United States

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

Quarterly Report UNDER Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended March 31, 2018

OR

Transition Report UNDER Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission file number 1-9330

INTELLIGENT SYSTEMS CORPORATION
(Exact name of registrant as specified in its charter)

Georgia **58-1964787**
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

4355 Shackelford Road, Norcross, Georgia

(Address of principal executive offices)

30093

(Zip Code)

Registrant's telephone number, including area code: **(770) 381-2900**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicated by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Accelerated filer

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use to the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 30, 2018, 8,777,988 shares of Common Stock of the issuer were outstanding.

Intelligent Systems Corporation

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

1. *Basis of Presentation* - Throughout this report, the terms “we”, “us”, “ours”, “ISC” and “company” refer to Intelligent Systems Corporation, including its wholly-owned and majority-owned subsidiaries. The unaudited Consolidated Financial Statements presented in this Form 10-Q have been prepared in accordance with accounting principles generally accepted in the United States applicable to interim financial statements. Accordingly, they do *not* include all of the information and notes required for complete financial statements. In the opinion of ISC management, these Consolidated Financial Statements contain all adjustments (which comprise only normal and recurring accruals) necessary to present fairly the financial position and results of operations as of and for the *three* month periods ended *March 31, 2018* and *2017*. The interim results for the *three* months ended *March 31, 2018* are *not* necessarily indicative of the results to be expected for the full year. These statements should be read in conjunction with our Consolidated Financial Statements and notes thereto for the fiscal year ended *December 31, 2017*, as filed in our Annual Report on Form 10-K.

There have been *no* material changes in the Company’s significant accounting policies, other than the adoption of accounting pronouncement ASU 2014-09, Revenue from Contracts with Customers (Topic 606), in the *first* quarter of *2018* as described in Note 2, as compared to the significant accounting policies described in the Company’s Annual Report on Form 10-K for the year ended *December 31, 2017*.

As a result of the implementation of Topic 606, certain revenue, and the associated cost of revenue, in the comparative periods, previously aggregated as product revenue has been reviewed and reclassified, based upon its performance obligations, from product revenue to service revenue. The impact to our fiscal quarters and the year ended *December 31, 2017* was as follows:

	Three Months Ended				Twelve Months Ended
	Dec. 31, 2017	Sept. 30, 2017	June 30, 2017	Mar. 31, 2017	Dec. 31, 2017
(<i>in thousands</i>)

Total cost of revenue	-	-	-	-	-
Net Income	\$-	\$-	\$-	\$-	\$ -

2. *New Accounting Standards –*

Accounting Pronouncements Adopted:

In *May 2014*, the Financial Accounting Standards Board ("FASB") issued ASU *2014-09*, Revenue from Contracts with Customers (Topic *606*) which amended the existing accounting standards for revenue recognition. ASU *2014-09* establishes principles for recognizing revenue upon the transfer of promised goods or services to customers, in an amount that reflects the expected consideration received in exchange for those goods or services. The Company adopted ASU *2014-09* in the *first* quarter of *2018* using the full retrospective approach. Because the Company's primary source of revenues is from monthly transaction processing services and software maintenance and support services which are recognized monthly as incurred, as well as professional services which are performance obligation based, the impact on its consolidated financial statements is *not* material. For the quarter ended *March 31, 2017*, the company restated approximately *\$53,000* in revenue and *\$10,000* in cost of revenue for a net *\$43,000* restatement to retained earnings.

Recent Accounting Pronouncements:

In *February 2016*, the FASB issued ASU 2016-02, Leases (Topic 842) related to the accounting for leases. This pronouncement requires lessees to record most leases on their balance sheet, while expense recognition on the income statement remains similar to current lease accounting guidance. The guidance also eliminates real estate-specific provisions and modifies certain aspects of lessor accounting. Under the new guidance, lease classification as either a finance lease or an operating lease will determine how lease-related revenue and expense are recognized. The pronouncement is effective for fiscal years, and for interim periods within those fiscal years, beginning after *December 15, 2018*. The adoption of this standard is *not* expected to have a material effect on the Company's operating results or financial condition.

We have considered all other recently issued accounting pronouncements and do *not* believe the adoption of such pronouncements will have a material impact on our Consolidated Financial Statements.

