**CAUTIONARY LANGUAGE ABOUT FORWARD-LOOKING STATEMENTS**

This Annual Report on Form 10-K includes “forward-looking statements” within the meaning and protections of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. All statements other than statements of historical fact are statements that could be forward-looking statements. You can identify these forward-looking statements through our use of words such as “may,” “will,” “anticipate,” “assume,” “should,” “indicate,” “would,” “believe,” “contemplate,” “expect,” “estimate,” “project,” “could,” “intend,” “target” and other similar words and expressions of the future. These forward-looking statements include, but are not limited to: (i) statements of our goals, intentions and expectations; (ii) statements regarding our business plans, prospects, growth and operating strategies; (iii) statements regarding the asset quality of our loan and investment portfolios; and (iv) estimates of our risks and future costs and benefits.

These forward-looking statements are based on current beliefs and expectations of our management and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change. The following factors, among others, could cause actual results to differ materially from the anticipated results or other expectations expressed in the forward-looking statements:

- changes in laws or government regulations or policies affecting financial institutions, including changes in regulatory fees and capital requirements;
- local, regional, national and international economic and market conditions and events and the impact they may have on us, our customers and our assets and liabilities;
- competition among depository and other financial institutions;
- changes in the prices, values and sales volume of residential and commercial real estate in Montana;
- inflation and changes in the interest rate environment that reduce our margins or reduce the fair value of financial instruments;
- our ability to attract deposits and other sources of funding or liquidity;
- changes or volatility in the securities markets;
- political developments, uncertainties or instability;
- our ability to enter new markets successfully and capitalize on growth opportunities;
- our ability to successfully perform due diligence and integrate acquired businesses including our recent acquisition of Big Muddy Bancorp, Inc.;
- changes in consumer spending, borrowing and savings habits;
- our ability to continue to increase and manage our commercial and residential real estate, multi-family and commercial business loans;
- possible impairments of securities held by us, including those issued by government entities and government sponsored enterprises;
- the level of future deposit insurance premium assessments;
- the costs or effects of mergers, acquisitions or dispositions we may make, whether we are able to obtain any required governmental approvals in connection with any such mergers, acquisitions or dispositions, and/or our ability to realize the contemplated financial or business benefits, including any anticipated cost savings or synergies, associated with any such mergers, acquisitions or dispositions, including the recent merger of The State Bank of Townsend with

and into Opportunity Bank of Montana;  
our ability to develop and maintain secure and reliable information technology systems, effectively defend ourselves against cyberattacks, or recover from breaches to our cybersecurity infrastructure;  
the failure of assumptions underlying the establishment of allowance for possible loan losses and other estimates;  
the possibility of goodwill impairment charges in the future;  
changes in the financial performance and/or condition of our borrowers and their ability to repay their loans when due; and  
the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Securities and Exchange Commission, the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters.

Because of these and other uncertainties, our actual future results may be materially different from the results indicated by these forward-looking statements. For a further list and description of various risks, relevant factors and uncertainties that could cause future results or events to differ materially from those expressed or implied in our forward-looking statements, see the Item 1A, "Risk Factors" and Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections contained elsewhere in this report, as well as other reports that we file with the SEC.

Table of Contents

**PART I**

**ITEM 1. DESCRIPTION OF BUSINESS.**

**Overview**

Eagle Bancorp Montana, Inc. (“Eagle” or “the Company”), is a Delaware corporation that holds 100.0% of the capital stock of Opportunity Bank of Montana (“the Bank”), formerly American Federal Savings Bank (“AFSB”). The Bank was founded in 1922 as a Montana-chartered building and loan association and has conducted operations and maintained its administrative office in Helena, Montana since that time. In 1975, the Bank adopted a federal thrift charter and in October 2014 converted to a Montana chartered commercial bank and became a member bank in the Federal Reserve System. The Bank currently has 22 branch offices and 19 automated teller machines located in our market areas and we participate in the Money Pass® ATM network. The Bank also operates certain branches under the brand names Dutton State Bank, Farmers State Bank of Denton and The State Bank of Townsend.

On September 5, 2017, the Company entered into an Agreement and Plan of Merger with TwinCo, a Montana corporation, and TwinCo’s wholly-owned subsidiary, Ruby Valley Bank, a Montana chartered commercial bank to acquire 100% of TwinCo’s equity voting interests. The merger agreement provided that Ruby Valley Bank would merge with and into Opportunity Bank of Montana and that TwinCo would merge with and into the Company. Ruby Valley Bank operated two branches in Madison County, Montana. The transaction provided an opportunity to expand market presence and lending activities, particularly in agricultural lending. The acquisition closed January 31, 2018, after receipt of approvals from regulatory authorities, approval of TwinCo shareholders and the satisfaction of other closing conditions. The total consideration paid was \$18.93 million and included cash consideration of \$9.90 million and common stock issued of \$9.03 million.

