair value of those investments where fair value is below cost, then realized carried interest will be distributed to the general partner upon a realization event. A fund that is in a position to pay cash carry refers to a fund for which carried interest is expected to be paid to the general partner upon the next material realization event, which includes funds with no netting holes as well as funds with a netting hole that is sufficiently small in size such that the next material realization event would be expected to result in the payment of carried interest. Strategic investor partnerships with fund investors may require netting across the various funds in which they invest, which may reduce the carried interest we otherwise would have earned if such fund investors were to have invested in our funds without the existence of the strategic investor partnership. See "Risk Factors—Risks Related to Our Business—Strategic investor partnerships have longer investment periods and invest in multiple strategies, which may increase the possibility of a 'netting hole,' which will result in less carried interest for us, as well as clawback liabilities."

As of December 31, 2018, netting holes in excess of \$50 million existed at one of our private equity funds, which was North America Fund XI, which had a netting hole of approximately \$73 million. In accordance with the criteria set forth above, other funds currently have and may in the future develop netting holes, and netting holes for those and other funds may otherwise increase or decrease in the future.

We have access to funding under various credit facilities, other borrowing arrangements and other sources of liquidity that we have entered into with major financial institutions or which we receive from the capital markets. The following describes these sources of liquidity.

Revolving Credit Agreements, Senior Notes, KFN Debt Obligations & KFN Securities

For a discussion of KKR's debt obligations, including our revolving credit agreements, senior notes, KFN debt obligations, and KFN securities, see Item 8. Financial Statements and Supplementary Data—Note 10 "Debt Obligations."

Preferred Stock

For a discussion of KKR's equity, including our preferred stock, see Item 8. Financial Statements and Supplementary Data—Note 15 "Equity."

Liquidity Needs

We expect that our primary liquidity needs will consist of cash required to:

continue to grow our business lines, including seeding new strategies, funding our capital commitments made to existing and future funds, co-investments and any net capital requirements of our capital markets companies and otherwise supporting investment vehicles which we sponsor;

-

Edgar Filing: KKR & Co. Inc. - Form 10-K

warehouse investments in portfolio companies or other investments for the benefit of one or more of our funds, vehicles, accounts or CLOs pending the contribution of committed capital by the investors in such vehicles, and advancing capital to them for operational or other needs;

service debt obligations including the payment of obligations upon maturity or redemption, as well as any contingent liabilities that may give rise to future cash payments;

fund cash operating expenses and contingencies, including litigation matters;

payment of corporate income taxes following the Conversion;

pay amounts that may become due under our tax receivable agreement with KKR Holdings;

pay cash dividends in accordance with our dividend policy for our Class A common stock or the terms of our preferred stock;

underwrite commitments, advance loan proceeds and fund syndication commitments within our capital markets business;

make future purchase price payments in connection with our proprietary investments, such as our hedge fund partnership with Marshall Wace, to the extent not paid by newly issued Class A common stock;

acquire other assets for our Principal Activities business line, including other businesses, investments and assets, some of which may be required to satisfy regulatory requirements for our capital markets business or risk retention requirements for CLOs (to the extent it continues to apply); and

repurchase KKR's Class A common stock pursuant to the share repurchase program or other securities issued by KKR.

KKR & Co. Inc. Share Repurchase Program

On October 27, 2015, KKR announced the authorization of a program providing for the repurchase by KKR of up to \$500 million in the aggregate of its outstanding shares of Class A common stock. On February 9, 2017, KKR announced the authorization for KKR to repurchase an incremental \$250 million under this unit repurchase program. On May 3, 2018, KKR announced the increase of the available amount under its repurchase program to \$500 million, which may be used for the repurchase of its Class A common stock and the retirement of equity awards issued pursuant to our Equity Incentive Plan (and any successor equity plan thereto). During the fourth quarter of 2018, KKR repurchased 4.2 million shares for approximately \$93 million and retired 1.6 million equity awards for approximately \$46 million. As of December 31, 2018, approximately \$868 million has been spent since October 27, 2015, representing a total of 51.8 million shares, to either repurchase shares or retire equity awards. As of December 31, 2018, approximately \$282 million is available under the repurchase program.

Under the current repurchase program, KKR is authorized to repurchase its Class A common stock from time to time in open market transactions, in privately negotiated transactions or otherwise. The timing, manner, price and amount of any Class A common stock repurchases will be determined by KKR in its discretion and will depend on a variety of factors, including legal requirements, price and economic and market conditions. KKR expects that the program, which has no expiration date, will be in effect until the maximum approved dollar amount has been used. The program does not require KKR to repurchase any specific number of shares of Class A common stock, and the program may be suspended, extended, modified or discontinued at any time.

In addition to the purchases of Class A common stock as described above, the repurchase program will be used for the retirement (by cash settlement or the payment of tax withholding amounts upon net settlement) of equity awards issued pursuant to our Equity Incentive Plan (and any successor equity plan thereto) representing the right to receive Class A common stock. See Item 5. "Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities."

Table of Contents

Capital Commitments

The agreements governing our active investment funds generally require the general partners of the funds to make minimum capital commitments to such funds, which usually range from 2% to 8% of a fund's total capital commitments at final closing; however, the size of our general partner commitment to certain funds pursuing newer strategies may exceed this range. The following table presents our uncalled commitments to our active investment funds as of December 31, 2018:

	Uncalled Commitments (\$ in thousands)
Private Markets	
Core Investment Vehicles	\$ 2,315,500
Asian Fund III	532,100
Americas Fund XII	528,200
European Fund V	400,000
Global Infrastructure III	310,600
Real Estate Partners Americas II	138,800
Health Care Strategic Growth	131,000
Next Generation Technology Growth	55,100
European Fund IV	49,900
Real Estate Partners Europe	33,200
Real Estate Credit Opportunity Partners	8,000
Other Private Markets Vehicles	464,200
Total Private Markets Commitments	4,966,600
Public Markets	
Special Situations Fund II	119,600
Private Credit Opportunities Partners II	30,800
Lending Partners III	19,100
Lending Partners Europe	14,200
Other Public Markets Vehicles	123,700
Total Public Markets Commitments	307,400
Total Uncalled Commitments	\$ 5,274,000

Other Commitments

In addition to the uncalled commitments to our investment funds as shown above, KKR has entered into contractual commitments with respect to (i) the purchase of investments and other assets primarily in our Principal Activities business line and (ii) underwriting transactions, debt financing, and syndications in our Capital Markets business line. As of December 31, 2018, these commitments amounted to \$370.5 million and \$663.7 million, respectively. Whether these amounts are actually funded, in whole or in part, depends on the contractual terms of such commitments, including the satisfaction or waiver of any conditions to closing or funding. The unfunded commitments shown for our Capital Markets business line are shown without reflecting arrangements that may reduce the actual amount of contractual commitments shown occurring after December 31, 2018. Our capital markets business has an arrangement with a third party, which reduces our risk when underwriting certain debt transactions, and thus our unfunded commitments as of December 31, 2018 are reduced to reflect the amount to be funded by such third party. In the case

of purchases of investments or assets in our Principal Activities business line, the amount to be funded includes amounts that are intended to be syndicated to third parties, and the actual amounts to be funded may be less than shown.

Investment in Marshall Wace

In connection with our investment in Marshall Wace, either of Marshall Wace or KKR may, in the fourth quarter of 2019, exercise a put option or a call option, respectively, that would give KKR an incremental 5% equity interest in Marshall Wace. KKR currently holds an ownership interest of 34.6%. The exercise of such options would require the use of cash and/or KKR

142

Table of Contents

Class A common stock. For further information on this and prior option exercises, see Item 8. Financial Statements and Supplementary Data—Note 4 "Investments—Equity Method."

Tax Receivable Agreement

We may be required to acquire KKR Group Partnership Units from time to time pursuant to our exchange agreement with KKR Holdings, which may result in an increase in our tax basis of the assets of the KKR Group Partnerships at the time of an exchange of KKR Group Partnership Units. We have entered into a tax receivable agreement with KKR Holdings, which requires us to pay to KKR Holdings, or to current and former principals who have exchanged KKR Holdings units for KKR Class A common stock as transferees of KKR Group Partnership Units, 85% of the amount of cash savings, if any, in U.S. federal, state and local income tax that we realize as a result of the increase in tax basis described above, as well as 85% of the amount of any such savings we realize as a result of increases in tax basis that arise due to future payments under the agreement. For the full description of the tax receivable agreement and our obligations thereunder, see Item 8. Financial Statements and Supplementary Data—Note 13 "Related Party Transactions—Tax Receivable Agreement," and for a discussion of amounts payable and cumulative cash payments made under the tax receivable agreement see "—Liquidity—Other Liquidity Needs—Contractual Obligations, Commitments and Contingencies."

Following the Conversion, we expect the amount of future payments under the tax receivable agreement to be materially higher than it would have been had we not converted to a corporation. In addition, our obligations under the tax receivable agreement would be effectively accelerated in the event of an early termination of the tax receivable agreement by us or in the event of certain mergers, asset sales and other forms of business combinations or other changes of control. See "Risk Factors—Risks Related to Our Organization—We will be required to pay our principals for most of the benefits relating to our use of tax attributes we receive from prior and future exchanges of our Class A common stock for KKR Group Partnership Units and related transactions."

Dividends

A dividend of \$0.125 per share of Class A common stock has been declared, which will be paid on February 26, 2019 to holders of record of Class A common stock as of the close of business on February 11, 2019.

A dividend of \$0.421875 per share of Series A Preferred Stock has been declared and set aside for payment on March 15, 2019 to holders of record of Series A Preferred Stock as of the close of business on March 1, 2019. A dividend of \$0.406250 per share of Series B Preferred Stock has been declared and set aside for payment on March 15, 2019 to holders of record of Series B Preferred Stock as of the close of business on March 1, 2019.

When KKR & Co. Inc. receives distributions from the KKR Group Partnerships (the holding companies of the KKR business), KKR Holdings receives its pro rata share of such distributions from the KKR Group Partnerships.

The declaration and payment of dividends to our Class A common stockholders will be at the sole discretion of our board of directors, and our dividend policy may be changed at any time. As a corporation, we expect our dividends to our Class A common stockholders, if declared, to be lower than the distribution amounts we declared in prior periods as a limited partnership. Our distribution policy as a limited partnership had been to pay annual aggregate distributions to holders of our common units of \$0.68 per common unit, and our dividend policy after the Conversion and beginning with respect to the third quarter of 2018 is to pay dividends to holders of our Class A common stock in an initial annual aggregate amount of \$0.50 per share (or a quarterly dividend of \$0.125 per share), in each case, subject to the discretion of our board of directors based on a number of factors, including KKR's future financial performance and other considerations that the board deems relevant, and compliance with the terms of KKR & Co. Inc.'s certificate of incorporation and applicable law. For U.S. federal income tax purposes, any dividends we pay following July 1, 2018 (including dividends on our preferred stock) generally will be treated as qualified dividend income for U.S. individual stockholders to the extent paid out of our current or accumulated earnings and profits, as determined for U.S. federal income tax purposes. No income, gains, losses, deductions or credits of KKR will flow through to the

stockholders for U.S. federal income tax purposes following July 1, 2018. There can be no assurance that future dividends will be made as intended or at all or that any particular dividend policy for our Class A common stock will be maintained. Furthermore, the declaration and payment of distributions by the KKR Group Partnerships and our other subsidiaries may also be subject to legal, contractual and regulatory restrictions, including restrictions contained in our debt agreements and the terms of the preferred stock of the KKR Group Partnerships.

Table of Contents

Other Liquidity Needs

We may also be required to fund various underwriting, syndication and fronting commitments in our capital markets business in connection with the underwriting of loans, securities or other financial instruments, which has increased in significance in recent periods and may continue to be significant in future periods. We generally expect that these commitments will be syndicated to third parties or otherwise fulfilled or terminated, although we may in some instances elect to retain a portion of the commitments for our own investment.

Contractual Obligations, Commitments and Contingencies

In the ordinary course of business, we and our consolidated funds and CFEs enter into contractual arrangements that may require future cash payments. The following table sets forth information relating to anticipated future cash payments as of December 31, 2018 excluding consolidated funds and CFEs with a reconciliation of such amounts to the anticipated future cash payments of KKR including consolidated funds and CFEs.

Types of Contractual Obligations	Payments due by Period				Total
	<1 Year	1-3 Years	3-5 Years	>5 Years	
	(\$ in millions)				
Uncalled commitments to investment funds ⁽¹⁾	\$5,274.0	\$—	\$—	\$—	\$5,274.0
Debt payment obligations ⁽²⁾	—	500.0	228.2	2,588.1	3,316.3
Interest obligations on debt ⁽³⁾	164.0	288.3	263.6	2,080.3	2,796.2
Underwriting commitments ⁽⁴⁾	519.7	—	—	—	519.7
Lending commitments ⁽⁵⁾	144.0	—	—	—	144.0
Purchase commitments ⁽⁶⁾	370.5	—	—	—	370.5
Lease obligations	50.6	69.3	29.7	76.3	225.9
Corporate real estate ⁽⁷⁾	318.0	—	—	—	318.0
Total Contractual Obligations of KKR	6,840.8	857.6	521.5	4,744.7	12,964.6
Plus: Uncalled commitments of consolidated funds ⁽⁸⁾	9,831.5	—	—	—	9,831.5
Plus: Debt payment obligations of consolidated funds, CFEs and Other ⁽⁹⁾	1,561.7	2,030.1	770.6	14,960.3	19,322.7
Plus: Interest obligations of consolidated funds, CFEs and Other ⁽¹⁰⁾	729.1	1,264.7	957.8	2,710.1	5,661.7
Plus: Purchase commitments of consolidated funds ⁽¹¹⁾	419.5	—	—	—	419.5
Total Consolidated Contractual Obligations	\$19,382.6	\$4,152.4	\$2,249.9	\$22,415.1	\$48,200.0

These uncalled commitments represent amounts committed by us to fund a portion of the purchase price paid for each investment made by our investment funds which are actively investing. Because capital contributions are due (1) on demand, the above commitments have been presented as falling due within one year. However, given the size of such commitments and the pace at which our investment funds make investments, we expect that the capital commitments presented above will be called over a period of several years. See "—Liquidity—Liquidity Needs."

(2) Amounts include: (i) \$500 million aggregate principal amount of 6.375% Senior Notes due 2020 issued by KKR Group Finance Co. LLC, \$500 million aggregate principal amount of 5.500% Senior Notes due 2043 issued by KKR Group Finance Co. II LLC and \$1,000 million aggregate principal amount of 5.125% Senior Notes due 2044 issued by KKR Group Finance Co. III LLC, gross of unamortized discount; (ii) \$367.8 million aggregate principal amount of 0.509% Senior Notes due 2023, 0.764% Senior Notes due 2025 and 1.595% Senior Notes due 2038 issued by KKR Group Finance Co. IV LLC (denominated in Japanese Yen); (iii) \$500 million aggregate principal amount of KFN 2032 Senior Notes, gross of unamortized discount; (iv) \$120 million aggregate principal amount of KFN 2033 Senior Notes; (v) \$70.0 million aggregate principal amount of KFN 5.400% Senior Notes due 2033 and (vi) \$258.5 million aggregate principal amount of KFN junior subordinated notes, gross of unamortized discount.