3. *Notes Receivable* – In the quarter ended *September 30, 2017*, we entered into a Loan Agreement with a privately-held identity and professional services company with ties to the FinTech industry. We committed to lend up to *\$1,500,000* with an initial advance of *\$750,000*. In the quarter ended *December 31, 2017*, we advanced an additional *\$500,000* for a total advancement of *\$1,250,000* as of *December 31, 2017*. Subsequent to *March 31, 2018*, we advanced the final *\$250,000* increment on the Loan Agreement. The loan bears interest at the rate of *6.0* percent annually with the maturity date for each Promissory Note on the *fourth* anniversary of funding of such Promissory Note, extendable by *one* additional year at the borrower's election. We are entitled to purchase, at a nominal price, certain Warrant Units in conjunction with each advance. Upon exercising the Warrant Units, we are entitled to receive up to *fourteen* percent ownership of Common A Units in the company.

On *March 16, 2018*, we advanced *\$250,000* on a simple Promissory Note to the aforementioned identity and professional services company. The Note bears interest at the rate of *6.0* percent annually with the maturity date *six* months from the date of funding the Note.

In the quarter ended *March 31, 2018*, we entered into a Convertible Loan Agreement with a private limited India based company in the FinTech industry. We committed to lend up to *\$435,000* with an initial advance of *\$235,000*. The loan bears interest at the rate of *5.0* percent annually with the maturity date on the *third* anniversary of funding of such Promissory Note. We are entitled to convert the principal on the initial Note for up to *ten* percent ownership of shares of the company.

4. *Stock-based Compensation* – At *March 31, 2018*, we have *three* stock-based compensation plans in effect. We record compensation cost related to unvested stock awards by recognizing the unamortized grant date fair value on a straight line basis over the vesting periods of each award. We have estimated forfeiture rates based on our historical experience. Stock option compensation expense for the *three* month periods ended *March 31, 2018* and *2017* has been recognized as a component of general and administrative expenses in the accompanying Consolidated Financial Statements. We recorded *\$13,000* of stock-based compensation expense in both quarters ended *March 31, 2018* and *2017*.

As of *March 31, 2018*, there is *\$64,000* of unrecognized compensation cost related to stock options. *No* options were granted during the *three* months ended *March 31, 2018*. The following table summarizes options as of *March 31, 2018*:

	# of Shares	Wgt Avg Exercise Price	Wgt Avg Remaining Contractual Life in Years	Aggregate Intrinsic Value
Outstanding at March 31, 2018	243,500	\$ 2.17	4.7	\$ 716,655
Vested and exercisable at March 31, 2018	206,500	\$ 1.87	4.0	\$ 669,565

The estimated fair value of options granted is calculated using the Black-Scholes option pricing model with assumptions as previously disclosed in our *2017 Form 10-K*.

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between the company's closing stock price on the last trading day of the *first* quarter of *2018* and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on *March 31, 2018*. The amount of aggregate intrinsic value will change based on the market value of the company's stock.

5. *Fair Value of Financial Instruments* – The carrying value of cash, marketable securities, accounts receivable, accounts payable and certain other financial instruments (such as accrued expenses, and other current liabilities) included in the accompanying consolidated balance sheets approximates their fair value principally due to the short-term maturity of these instruments.

Financial instruments that potentially subject us to concentrations of credit risk consist principally of cash, marketable securities and trade accounts. Our available cash is held in accounts managed by *third*-party financial institutions. Cash *may* exceed the Federal Deposit Insurance Corporation, or FDIC, insurance limits. While we monitor cash balances on a regular basis and adjust the balances as appropriate, these balances could be impacted if the underlying financial institutions fail. To date, we have experienced *no* loss or lack of access to our cash; however, we can provide *no* assurances that access to our cash will *not* be impacted by adverse conditions in the financial markets.

6. *Fair Value Measurements* – In determining fair value, the company uses quoted market prices in active markets. GAAP establishes a fair value measurement framework, provides a single definition of fair value, and requires expanded disclosure summarizing fair value measurements. GAAP emphasizes that fair value is a market-based measurement, *not* an entity specific measurement. Therefore, a fair value measurement should be determined based on the assumptions that market participants would use in pricing an asset or liability.

GAAP establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable input be used when available. Observable inputs are based on data obtained from sources independent of the company that market participants would use in pricing the asset or liability. Unobservable inputs are inputs that reflect the company's assumptions about the estimates market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

The hierarchy is measured in *three* levels based on the reliability of inputs:

- Level 1

Valuations based on quoted prices in active markets for identical assets or liabilities that we have the ability to access. Valuation adjustments and block discounts are *not* applied to Level 1 instruments.