We provide loan and deposit services to customers who are predominantly small businesses and individuals throughout Montana. We are a diversified lender with a focus on residential mortgage loans, commercial real estate mortgage loans, commercial business loans and second mortgage/home equity loan products. In addition, we offer wealth management products and services through our wealth management division and financial consultants located in several of our markets.

The Bank is headquartered at 1400 Prospect Avenue, Helena, Montana, 59601. Investor information for the Company may be found at [www.opportunitybank.com](http://www.opportunitybank.com). The contents on or accessible through our website are not incorporated into this report.

The Bank has equity investments in Certified Development Entities which have received allocations of New Markets Tax Credits (“NMTC”). Administered by the Community Development Financial Institutions Fund of the U.S. Department of the Treasury, the NMTC program is aimed at stimulating economic and community development and job creation in low-income communities.

### **Recent Developments**

On August 21, 2018, Eagle entered into an Agreement and Plan of Merger with Big Muddy Bancorp, Inc. (“BMB”), a Montana corporation and BMB’s wholly-owned subsidiary, The State Bank of Townsend (“SBOT”), a Montana chartered commercial bank to acquire 100% of BMB’s equity voting interests. On January 1, 2019, BMB merged with and into Eagle, with Eagle continuing as the surviving corporation. SBOT operated four branches in Townsend, Dutton, Denton and Choteau, Montana. The total consideration paid was \$16.4 million, all of which was paid in Eagle common stock.

## Table of Contents

### **Business Strategy**

Our principal strategy is to continue our profitability through building a diversified loan portfolio and operating the Bank as a full-service community bank that offers both retail and commercial loan and deposit products in all of its markets. We believe that this focus will enable us to continue to grow our franchise, while maintaining our commitment to customer service, high asset quality and sustained net earnings.

The following are the key elements of our business strategy:

Continue to diversify our portfolio by emphasizing our recent growth in commercial real estate and commercial business loans as a complement to our traditional single family residential real estate lending. As of December 31, 2018, such loans constituted approximately 65.56% of total loans;

Continue to emphasize the attraction and retention of lower cost core deposits;

Seek opportunities where presented to acquire other institutions or expand our branch network through opening new branches and/or loan production offices;

Maintain our strong asset quality; and

Operate as a community-oriented independent financial institution that offers a broad array of financial services with high levels of customer service.

Our results of operations may be significantly affected by our ability to effectively implement our business strategy including our plans for expansion through strategic acquisitions. If we are unable to effectively integrate and manage acquired or merged businesses or attract significant new business through our branching efforts, our financial performance may be negatively affected.

### **Market Areas**

From our headquarters in Helena, Montana, we operate 22 full service retail banking offices, including our main office. Our other full service branches are located in Helena – Neill (opened 1987), Helena – Skyway (opened 2009), Bozeman – Oak (opened 1980, relocated 2009), Butte (opened 1979), Townsend (opened 1979), Montana. The Sterling

Montana branch acquisition that was completed in 2012 included retail banking offices in: Bozeman, Big Timber, Livingston, Billings, Missoula and Hamilton. The Bozeman Mendenhall location was sold in June 2015, reconstructed by the new owners and we lease a portion of the new building. We opened a loan production office in Great Falls, Montana in 2015 and it transitioned to a full service branch in 2017. Our Great Falls branch moved to a new location in 2018. A branch in Billings Heights opened in 2017. The TwinCo acquisition in January 2018 included retail banking offices in Twin Bridges and Sheridan, Montana. The BMB merger in January 2019 included retail banking offices in Choteau, Denton, Dutton and Townsend, Montana.

Montana is one of the largest states in terms of land mass but ranks as one of the least populated states. According to U.S. Census Bureau data for 2010, it had a population of 989,415 (1.06 million estimated for 2018). Helena, where we are headquartered, is Montana's state capital. It is also the county seat of Lewis and Clark County, which has a population of approximately 67,773 and is located within 120 miles of four of Montana's other five largest cities: Missoula, Great Falls, Bozeman and Butte. Helena is approximately midway between Yellowstone and Glacier National Parks. Its economy has shown moderate growth, in terms of both employment and income. State government and the numerous offices of the federal government comprise the largest employment sector. Helena also has significant employment in the service industries. Specifically, it has evolved into a central health care center with employment in the medical and the supporting professions as well as the medical insurance industry. The local economy is also dependent to a lesser extent upon ranching and agriculture. These have been more cyclical in nature and remain vulnerable to severe weather conditions, increased competition, both domestic and international, as well as commodity prices.