KFN's debt obligations are non-recourse to KKR beyond the assets of KFN.

- These interest obligations on debt represent estimated interest to be paid over the maturity of the related debt obligation, which has been calculated assuming the debt outstanding at December 31, 2018 is not repaid until its
- (3) maturity. Future interest rates are assumed to be those in effect as of December 31, 2018, including both variable and fixed rates, as applicable, provided for by the relevant debt agreements. The amounts presented above include accrued interest on outstanding indebtedness.
 - (4) Represents various commitments in our capital markets business in connection with the underwriting of loans, securities and other financial instruments. These commitments are shown net of amounts syndicated.
 - (5) Represents obligations in our capital markets business to lend under various revolving credit facilities.
 - (6) Represents commitments of KKR and KFN to fund the purchase of various investments.
Represents the amount payable in 2019 upon delivery of a new KKR office being constructed, all or a portion of
 - (7) which represents construction financing obtained by the developer and may be refinanced upon delivery of the completed office.

Table of Contents

Represents uncalled commitments of our consolidated funds excluding KKR's portion of uncalled commitments as the general partner of the respective funds. Because capital contributions are due on demand, the above (8) commitments have been presented as falling due within one year. However, given the size of such commitments and the pace at which our investment funds make investments, we expect that the capital commitments presented above will be called over a period of several years. See "—Liquidity—Liquidity Needs."

Amounts include (i) financing arrangements entered into by our consolidated funds with the objective of providing liquidity to the funds of \$4.2 billion, (ii) debt securities issued by our consolidated CLOs of \$12.5 billion, (iii) debt securities issued by our consolidated CMBS entities of \$1.9 billion and (iv) borrowings collateralized by specific investments and other assets held directly by majority-owned investment vehicles of \$0.7 billion. In April 2018, a (9) consolidated entity of KKR sold its controlling beneficial interest in four consolidated CMBS vehicles. Debt securities issued by consolidated CLOs and CMBS entities are supported solely by the investments held at the CLO and CMBS vehicles and are not collateralized by assets of any other KKR entity. Obligations under financing arrangements entered into by our consolidated funds are generally limited to our pro rata equity interest in such funds. Our management companies bear no obligations to repay any financing arrangements at our consolidated funds.

The interest obligations on debt of our CFEs and other borrowings represent estimated interest to be paid over the maturity of the related debt obligation, which has been calculated assuming the debt outstanding at December 31, (10) 2018 is not repaid until its maturity. Future interest rates are assumed to be those in effect as of December 31, 2018, including both variable and fixed rates, as applicable, provided for by the relevant debt agreements. The amounts presented above include accrued interest on outstanding indebtedness.

(11) Represents commitments of consolidated funds to fund the purchase of various investments.

The commitment table above excludes contractual amounts owed under the tax receivable agreement because the ultimate amount and timing of the amounts due are not presently known. As of December 31, 2018, an undiscounted payable of \$117.9 million has been recorded in due to affiliates in the consolidated financial statements representing management's best estimate of the amounts currently expected to be owed under the tax receivable agreement. As of December 31, 2018, approximately \$24.0 million of cumulative cash payments have been made under the tax receivable agreement. See "—Liquidity Needs—Tax Receivable Agreement" and "Part II. Item 1A. Risk Factors—We will be required to pay our principals for most of the benefits relating to our use of tax attributes we receive from prior and future exchanges of our Class A common stock for KKR Group Partnership Units and related transactions."

We may incur contingent liabilities for claims that may be made against us in the future. We enter into contracts that contain a variety of representations, warranties and covenants, including indemnifications. For example, certain of our investment funds and KFN have provided certain indemnities relating to environmental and other matters and have provided nonrecourse carve-out guarantees for fraud, willful misconduct and other customary wrongful acts, each in connection with the financing of certain real estate investments that we have made. KKR has also provided certain guarantees for fraud, willful misconduct, bankruptcy and other customary wrongful acts in connection with certain investment vehicles. KKR has also guaranteed certain of our employees' (other than our named executive officers) and consultants' personal loans obtained in connection with certain fund investments. We have also indemnified employees and non-employees against potential liabilities, in connection with their service as described under "Item 13. Certain Relationships and Related Transactions, and Director Independence-Indemnification of Directors, Officers and Others." In addition, we have also provided credit support to certain of our subsidiaries' obligations in connection with certain investment vehicles or partnerships that we manage. For example, KKR has guaranteed the obligations of a general partner to post collateral on behalf of its investment vehicle in connection with such vehicle's derivative transactions, and we have also agreed to be liable for certain investment losses and/or for providing liquidity in the events specified in the governing documents of certain investment vehicles. Our maximum exposure under these arrangements is currently unknown as our liabilities for these matters would require a claim to be made against us in the future.

The partnership documents governing our carry-paying funds generally include a "clawback" provision that, if triggered, may give rise to a contingent obligation requiring the general partner to return amounts to the fund for distribution to the fund investors at the end of the life of the fund. See Item 8. Financial Statements and Supplementary Data—Note 16 "Commitments and Contingencies—Contingent Repayment Guarantees" for further information on KKR's potential clawback obligations.

Off Balance Sheet Arrangements

Other than contractual commitments and other legal contingencies incurred in the normal course of our business, we do not have any off-balance sheet financings or liabilities.

Table of Contents

Critical Accounting Policies

The preparation of our consolidated financial statements in accordance with GAAP requires our management to make estimates and judgments that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities, and reported amounts of fees, expenses and investment income. Our management bases these estimates and judgments on available information, historical experience and other assumptions that we believe are reasonable under the circumstances. However, these estimates, judgments and assumptions are often subjective and may be impacted negatively based on changing circumstances or changes in our analyses. If actual amounts are ultimately different from those estimated, judged or assumed, revisions are included in the consolidated financial statements in the period in which the actual amounts become known. We believe our critical accounting policies could potentially produce materially different results if we were to change underlying estimates, judgments or assumptions.

The following discusses certain aspects of our critical accounting policies. For a full discussion of these and all critical accounting policies, see Item 8. Financial Statements & Supplementary Data—Note 2 "Summary of Significant Accounting Policies."

Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. Except for certain of KKR's equity method investments and debt obligations, KKR's investments and other financial instruments are recorded at fair value or at amounts whose carrying values approximate fair value.

GAAP establishes a hierarchical disclosure framework which prioritizes and ranks the level of market price observability used in measuring financial instruments at fair value. Investments and financial instruments measured and reported at fair value are classified and disclosed based on the observability of inputs used in the determination of fair values, as follows:

Level I

Pricing inputs are unadjusted, quoted prices in active markets for identical assets or liabilities as of the measurement date. The types of financial instruments included in this category are publicly-listed equities and securities sold short.

We classified 4.8% of total investments measured and reported at fair value as Level I at December 31, 2018.

Level II

Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the measurement date, and fair value is determined through the use of models or other valuation methodologies. The types of financial instruments included in this category are credit investments, investments and debt obligations of consolidated CLO entities, convertible debt securities indexed to publicly-listed securities, less liquid and restricted equity securities and certain over-the-counter derivatives such as foreign currency option and forward contracts.

We classified 39.3% of total investments measured and reported at fair value as Level II at December 31, 2018.

Level III

Pricing inputs are unobservable for the financial instruments and include situations where there is little, if any, market activity for the financial instrument. The inputs into the determination of fair value require significant management judgment or estimation. The types of financial instruments generally included in this category are private portfolio companies, real assets investments, credit investments, equity method investments for which the fair value option was elected and investments and debt obligations of consolidated CMBS entities.

We classified 55.9% of total investments measured and reported at fair value as Level III at December 31, 2018. The valuation of our Level III investments at December 31, 2018 represents management's best estimate of the amounts that we would anticipate realizing on the sale of these investments in an orderly transaction at such date.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Table of Contents

Level III Valuation Methodologies

With respect to our private equity portfolio, which includes growth equity investments, we generally employ two valuation methodologies when determining the fair value of an investment. The first methodology is typically a market comparables analysis that considers key financial inputs and recent public and private transactions and other available measures. The second methodology utilized is typically a discounted cash flow analysis, which incorporates significant assumptions and judgments. Estimates of key inputs used in this methodology include the weighted average cost of capital for the investment and assumed inputs used to calculate terminal values, such as exit EBITDA multiples. In certain cases the results of the discounted cash flow approach can be significantly impacted by these estimates. Other inputs are also used in both methodologies. Also, as discussed in greater detail under "—Business Environment" and "Risk Factors—Risks Related to the Assets We Manage—Our investments are impacted by various economic conditions that are difficult to quantify or predict, but may have a significant adverse impact on the value of our investments" in this report, a change in interest rates could have a significant impact on valuations. In addition, when a definitive agreement has been executed to sell an investment, KKR generally considers a significant determinant of fair value to be the consideration to be received by KKR pursuant to the executed definitive agreement.

Upon completion of the valuations conducted using these methodologies, a weighting is ascribed to each method, and an illiquidity discount is typically applied where appropriate. The ultimate fair value recorded for a particular investment will generally be within a range suggested by the two methodologies, except that the value may be higher or lower than such range in the case of investments being sold pursuant to an executed definitive agreement.

Across the total Level III private equity investment portfolio, including investments in both consolidated and unconsolidated investment funds, approximately 69% of the fair value is derived from investments that are valued based exactly 50% on market comparables and 50% on a discounted cash flow analysis. Less than 2% of the fair value of this Level III private equity investment portfolio is derived from investments that are valued either based 100% on market comparables or 100% on a discounted cash flow analysis. As of December 31, 2018, the overall weights ascribed to the market comparables methodology, the discounted cash flow methodology, and a methodology based on pending sales for this portfolio of Level III private equity investments were 41%, 47%, and 12%, respectively.

In the case of growth equity investments, enterprise values may be determined using the market comparables analysis and discounted cash flow analysis described above. A scenario analysis may also be conducted to subject the estimated enterprise values to a downside, base and upside case, which involves significant assumptions and judgments. A milestone analysis may also be conducted to assess the current level of progress towards value drivers that we have determined to be important, which involves significant assumptions and judgments. The enterprise value in each case may then be allocated across the investment's capital structure to reflect the terms of the security and subjected to probability weightings. In certain cases, the values of growth equity investments may be based on recent or expected financings.

Real asset investments in infrastructure, energy and real estate are valued using one or more of the discounted cash flow analysis, market comparables analysis and direct income capitalization, which in each case incorporates significant assumptions and judgments. Infrastructure investments are generally valued using the discounted cash flow analysis. Key inputs used in this methodology can include the weighted average cost of capital and assumed inputs used to calculate terminal values, such as exit EBITDA multiples. Energy investments are generally valued using a discounted cash flow analysis. Key inputs used in this methodology that require estimates include the weighted average cost of capital. In addition, the valuations of energy investments generally incorporate both commodity prices as quoted on indices and long-term commodity price forecasts, which may be substantially different from, and are currently higher than, commodity prices on certain indices for equivalent future dates. Certain energy investments do not include an illiquidity discount. Long-term commodity price forecasts are utilized to capture the value of the

investments across a range of commodity prices within the energy investment portfolio associated with future development and to reflect a range of price expectations. Real estate investments are generally valued using a combination of direct income capitalization and discounted cash flow analysis. Key inputs used in such methodologies that require estimates include an unlevered discount rate and current capitalization rate, and certain real estate investments do not include a minimum illiquidity discount. The valuations of real assets investments also use other inputs.

On a segment basis, our energy real asset investments in oil and gas-producing properties as of December 31, 2018 had a fair value of approximately \$668 million. Based on this fair value, we estimate that an immediate, hypothetical 10% decline in the fair value of these energy investments from one or more adverse movements to the investments' valuation inputs would result in a decline in book value of \$66.8 million. As of December 31, 2018, if we were to value our energy investments using only the commodity prices as quoted on indices and did not use long-term commodity price forecasts, and also held all other inputs to their valuation constant, we estimate that book value would have been approximately \$103 million lower.

Table of Contents

These hypothetical declines relate only to book value. There would be no current impact on KKR's unrealized carried interest since all of the investment funds which hold these types of energy investments have investment values that are either below their cost or not currently accruing carried interest. Additionally, there would be no impact on fees since fees earned from investment funds which hold investments in oil and gas-producing properties are based on either committed capital or capital invested.

For GAAP purposes, where KKR holds energy investments consisting of working interests in oil and gas-producing properties directly and not through an investment fund, such working interests are consolidated based on the proportion of the working interests held by us. Accordingly, we reflect the assets, liabilities, revenues, expenses, investment income and cash flows of the consolidated working interests on a gross basis and changes in the value of these energy investments are not reflected as unrealized gains and losses in the consolidated statements of operations. Accordingly, a change in fair value for these investments does not result in a decrease in net gains (losses) from investment activities, but may result in an impairment charge reflected in general, administrative and other expenses. For segment purposes, these directly held working interests are treated as investments and changes in value are reflected in our segment results as unrealized gains and losses.

Credit Investments: Credit investments are valued using values obtained from dealers or market makers, and where these values are not available, credit investments are generally valued by us based on ranges of valuations determined by an independent valuation firm. Valuation models are based on discounted cash flow analyses, for which the key inputs are determined based on market comparables, which incorporate similar instruments from similar issuers.

Key unobservable inputs that have a significant impact on our Level III investment valuations as described above are included in Item 8. Financial Statements and Supplementary Data—Note 5 "Fair Value Measurements."

Level III Valuation Process

The valuation process involved for Level III measurements is completed on a quarterly basis and is designed to subject the valuation of Level III investments to an appropriate level of consistency, oversight, and review.

For Private Markets investments classified as Level III, investment professionals prepare preliminary valuations based on their evaluation of financial and operating data, company specific developments, market valuations of comparable companies and other factors. KKR begins its procedures to determine the fair values of its Level III assets one month prior to the end of a reporting period, and KKR follows additional procedures to ensure that its determinations of fair value for its Level III assets are appropriate as of the relevant reporting date. These preliminary valuations are reviewed by an independent valuation firm engaged by KKR to perform certain procedures in order to assess the reasonableness of KKR's valuations annually for all Level III investments in Private Markets and quarterly for investments other than certain investments, which have values less than preset value thresholds and which in the aggregate comprise less than 5% of the total value of KKR's Level III Private Markets investments. The valuations of certain real asset investments are determined solely by an independent valuation firm without the preparation of preliminary valuations by our investment professionals, and instead such independent valuation firm relies on valuation information available to it as a broker or valuation firm. For credit investments and debt obligations of consolidated CMBS vehicles, an independent valuation firm is generally engaged quarterly by KKR with respect to most investments classified as Level III. The valuation firm either provides a value or provides a valuation range from which KKR's investment professionals select a point in the range to determine the preliminary valuation or performs certain procedures in order to assess the reasonableness and provide positive assurance of KKR's valuations. After reflecting any input from the independent valuation firm, the valuation proposals are submitted for review and approval by KKR's valuation committees. As of December 31, 2018, less than 4% of the total value of our Level III credit investments were not valued with the engagement of an independent valuation firm.