- Level 2

Valuations based on quoted prices in less active, dealer or broker markets. Fair values are primarily obtained from *third* party pricing services for identical or comparable assets or liabilities.

- Level 3

Valuations derived from other valuation methodologies, including pricing models, discounted cash flow models and similar techniques, and *not* based on market, exchange, dealer, or broker-traded transactions. Level 3 valuations incorporate certain assumptions and projections that are *not* observable in the market and significant professional judgment is needed in determining the fair value assigned to such assets or liabilities.

In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety.

Our available-for-sale investments are classified within Level 1 of the valuation hierarchy.

The fair value of equity method and cost method investments has *not* been determined as it was impracticable to do so due to the fact that the investee companies are relatively small, early stage private companies for which there is *no* comparable valuation data available without unreasonable time and expense.

7. *Concentration of Revenue* – The following table indicates the percentage of consolidated revenue represented by each customer that represented more than 10 percent of consolidated revenue in the *three* month periods ended *March 31, 2018* and *2017*. Most of our customers have multi-year contracts with recurring revenue as well as professional services fees that vary by period depending on their business needs.

	Three Months Ended March 31,	
	2018	2017
Customer A	11.1%	11.6%
Customer B	5.5%	13.6%
Customer C	7.5%	15.2%
Customer D	20.3%	14.5%
Customer E	27.3%	–%

8. *Commitments and Contingencies* – Please refer to Note 9 to our Consolidated Financial Statements included in our 2017 Form 10-K for a description of our commitments and contingencies. Effective *April 1, 2018*, we executed the First Addendum to our Lease Agreement for Intelligent Systems. The Addendum provides for the extension of the Lease Agreement for an additional *three* year term from *April 1, 2018* through *March 31, 2021* on the same terms and conditions as the original Lease Agreement. Accordingly, our future minimum lease payments for offices and data centers expiring through *May 31, 2022* are as follows:

Year ended December 31, (in thousands)	
2018 (April 1 – December 31)	\$339
2019	405
2020	390
2021	212
2022	44
Total minimum lease payments	\$1,392

9. *Income Taxes* – We recognize deferred tax liabilities and assets for the expected future tax consequences of events that have been included in the financial statements or tax returns. Deferred tax liabilities and assets are determined based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. Deferred tax assets are recognized, net of a valuation allowance, for the estimated future tax effects of deductible temporary differences and tax credit carry-forwards. A valuation allowance against deferred tax assets is recorded when, and if, based upon available evidence, it is more likely than *not* that some or all deferred tax assets will *not* be realized.

There were *no* unrecognized tax benefits at *March 31, 2018* and *December 31, 2017*. Our policy is to recognize interest and penalties accrued on any unrecognized tax benefits as a component of income tax expense. There were *no* accrued interest or penalties associated with any unrecognized tax benefits, nor was any interest expense recognized during the periods presented. We have determined we have *no* uncertain tax positions.

We file a consolidated U.S. federal income tax return for all subsidiaries in which our ownership equals or exceeds *80%*, as well as individual subsidiary returns in various states and foreign jurisdictions. With few exceptions we are *no* longer subject to U.S. federal, state and local or foreign income tax examinations by taxing authorities for years before *2013*.

10. Subsequent Event – We have evaluated subsequent events through the date when these financial statements were issued and, aside from the advance disclosed in Note 3, are *not* aware of any significant events that occurred subsequent to the balance sheet date but prior to the filing of this report that would have a material impact on our Consolidated Financial Statements.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

In addition to historical information, this Form 10-Q may contain forward-looking statements relating to ISC. All statements, trend analyses and other information relative to markets for our products and trends in revenue, gross margins and anticipated expense levels, as well as other statements including words such as “anticipate”, “believe”, “plan”, “estimate”, “expect”, and “intend”, and other similar expressions, constitute forward-looking statements. Prospective investors are cautioned that any such forward-looking statements are not guarantees of future performance and involve risks and uncertainties including those factors described below under “Factors That May Affect Future Operations”, and that actual results may differ materially from those contemplated by such forward-looking statements. ISC undertakes no obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes in future operating results.

For purposes of this discussion and analysis, we are assuming and relying upon the reader’s familiarity with the information contained in Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations, in the Form 10-K for the year ended December 31, 2017 as filed with the Securities and Exchange Commission.