Butte, Montana is approximately 64 miles southwest of Helena. Butte and the surrounding Silver Bow County have a population of approximately 34,602. Butte's economy was historically reliant on the mining industry and fluctuations in metal and mineral commodity prices have had a corresponding impact on the local economy.

Table of Contents

Bozeman is approximately 95 miles southeast of Helena. It is located in Gallatin County, which has a population of approximately 107,810. Bozeman is home to Montana State University and has experienced significant growth, in part due to the growth of the University as well as the increased tourism for resort areas in and near Bozeman. Agriculture, however, remains an important part of Bozeman's economy. Bozeman has also become an attractive location for retirees, primarily from the West Coast, owing to its many winter and summer recreational opportunities and the presence of the University.

Townsend, Montana is approximately 34 miles southeast of Helena. Townsend is located in Broadwater County which has a population of approximately 5,936. Many of its residents commute to other Montana locations for work, particularly Helena. Other employment in Townsend is primarily in agriculture and services.

Livingston, Montana is approximately 124 miles southeast of Helena. Livingston and the surrounding Park County have a population of approximately 16,353. Livingston's economy is somewhat reliant on wood products and tourism.

Big Timber, Montana is approximately 158 miles southeast of Helena. Big Timber and the surrounding Sweet Grass County have a population of approximately 3,691. Big Timber's economy is somewhat reliant on the wood products, agriculture and tourism industries.

Billings, Montana is approximately 239 miles southeast of Helena. Billings and the surrounding Yellowstone County have a population of approximately 158,980. Billings is a significant trade center for eastern Montana. Select manufacturing is also a significant contributing portion of its economy.

Missoula, Montana is approximately 116 miles west of Helena. Missoula and the surrounding Missoula County have a population of approximately 117,441. The University of Montana is located in Missoula and the local economy is reliant on the University and the corresponding trade and services resulting from the University's presence.

Hamilton, Montana is approximately 161 miles southwest of Helena in Ravalli County. Ravalli County has a population of approximately 42,563. Hamilton is a relatively short distance from Missoula with a number of persons working in Missoula, residing in Hamilton. Medical research and the wood products industry are significant contributors to Ravalli County's economy.

Great Falls, Montana is approximately 91 miles northeast of Helena in Cascade County. Cascade County has a population of approximately 81,654. Health care, education services, and accommodation and food services are large contributors to Cascade County's economy.

Twin Bridges, Montana is approximately 94 miles south of Helena in Madison County. Sheridan, Montana is approximately 103 miles south of Helena and is also in Madison County. Madison County has a population of approximately 8,175. Construction, health care and social assistance are significant contributors to the economy of Madison County.

Choteau, Montana is approximately 103 miles north of Helena in Teton County. Dutton, Montana is approximately 114 miles north of Helena and is also in Teton County. Teton County has a population of approximately 6,085. Agriculture, forestry, fishing and hunting along with health care and social assistance are significant contributors to Teton County's economy.

Denton, Montana is approximately 179 miles northeast of Helena in Fergus County. Fergus County has a population of approximately 11,291. Agriculture, retail trade and construction are significant contributors to Fergus County's economy.

### **Competition**

We face strong competition in our primary market areas for retail deposits and the origination of loans. Historically, Montana was a unit banking state. This means that the ability of Montana state banks to create branches was either prohibited or significantly restricted. As a result of unit banking, Montana has a significant number of independent financial institutions serving a single community in a single location. While the state's population is approximately 1.06 million people, there are 51 credit unions in Montana as well as 1 national thrift institution and 46 commercial banks as of December 31, 2018. Our most direct competition for depositors has historically come from locally owned and out-of-state commercial banks, thrift institutions and credit unions operating in our primary market areas. Competition in our primary market areas has increased in recent years. Our competition for loans also comes from banks, thrifts and credit unions, in addition to mortgage bankers and brokers. Our principal market areas can be characterized as markets with moderately increasing incomes, relatively low unemployment, increasing wealth (particularly in the growing resort areas such as Bozeman) and moderate population growth.