KKR has a global valuation committee that is responsible for coordinating and implementing the firm's valuation process to ensure consistency in the application of valuation principles across portfolio investments and between periods. The global valuation committee is assisted by the asset class-specific valuation committees that exist for private equity (including core investments), growth equity, real estate, energy and infrastructure and credit. The asset class-specific valuation committees are responsible for the review and approval of all preliminary Level III valuations in their respective asset classes on a quarterly basis. The members of these valuation committees are comprised of investment professionals, including the heads of each respective strategy, and professionals from business operations functions such as legal, compliance and finance, who are not primarily responsible for the management of the investments. For periods prior to the completion of the PAAMCO Prisma transaction, when Level III valuations were required to be performed on hedge fund investments, a valuation committee for hedge funds reviewed these valuations.

Table of Contents

All Level III valuations are also subject to approval by the global valuation committee, which is comprised of senior employees including investment professionals and professionals from business operations functions, and includes one of KKR's Co-Presidents and Co-Chief Operating Officers and its Chief Financial Officer, General Counsel and Chief Compliance Officer. When valuations are approved by the global valuation committee after reflecting any input from it, the valuations of Level III investments, as well as the valuations of Level I and Level II investments, are presented to the audit committee of the board of directors of KKR & Co. Inc. and are then reported to the board of directors.

As of December 31, 2018, upon completion by, where applicable, an independent valuation firm of certain limited procedures requested to be performed by them on certain investments, the independent valuation firm concluded that the fair values, as determined by KKR, of those investments reviewed by them were reasonable. The limited procedures did not involve an audit, review, compilation or any other form of examination or attestation under generally accepted auditing standards and were not conducted on all Level III investments. We are responsible for determining the fair value of investments in good faith, and the limited procedures performed by an independent valuation firm are supplementary to the inquiries and procedures that we are required to undertake to determine the fair value of the commensurate investments.

As described above, Level II and Level III investments were valued using internal models with significant unobservable inputs and our determinations of the fair values of these investments may differ materially from the values that would have resulted if readily observable inputs had existed. Additional external factors may cause those values, and the values of investments for which readily observable inputs exist, to increase or decrease over time, which may create volatility in our earnings and the amounts of assets and stockholders' equity that we report from time to time.

Changes in the fair value of investments impacts the amount of carried interest that is recognized as well as the amount of investment income that is recognized for investments held directly and through our consolidated funds as described below. We estimate that an immediate 10% decrease in the fair value of investments held directly and through consolidated investment funds generally would result in a commensurate change in the amount of net gains (losses) from investment activities for investments held directly and through investment funds and a more significant impact to the amount of carried interest recognized, regardless of whether the investment was valued using observable market prices or management estimates with significant unobservable pricing inputs. With respect to consolidated investment funds, the impact that the consequential decrease in investment income would have on net income attributable to KKR would generally be significantly less than the amount described above, given that a majority of the change in fair value of our consolidated funds would be attributable to noncontrolling interests and therefore we are only impacted to the extent of our carried interest and our balance sheet investments.

As of December 31, 2018, there were no investments which represented greater than 5% of total investments on a GAAP basis. On a segment basis, as of December 31, 2018, investments which represented greater than 5% of total segment investments consisted of First Data Corporation and USI, Inc. valued at \$998.1 million and \$650.1 million, respectively. Our investment income on a GAAP basis and our book value can be impacted by volatility in the public markets related to our holdings of publicly traded securities, including our sizable holdings of First Data Corporation. See "—Business Environment" for a discussion on the impact of global equity markets on our financial condition and "—Segment Balance Sheet" for additional information regarding our largest holdings on a segment basis.

Recognition of Investment Income

Investment income consists primarily of the net impact of: (i) realized and unrealized gains and losses on investments; (ii) dividends; (iii) interest income; (iv) interest expense and (v) foreign exchange gains and losses relating to mark-to-market activity on foreign exchange forward contracts, foreign currency options, foreign denominated debt

and debt securities issued by consolidated CFEs.

Certain of our investment funds are consolidated. When a fund is consolidated, the portion of our funds' investment income that is allocable to our carried interests and capital investments is not shown in the consolidated financial statements. For funds that are consolidated, all investment income (loss), including the portion of a funds' investment income (loss) that is allocable to KKR's carried interest, is included in investment income (loss) on the consolidated statements of operations. The carried interest that KKR retains in net income (loss) attributable to KKR & Co. Inc. is reflected as an adjustment to net income (loss) attributable to noncontrolling interests. However, because certain of our funds remain consolidated and because we hold a minority economic interest in these funds' investments, our share of the investment income is less than the total amount of investment income presented in the consolidated financial statements for these consolidated funds.

Table of Contents

Recognition of Carried Interest in the Statement of Operations

Carried interest entitles the general partner of a fund to a greater allocable share of the fund's earnings from investments relative to the capital contributed by the general partner and correspondingly reduces noncontrolling interests' attributable share of those earnings. Carried interest is earned by the general partner of those funds to the extent that cumulative investment returns are positive and where applicable, preferred return thresholds have been met. If these investment returns decrease or turn negative in subsequent periods, recognized carried interest will be reversed and reflected as losses in the statement of operations. For funds that are not consolidated, amounts earned pursuant to carried interest are included in capital allocation-based income in the consolidated statements of operations. Amounts earned pursuant to carried interest at consolidated funds are eliminated from fees and other upon consolidation of the fund and are included as investment income (loss) in net gains (losses) from investment activities along with all of the other investment gains and losses at the consolidated fund.

Carried interest is recognized in the statement of operations based on the contractual conditions set forth in the agreements governing the fund as if the fund were terminated and liquidated at the reporting date and the fund's investments were realized at the then estimated fair values. Due to the extended durations of our private equity funds, we believe that this approach results in income recognition that best reflects our periodic performance in the management of those funds. Amounts earned pursuant to carried interest are earned by the general partner of those funds to the extent that cumulative investment returns are positive and where applicable, preferred return thresholds have been met. If these investment amounts earned decrease or turn negative in subsequent periods, recognized carried interest will be reversed and to the extent that the aggregate amount of carry distributions received by the general partner during the term of the fund exceed the amount to which the general partner was ultimately entitled, a clawback obligation would be recorded. For funds that are not consolidated, this clawback obligation, if any, is reflected as a reduction of our investment balance as this is where carried interest is initially recorded. For funds that are consolidated, this clawback obligation, if any, is reflected as an increase in noncontrolling interests in the consolidated statements of financial condition.

Prior to January 1, 2016, most of our historical private equity funds that provide for carried interest do not have a preferred return. For these funds, the management company is required to refund up to 20% of any management fees earned from its limited partners in the event that the fund recognizes carried interest. At such time as the fund recognizes carried interest in an amount sufficient to cover 20% of the management fees earned or a portion thereof, a liability due to the fund's limited partners is recorded and revenue is reduced for the amount of the carried interest recognized, not to exceed 20% of the management fees earned. The refunds to the limited partners are paid, and liabilities relieved, at such time that the underlying investment is sold and the associated carried interest is realized. In the event that a fund's carried interest is not sufficient to cover all or a portion of the amount that represents 20% of the earned management fees, such management fees would be retained and not returned to the funds' limited partners.

Most of our newer investment funds that provide for carried interest, however, have a preferred return. In this case, the management company does not refund the management fees earned from the limited partners of the fund as described above. Instead, the management fee is effectively returned to the limited partners through a reduction of the realized gain on which carried interest is calculated. To calculate the carried interest, KKR calculates whether a preferred return has been achieved based on an amount that includes all of the management fees paid by the limited partners as well as the other capital contributions and expenses paid by them to date. To the extent the fund has exceeded the preferred return at the time of a realization event, and subject to any other conditions for the payment of carried interest like netting holes, carried interest is distributed to the general partner. Until the preferred return is achieved, no carried interest is recorded. Thereafter, the general partner is entitled to a catch up allocation such that the general partner's carried interest is paid in respect of all of the fund's net gains, including the net gains used to pay the preferred return, until the general partner has received the full percentage amount of carried interest that the general

partner is entitled to under the terms of the fund. In general, investment funds that entitle the management company to receive an incentive fee have a preferred return and are calculated on a similar basis that takes into account management fees paid.

Table of Contents

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market risks primarily relates to movements in the fair value of investments, including the effect that those movements have on our management fees, carried interest, and net gains from investment activities. The fair value of investments may fluctuate in response to changes in the values of investments, foreign currency exchange rates, and interest rates. Additionally, interest rate movements can adversely impact the amount of interest income we receive on credit instruments bearing variable rates and could also impact the amount of interest that we pay on debt obligations bearing variable rates.

The quantitative information provided in this section was prepared using estimates and assumptions that management believes are appropriate in order to provide a reader with an indication of the directional impact that a hypothetical adverse movement in certain risks would have on net income attributable to KKR & Co. Inc. In all cases, these directional impacts are presented after deducting amounts that are attributable to noncontrolling interests held by KKR Holdings. As of December 31, 2018, KKR & Co. Inc. and KKR Holdings held interests in our business of 64.1% and 35.9%, respectively. The actual impact of a hypothetical adverse movement in these risks could be materially different from the amounts shown below.

The firm uses various committees to help manage market risk and general business risks.

Management of Market Risk

When we commit capital of a certain amount from our balance sheet to investments or transactions, a balance sheet committee of senior employees, including our two Co-Chief Executive Officers, a Co-President/Co-Chief Operating Officer, and the Chief Financial Officer, must approve the investment or transaction before it may be made. The committee may delegate authority to other employees subject to maximum commitment sizes or other limitations determined by the committee. In addition, this committee supervises activities governing KKR's capital structure, liquidity, and the composition of our balance sheet.

Certain securities transactions by our capital markets business are subject to risk tolerance limits, regulatory capital requirements, and the review and approval of one or more committees in compliance with rules applicable to broker-dealers pursuant to the Exchange Act. When our capital is committed to capital markets transactions after diligence is conducted, such transactions are subject to the review and approval of a capital markets underwriting committee. These transactions are also subject to risk tolerance limits. The risk tolerance limits establish the level of investment we may make in a single company or type of transaction, for example, and are designed to avoid undue concentration and risk exposure. Regulatory capital requirements also place limits on the size of securities underwritings the capital markets business can conduct based on quantitative measure of assets, liabilities, and certain off-balance-sheet items. Aggregate balance sheet risk and capital deployed for transactions are monitored on an ongoing basis by the balance sheet committee referenced above.

With respect to the funds and other investment vehicles through which we make investments for our fund investors, KKR manages risk by subjecting transactions to the review and approval of an applicable investment committee or portfolio manager; a portfolio management committee (or other designated senior employees) then regularly monitors these investments. Before making an investment, investment professionals identify risks in due diligence, evaluating, among other things, business, financial, legal and regulatory issues, financial data, and other information relevant to a particular investment. An investment team presents the investment and its identified risks to an investment committee or a portfolio manager, which must approve each investment before it may be made. If an investment is made, a portfolio management committee (or other designated senior employees) is responsible for working with our investment professionals to monitor the investment on an ongoing basis.

Management of General Business Risk

KKR has an investment management and distribution committee comprised of senior employees across our business lines, and includes our Co-Presidents/Co-Chief Operating Officers. The investment management and distribution committee focuses on coordinating investment and distribution activities across the firm. KKR has a risk and operations committee comprised of senior employees from across our business operations, and includes our Co-Presidents/Co-Chief Operating Officers, Chief Financial Officer, General Counsel, and Chief Compliance Officer. The risk and operations committee focuses on KKR's operations and enterprise risk management.

KKR's global conflicts and compliance committee is responsible for analyzing and addressing new or potential conflicts of interest that may arise in KKR's business, including conflicts relating to specific transactions as well as potential conflicts involving the overall activities of KKR and its various businesses. This committee also reviews and monitors certain

- (2) Represents an annualized reduction in management fees.
- (3) Decrease would impact our statement of operations in a single quarter. With respect to carried interest, for purposes of this analysis the impact of preferred returns are ignored.

Management Fees

Our management fees in our Private Markets investment funds are generally calculated based on the amount of capital committed or invested by a fund, as described under "Business—Our Business Lines—Private Markets." Accordingly, movements in the fair value of investments do not significantly affect the amount of fees we may charge in Private Markets funds. Management fees in our infrastructure funds are calculated based on NAV of the fund and, in some cases, we additionally earn management fees on the fund's remaining commitment.

In the case of our Public Markets business, management fees are often calculated based on the average NAV of the fund for that particular period, although certain funds in our Public Markets business line have management fees based on the amount of capital invested. In the case of our CLO vehicles, management fees are calculated based on the collateral of the vehicle. The collateral is based on the par value of the investments and cash on hand.

To the extent that management fees are calculated based on the NAV of the fund's investments, the amount of fees that we may charge will increase or decrease in direct proportion to the effect of changes in the fair value of the fund's investments. The proportion of our management fees that are based on NAV depends on the number and type of funds in existence. For the year ended December 31, 2018, the fund management fees that were recognized based on the NAV of the applicable funds was approximately 26%.

Table of Contents

Publicly Traded Securities

Our investment funds and KKR's balance sheet hold certain investments in portfolio companies whose securities are publicly traded. The market prices of securities may be volatile and are likely to fluctuate due to a number of factors beyond our control. These factors include actual or anticipated fluctuations in the quarterly and annual results of such companies or of other companies in the industries in which they operate, market perceptions concerning the availability of additional securities for sale, general economic, social or political developments, industry conditions, changes in government regulation, shortfalls in operating results from levels forecasted by securities analysts, the general state of the securities markets and other material events, such as significant management changes, re-financings, acquisitions, and dispositions. In addition, although a substantial portion of our investments are comprised of investments in portfolio companies whose securities are not publicly traded, the value of these privately held investments may also fluctuate as our Level III investments are valued in part using a market comparables analysis. Consequently, due to similar factors beyond our control as described above for portfolio companies whose securities are publicly traded, the value of these Level III investments may fluctuate with market prices. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Business Environment."

Exchange Rate Risk

Our investment funds, CLO vehicles, and KKR's balance sheet hold investments denominated in currencies other than the U.S. dollar. Those investments expose us and our fund investors to the risk that the value of the investments will be affected by changes in exchange rates between the currency in which the investments are denominated and the currency in which the investments are made. Additionally, a portion of our management fees are denominated in non-U.S. dollar currencies. Our policy is to reduce these risks by employing hedging techniques, including using foreign currency options and foreign exchange forward contracts to reduce exposure to future changes in exchange rates when a meaningful amount of capital has been invested in currencies other than the currencies in which the investments are denominated.