Overview

Our consolidated operations consist of our CoreCard Software subsidiary and its affiliate companies in Romania and India, as well as the corporate office which provides significant administrative, human resources and executive management support to CoreCard.

We provide technology solutions and processing services to the financial services market, commonly referred to as the FinTech industry. Our service revenue consists of fees for software maintenance and support for licensed software products, fees for processing services that we provide to companies that outsource their financial transaction processing functions to us, and professional services primarily for software customizations provided to both license and processing customers. We derive our product revenue from licensing our comprehensive suite of financial transaction management software to accounts receivable businesses, financial institutions, retailers and processors to manage their credit and debit cards, prepaid cards, private label cards, fleet cards, loyalty programs, and accounts receivable and small loan transactions.

We have frequently recognized consolidated operating losses on a quarterly and annual basis. As we continue to grow our customer base and scale operations, we may, in the future, report operating profits on a quarterly and annual basis. Our results vary in part depending on the size and number of software licenses recognized as well the value and number of professional services contracts recognized in a particular period. As an example, for the quarter ended

March 31, 2018, we reported consolidated operating income, in part, due to revenue associated with professional services provided to both a new customer, with a potential long-term commitment, and to an existing global license customer for customizations of our base product offering as well as the recognition of a third license for the same global license customer. In addition, we recognized revenue, with no associated cost of revenue, on a one-time contractual minimum guarantee arrangement. As we continue to grow our Processing Services business, we continue to gain economies of scale on the investment we have made in the infrastructure, resources, processes and software features developed over the past number of years to support this growing side of our business. We are adding new processing customers at a faster pace than we are adding new license customers, resulting in steady growth in the processing revenue stream. The infrastructure of our multi customer environment is scalable for the future. A significant portion of our expenses is related to personnel, including approximately 360 employees located in India and Romania. In the fourth quarter of 2017, we opened a second office in India, located near Mumbai, to enable us to attract additional talent required for our software development and testing. In addition, we have certain corporate office expenses associated with being a public company that impact our operating results.

Our revenue fluctuates from period to period and our results are not necessarily indicative of the results to be expected in future periods. It is difficult to predict the level of consolidated revenue on a quarterly or annual basis for a number of reasons, including the following:

Software license revenue in a given period may consist of a relatively small number of contracts and contract values can vary considerably depending on the software product and scope of the license sold. Consequently, even minor delays in delivery under a software contract (which may be out of our control) could have a significant and unpredictable impact on the consolidated revenue that we recognize in a given quarterly or annual period.

Customers may decide to postpone or cancel a planned implementation of our software for any number of reasons, which may be unrelated to our software or contract performance, but which may affect the amount, timing and characterization of our deferred and/or recognized revenue.

Customers typically require our professional services to modify or enhance their CoreCard software implementation based on their specific business strategy and operational requirements, which vary from customer to customer and period to period.

The timing of new processing customer implementations is often dependent on third party approvals or processes which are typically not under our direct control.

We continue to maintain a strong cash position. In the latter part of December, 2017 and in the first quarter of 2018, we purchased additional hardware and software for our processing environment in anticipation of a contract currently being negotiated with a potential customer that may result in increased revenue over the next few years. While there is no assurance that the contemplated agreement will be finalized, management believes it will have a successful outcome and in the event the agreement is not finalized, the potential customer has agreed to take title to and reimburse us for the equipment purchases. We intend to use cash balances to support the domestic and international operations associated with our CoreCard business and to expand our operations in the FinTech industry through financing the growth of CoreCard and, if appropriate opportunities become available, through acquisitions of businesses in this industry.

Results of Operations

The following discussion should be read in conjunction with the Consolidated Financial Statements and the notes to Consolidated Financial Statements presented in this quarterly report.

Revenue – Total revenue in the three month period ended March 31, 2018 was \$4,058,000 which represents a 139 percent increase over the first quarter of 2017.

Revenue from services was \$3,963,000 in the first quarter of 2018 compared to \$1,699,000 in the first quarter of 2017. Revenue from transaction processing services, software maintenance and support services, and professional services were greater in the first quarter of 2018 as compared to the first quarter of 2017 due to an increase in the number of customers and accounts on file, an increase in the number and value of professional services contracts completed during the first quarter of 2018, and a one-time contractual minimum guarantee maintenance support service recognition. We expect that processing services will continue to grow as our customer base increases; however, the time required to implement new customer programs has proven longer than anticipated due to delays in third party integration and approval processes. It is not possible to predict with any accuracy the number and value of professional services contracts that our customers will require in a given period. Customers typically request our professional services to modify or enhance their CoreCard® software implementation based on their specific business strategy and operational requirements, which vary from customer to customer and period to period.