Table of Contents

**Lending Activities**

**General**

The Bank originates residential 1-4 family, commercial real estate, home equity, consumer and commercial loans. Residential 1-4 family loans include residential mortgages and construction of residential properties. Commercial real estate loans include loans on multi-family dwellings, nonresidential property, commercial construction and development and farmland loans. Home equity loans include loans secured by the borrower's primary residence. Typically, the property securing such loans is subject to a prior lien. Consumer loans consist of loans secured by collateral other than real estate, such as automobiles, recreational vehicles and boats. Personal loans and lines of credit are made on deposits held by the Bank and on an unsecured basis. Commercial business loans consist of business loans and lines of credit on a secured and unsecured basis and include agriculture production loans.

**Fee Income**

The Bank receives lending related fee income from a variety of sources. Its principal source of this income is from the origination and servicing of sold mortgage loans. Fees generated from mortgage loan servicing, which generally consists of collecting mortgage payments, maintaining escrow accounts, disbursing payments to investors and foreclosure processing for loans held by others, were \$2.30 million and \$2.13 million for the years ended December 31, 2018 and 2017, respectively. Other loan related fee income for late charges and other ancillary fees were \$172,000 and \$174,000 for the years ended December 31, 2018 and 2017, respectively.

**Residential 1-4 Family Loans**

The Bank originates residential 1-4 family mortgage loans secured by property located in the Bank's market areas. At December 31, 2018, \$116.94 million or 18.92% of the Bank's total loans were such loans. The Bank generally originates residential 1-4 family mortgage loans in amounts of up to 80.0% of the lesser of the appraised value or the selling price of the mortgaged property without requiring private mortgage insurance. A mortgage loan originated by the Bank, whether fixed rate or adjustable rate, can have a term of up to 30 years. The Bank holds substantially all of its adjustable rate and its 8, 10 and 12-year fixed rate loans in portfolio. Adjustable rate loans limit the periodic interest rate adjustment and the minimum and maximum rates that may be charged over the term of the loan. The Bank's fixed rate 15-year and 20-year loans are held in portfolio or sold in the secondary market depending on market conditions. Generally, all 30-year fixed rate loans are sold in the secondary market. The volume of loan sales is dependent on the volume, type and term of loan originations.

The Bank derives a significant portion of its noninterest income from servicing of loans that it has sold. The Bank offers many of the fixed rate loans it originates for sale in the secondary market on a servicing retained basis. This means that we process the borrower's payments and send them to the purchaser of the loan. This retention of servicing enables the Bank to increase fee income and maintain a relationship with the borrower. At December 31, 2018, the Bank had \$964.97 million in residential 1-4 family mortgage loans and \$33.41 million in other loan categories sold with servicing retained. The Bank does not ordinarily purchase home mortgage loans from other financial institutions.

Property appraisals on real estate securing the Bank's single-family residential loans are made by state certified and licensed independent appraisers who are approved annually by the Board. Appraisals are performed in accordance with applicable regulations and policies. The Bank generally obtains title insurance policies on all first mortgage real estate loans originated. On occasion, refinancing of mortgage loans are approved using title reports instead of title insurance. Title reports are also allowed on home equity loans. Borrowers generally remit funds with each monthly payment of principal and interest, to a loan escrow account from which the Bank makes disbursements for such items as real estate taxes and hazard and mortgage insurance premiums as they become due.

The Bank also lends funds for the residential 1-4 family construction. Residential 1-4 family construction loans are made both to individual homeowners for the construction of their primary residence and, to a lesser extent, to local builders for the construction of pre-sold houses or houses that are being built for sale in the future. Residential 1-4 family construction loans accounted for \$27.17 million or 4.40% of the Bank's total loan portfolio at December 31, 2018.

## Table of Contents

### **Commercial Real Estate Loans**

The Bank originates commercial real estate loans including loans on multi-family dwellings. Commercial real estate loans made up 41.54% of the Bank's total loan portfolio, or \$256.78 million at December 31, 2018. The Bank's commercial real estate loans are primarily permanent loans secured by improved property such as office buildings, retail stores, commercial warehouses and apartment buildings. The terms and conditions of each loan are tailored to the needs of the borrower and based on the financial strength of the project and any guarantors. Generally, commercial real estate loans originated by the Bank will not exceed 75.0% of the appraised value or the selling price of the property, whichever is less. Commercial real estate loans are typically made with fixed rates of interest and 5 to 15-year maturities. Upon maturity, the loan is repaid or the terms and conditions are renegotiated. Generally, all commercial real estate loans that we originate are secured by property located in the state of Montana and within the market areas of the Bank. The Bank's largest single commercial real estate loan at December 31, 2018 was a 50% participation loan originated by another bank in northwestern Montana. The Company's share of the total outstanding loan at December 31, 2018 was \$9.58 million and it is collateralized by commercial real estate located in Missoula, Montana. At December 31, 2018 this loan is performing in accordance with its repayment terms.