Our primary exposure to exchange rate risk relates to movements in the value of exchange rates between the U.S. dollar and other currencies in which our investments are denominated (including euros, British pounds, Japanese yen, among others), net of the impact of foreign exchange hedging strategies. The quantitative information that follows represents the impact that a reduction to each of the income streams shown below would have on net income attributable to KKR & Co. Inc. before income taxes. The actual impact to individual line items within the statements of operations would differ from the amounts shown below as a result of (i) the inclusion of amounts attributable to KKR Holdings in individual line items within the consolidated statement of operations, (ii) the elimination of carried interest as a result of the consolidation of certain investment funds, and (iii) the gross-up of net gains (losses) from investment activities, in each case as a result of the consolidation of certain investment funds and CLO vehicles.

We estimate that an immediate, hypothetical 10% decline in the exchange rates between the U.S. dollar and all of the major foreign currencies in which our investments were denominated as of December 31, 2018 (i.e. an increase in the value of the U.S. dollar against these foreign currencies) would result in declines in net income attributable to KKR & Co. Inc. before income taxes in 2019 from reductions in the following items, net of the impact of foreign exchange hedging strategies, if not offset by other factors:

Carried	Net
Interest,	Gains/(Losses)
Net of	From
Carry Pool	Investment
Allocation	Activities
	Including

General Partner
Capital Interest

(\$ in thousands)

10% Decline in Foreign Currencies Against the U.S. Dollar ⁽¹⁾ \$47,029 ⁽²⁾ \$ 54,787 ⁽²⁾

- An immediate, hypothetical 10% decline in exchange rates between the U.S. dollar and all of the major foreign currencies in which our investments were denominated would only marginally impact our ability to earn incentive fees since the majority of our funds in which we are entitled to earn incentive fees are denominated in U.S. dollars. Additionally, the impact on our management fees that are denominated in non-US dollar currencies considering the impact of foreign exchange hedging strategies employed would not be expected to be material.
- ⁽¹⁾ Decrease would impact our statement of operations in a single quarter. With respect to carried interest, for purposes of this analysis the impact of preferred returns are ignored.
- ⁽²⁾

Table of Contents

Interest Rate Risk

Valuation of Investments

Changes in credit markets and in particular, interest rates, can impact investment valuations, particularly our Level III investments, and may have offsetting results depending on the valuation methodology used. For example, we typically use a discounted cash flow analysis as one of the methodologies to ascertain the fair value of our investments that do not have readily observable market prices. If applicable interest rates rise, then the assumed cost of capital for those portfolio companies would be expected to increase under the discounted cash flow analysis, and this effect would negatively impact their valuations if not offset by other factors. Conversely, a fall in interest rates can positively impact valuations of certain portfolio companies if not offset by other factors. These impacts could be substantial depending upon the magnitude of the change in interest rates. In certain cases, the valuations obtained from the discounted cash flow analysis and the other primary methodology we use, the market multiples approach, may yield different and offsetting results. For example, the positive impact of falling interest rates on discounted cash flow valuations may offset the negative impact of the market multiples valuation approach and may result in less of a decline in value than for those investments that had a readily observable market price. Finally, low interest rates related to monetary stimulus and economic stagnation may also negatively impact expected returns on all investments, as the demand for relatively higher return assets increases and supply decreases.

Interest Income

We and certain consolidated funds, including CLOs, hold credit investments that generate interest income based on variable interest rates. We are exposed to interest rate risk relating to investments that generate yield since a meaningful portion of credit investments held by us and our consolidated funds, including CLOs, earn income based on variable interest rates. However, the contractual interest rate structure for a large portion of our credit investments bearing variable rates have "floors," which establish a minimum rate of interest that will be earned. In the current low interest rate environment, a large portion of the credit investments held by us and our consolidated funds, including CLOs, are earning interest marginally above the contractual floor and therefore, for these investments, a decrease in variable interest rates would not materially impact the amount of interest income earned. The impact on net income attributable to KKR & Co. Inc. resulting from a decrease of a hypothetical 100 basis points in variable interest rates used in the recognition of interest income would not be expected to be material since (i) many variable rate credit investments are subject to floors as described above and (ii) a substantial portion of this decrease would be attributable to noncontrolling interests.

Interest Expense

We and certain consolidated funds, including CLOs, have debt obligations that include revolving credit agreements, certain investment financing arrangements and debt securities issued by CLO vehicles that accrue interest at variable rates. Changes in these rates would affect the amount of interest payments that our consolidated funds, including CLOs, would have to make. With respect to consolidated funds and CLOs, the impact on net income attributable to KKR & Co. Inc. resulting from an increase of a hypothetical 100 basis points in variable interest rates used in the recognition of interest expense would not be expected to be material since a substantial portion of this increase would be attributable to noncontrolling interests. With respect to debt obligations held by KKR and not in the consolidated funds or CLOs, as of December 31, 2018, KKR had debt obligations outstanding with an aggregate principal amount of approximately \$258.5 million that accrues interest at a variable rate. Our policy is to reduce these risks by employing hedging techniques, including using interest rate swaps. The impact on net income attributable to KKR & Co. Inc. resulting from an increase of a hypothetical 100 basis points in variable interest rates used in the recognition of interest expense, net of the impact of interest rate hedging strategies, would not be expected to be material.

Credit Risk

We are party to agreements providing for various financial services and transactions that contain an element of risk in the event that the counterparties are unable to meet the terms of such agreements. In these agreements, we depend on these counterparties to make payment or otherwise perform. We generally endeavor to reduce our risk of exposure by limiting the counterparties with which we enter into financial transactions to reputable financial institutions. In addition, availability of financing from financial institutions may be uncertain due to market events, and we may not be able to access these financing markets.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of KKR & Co. Inc.:

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated statements of financial condition of KKR & Co. Inc. (formerly KKR & Co. L.P.) and its subsidiaries (the "Company") as of December 31, 2018 and 2017, the related consolidated statements of operations, comprehensive income (loss), changes in equity, and cash flows, for each of the three years in the period ended December 31, 2018, and the related notes and the financial statement schedule listed in the Index at Item 15 (collectively referred to as the "financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by COSO.

Basis for Opinions

The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on these financial statements and an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures to respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding

prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

156

Table of Contents

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

CONSOLIDATED STATEMENTS OF FINANCIAL CONDITION (Continued)

(Amounts in Thousands)

The following presents the portion of the consolidated balances presented in the consolidated statements of financial condition attributable to consolidated variable interest entities ("VIEs") as of December 31, 2018 and 2017. KKR's consolidated VIEs consist primarily of (i) certain collateralized financing entities ("CFEs") holding collateralized loan obligations ("CLOs") and commercial real estate mortgage-backed securities ("CMBS") and (ii) certain investment funds. With respect to consolidated VIEs, the following assets may only be used to settle obligations of these consolidated VIEs and the following liabilities are only the obligations of these consolidated VIEs. The noteholders, limited partners and other creditors of these VIEs have no recourse to KKR's general assets. Additionally, KKR has no right to the benefits from, nor does KKR bear the risks associated with, the assets held by these VIEs beyond KKR's beneficial interest therein and any income generated from the VIEs. There are neither explicit arrangements nor does KKR hold implicit variable interests that would require KKR to provide any material ongoing financial support to the consolidated VIEs, beyond amounts previously committed, if any.

KKR & CO. INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All Amounts in Thousands, Except Unit and Share Data, and Except Where Noted)

1. ORGANIZATION

KKR & Co. Inc. (NYSE: KKR), together with its subsidiaries ("KKR"), is a leading global investment firm that manages multiple alternative asset classes including private equity, energy, infrastructure, real estate and credit, with strategic partners that manage hedge funds. KKR aims to generate attractive investment returns for its fund investors by following a patient and disciplined investment approach, employing world-class people, and driving growth and value creation with KKR's portfolio companies. KKR invests its own capital alongside the capital it manages for fund investors and provides financing solutions and investment opportunities through its capital markets business.

On July 1, 2018, KKR & Co. L.P. converted from a Delaware limited partnership to a Delaware corporation named KKR & Co. Inc. (the "Conversion"). Because the Conversion became effective on July 1, 2018, the prior period amounts in the accompanying consolidated financial statements as of December 31, 2017, for the years ended December 31, 2017 and 2016, and for the six months ended June 30, 2018, reflect KKR as a limited partnership and not a corporation. In this report, references to KKR & Co. Inc. for periods prior to the Conversion mean KKR & Co. L.P., and references to KKR's Class A common stock, Series A Preferred Stock and Series B Preferred Stock for periods prior to the Conversion mean common units, Series A preferred units and Series B preferred units of KKR & Co. L.P., respectively, in each case, except where the context requires otherwise. As a result of the Conversion, the financial impact to the consolidated financial statements contained herein consisted of (i) reclassifications from partnership equity accounts to equity accounts reflective of a corporation and (ii) a partial step-up in the tax basis of certain assets resulting in the recognition of a net income tax benefit. See Note 15 "Equity" for the impact of the Conversion on KKR's equity accounts and Note 11 "Income Taxes" for the impact of the Conversion on KKR's income taxes.

In connection with the Conversion, a wholly-owned subsidiary of KKR & Co. Inc., KKR Group Holdings Corp., became (i) a general partner of KKR Fund Holdings L.P. ("Fund Holdings") and KKR International Holdings L.P. ("International Holdings") and (ii) the sole stockholder of KKR Management Holdings Corp. (the general partner of KKR Management Holdings L.P. ("Management Holdings")) and KKR Fund Holdings GP Limited (the other general partner of Fund Holdings and International Holdings). In addition, certain wholly-owned subsidiaries of KKR & Co. Inc., namely KKR Group Holdings L.P. ("Group Holdings"), KKR Group Limited (the general partner of Group Holdings), KKR Subsidiary Corp. and KKR Subsidiary Partnership L.P., were either merged into another wholly-owned subsidiary of KKR & Co. Inc. or dissolved. Fund Holdings, Management Holdings and International Holdings are collectively referred to as the "KKR Group Partnerships."

KKR & Co. Inc. both indirectly controls the KKR Group Partnerships and indirectly holds Class A partner units in each KKR Group Partnership (collectively, "KKR Group Partnership Units") representing economic interests in KKR's business. The remaining KKR Group Partnership Units are held by KKR Holdings L.P. ("KKR Holdings"), which is not a subsidiary of KKR & Co. Inc. As of December 31, 2018, KKR & Co. Inc. held approximately 64.1% of the KKR Group Partnership Units and principals through KKR Holdings held approximately 35.9% of the KKR Group Partnership Units. The percentage ownership in the KKR Group Partnerships will continue to change as KKR Holdings and/or principals exchange units in the KKR Group Partnerships for shares of Class A common stock of KKR & Co. Inc. or when KKR & Co. Inc. otherwise issues or repurchases shares of Class A common stock of KKR & Co. Inc. The KKR Group Partnerships also have outstanding equity interests that provide for the carry pool and preferred units with economic terms that mirror the preferred stock issued by KKR & Co. Inc.

The following table presents the effect of changes in the ownership interest in the KKR Group Partnerships on KKR:

	For the Years Ended December		
	31,		
	2018	2017	2016
Net income (loss) attributable to KKR & Co. Inc.	\$1,131,063	\$1,018,305	\$309,307
Transfers from noncontrolling interests:			
Exchange of KKR Group Partnership shares held by KKR Holdings L.P. ⁽¹⁾	570,898	247,946	90,910
Change from net income (loss) attributable to KKR & Co. Inc. and transfers from noncontrolling interests held by KKR Holdings	\$1,701,961	\$1,266,251	\$400,217
Increase in KKR's stockholders' equity for exchange of 36,890,095, 17,786,064, and 7,589,190 KKR Group			
(1)Partnerships units for the years ended December 31, 2018, 2017, and 2016, respectively, held by KKR Holdings L.P., inclusive of deferred taxes.

Notes to Consolidated Financial Statements (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying consolidated financial statements (referred to hereafter as the "financial statements") have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). KKR consolidates the financial results of the KKR Group Partnerships and their consolidated entities, which include the accounts of KKR's investment management and capital markets companies, the general partners of certain unconsolidated investment funds, general partners of consolidated investment funds and their respective consolidated investment funds and certain other entities including CFEs. References in the accompanying financial statements to "principals" are to KKR's senior employees and non-employee operating consultants who hold interests in KKR's business through KKR Holdings.

All intercompany transactions and balances have been eliminated.

Use of Estimates

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues, expenses and investment income (loss) during the reporting periods. Such estimates include but are not limited to (i) the determination of the income tax provision and (ii) the valuation of investments and financial instruments. Actual results could differ from those estimates, and such differences could be material to the financial statements.

Principles of Consolidation

The types of entities KKR assesses for consolidation include (i) subsidiaries, including management companies, broker-dealers and general partners of investment funds that KKR manages, (ii) entities that have all the attributes of an investment company, like investment funds, (iii) CFEs and (iv) other entities, including entities that employ non-employee operating consultants. Each of these entities is assessed for consolidation on a case by case basis depending on the specific facts and circumstances surrounding that entity.

Pursuant to its consolidation policy, KKR first considers whether an entity is considered a VIE and therefore whether to apply the consolidation guidance under the VIE model. Entities that do not qualify as VIEs are assessed for consolidation as voting interest entities ("VOEs") under the voting interest model.

KKR's funds are, for GAAP purposes, investment companies and therefore are not required to consolidate their investments in portfolio companies even if majority-owned and controlled. Rather, the consolidated funds and vehicles reflect their investments at fair value as described below in "Fair Value Measurements."

An entity in which KKR holds a variable interest is a VIE if any one of the following conditions exist: (a) the total equity investment at risk is not sufficient to permit the legal entity to finance its activities without additional subordinated financial support, (b) the holders of the equity investment at risk (as a group) lack either the direct or indirect ability through voting rights or similar rights to make decisions about a legal entity's activities that have a significant effect on the success of the legal entity or the obligation to absorb the expected losses or right to receive the expected residual returns, or (c) the voting rights of some investors are disproportionate to their obligation to absorb the expected losses of the legal entity, their rights to receive the expected residual returns of the legal entity, or both and substantially all of the legal entity's activities either involve or are conducted on behalf of an investor with disproportionately few voting rights. Limited partnerships and other similar entities where unaffiliated limited partners have not been granted (i) substantive participatory rights or (ii) substantive rights to either dissolve the partnership or

remove the general partner ("kick-out rights") are VIEs under condition (b) above. KKR's investment funds that are not CFEs (i) are generally limited partnerships, (ii) generally provide KKR with operational discretion and control and (iii) generally have fund investors with no substantive rights to impact ongoing governance and operating activities of the fund, including the ability to remove the general partner, and as such the limited partners do not hold kick-out rights. Accordingly, most of KKR's investment funds are categorized as VIEs.