Revenue from products, which is primarily software license fees, was \$95,000 in the three month period ended March 31, 2018, compared to \$0 in the three month period ended March 31, 2017. The increase is due to the recognition of the third license implementation for a global license customer. Monthly support fees previously bundled with the applicable license have been reclassified as service revenue as a result of the adoption of ASU 2014-09, Revenue from Contracts with Customers Topic 606.

Cost of Revenue – Total cost of revenue was 43 percent and 53 percent of total revenue in the three month period ended March 31, 2018 and 2017, respectively.

Cost of service revenue as a percentage of total service revenue was 41 percent in the first quarter of 2018 compared to 53 percent in the first quarter of 2017. Cost of service revenue includes three components: costs to provide annual maintenance and support services to our installed base of licensed customers, costs to provide professional services, and costs to provide our financial transaction processing services. The cost and gross margins on such services vary considerably depending on the customer mix, customer requirements and project complexity as well as the mix of our U.S. and offshore employees working on the various aspects of services provided. In 2018, our cost of service revenue was more heavily weighted towards our professional services component which, historically, has utilized relatively more offshore employees at a lower cost. As a result, our cost of services revenue percentage in 2018 is below the 2017 percentage. In addition, the one-time recognition of contractual minimum guarantee maintenance support service revenue had no cost of revenue associated with the revenue recognition. We continue to devote the resources necessary to support our growing processing business, including direct costs for regulatory compliance, infrastructure, network certifications, and customer support. However, we are continuing to experience economies of scale in our processing environment, and did experience a decrease year over year for our cost of financial transaction processing services as a percentage of transaction processing services revenue. This may be subject to change in the future if new regulations or processing standards are implemented causing us to incur additional costs to comply.

Cost of product revenue as a percent of product revenue was 143 percent in the period ended March 31, 2018. The cost associated with the implementation of the license recognized was greater than the related revenue. This is not an uncommon occurrence, as a customer's contract profitability is recognized over the life of the contract. The future benefit of the contractual maintenance support services revenue will provide a steady revenue stream to services revenue.

Operating Expenses – In the three month period ended March 31, 2018, total operating expenses from consolidated operations were greater than in the corresponding period in 2017 primarily as the result of increased research and development expenses. Research and development expenses were 21 percent higher in 2018 as compared to 2017, mainly due to payroll and related expense for additional offshore technical personnel, expanding our hiring capabilities of technical resources by opening a second office located near Mumbai, India and a recognition based bonus accrual. General and administrative expenses were lower in 2018 than in 2017, due to lower personnel-related expense at the corporate offices in 2018. Marketing expenses decreased 14 percent year over year as we continued to place less focus on marketing initiatives for CoreCard in 2018. Our client base increased in 2017 and continues to increase in 2018 with minimal marketing efforts as we continue to have prospects contact us via online searches; however, we will continue to re-evaluate our marketing expenditures as needed to competitively position the Processing Services business.

Other Income (Loss) – In the quarter ended March 31, 2018, we recorded \$72,000 in other income, comprised primarily of income earned on our cash balances and interest income on our Notes Receivable as described in more detail in Note 3.

Liquidity and Capital Resources

Our cash balance at March 31, 2018 was \$10,183,000 compared to \$14,024,000 at December 31, 2017. The principal use of cash during the period was the prepayment of approximately \$2,580,000 for processing equipment, software and related licenses. This prepayment was in addition to approximately \$1,745,000 for comparable equipment purchased in the latter part of December 2017. The processing equipment is being installed to enhance our processing environment in anticipation of a significant contract under negotiations. As the potential customer has agreed to take title and reimburse us for the equipment purchases, the prepayment is shown in “Other Current Assets” at March 31, 2018. In addition, we advanced \$250,000 on a Promissory Note and we advanced \$235,000 on a Convertible Loan Agreement, both of which are described in more detail in Note 3 to the Consolidated Financial Statements.

During the three months ended March 31, 2018, we used \$3,187,000 cash for operations. The most significant working capital change since December 31, 2017 was an increase in other current assets of \$2,673,000, of which \$2,580,000 relates to the aforementioned equipment and software purchases on behalf of a potential new customer and an increase in accounts receivable of \$1,716,000, of which our three largest customers comprising the majority of the increase in accounts receivable remitted payment in April 2018 of approximately \$1,566,000 in total.