The Bank also lends funds for commercial construction and development. Commercial construction and development loans accounted for \$41.74 million or 6.75% of the Bank's total loan portfolio at December 31, 2018. In addition, the bank originates loans secured by farm and ranch real estate. Farmland loans accounted for \$29.92 million or 4.84% of the Bank's total loan portfolio at December 31, 2018.

### **Home Equity Loans**

The Bank also originates home equity loans. These loans are secured by the borrowers' primary residence, but are typically subject to a prior lien, which may or may not be held by the Bank. At December 31, 2018, \$52.16 million or 8.44% of our total loans were home equity loans. Borrowers may use the proceeds from the Bank's home equity loans for many purposes, including home improvement, debt consolidation or other purchasing needs. The Bank offers fixed rate, fixed payment home equity loans as well as variable and fixed rate home equity lines of credit. Fixed rate home equity loans typically have terms of no longer than 15 years.

Home equity loans are secured by real estate but they have historically carried a greater risk than first lien residential mortgages because of the existence of a prior lien on the property securing the loan, as well as the flexibility the borrower has with respect to the loan proceeds. The Bank attempts to minimize this risk by maintaining conservative underwriting policies on such loans. We generally make home equity loans for not more than 85.0% of appraised value of the underlying real estate collateral, less the amount of any existing prior liens on the property securing the loan.

## Consumer Loans

As part of its strategy to invest in higher yielding shorter term loans, the Bank emphasized growth of its consumer lending portfolio in recent years. This portfolio includes personal loans secured by collateral other than real estate, unsecured personal loans and lines of credit and loans secured by deposits held by the Bank. As of December 31, 2018, consumer loans totaled \$16.57 million or 2.68% of the Bank's total loan portfolio. These loans consist primarily of auto loans, RV loans, boat loans, personal loans and credit lines and deposit account loans. Consumer loans are originated in the Bank's market areas and generally have maturities of up to 7 years. For loans secured by savings accounts, the Bank will lend up to 90.0% of the account balance on single payment loans and up to 100.0% for monthly payment loans.

Consumer loans have a shorter term and generally provide higher interest rates than residential loans. Consumer loans can be helpful in improving the spread between average loan yield and cost of funds and at the same time improve the matching of the maturities of rate sensitive assets and liabilities.

The underwriting standards employed by the Bank for consumer loans include a determination of the applicant's credit history and an assessment of the applicant's ability to meet existing obligations and payments on the proposed loan. The stability of the applicant's monthly income may be determined by verification of gross monthly income from primary employment, and additionally from any verifiable secondary income. Creditworthiness of the applicant is of primary consideration; however, the underwriting process also includes a comparison of the value of the collateral in relation to the proposed loan amount.

## Table of Contents

### **Commercial Loans**

Commercial business loans amounted to \$59.05 million, or 9.56% of the Bank's total loan portfolio at December 31, 2018. Agricultural production loans amounted to \$17.71 million, or 2.87% of the Bank's total loan portfolio at December 31, 2018. The Bank's commercial business loans are traditional business loans and are not secured by real estate. Such loans may be structured as unsecured lines of credit or may be secured by inventory, accounts receivable or other business assets. Agricultural operating loans are generally secured with equipment, cattle, crops or other non-real property and at times the underlying real property.

Commercial business loans of this nature usually involve greater credit risk than residential 1-4 family loans. The collateral we receive is typically related directly to the performance of the borrower's business which means that repayment of commercial business loans is dependent on the successful operations and income stream of the borrower's business. Such risks can be significantly affected by economic conditions. In addition, commercial lending generally requires substantially greater oversight efforts compared to residential real estate lending.