KKR consolidates all VIEs in which it is the primary beneficiary. A reporting entity is determined to be the primary beneficiary if it holds a controlling financial interest in a VIE. A controlling financial interest is defined as (a) the power to direct the activities of a VIE that most significantly impact the VIE's economic performance and (b) the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits from the VIE that could

Table of Contents

Notes to Consolidated Financial Statements (Continued)

potentially be significant to the VIE. The consolidation guidance requires an analysis to determine (i) whether an entity in which KKR holds a variable interest is a VIE and (ii) whether KKR's involvement, through holding interests directly or indirectly in the entity or contractually through other variable interests (for example, management and performance related fees), would give it a controlling financial interest. Performance of that analysis requires the exercise of judgment. Fees earned by KKR that are customary and commensurate with the level of effort required to provide those services, and where KKR does not hold other economic interests in the entity that would absorb more than an insignificant amount of the expected losses or returns of the entity, would not be considered variable interests. KKR factors in all economic interests including interests held through related parties, to determine if it holds a variable interest. KKR determines whether it is the primary beneficiary of a VIE at the time it becomes involved with a VIE and reconsiders that conclusion periodically.

For entities that are determined not to be VIEs, these entities are generally considered VOEs and are evaluated under the voting interest model. KKR consolidates VOEs it controls through a majority voting interest or through other means.

The consolidation assessment, including the determination as to whether an entity qualifies as a VIE or VOE depends on the facts and circumstances surrounding each entity and therefore certain of KKR's investment funds may qualify as VIEs whereas others may qualify as VOEs.

With respect to CLOs (which are generally VIEs), in its role as collateral manager, KKR generally has the power to direct the activities of the CLO that most significantly impact the economic performance of the entity. In some, but not all cases, KKR, through its residual interest in the CLO may have variable interests that represent an obligation to absorb losses of, or a right to receive benefits from, the CLO that could potentially be significant to the CLO. In cases where KKR has both the power to direct the activities of the CLO that most significantly impact the CLO's economic performance and the obligation to absorb losses of the CLO or the right to receive benefits from the CLO that could potentially be significant to the CLO, KKR is deemed to be the primary beneficiary and consolidates the CLO.

With respect to CMBS vehicles (which are generally VIEs), KKR holds unrated and non-investment grade rated securities issued by the CMBS, which are the most subordinate tranche of the CMBS vehicle. The economic performance of the CMBS is most significantly impacted by the performance of the underlying assets. Thus, the activities that most significantly impact the CMBS economic performance are the activities that most significantly impact the performance of the underlying assets. The special servicer has the ability to manage the CMBS assets that are delinquent or in default to improve the economic performance of the CMBS. KKR generally has the right to unilaterally appoint and remove the special servicer for the CMBS and as such is considered the controlling class of the CMBS vehicle. These rights give KKR the ability to direct the activities that most significantly impact the economic performance of the CMBS. Additionally, as the holder of the most subordinate tranche, KKR is in a first loss position and has the right to receive benefits, including the actual residual returns of the CMBS, if any. In these cases, KKR is deemed to be the primary beneficiary and consolidates the CMBS vehicle.

Investments

Investments consist primarily of private equity, real assets, credit, investments of consolidated CFEs, equity method, carried interest and other investments. Investments denominated in currencies other than the entity's functional currency are valued based on the spot rate of the respective currency at the end of the reporting period with changes related to exchange rate movements reflected as a component of Net Gains (Losses) from Investment Activities in the consolidated statements of operations. Security and loan transactions are recorded on a trade date basis. Further disclosure on investments is presented in Note 4 "Investments."

The following describes the types of securities held within each investment class.

Private Equity - Consists primarily of equity investments in operating businesses, including growth equity investments.

Credit - Consists primarily of investments in below investment grade corporate debt securities (primarily high yield bonds and syndicated bank loans), originated, distressed and opportunistic debt, real estate mortgage loans and interests in unconsolidated CLOs.

Investments of Consolidated CFEs - Consists primarily of (i) investments in below investment grade corporate debt securities (primarily high yield bonds and syndicated bank loans) held directly by the consolidated CLOs and (ii) investments in originated, fixed-rate real estate mortgage loans held directly by the consolidated CMBS vehicles.

Table of Contents

Notes to Consolidated Financial Statements (Continued)

Real Assets - Consists primarily of investments in (i) energy related assets, principally oil and natural gas producing properties, (ii) infrastructure assets, and (iii) real estate, principally residential and commercial real estate assets and businesses.

Equity Method - Other - Consists primarily of (i) certain direct interests in operating companies in which KKR is deemed to exert significant influence under GAAP and (ii) certain interests in partnerships and joint ventures that hold private equity and real estate investments.

Equity Method - Capital Allocation-Based Income - Consists primarily of (i) the capital interest KKR holds as the general partner in certain investment funds, which are not consolidated and (ii) the carried interest component of the general partner interest, which are accounted for as a single unit of account.

Other - Consists primarily of investments in common stock, preferred stock, warrants and options of companies that are not private equity, real assets, credit or investments of consolidated CFEs.

Investments held by Consolidated Investment Funds

The consolidated investment funds are, for GAAP purposes, investment companies and reflect their investments and other financial instruments, including portfolio companies that are majority-owned and controlled by KKR's investment funds, at fair value. KKR has retained this specialized accounting for the consolidated funds in consolidation. Accordingly, the unrealized gains and losses resulting from changes in fair value of the investments and other financial instruments held by the consolidated investment funds are reflected as a component of Net Gains (Losses) from Investment Activities in the consolidated statements of operations.

Certain energy investments are made through consolidated investment funds, including investments in working and royalty interests in oil and natural gas producing properties as well as investments in operating companies that operate in the energy industry. Since these investments are held through consolidated investment funds, such investments are reflected at fair value as of the end of the reporting period.

Investments in operating companies that are held through KKR's consolidated investment funds are generally classified within private equity investments and investments in working and royalty interests in oil and natural gas producing properties are generally classified as real asset investments.

Energy Investments held directly by KKR

Certain energy investments are made by KKR directly in working and royalty interests in oil and natural gas producing properties and not through investment funds. Oil and natural gas producing activities are accounted for under the successful efforts method of accounting and such working interests are consolidated based on the proportion of the working interests held by KKR. Accordingly, KKR reflects its proportionate share of the underlying statements of financial condition and statements of operations of the consolidated working interests on a gross basis and changes in the value of these working interests are not reflected as unrealized gains and losses in the consolidated statements of operations. Under the successful efforts method, exploration costs, other than the costs of drilling exploratory wells, are charged to expense as incurred. Costs that are associated with the drilling of successful exploration wells are capitalized if proved reserves are found. Lease acquisition costs are capitalized when incurred. Costs associated with the drilling of exploratory wells that do not find proved reserves, geological and geophysical costs and costs of certain nonproducing leasehold costs are charged to expense as incurred.

Expenditures for repairs and maintenance, including workovers, are charged to expense as incurred.

The capitalized costs of producing oil and natural gas properties are depleted on a field-by-field basis using the units-of production method based on the ratio of current production to estimated total net proved oil, natural gas and natural gas liquid reserves. Proved developed reserves are used in computing depletion rates for drilling and development costs and total proved reserves are used for depletion rates of leasehold costs.

Estimated dismantlement and abandonment costs for oil and natural gas properties, net of salvage value, are capitalized at their estimated net present value and amortized on a unit-of-production basis over the remaining life of the related proved developed reserves.

Whenever events or changes in circumstances indicate that the carrying amounts of oil and natural gas properties may not be recoverable, KKR evaluates oil and natural gas properties and related equipment and facilities for impairment on a field-by-

170

Table of Contents

Notes to Consolidated Financial Statements (Continued)

field basis. The determination of recoverability is made based upon estimated undiscounted future net cash flows. The amount of impairment loss, if any, is determined by comparing the fair value, as determined by a discounted cash flow analysis, with the carrying value of the related asset. Any impairment in value is recognized when incurred and is recorded in General, Administrative, and Other expense in the consolidated statements of operations.

Fair Value Option

For certain investments and other financial instruments, KKR has elected the fair value option. Such election is irrevocable and is applied on a financial instrument by financial instrument basis at initial recognition. KKR has elected the fair value option for certain private equity, real assets, credit, investments of consolidated CFEs, equity method - other and other financial instruments not held through a consolidated investment fund. Accounting for these investments at fair value is consistent with how KKR accounts for its investments held through consolidated investment funds. Changes in the fair value of such instruments are recognized in Net Gains (Losses) from Investment Activities in the consolidated statements of operations. Interest income on interest bearing credit securities on which the fair value option has been elected is based on stated coupon rates adjusted for the accretion of purchase discounts and the amortization of purchase premiums. This interest income is recorded within Interest Income in the consolidated statements of operations.

Equity Method

For certain investments in entities over which KKR exercises significant influence but which do not meet the requirements for consolidation and for which KKR has not elected the fair value option, KKR uses the equity method of accounting. The carrying value of equity method investments, for which KKR has not elected the fair value option, is determined based on the amounts invested by KKR, adjusted for the equity in earnings or losses of the investee allocated based on KKR's respective ownership percentage, less distributions.

For equity method investments for which KKR has not elected the fair value option, KKR records its proportionate share of the investee's earnings or losses based on the most recently available financial information of the investee, which in certain cases may lag the date of KKR's financial statements by no more than three calendar months. As of December 31, 2018, equity method investees for which KKR reports financial results on a lag include Marshall Wace LLP ("Marshall Wace"). KKR evaluates its equity method investments for which KKR has not elected the fair value option for impairment whenever events or changes in circumstances indicate that the carrying amounts of such investments may not be recoverable.

The carrying value of investments classified as Equity Method - Capital Allocation-Based Income approximates fair value, because the underlying investments of the unconsolidated investment funds are reported at fair value.

Financial Instruments held by Consolidated CFEs

KKR measures both the financial assets and financial liabilities of the consolidated CFEs in its financial statements using the more observable of the fair value of the financial assets and the fair value of the financial liabilities which results in KKR's consolidated net income (loss) reflecting KKR's own economic interests in the consolidated CFEs including (i) changes in the fair value of the beneficial interests retained by KKR and (ii) beneficial interests that represent compensation for services rendered.

For the consolidated CLOs, KKR has determined that the fair value of the financial assets of the consolidated CLOs is more observable than the fair value of the financial liabilities of the consolidated CLOs. As a result, the financial assets of the consolidated CLOs are being measured at fair value and the financial liabilities are being measured in consolidation as: (1) the sum of the fair value of the financial assets and the carrying value of any nonfinancial assets

that are incidental to the operations of the CLOs less (2) the sum of the fair value of any beneficial interests retained by KKR (other than those that represent compensation for services) and KKR's carrying value of any beneficial interests that represent compensation for services. The resulting amount is allocated to the individual financial liabilities (other than the beneficial interests retained by KKR).

For the consolidated CMBS vehicles, KKR has determined that the fair value of the financial liabilities of the consolidated CMBS vehicles is more observable than the fair value of the financial assets of the consolidated CMBS vehicles. As a result, the financial liabilities of the consolidated CMBS vehicles are being measured at fair value and the financial assets are being measured in consolidation as: (1) the sum of the fair value of the financial liabilities (other than the beneficial interests retained by KKR), the fair value of the beneficial interests retained by KKR and the carrying value of any nonfinancial liabilities that are incidental to the operations of the CMBS vehicles less (2) the carrying value of any nonfinancial assets that are incidental to the operations of the CMBS vehicles. The resulting amount is allocated to the individual financial assets.

Table of Contents

Notes to Consolidated Financial Statements (Continued)

Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. Except for certain of KKR's equity method investments (see "Equity Method" above in this Note 2 "Summary of Significant Accounting Policies") and debt obligations (as described in Note 10 "Debt Obligations"), KKR's investments and other financial instruments are recorded at fair value or at amounts whose carrying values approximate fair value. Where available, fair value is based on observable market prices or parameters or derived from such prices or parameters. Where observable prices or inputs are not available, valuation techniques are applied. These valuation techniques involve varying levels of management estimation and judgment, the degree of which is dependent on a variety of factors.

GAAP establishes a hierarchical disclosure framework which prioritizes and ranks the level of market price observability used in measuring financial instruments at fair value. Market price observability is affected by a number of factors, including the type of financial instrument, the characteristics specific to the financial instrument and the state of the marketplace, including the existence and transparency of transactions between market participants. Financial instruments with readily available quoted prices in active markets generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value.

Investments and financial instruments measured and reported at fair value are classified and disclosed based on the observability of inputs used in the determination of fair values, as follows:

Level I - Pricing inputs are unadjusted, quoted prices in active markets for identical assets or liabilities as of the measurement date. The types of financial instruments included in this category are publicly-listed equities and securities sold short.

Level II - Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the measurement date, and fair value is determined through the use of models or other valuation methodologies. The types of financial instruments included in this category are credit investments, investments and debt obligations of consolidated CLO entities, convertible debt securities indexed to publicly-listed securities, less liquid and restricted equity securities and certain over-the-counter derivatives such as foreign currency option and forward contracts.

Level III - Pricing inputs are unobservable for the financial instruments and include situations where there is little, if any, market activity for the financial instrument. The inputs into the determination of fair value require significant management judgment or estimation. The types of financial instruments generally included in this category are private portfolio companies, real assets investments, credit investments, equity method investments for which the fair value option was elected and investments and debt obligations of consolidated CMBS entities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. KKR's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and consideration of factors specific to the asset.

A significant decrease in the volume and level of activity for the asset or liability is an indication that transactions or quoted prices may not be representative of fair value because in such market conditions there may be increased instances of transactions that are not orderly. In those circumstances, further analysis of transactions or quoted prices is needed, and a significant adjustment to the transactions or quoted prices may be necessary to estimate fair value.

The availability of observable inputs can vary depending on the financial asset or liability and is affected by a wide variety of factors, including, for example, the type of instrument, whether the instrument has recently been issued, whether the instrument is traded on an active exchange or in the secondary market, and current market conditions. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by KKR in determining fair value is greatest for instruments categorized in Level III. The variability and availability of the observable inputs affected by the factors described above may cause transfers between Levels I, II, and III, which KKR recognizes at the beginning of the reporting period.

Investments and other financial instruments that have readily observable market prices (such as those traded on a securities exchange) are stated at the last quoted sales price as of the reporting date. KKR does not adjust the quoted price for these investments, even in situations where KKR holds a large position and a sale could reasonably affect the quoted price.

Table of Contents

Notes to Consolidated Financial Statements (Continued)

Management's determination of fair value is based upon the methodologies and processes described below and may incorporate assumptions that are management's best estimates after consideration of a variety of internal and external factors.

Level II Valuation Methodologies

Credit Investments: These instruments generally have bid and ask prices that can be observed in the marketplace. Bid prices reflect the highest price that KKR and others are willing to pay for an instrument. Ask prices represent the lowest price that KKR and others are willing to accept for an instrument. For financial assets and liabilities whose inputs are based on bid-ask prices obtained from third party pricing services, fair value may not always be a predetermined point in the bid-ask range. KKR's policy is generally to allow for mid-market pricing and adjusting to the point within the bid-ask range that meets KKR's best estimate of fair value.

Investments and Debt Obligations of Consolidated CLO Vehicles: Investments of consolidated CLO vehicles are reported within Investments of Consolidated CFEs and are valued using the same valuation methodology as described above for credit investments. Under ASU 2014-13, KKR measures CLO debt obligations on the basis of the fair value of the financial assets of the CLO.