We used \$170,000 cash to acquire computer equipment primarily for the technical resources added in our India office and to upgrade our existing processing environment in the U.S.

We expect to have sufficient liquidity from cash on hand as well as projected customer payments to support our operations and capital equipment purchases in the foreseeable future. Currently we expect to use cash in excess of what is required for our current operations for opportunities we believe will expand our CoreCard and FinTech business, although there can be no assurance that appropriate opportunities will arise.

Off-Balance Sheet Arrangements

We do not currently have any off-balance sheet arrangements that are reasonably likely to have a current or future material effect on our financial condition, liquidity or results of operations.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations is based upon our Consolidated Financial Statements which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amount of assets, liabilities, revenues and expenses. We consider certain accounting policies related to revenue recognition, valuation of investments and accrued costs and expenses to be critical policies due to the estimation processes involved in each. Management discusses its estimates and judgments with the Audit Committee of the Board of Directors. For a detailed description on the application of these and other accounting policies, see Note 1 to the Consolidated Financial Statements contained in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017. Reference is also made to the discussion of the application of these critical accounting policies and estimates contained in Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for 2017. During the three month period ended March 31, 2018, there were no significant or material changes in the application of critical accounting policies, other than the adoption of ASU 2014-09, Revenue from Contracts with Customers (Topic 606) and the related reclassifications as describe further in Notes 1 and 2 to the Consolidated Financial Statements, that would require an update to the information provided in the Form 10-K for 2017.

Factors That May Affect Future Operations

Future operations are subject to risks and uncertainties that may negatively impact our future results of operations or projected cash requirements. It is difficult to predict future quarterly and annual results with certainty.

Among the numerous factors that may affect our consolidated results of operations or financial condition are the following:

Weakness or instability in the global financial markets could have a negative impact due to potential customers (most of whom perform some type of financial services) delaying decisions to purchase software or initiate processing services.

Increased federal and state regulations and reluctance by financial institutions to act as sponsor banks for prospective customers could increase our losses and cash requirements.

Delays in software development projects could cause our customers to postpone implementations or delay payments, which would increase our costs and reduce our revenue and cash.

Our processing business involves the processing and storage of sensitive business and personal information about our clients and their customers. Any type of security breach, attack, or misuse of data could deter clients from using our services and expose us to liability to parties whose data has been compromised, fines from regulatory authorities, and other material adverse consequences.

We could fail to deliver software products which meet the business and technology requirements of its target markets within a reasonable time frame and at a price point that supports a profitable, sustainable business model.

Our processing business is impacted, directly or indirectly, by more regulations than our licensed software business. If we fail to provide services that comply with (or allow our customers to comply with) applicable regulations or processing standards, we could be subject to financial or other penalties that could negatively impact our business.

Software errors or poor quality control may delay product releases, increase our costs, result in non-acceptance of our software by customers or delay revenue recognition.

We could fail to expand our base of customers as quickly as anticipated, resulting in lower revenue and profits (or increased losses) and increased cash needs.

We could fail to retain key software developers and managers who have accumulated years of know-how in our target markets and company products, or fail to attract and train a sufficient number of new software developers and testers to support our product development plans and customer requirements at projected cost levels.

Increasing and changing government regulations in the United States and foreign countries related to such issues as data privacy, financial and credit transactions could require changes to our products and services which could increase our costs and could affect our existing customer relationships or prevent us from getting new customers.

Delays in anticipated customer payments for any reason would increase our cash requirements and possibly our losses.

Competitive pressures (including pricing, changes in customer requirements and preferences, and competitor product offerings) may cause prospective customers to choose an alternative product solution, resulting in lower revenue and profits (or increased losses).

Our future capital needs are uncertain and depend on a number of factors; additional capital may not be available on acceptable terms, if at all.

Other general economic and political conditions could cause customers to delay or cancel purchases.

Item 4. Controls and Procedures

As of the end of the period covered by this report, the company carried out an evaluation, under the supervision and with the participation of the company's management, including the company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the company's disclosure controls and procedures pursuant to Rule 13a-15(b) under the Exchange Act. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the company's disclosure controls and procedures are effective. There were no significant changes in the company's internal control over financial reporting or in other factors identified in connection with this evaluation that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.