### **Loans to One Borrower**

Under Montana law, commercial banks such as the Bank, are subject to certain exemptions and are allowed to select the Office of the Comptroller of the Currency ("OCC") formula used to determine limits on credit concentrations to single borrowers to an amount equal to 15.0% of the institution's total capital. As of December 31, 2018, the Bank's limit to a single borrower was \$15.02 million. Our largest aggregation of loans to one borrower was approximately \$17.13 million at December 31, 2018. This consisted of four loans: two commercial real estate loans secured by two separate detention facilities, a commercial real estate loan secured by a chemical dependency treatment facility and a commercial loan. The first commercial real estate loan had a principal balance of \$4.63 million at December 31, 2018. However, 80.0% of that amount, or \$3.70 million at December 31, 2018 was sold to Montana Board of Investments, leaving a net principal balance payable to the Bank of \$926,000. As of December 31, 2018, the principal balance on the second commercial real estate loan was \$8.86 million. However, 90.0% of this loan is guaranteed by the USDA Rural Development. Thus, 90.0% of the loan, or \$7.98 million at December 31, 2018, is not required to be included in the Bank's limitations to a single borrower under applicable banking regulations. This leaves approximately \$886,000 subject to the lending limit described above. The third commercial real estate loan had a principal balance of \$3.62 million as of December 31, 2018. The commercial loan had a principal balance of \$24,000 at December 31, 2018. As a result, the total amount subject to the lending limit at December 31, 2018 was \$5.45 million. At December 31, 2018, these loans were performing in accordance with their terms. The Bank maintains the servicing for these loans.

### **Loan Solicitation and Processing**

Our customary sources of mortgage loan applications include repeat customers, walk-ins and referrals from home builders and real estate brokers. We also advertise in local newspapers and on local radio and television. We currently have the ability to accept online mortgage loan applications and provide pre-approvals through our website. Our branch managers and loan officers located at our headquarters and in branches, have authority to approve certain types of loans when presented with a completed application. Other loans must be approved at our main offices as disclosed below. No loan consultants or loan brokers are currently utilized for either residential or commercial lending activities.

After receiving a loan application from a prospective borrower, a credit report and verifications are obtained to confirm specific information relating to the loan applicant's employment, income and credit standing. When required by our policies, an appraisal of the real estate intended to secure the proposed loan is undertaken by an independent fee appraiser. In connection with the loan approval process, our staff analyzes the loan applications and the property involved. Officers and branch managers are granted lending authority based on the nature of the loan and the managers' level of experience. We have established a series of loan committees to approve any loans which may exceed the lending authority of particular officers or branch managers. Three Directors of the Board are required for approval of any loan, or aggregation of loans to a single borrower, that exceeds \$2.50 million.

Loan applicants are promptly notified of the decision by a letter setting forth the terms and conditions of the decision. If approved, these terms and conditions include the amount of the loan, interest rate basis, amortization term, a brief description of real estate to be mortgaged, tax escrow and the notice of requirement of insurance coverage to be maintained. We generally require title insurance on first mortgage loans and fire and casualty insurance on all properties securing loans, which insurance must be maintained during the entire term of the loan.

## Table of Contents

### **Loan Commitments**

We generally provide commitments to fund fixed and adjustable-rate single-family mortgage loans for periods up to 60 days at a specified term and interest rate, and other loan categories for shorter time periods. The total amount of our commitments to extend credit as of December 31, 2018, was approximately \$18.75 million, all of which was for residential mortgage loans.

### **Investment Activities**

#### **General**

State-chartered commercial banks such as the Bank have the authority to invest in various types of investment securities, including United States Treasury obligations, securities of various Federal agencies (including securities collateralized by mortgages), certificates of deposits of insured banks and savings institutions, municipal securities, corporate debt securities and loans to other banking institutions.

Eagle maintains liquid assets that may be invested in specified short-term securities and other investments. Liquidity levels may be increased or decreased depending on the yields on investment alternatives. They may also be increased based on management's judgment as to the attractiveness of yields available in relation to other opportunities. Liquidity levels can also change based on management's expectation of future yield levels, as well as management's projections as to the short-term demand for funds to be used in the Bank's loan origination and other activities. Eagle maintains an investment securities portfolio and a mortgage-backed securities ("MBSs") portfolio as part of its investment portfolio.

#### **Investment Policies**

The investment policy of Eagle, which is established by the Board, is designed to foster earnings and liquidity within prudent interest rate risk guidelines, while complementing the Bank's lending activities. The policy provides for available-for-sale (including those accounted for under ASC Topic 825), held-to-maturity and trading classifications. However, Eagle currently does not hold any securities for purposes of trading or held-to-maturity. The policy permits investments in high credit quality instruments with diversified cash flows while permitting us to maximize total return within the guidelines set forth in our interest rate risk and liquidity management policies. Permitted investments include but are not limited to U.S. government obligations, government agency or government-sponsored agency obligations, state, county and municipal obligations, asset-backed securities and mortgage-backed securities.

Collateralized mortgage obligations (“CMOs”), investment grade corporate debt securities and commercial paper are also included. We also invest in Federal Home Loan Bank (“FHLB”) overnight deposits and federal funds, but these instruments are not considered part of the investment portfolio.