Securities indexed to publicly-listed securities: The securities are typically valued using standard convertible security pricing models. The key inputs into these models that require some amount of judgment are the credit spreads utilized and the volatility assumed. To the extent the company being valued has other outstanding debt securities that are publicly-traded, the implied credit spread on the company's other outstanding debt securities would be utilized in the valuation. To the extent the company being valued does not have other outstanding debt securities that are publicly-traded, the credit spread will be estimated based on the implied credit spreads observed in comparable publicly-traded debt securities. In certain cases, an additional spread will be added to reflect an illiquidity discount due to the fact that the security being valued is not publicly-traded. The volatility assumption is based upon the historically observed volatility of the underlying equity security into which the convertible debt security is convertible and/or the volatility implied by the prices of options on the underlying equity security.

Restricted Equity Securities: The valuation of certain equity securities is based on an observable price for an identical security adjusted for the effect of a restriction.

Derivatives: The valuation incorporates observable inputs comprising yield curves, foreign currency rates and credit spreads.

Level III Valuation Methodologies

Investments and financial instruments categorized as Level III consist primarily of the following:

Private Equity Investments: KKR generally employs two valuation methodologies when determining the fair value of a private equity investment. The first methodology is typically a market comparables analysis that considers key financial inputs and recent public and private transactions and other available measures. The second methodology utilized is typically a discounted cash flow analysis, which incorporates significant assumptions and judgments. Estimates of key inputs used in this methodology include the weighted average cost of capital for the investment and assumed inputs used to calculate terminal values, such as exit EBITDA multiples. In certain cases the results of the discounted cash flow approach can be significantly impacted by these estimates. Other inputs are also used in both methodologies. In addition, when a definitive agreement has been executed to sell an investment, KKR generally

considers a significant determinant of fair value to be the consideration to be received by KKR pursuant to the executed definitive agreement.

Upon completion of the valuations conducted using these methodologies, a weighting is ascribed to each method, and an illiquidity discount is typically applied where appropriate. The ultimate fair value recorded for a particular investment will generally be within a range suggested by the two methodologies, except that the value may be higher or lower than such range in the case of investments being sold pursuant to an executed definitive agreement.

When determining the weighting ascribed to each valuation methodology, KKR considers, among other factors, the availability of direct market comparables, the applicability of a discounted cash flow analysis, the expected hold period and manner of realization for the investment, and in the case of investments being sold pursuant to an executed definitive agreement, an estimated probability of such sale being completed. These factors can result in different weightings among investments in the portfolio and in certain instances may result in up to a 100% weighting to a single methodology.

Table of Contents

Notes to Consolidated Financial Statements (Continued)

When an illiquidity discount is to be applied, KKR seeks to take a uniform approach across its portfolio and generally applies a minimum 5% discount to all private equity investments. KKR then evaluates such private equity investments to determine if factors exist that could make it more challenging to monetize the investment and, therefore, justify applying a higher illiquidity discount. These factors generally include (i) whether KKR is unable to freely sell the portfolio company or conduct an initial public offering of the portfolio company due to the consent rights of a third party or similar factors, (ii) whether the portfolio company is undergoing significant restructuring activity or similar factors and (iii) characteristics about the portfolio company regarding its size and/or whether the portfolio company is experiencing, or expected to experience, a significant decline in earnings. These factors generally make it less likely that a portfolio company would be sold or publicly offered in the near term at a price indicated by using just a market multiples and/or discounted cash flow analysis, and these factors tend to reduce the number of opportunities to sell an investment and/or increase the time horizon over which an investment may be monetized. Depending on the applicability of these factors, KKR determines the amount of any incremental illiquidity discount to be applied above the 5% minimum, and during the time KKR holds the investment, the illiquidity discount may be increased or decreased, from time to time, based on changes to these factors. The amount of illiquidity discount applied at any time requires considerable judgment about what a market participant would consider and is based on the facts and circumstances of each individual investment. Accordingly, the illiquidity discount ultimately considered by a market participant upon the realization of any investment may be higher or lower than that estimated by KKR in its valuations.

In the case of growth equity investments, enterprise values may be determined using the market comparables analysis and discounted cash flow analysis described above. A scenario analysis may also be conducted to subject the estimated enterprise values to a downside, base and upside case, which involves significant assumptions and judgments. A milestone analysis may also be conducted to assess the current level of progress towards value drivers that we have determined to be important, which involves significant assumptions and judgments. The enterprise value in each case may then be allocated across the investment's capital structure to reflect the terms of the security and subjected to probability weightings. In certain cases, the values of growth equity investments may be based on recent or expected financings.

Real Asset Investments: Real asset investments in infrastructure, energy and real estate are valued using one or more of the discounted cash flow analysis, market comparables analysis and direct income capitalization, which in each case incorporates significant assumptions and judgments.

Infrastructure investments are generally valued using the discounted cash flow analysis. Key inputs used in this methodology can include the weighted average cost of capital and assumed inputs used to calculate terminal values, such as exit EBITDA multiples.

Energy investments are generally valued using a discounted cash flow approach, and where applicable, a market approach using comparable companies and transactions. Key inputs used in our valuations include (i) the weighted average cost of capital, (ii) future commodity prices, as quoted on indices and long-term commodity price forecasts and (iii) the asset's future operating performance.

Real estate investments are generally valued using a combination of direct income capitalization and discounted cash flow analysis. Certain real estate investments are valued by KKR based on ranges of valuations determined by an independent valuation firm. Key inputs used in such methodologies that require estimates include an unlevered discount rate and current capitalization rate. The valuations of real assets investments also use other inputs.

Credit Investments: Credit investments are valued using values obtained from dealers or market makers, and where these values are not available, credit investments are generally valued by KKR based on ranges of valuations determined by an independent valuation firm. Valuation models are based on discounted cash flow analyses, for which the key inputs are determined based on market comparables, which incorporate similar instruments from similar issuers.

Other Investments: With respect to other investments including equity method investments for which the fair value election has been made, KKR generally employs the same valuation methodologies as described above for private equity investments when valuing these other investments.

Investments and Debt Obligations of Consolidated CMBS Vehicles: Under ASU 2014-13, KKR measures CMBS investments, which are reported within Investments of Consolidated CFEs on the basis of the fair value of the financial liabilities of the CMBS. Debt obligations of consolidated CMBS vehicles are valued based on discounted cash flow analyses. The key input is the expected yield of each CMBS security using both observable and unobservable factors, which may include recently offered or completed trades and published yields of similar securities, security-specific characteristics (e.g. securities

Table of Contents

Notes to Consolidated Financial Statements (Continued)

ratings issued by nationally recognized statistical rating organizations, credit support by other subordinate securities issued by the CMBS and coupon type) and other characteristics.

Key unobservable inputs that have a significant impact on KKR's Level III investment valuations as described above are included in Note 5 "Fair Value Measurements." KKR utilizes several unobservable pricing inputs and assumptions in determining the fair value of its Level III investments. These unobservable pricing inputs and assumptions may differ by investment and in the application of KKR's valuation methodologies. KKR's reported fair value estimates could vary materially if KKR had chosen to incorporate different unobservable pricing inputs and other assumptions or, for applicable investments, if KKR only used either the discounted cash flow methodology or the market comparables methodology instead of assigning a weighting to both methodologies.

Revenues

For the years ended December 31, 2018, 2017, and 2016, respectively, revenues consisted of the following:

	For the Years Ended December 31,		
	2018	2017	2016
Management Fees	\$724,558	\$700,245	\$619,243
Fee Credits	(231,943)	(257,401)	(128,707)
Transaction Fees	988,954	783,952	350,091
Monitoring Fees	87,545	82,238	65,418
Incentive Fees	14,038	4,601	8,709
Expense Reimbursements	146,989	121,927	81,549
Oil and Gas Revenue	51,465	63,460	65,754
Consulting Fees	59,720	42,582	42,851
Total Fees and Other	1,841,326	1,541,604	1,104,908
Carried Interest	441,529	1,740,661	803,185
General Partner Capital Interest	112,981	275,015	131,925
Total Capital Allocation-Based Income	554,510	2,015,676	935,110
Total Revenues	\$2,395,836	\$3,557,280	\$2,040,018

Fees and Other

Fees and Other, as detailed above, are accounted for as contracts with customers. Under the guidance for contracts with customers, KKR is required to (a) identify the contract(s) with a customer, (b) identify the performance obligations in the contract, (c) determine the transaction price, (d) allocate the transaction price to the performance obligations in the contract and (e) recognize revenue when (or as) KKR satisfies its performance obligation. In determining the transaction price, KKR has included variable consideration only to the extent that it is probable that a significant reversal in the amount of cumulative revenue recognized would not occur when the uncertainty associated with the variable consideration is resolved.

Table of Contents

Notes to Consolidated Financial Statements (Continued)

The following table summarizes KKR's revenues from contracts with customers:

Revenue Type	Customer	Performance Obligation	Performance Obligation Satisfied Over Time or Point In Time (1)	Variable or Fixed Consideration	Payment Terms	Subject to Return Once Recognized	Classification of Uncollected Amounts (2)
Management Fees	Investment funds, CLOs and other vehicles	Investment management services	Over time as services are rendered	Variable consideration since varies based on fluctuations in the basis of the management fee over time	Typically quarterly or annually in arrears	No	Due from Affiliates
Transaction Fees	Portfolio companies and third party companies	Advisory services and debt and equity arranging and underwriting	Point in time when the transaction (e.g. underwriting) is completed	Fixed consideration	Typically paid on or shortly after transaction closes	No	Due from Affiliates (portfolio companies) Other Assets (third parties)
Monitoring Fees							
Recurring Fees	Portfolio companies	Monitoring services	Over time as services are rendered	Variable consideration since varies based on fluctuations in the basis of the recurring fee	Typically quarterly in arrears	No	Due from Affiliates
Termination Fees	Portfolio companies	Monitoring services	Point in time when the termination is completed	Fixed consideration	Typically paid on or shortly after termination occurs	No	Due from Affiliates
Incentive Fees	Investment funds and other vehicles	Investment management services that result in achievement of minimum investment return levels	Point in time at the end of the performance measurement period (quarterly or annually) if investment performance is achieved	Variable consideration since contingent upon the investment fund and other vehicles achieving more than stipulated investment return hurdles	Typically paid shortly after the end of the performance measurement period	No	Due from Affiliates

Expense Reimbursements	Investment funds and portfolio companies	Investment management and monitoring services	Point in time when the related expense is incurred	Fixed consideration	Typically shortly after expense is incurred	No	Due from Affiliates
Oil and Gas Revenues	Oil and gas wholesalers	Delivery of oil liquids and gas	Point in time when delivery has occurred and title has transferred	Fixed consideration	Typically shortly after delivery	No	Other Assets
Consulting Fees	Portfolio companies and other companies	Consulting and other services	Over time as services are rendered	Fixed consideration	Typically quarterly in arrears	No	Due from Affiliates

- (1) For performance obligations satisfied at a point in time, there were no significant judgments made in evaluating when a customer obtains control of the promised service.
- (2) For amounts classified in Other Assets, see Note 8 "Other Assets and Accounts Payable, Accrued Expenses and Other Liabilities." For amounts classified in Due from Affiliates, see Note 13 "Related Party Transactions."

Management Fees

KKR provides investment management services to investment funds, CLOs, and other vehicles in exchange for a management fee. Management fees are determined quarterly based on an annual rate and are generally based upon a percentage of the capital committed or capital invested during the investment period. Thereafter, management fees are generally based on a percentage of remaining invested capital, net asset value, gross assets or as otherwise defined in the respective contractual agreements. Since some of the factors that cause the fees to fluctuate are outside of KKR's control, management fees are considered to be constrained and are therefore not included in the transaction price. Additionally, after the contract is established there are no significant judgments made when determining the transaction price.

Management fees earned from private equity funds generally range from 1.5% to 2% of committed capital during the fund's investment period and are generally 0.75% to 1.25% of invested capital after the expiration of the fund's investment period with subsequent reductions over time. Typically, an investment period is defined as a period of up to six years. The actual length of the investment period is often shorter due to the earlier deployment of committed capital. Management fees

Table of Contents

Notes to Consolidated Financial Statements (Continued)

earned from growth equity, real assets, and core investment strategy funds generally range from 1.0% to 2.0% and are generally based on the investment fund's average net asset value, capital commitments, or invested capital.

Management fees earned from credit funds and other investment vehicles in the Public Markets business line generally range from 0.25% to 1.50%. Such rates may be based on the investment fund's average net asset value, capital commitments, or invested capital. Management fees earned from CLOs include senior collateral management fees and subordinate collateral management fees. When combined, senior collateral management fees and subordinate collateral management fees are determined based on an annual rate ranging from 0.40% to 0.50% of collateral. If amounts distributable on any payment date are insufficient to pay the collateral management fees according to the priority of payments, any shortfall is deferred and payable on subsequent payment dates. For the purpose of calculating the collateral management fees, collateral, the payment dates, and the priority of payments are terms defined in the management agreements.

Management fees earned from KKR's consolidated investment funds, CLOs and other vehicles are eliminated in consolidation. However, because these amounts are funded by, and earned from, noncontrolling interests, KKR's allocated share of the net income from the consolidated investment funds, CLOs and other vehicles is increased by the amount of fees that are eliminated. Accordingly, the elimination of these fees does not impact the net income (loss) attributable to KKR or KKR stockholders' equity.

Fee Credits

Under the terms of the management agreements with certain of its investment funds, KKR is required to share with such funds an agreed upon percentage of certain fees, including monitoring and transaction fees earned from portfolio companies ("Fee Credits"). Investment funds earn Fee Credits only with respect to monitoring and transaction fees that are allocable to the fund's investment in the portfolio company and not, for example, any fees allocable to capital invested through co-investment vehicles. Fee Credits are calculated after deducting certain costs incurred in connection with pursuing potential investments that do not result in completed transactions ("broken-deal expenses") and generally amount to 80% for older funds, or 100% for newer funds, of allocable monitoring and transaction fees after broken-deal expenses are recovered, although the actual percentage may vary from fund to fund. Fee Credits are recognized and owed to investment funds concurrently with the recognition of monitoring fees, transaction fees and broken-deal expenses. Since Fee Credits are payable to investment funds, amounts owed are generally applied as a reduction of the management fee that is otherwise billed to the investment fund. Fee credits are recorded as a reduction of revenues in the consolidated statement of operations. Fee credits owed to investment funds are recorded in Due to Affiliates on the consolidated statements of financial condition (See Note 13 "Related Party Transactions").

Transaction Fees

KKR (i) arranges debt and equity financing, places and underwrites securities offerings and provides other types of capital markets services for companies seeking financing in its Capital Markets business line and (ii) provides advisory services in connection with successful Private Markets and Public Markets portfolio company investment transactions, in each case, in exchange for a transaction fee. Transaction fees are separately negotiated for each transaction and are generally based on (i) in our Capital Markets business line, a percentage of the overall transaction size and (ii) for Private Markets and Public Markets transactions, a percentage of either total enterprise value of an investment or a percentage of the aggregate price paid for an investment. After the contract is established, there are no significant judgments made when determining the transaction price.