Our investment policy also includes several specific guidelines and restrictions to ensure adherence with safe and sound activities. The policy prohibits investments in high-risk mortgage derivative products (as defined within the policy) without prior approval from the Board. To secure such approval, management must demonstrate the business advantage of such investments.

We do not participate in the use of off-balance sheet derivative financial instruments, except interest rate caps and certain financial instruments designated as cash flow hedges related to loans committed to be sold in the secondary market. Further, Eagle does not invest in securities which are not rated investment grade at time of purchase.

The Board, through its asset/liability committee, has charged the President and CEO with implementation of the investment policy. All transactions are reported to the Board monthly, as well as the current composition of the portfolio, including market values and unrealized gains and losses.

### **Sources of Funds**

#### **General**

Deposits are the major source of our funds for lending and other investment purposes. Borrowings are also used to compensate for reductions in the availability of funds from other sources. In addition to deposits and borrowings, we derive funds from loans and investment securities principal payments. Funds are also derived from proceeds for the maturity, call and sale of investment securities and from the sale of loans. Loan and investment securities principal payments are a relatively stable source of funds, while loan prepayments and deposit inflows are significantly influenced by general interest rates and financial market conditions.

## Table of Contents

### **Deposits**

We offer a variety of deposit accounts. Deposit account terms vary, primarily as to the required minimum balance amount, the amount of time that the funds must remain on deposit and the applicable interest rate.

Our current deposit products include certificates of deposit accounts ranging in terms from 90 days to five years, as well as, checking, savings and money market accounts. Individual retirement accounts (“IRAs”) are included in certificates of deposit.

Deposits are obtained primarily from residents of Helena, Bozeman, Butte, Townsend, Billings, Missoula, Livingston, Big Timber and Hamilton, and since the merger with Ruby Valley Bank, Twin Bridges and Sheridan. We believe we are able to attract deposit accounts by offering outstanding service, competitive interest rates, convenient locations and service hours. We use traditional methods of advertising to attract new customers and deposits, including radio, television, print media advertising and sales training and incentive programs for employees. Management believes that non-residents of Montana hold an insignificant number and amount of deposit accounts.

We pay interest rates on deposits which are competitive in our market. Interest rates on deposits are set by senior management, based on a number of factors, including: projected cash flow; a current survey of a selected group of competitors’ rates for similar products; external data which may influence interest rates; investment opportunities and loan demand; and scheduled certificate maturities and loan and investment repayments.

### **Borrowings**

Deposits are the primary source of funds for our lending and investment activities and for general business purposes. However, as the need arises, or in order to take advantage of funding opportunities, we also borrow funds in the form of advances to supplement our supply of lendable funds and to meet deposit withdrawal requirements. We have Federal funds line of credits with FHLB of Des Moines, Pacific Coast Bankers Bank (“PCBB”), PNC Financial Services Group, Inc. (“PNC”), United Bankers’ Bank (“UBB”) and Zions Bank. Our Federal funds line of credit with Stockman Bank was terminated during 2018.

In February 2017, the Company completed the issuance, through a private placement, of \$10.00 million aggregate principal amount of 5.75% fixed senior unsecured notes due in 2022. The interest will be paid semi-annually through maturity date. The notes are not subject to redemption at the option of the Company.

In June 2015, the Company completed the issuance of \$10.00 million in aggregate principal amount of subordinated notes due in 2025 in a private placement transaction to an institutional accredited investor. The notes will bear interest at an annual fixed rate of 6.75% and interest will be paid quarterly through maturity date or earlier redemption. The notes qualify as Tier 2 capital for regulatory purposes, subject to applicable limitations. The notes are recorded as long term debt for accounting purposes.

In September 2005, our predecessor entity formed a special purpose subsidiary, Eagle Bancorp Statutory Trust I (the "Trust"), for the purpose of issuing trust preferred securities in the amount of \$5.16 million. Our predecessor entity has issued subordinated debentures to the Trust, and the coupon on the debentures matches the dividend payment on the trust preferred securities. Upon the closing of the second-step conversion and reorganization, we assumed the obligations of our predecessor in connection with the subordinated debentures and trust preferred securities. For regulatory purposes, the securities qualify as Tier 1 Capital, while for accounting purposes they are recorded as long term debt. The securities have a 30-year maturity and carried a fixed coupon of 6.02% for the first five years, at which time the coupon became variable, at a spread of 142 basis points over 3 month LIBOR. At December 31, 2018 the rate was 4.228%.