Monitoring Fees

KKR provides services in connection with monitoring portfolio companies in exchange for a fee. Recurring monitoring fees are separately negotiated for each portfolio company. In addition, certain monitoring fee arrangements may provide for a termination payment following an initial public offering or change of control as defined in the contractual terms of the related agreement. These termination payments are recognized in the period when the related transaction closes. After the contract is established, there are no significant judgments made when determining the transaction price.

Incentive Fees

KKR provides investment management services to certain investment funds, CLOs and other vehicles in exchange for a management fee as discussed above and, in some cases an incentive fee when KKR is not entitled to a carried interest. Incentive fee rates generally range from 5% to 20% of investment gains. Incentive fees are considered a form of variable consideration as these fees are subject to reversal, and therefore the recognition of such fees is deferred until the end of each fund's measurement period (which is generally one year) when the performance-based incentive fees become fixed and

177

Table of Contents

Notes to Consolidated Financial Statements (Continued)

determinable. Incentive fees are generally paid within 90 days of the end of the investment vehicles' measurement period. After the contract is established, there are no significant judgments made when determining the transaction price.

Expense Reimbursements

Providing investment management services to investment funds and monitoring KKR's portfolio companies require KKR to arrange for services on behalf of them. In those situations where KKR is acting as an agent on behalf of its investment funds or portfolio companies, it presents the cost of services on a net basis as a reduction of Revenues. In all other situations, KKR is primarily responsible for fulfilling the services and is therefore acting as a principal for those arrangements for accounting purposes. As a result, the expense and related reimbursement associated with those services is presented on a gross basis. Costs incurred are classified as Expenses and reimbursements of such costs are classified as Expense Reimbursements within Revenues on the consolidated statements of operations. After the contract is established, there are no significant judgments made when determining the transaction price.

Oil and Gas Revenue

KKR directly holds certain working and royalty interests in oil and natural gas producing properties that are not held through investment funds. Oil and gas revenue is recognized when the performance obligation is satisfied, which occurs at the point in time when control of the product transfers to the customer. Performance obligations are typically satisfied through the monthly delivery of production. Revenue is recognized based on KKR's proportionate share of production from non-operated properties as marketed by the operator. After the contract is established, there are no significant judgments made when determining the transaction price.

Consulting Fees

Certain consolidated entities that employ non-employee operating consultants provide consulting and other services to portfolio companies and other companies in exchange for a consulting fee. Consulting fees are separately negotiated with each portfolio company for which services are provided and are not shared with KKR. After the contract is established, there are no significant judgments made when determining the transaction price.

Capital Allocation-Based Income

Capital allocation-based income is earned from those arrangements where KKR has a general partner capital interest and is entitled to a disproportionate allocation of investment income (referred to hereafter as "carried interest"). KKR accounts for its general partner interests in capital allocation-based arrangements as financial instruments under ASC 323, Investments - Equity Method and Joint Ventures ("ASC 323") since the general partner has significant governance rights in the investment funds in which it invests, which demonstrates significant influence. In accordance with ASC 323, KKR records equity method income based on the proportionate share of the income of the investment fund, including carried interest, assuming the investment fund was liquidated as of each reporting date pursuant to each investment fund's governing agreements. Accordingly, these general partner interests are accounted for outside of the scope of ASC 606. Other arrangements surrounding contractual incentive fees through an advisory contract are separate and distinct and accounted for in accordance with ASC 606. In these incentive fee arrangements, accounted for in accordance with ASC 606, KKR's economics in the entity do not involve an allocation of capital. See "Incentive Fees" above.

Carried interest is allocated to the general partner based on cumulative fund performance to date, and where applicable, subject to a preferred return to the funds' limited partners. At the end of each reporting period, KKR calculates the carried interest that would be due to KKR for each investment fund, pursuant to the fund agreements, as if the fair value of the underlying investments were realized as of such date, irrespective of whether such amounts have been realized. As the fair value of underlying investments varies between reporting periods, it is necessary to make adjustments to amounts recorded as carried interest to reflect either (a) positive performance resulting in an

increase in the carried interest allocated to the general partner or (b) negative performance that would cause the amount due to KKR to be less than the amount previously recognized, resulting in a negative adjustment to carried interest allocated to the general partner. In each case, it is necessary to calculate the carried interest on cumulative results compared to the carried interest recorded to date and to make the required positive or negative adjustments. KKR ceases to record negative carried interest allocations once previously recognized carried interest allocations for an investment fund have been fully reversed. KKR is not obligated to make payments for guaranteed returns or hurdles and, therefore, cannot have negative carried interest over the life of an investment fund. Accrued but unpaid carried interest as of the reporting date is reflected in Investments in the consolidated statements of financial condition.

Table of Contents

Notes to Consolidated Financial Statements (Continued)

Prior to January 1, 2018, to the extent an investment fund was not consolidated, KKR accounted for carried interest within Fees and Other separately from its general partner capital interest, which was included in Net Gains (Losses) from Investment Activities in the consolidated statements of operations. Effective January 1, 2018, the carried interest component of the general partner interest and the capital interest KKR holds in its investment funds as the general partner are accounted for as a single unit of account and reported in capital allocation-based income within Revenues in the consolidated statements of operations. This change in accounting principle has been applied on a full retrospective basis. For the years ended December 31, 2017 and 2016 \$1,740.7 million and \$803.2 million were reclassified from Fees and Other, respectively, to Capital Allocation-Based Income in the consolidated statements of operations. For the years ended December 31, 2017 and 2016, \$275.0 million and \$131.9 million were reclassified from Net Gains (Losses) from Investment Activities, respectively, to Capital Allocation-Based Income in the consolidated statements of operations. KKR has concluded that investments made alongside its fund investors in investment funds which entitle KKR to a carried interest represent equity method investments that are not in the scope of the amended revenue recognition guidance.

Compensation and Benefits

Compensation and Benefits expense includes (i) cash compensation consisting of salaries, bonuses, and benefits, (ii) equity based compensation consisting of charges associated with the vesting of equity-based awards (see Note 12 "Equity Based Compensation") and (iii) carry pool allocations and other performance-based income compensation. All KKR employees and employees of certain consolidated entities receive a base salary that is paid by KKR or its consolidated entities, and is accounted for as Compensation and Benefits expense in the consolidated statements of operations. These employees are also eligible to receive discretionary cash bonuses based on performance, overall profitability and other matters. While cash bonuses paid to most employees are borne by KKR and certain consolidated entities and result in customary compensation and benefits expense, certain cash bonuses that are paid to certain of KKR's principals can be borne by KKR Holdings. These bonuses are funded with distributions that KKR Holdings receives on KKR Group Partnership Units held by KKR Holdings but are not then passed on to holders of unvested units of KKR Holdings. Because KKR principals are not entitled to receive distributions on units that are unvested, any amounts allocated to principals in excess of a principal's vested equity interests are reflected as employee compensation and benefits expense. These compensation charges are currently recorded based on the amount of cash expected to be paid by KKR Holdings.

Carry Pool Allocation

With respect to KKR's active and future funds and co-investment vehicles that provide for carried interest, KKR allocates to its employees and employees of certain consolidated entities a portion of the carried interest earned in relation to these funds as part of its carry pool. KKR currently allocates 40% or 43%, as applicable, of the carry it earns from these funds and vehicles to its carry pool. These amounts are accounted for as compensatory profit sharing arrangements in Accounts Payable, Accrued Expenses and Other Liabilities within the accompanying consolidated statements of financial condition in conjunction with the related carried interest income or incentive fees and recorded as compensation expense.

Profit Sharing Plan

KKR provides certain profit sharing programs for KKR employees and other eligible personnel. In particular, KKR provides a 401(k) plan for eligible employees in the United States. For certain professionals who are participants in the 401(k) plan, KKR may, in its discretion, contribute an amount after the end of the plan year. For the years ended December 31, 2018, 2017 and 2016, KKR incurred expenses of \$9.5 million, \$8.2 million and \$8.0 million, respectively, in connection with the 401(k) plan and other profit sharing programs.

General, Administrative and Other

General, administrative and other expense consists primarily of professional fees paid to legal advisors, accountants, advisors and consultants, insurance costs, travel and related expenses, communications and information services, depreciation and amortization charges, expenses (including impairment charges) incurred by oil and gas-producing entities that are consolidated, broken-deal expenses, and other general operating expenses. A portion of these general administrative and other expenses, in particular broken-deal expenses, are borne by fund investors.

Table of Contents

Notes to Consolidated Financial Statements (Continued)

Investment Income

Investment income consists primarily of the net impact of:

Realized and unrealized gains and losses on investments, securities sold short, derivatives and debt obligations of (i) consolidated CFEs which are recorded in Net Gains (Losses) from Investment Activities. Upon disposition of an investment, previously recognized unrealized gains or losses are reversed and a realized gain or loss is recognized.

Foreign exchange gains and losses relating to mark to market activity on foreign exchange forward contracts, (ii) foreign currency options and foreign denominated debt which are recorded in Net Gains (Losses) from Investment Activities.

(iii) Dividends, which are recognized on the ex dividend date, or, in the absence of a formal declaration of a record date, on the date it is received.

(iv) Interest income, which is recognized as earned.

(v) Interest expense, which is recognized as incurred.

Income Taxes

KKR & Co. Inc. is a corporation for U.S. federal income tax purposes and thus is subject to U.S. federal, state and local corporate income taxes at the entity level on KKR's share of net taxable income. In addition, the KKR Group Partnerships and certain of their subsidiaries operate in the United States as partnerships for U.S. federal income tax purposes and as corporate entities in certain non-U.S. jurisdictions. These entities, in some cases, are subject to U.S. state or local income taxes or non-U.S. income taxes.

Prior to the Conversion, KKR & Co. L.P.'s investment income and carried interest generally were not subject to U.S. corporate income taxes. Subsequent to the Conversion, all income earned by KKR & Co. Inc. is subject to U.S. corporate income taxes.

See Note 11 "Income Taxes" for further information on the financial statement impact of the Conversion.

Deferred Income Taxes

Income taxes are accounted for using the asset and liability method of accounting. Under this method, deferred tax assets and liabilities are recognized for the expected future tax consequences of differences between the carrying amounts of assets and liabilities and their respective tax basis, using tax rates in effect for the year in which the differences are expected to reverse. The effect on deferred assets and liabilities of a change in tax rates is recognized in the consolidated statements of operations in the period when the change is enacted.

Deferred tax assets, which are recorded in Other Assets within the statement of financial condition, are reduced by a valuation allowance when, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. When evaluating the realizability of the deferred tax assets, all evidence, both positive and negative, is considered. Items considered when evaluating the need for a valuation allowance include the ability to carry back losses, future reversals of existing temporary differences, tax planning strategies, and expectations of future earnings.

For a particular tax paying component of an entity and within a particular tax jurisdiction, deferred tax assets and liabilities are offset and presented as a single amount within Other Assets or Accounts Payable, Accrued and Other Liabilities, as applicable, in the accompanying statements of financial condition.

2017 Tax Act

The Tax Cuts and Jobs Act, which was enacted in December 2017 (the "2017 Tax Act") made various changes to the U.S. tax code that include, but are not limited to, (1) reducing the U.S. federal corporate income tax rate to 21% effective January 1, 2018 and (2) requiring a one-time transition tax on certain un-repatriated earnings of foreign subsidiaries.

See Note 11 "Income Taxes" for further information on the financial statement impact of the 2017 Tax Act.

Notes to Consolidated Financial Statements (Continued)

Uncertain Tax Positions

KKR analyzes its tax filing positions in all of the U.S. federal, state and local tax jurisdictions and foreign tax jurisdictions where it is required to file income tax returns, as well as for all open tax years in these jurisdictions. If, based on this analysis, KKR determines that uncertainties in tax positions exist, a reserve is established. The reserve for uncertain tax positions is recorded in Accounts Payable, Accrued and Other Liabilities in the accompanying statements of financial condition. KKR recognizes accrued interest and penalties related to uncertain tax positions within the provision for income taxes in the consolidated statements of operations.

KKR records uncertain tax positions on the basis of a two step process: (a) determination is made whether it is more likely than not that the tax positions will be sustained based on the technical merits of the position and (b) those tax positions that meet the more likely than not threshold are recognized as the largest amount of tax benefit that is greater than 50 percent likely to be realized upon ultimate settlement with the related tax authority.

Cash and Cash Equivalents

KKR considers all highly liquid short term investments with original maturities of 90 days or less when purchased to be cash equivalents.

Cash and Cash Equivalents Held at Consolidated Entities

Cash and cash equivalents held at consolidated entities represents cash that, although not legally restricted, is not available to fund general liquidity needs of KKR as the use of such funds is generally limited to the investment activities of KKR's investment funds and CFEs.

Restricted Cash and Cash Equivalents

Restricted cash and cash equivalents primarily represent amounts that are held by third parties under certain of KKR's financing and derivative transactions. The duration of this restricted cash generally matches the duration of the related financing or derivative transaction.

Due from and Due to Affiliates

KKR considers its principals and their related entities, unconsolidated investment funds and the portfolio companies of its funds to be affiliates for accounting purposes. Receivables from and payables to affiliates are recorded at their current settlement amount.

Fixed Assets, Depreciation and Amortization

Fixed assets consist primarily of corporate real estate, leasehold improvements, furniture and computer hardware. Such amounts are recorded at cost less accumulated depreciation and amortization and are included in Other Assets within the accompanying consolidated statements of financial condition. Depreciation and amortization are calculated using the straight line method over the assets' estimated economic useful lives, which for leasehold improvements are the lesser of the lease terms or the life of the asset, and three to seven years for other fixed assets.

Freestanding Derivatives

Freestanding derivatives are instruments that KKR and certain of its consolidated funds have entered into as part of their overall risk management and investment strategies. These derivative contracts are not designated as hedging instruments for accounting purposes. Such contracts may include forward, swap and option contracts related to foreign currencies and interest rates to manage foreign exchange risk and interest rate risk arising from certain assets and liabilities. All derivatives are recognized in Other Assets or Accounts Payable, Accrued Expenses and Other Liabilities and are presented on a gross basis in the consolidated statements of financial condition and measured at fair value with changes in fair value recorded in Net Gains (Losses) from Investment Activities in the accompanying consolidated statements of operations. KKR's derivative financial instruments contain credit risk to the extent that its counterparties may be unable to meet the terms of the agreements. KKR attempts to reduce this risk by limiting its counterparties to major financial institutions with strong credit ratings.

Table of Contents

Notes to Consolidated Financial Statements (Continued)

Intangible Assets

Intangible assets consist primarily of contractual rights to earn future fee income, including management and incentive fees, and are recorded in Other Assets in the accompanying consolidated statements of financial condition. Identifiable finite-lived intangible assets are amortized on a straight-line basis over their estimated useful lives and amortization expense is included within General, Administrative and Other in the accompanying consolidated statements of operations. Intangible assets are reviewed for impairment when circumstances indicate impairment may exist.

Goodwill

Goodwill represents the excess of acquisition cost over the fair value of net tangible and intangible assets acquired in connection with an acquisition. Goodwill is assessed for impairment annually in the third quarter of each fiscal year or more frequently if circumstances indicate impairment may have occurred. Goodwill is recorded in Other Assets in the accompanying consolidated statements of financial condition.

Securities Sold Short

Whether part of a hedging transaction or a transaction in its own right, securities sold short represent obligations of KKR to deliver the specified security at the contracted price at a future point in time, and thereby create a liability to repurchase the security in the market at the prevailing prices. The liability for such securities sold short, which is recorded in Accounts Payable, Accrued Expenses and Other Liabilities in the statement of financial condition, is marked to market based on the current fair value of the underlying security at the reporting date with changes in fair value recorded as unrealized gains or losses in Net Gains (Losses) from Investment Activities in the accompanying consolidated statements of operations. These transactions may involve market risk in excess of the amount currently reflected in the accompanying consolidated statements of financial condition.

Comprehensive Income (Loss)

Comprehensive income is defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances, excluding those resulting from contributions from and distributions to owners. In the accompanying consolidated financial statements, comprehensive income is comprised of (i) Net Income (Loss), as presented in the consolidated statements of operations and (ii) net foreign currency translation.

Foreign Currency

Consolidated entities which have a functional currency that differs from KKR's reporting currency are primarily KKR's investment management and capital markets companies located outside the United States and certain CFEs. Foreign currency denominated assets and liabilities are translated using the exchange rates prevailing at the end of each reporting period. Results of foreign operations are translated at the weighted average exchange rate for each reporting period. Translation adjustments are included as a component of accumulated other comprehensive income (loss) until realized. Foreign currency income or expenses resulting from transactions outside of the functional currency of a consolidated entity are recorded as incurred in general, administrative and other expense in the consolidated statements of operations.

Recently Issued Accounting Pronouncements

Adopted in 2018

Revenue from Contracts with Customers

The FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606) (“ASU 2014-09”) in May 2014 and subsequently issued several amendments to the standard. ASU 2014-09, and related amendments, provide comprehensive guidance for recognizing revenue from contracts with customers. Entities will be able to recognize revenue when the entity transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled to in exchange for those goods or services. The guidance includes a five-step framework that requires an entity to: (i) identify the contracts with a customer, (ii) identify the performance obligations in the contract, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations in the contracts and (v) recognize revenue when the entity satisfies a performance obligation. The guidance in ASU 2014-09, and the related amendments, is effective for KKR beginning on January 1, 2018, and KKR adopted this guidance on that date. KKR has concluded that its Fees and Other are within the scope of the amended revenue recognition guidance. Additionally, KKR has concluded that investments made alongside its fund investors in investment funds which entitle KKR to a carried interest represent equity method investments not in the scope of the amended revenue recognition guidance. KKR has implemented ASU 2014-09 and its related amendments, and there were no changes to KKR's historical pattern of recognizing revenue. See the accounting policy for Revenues above.

Cash Flows

In August 2016, the FASB issued ASU No. 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments, which amends the guidance on the classification of certain cash receipts and payments in the statement of cash flows. The amended guidance adds or clarifies guidance on eight cash flow matters: (i) debt prepayment or debt extinguishment costs, (ii) settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing, (iii) contingent consideration payments made after a business combination, (iv) proceeds from the settlement of insurance claims, (v) proceeds from the settlement of corporate-owned life insurance policies, (vi) distributions received from equity method investees, (vii) beneficial interests in securitization transactions and (viii) separately identifiable cash flows and application of the predominance principle. The guidance is effective for KKR beginning on January 1, 2018, and KKR adopted this guidance on that date. This adoption did not have a material impact on KKR's consolidated statements of cash flows.

In November 2016, the FASB issued ASU No. 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash, which amends the guidance to add or clarify guidance on the classification and presentation of restricted cash in the statement of cash flows. The amended guidance requires the following: (i) restricted cash and restricted cash equivalents should be included in the cash and cash-equivalents balances in the statement of cash flows; (ii) changes in restricted cash and restricted cash equivalents that result from transfers between cash, cash equivalents, and restricted cash and restricted cash equivalents should not be presented as cash flow activities in the statement of cash flows; (iii) a reconciliation between the statement of financial position and the statement of cash flows must be disclosed when the statement of financial position includes more than one line item for cash, cash equivalents, restricted cash, and restricted cash equivalents and (iv) the nature of the restrictions must be disclosed for material restricted cash and restricted cash equivalents amounts. The guidance is effective for KKR beginning on January 1, 2018, and KKR adopted this guidance on that date. Upon adoption, (i) Restricted Cash and Cash Equivalents and (ii) Cash and Cash Equivalents Held at Consolidated Entities were (a) included in the cash and cash-equivalents balances in the consolidated statements of cash flows and (b) disclosed in a reconciliation between the consolidated statements

of financial condition and the consolidated statements of cash flows. This guidance has been applied on a full retrospective basis. For the years ended December 31, 2017 and 2016, \$97.9 million and \$121.0 million, respectively, of cash used by operating activities and \$155.9 million and \$1.4 million, respectively, of cash provided by investing activities were removed from net cash provided (used) by operating activities and net cash provided (used) by investing activities, respectively, and included in net increase/(decrease) in cash, cash-equivalents and restricted cash in the consolidated statements of cash flows.

Notes to Consolidated Financial Statements (Continued)

Equity-Based Compensation

In May 2017, the FASB issued ASU No. 2017-09, Compensation - Stock Compensation (Topic 718): Scope of Modification Accounting ("ASU 2017-09"), which amends the scope of modification accounting for share-based payment arrangements. ASU 2017-09 provides guidance on the types of changes to the terms or conditions of share-based payment awards to which an entity would be required to apply modification accounting. Specifically, an entity would not apply modification accounting if the fair value, vesting conditions, and classification of the awards are the same immediately before and after the modification. ASU 2017-09 is effective for fiscal years and interim periods beginning after December 15, 2017. This guidance has been adopted as of January 1, 2018 and did not have a material impact to KKR.

In June 2018, the FASB issued ASU No. 2018-07, Compensation - Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting ("ASU 2018-07"), which generally simplifies the accounting for share-based payments granted to nonemployees for goods and services. Under ASU 2018-07, most of the guidance on such payments to nonemployees is generally aligned with the requirements for share-based payments granted to employees. Prior to adoption of ASU 2018-07, share-based payment arrangements with employees were accounted for under ASC 718, Compensation - Stock Compensation, while nonemployee share-based payments issued for goods and services were accounted for under ASC 505-50, Equity - Equity Based Payments to Non-Employees. ASC 505-50, before the ASU's amendments, differed significantly from ASC 718. Differences included the guidance on (1) the determination of the measurement date (which generally is the date on which the measurement of equity-classified share-based payments becomes fixed), (2) the accounting for performance conditions, (3) the ability of a nonpublic entity to use certain practical expedients for measurement and (4) the accounting for share-based payments after vesting. ASU 2018-07 eliminates most of these differences. The guidance is effective for fiscal periods beginning after December 15, 2018. KKR has elected to early adopt ASU 2018-07 during the second quarter of 2018 with adjustments reflected as of January 1, 2018. Such adoption did not have a material impact to KKR.

Income Taxes

In October 2016, the FASB issued ASU No. 2016-16, Income Taxes (Topic 740): Intra-entity Transfers of Assets Other Than Inventory ("ASU 2016-16"), which removed the prohibition in ASC 740 against the immediate recognition of the current and deferred income tax effects of intra-entity transfers of assets other than inventory. ASU 2016-16 is effective for annual reporting periods beginning after December 15, 2017, including interim periods within those annual reporting periods. This guidance has been adopted as of January 1, 2018 and did not have a material impact to KKR.

Fair Value Measurement

In August 2018, the FASB issued ASU No. 2018-13, which changes the fair value measurement disclosure requirements. The ASU eliminates, amends and adds disclosure requirements for fair value measurements. The guidance is effective for fiscal periods beginning after December 15, 2019. KKR has elected to early adopt ASU 2018-13 in its entirety during the third quarter of 2018. Such adoption did not have a material impact to KKR.

Effective on January 1, 2019

Leases

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) which has subsequently been amended by ASU 2018-01, 2018-10, 2018-11. The guidance requires the recognition of lease assets and lease liabilities for those leases classified as operating leases under previous GAAP. The guidance retains a distinction between finance leases

and operating leases. The classification criteria for distinguishing between finance leases and operating leases are substantially similar to the classification criteria for distinguishing between capital leases and operating leases under previous GAAP. The recognition, measurement and presentation of expenses and cash flows arising from a lease by a lessee have not changed significantly from previous GAAP. For operating leases, a lessee is required to do the following: (a) recognize a right-of-use asset and a lease liability, initially measured at the present value of the lease payments, in the statement of financial condition; (b) recognize a single lease cost, calculated so that the cost of the lease is allocated over the lease term on a generally straight-line basis and (c) classify all cash payments within operating activities in the statement of cash flows. The guidance is effective for fiscal periods beginning after December 15, 2018. Early application is permitted. The only material lease arrangements KKR is engaged in are leases of office space where KKR is the lessee under the terms of operating lease agreements. KKR is finalizing its analysis of the impact of this guidance on the financial statements and such guidance is not expected to have a material impact to KKR.

Notes to Consolidated Financial Statements (Continued)

Premium Amortization on Purchased Callable Debt Securities

In March 2017, the FASB issued ASU No. 2017-08, Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities ("ASU 2017-08"). This guidance amends the amortization period for certain purchased callable debt securities held at a premium. The guidance requires the premium to be amortized to the earliest call date. The guidance does not require an accounting change for securities held at a discount; the discount continues to be amortized to maturity. ASU 2017-08 is effective for fiscal years and interim periods beginning after December 15, 2018. Early adoption is permitted and the guidance when adopted should be applied on a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. KKR is currently evaluating the impact of this guidance on the financial statements.

Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income

In February 2018, the FASB issued ASU No. 2018-02, Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income ("ASU 2018-02"). Under ASC 740-10-45-15, the effects of changes in tax rates and laws on deferred tax balances are recorded as a component of tax expense related to continuing operations for the period in which the law was enacted, even if the assets and liabilities related to items of accumulated other comprehensive income ("OCI"). ASU 2018-02 allows entities to reclassify from accumulated OCI to retained earnings stranded tax effects related to the change in federal tax rate for all items accounted for in OCI. Entities can also elect to reclassify other stranded tax effects that relate to the 2017 Tax Act, but do not directly relate to the change in the federal tax rate. Tax effects that are stranded in OCI for other reasons may not be reclassified. In the period of adoption, entities that elect to reclassify the income tax effects of the 2017 Tax Act from accumulated OCI to retained earnings must disclose that they made such an election. Entities must also disclose a description of other income tax effects related to the 2017 Tax Act that are reclassified from accumulated OCI to retained earnings, if any. The guidance is effective for fiscal periods beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted for periods for which financial statement have not yet been issued or made available upon issuance, including in the period the 2017 Tax Act was enacted. An entity that adopts ASU 2018-02 in an annual or interim periods after the period of enactment is able to choose whether to apply the amendments retrospectively to each period in which the effect of the 2017 Tax Act is recognized or to apply the amendments in the period of adoption. KKR is currently evaluating the impact of this guidance on the financial statements.

Effective on January 1, 2020

Goodwill

In January 2017, the FASB issued ASU No. 2017-04, Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment. This guidance simplifies the accounting for goodwill impairments by eliminating the second step from the goodwill impairment test. The ASU requires goodwill impairments to be measured on the basis of the fair value of a reporting unit relative to the reporting unit's carrying amount rather than on the basis of the implied amount of goodwill relative to the goodwill balance of the reporting unit. The ASU also (i) clarifies the requirements for excluding and allocating foreign currency translation adjustments to reporting units related to an entity's testing of reporting units for goodwill impairment and (ii) clarifies that an entity should consider income tax effects from any tax deductible goodwill on the carrying amount of the reporting unit when measuring the goodwill impairment loss, if applicable. The guidance is effective for fiscal periods beginning after December 15, 2019. Early adoption is allowed for entities as of January 1, 2017, for annual and any interim impairment tests occurring after January 1, 2017. KKR is currently evaluating the impact of this guidance on the financial statements.

Implementation Costs Incurred in a Cloud Computing Arrangement

In August 2018, the FASB issued ASU No. 2018-15, which addresses a customer's accounting for implementation costs incurred in a cloud computing arrangement ("CCA") that is a service contract. The ASU aligns the accounting for costs incurred to implement a CCA that is a service arrangement with the guidance on capitalizing costs associated with developing or obtaining internal-use software. The guidance is effective for fiscal periods beginning after December 15, 2019. Early adoption is permitted and this ASU can be applied on either a retrospective or prospective basis. KKR is currently evaluating the impact of this guidance on the financial statements.

Table of Contents

Notes to Consolidated Financial Statements (Continued)

3. NET GAINS (LOSSES) FROM INVESTMENT ACTIVITIES

Net Gains (Losses) from Investment Activities in the consolidated statements of operations consist primarily of the realized and unrealized gains and losses on investments (including foreign exchange gains and losses attributable to foreign denominated investments and related activities) and other financial instruments, including those for which the fair value option has been elected. Unrealized gains or losses result from changes in the fair value of these investments and other financial instruments during a period. Upon disposition of an investment or financial instrument, previously recognized unrealized gains or losses are reversed and an offsetting realized gain or loss is recognized in the current period.

The following tables summarize total Net Gains (Losses) from Investment Activities for the years ended December 31, 2018, 2017 and 2016, respectively:

	For the Year Ended December 31, 2018		
	Net Realized	Net Unrealized	Total
	Gains (Losses)	Gains (Losses)	
Private Equity ⁽¹⁾	\$ 184,784	\$ 708,600	\$ 893,384
Credit ⁽¹⁾	(354,090)	(420,434)	(774,524)
Investments of Consolidated CFEs ⁽¹⁾	(83,719)	(452,331)	(536,050)
Real Assets ⁽¹⁾	92,885	67,999	160,884
Equity Method - Other ⁽¹⁾	(3,991)	339,027	335,036
Other Investments ⁽¹⁾	(239,081)	(434,537)	(673,618)
Foreign Exchange Forward Contracts and Options ⁽²⁾	(90,625)	266,938	176,313
Securities Sold Short ⁽²⁾	750,007	26,465	776,472
Other Derivatives ⁽²⁾	(13,273)	1,037	(12,236)
Debt Obligations and Other ⁽³⁾	291,755	617,416	909,171
Net Gains (Losses) From Investment Activities	\$ 534,652	\$ 720,180	\$ 1,254,832
	For the Year Ended December 31,		
	2017		
	Net Realized	Net Unrealized	Total
	Gains (Losses)	Gains (Losses)	
Private Equity ⁽¹⁾	\$ 223,568	\$ 338,720	\$ 562,288