### **Other Activities**

The Company offers wealth management services at its locations through financial advisors employed by the Bank. Income from wealth management services was \$536,000 and \$624,000 for the years ended December 31, 2018 and 2017, respectively.

### **Subsidiary Activity**

We are permitted to invest in the capital stock of, or originate secured or unsecured loans to, subsidiary corporations. The following are subsidiaries of the Company: Opportunity Bank of Montana, Eagle Bancorp Statutory Trust I, and AFSB NMTC Investment Fund, LLC, which is a subsidiary of the Bank.

## Table of Contents

### **Personnel**

As of December 31, 2018, we had 235 full-time employees and 14 part-time employees. The employees are not represented by a collective bargaining unit. We believe our relationship with our employees to be good.

### **Regulation**

Set forth below is a brief description of certain laws and regulations applicable to Eagle and the Bank. These descriptions of laws and regulations as well as those contained elsewhere do not purport to be complete and are qualified in their entirety by reference to applicable laws and regulations. Legislative or regulatory changes in the future could adversely affect our operations or financial condition.

### **General**

As a state-chartered commercial bank, the Bank is subject to extensive regulation, examination and supervision by the Montana Division of Banking and Financial Institutions and the Federal Deposit Insurance Corporation (“FDIC”), as the insurer of its deposits. The Bank is a member of the Federal Reserve Bank (“FRB”) System and its deposit accounts are insured up to applicable limits by the Deposit Insurance Fund, which is administered by the FDIC. There are periodic examinations to evaluate the Bank’s safety and soundness and compliance with various regulatory requirements. Under certain circumstances, the FDIC may also examine the Bank. This regulatory structure is intended primarily for the protection of the insurance fund and depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and examination policies, including policies with respect to the classification of assets and the establishment of adequate allowance for loan losses for regulatory purposes. Eagle, as a bank holding company, is required to file certain reports with, and is subject to examination by, and must otherwise comply with the rules and regulations of the FRB. Eagle is also subject to the rules and regulations of the Securities and Exchange Commission (“SEC”) under the federal securities laws. See “—Holding Company Regulation.”

### **Dodd-Frank Act**

In July 2010, the President signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”). The Dodd-Frank Act has significantly changed the bank regulatory structure and affected the lending, investment, trading and operating activities of financial institutions and their holding companies. Many of the provisions of the Dodd-Frank Act are subject to delayed effective dates and/or require the issuance of implementing

regulations, some of which have not yet been issued in final form. The Dodd-Frank Act and implementing regulations have increased the regulatory burden, compliance cost and interest expense for Eagle and the Bank.

The Dodd-Frank Act will require the FRB to set minimum capital levels for depository institution holding companies that are as stringent as those required for the insured depository subsidiaries, and the components of Tier 1 capital would be restricted to capital instruments that are currently considered to be Tier 1 capital for insured depository institutions. Under the Dodd-Frank Act, the proceeds of trust preferred securities are excluded from Tier 1 capital unless such securities were issued prior to May 19, 2010 by bank or savings and loan holding companies with less than \$15 billion of assets.

The Dodd-Frank Act also created a new Consumer Financial Protection Bureau with broad powers to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all banks such as the Bank, including the authority to prohibit “unfair, deceptive or abusive” acts and practices. The Consumer Financial Protection Bureau has examination and enforcement authority over all banks with more than \$10 billion in assets. Banks with \$10 billion or less in assets will continue to be examined by their applicable bank regulators.

The legislation also broadened the base for FDIC insurance assessments. Assessments will now be based on the average consolidated total assets less tangible equity capital of a financial institution. The Dodd-Frank Act also permanently increases the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per depositor, retroactive to January 1, 2009, and non-interest bearing transaction accounts had unlimited deposit insurance through December 31, 2012. Lastly, the Dodd-Frank Act directs the FRB to promulgate rules prohibiting excessive compensation paid to bank holding company executives, regardless of whether the company is publicly traded or not.

Table of Contents

**Federal Regulation of Commercial Banks**

*General*

Deposits in the Bank, a Montana state-chartered commercial bank are insured by the FDIC. The bank has no branches in any other state. The Bank is subject to regulation and supervision by the Montana Department of Administration's Banking and Financial Institutions Division and the FRB. The federal laws that apply to the Bank regulate, among other things, the scope of its business, its investments, its reserves against deposits, the timing of the availability of deposited funds, and the nature, amount of, and collateral for loans. Federal laws also regulate community reinvestment and insider credit transactions and impose safety and soundness standards.

The Bank's general permissible lending limit for loans-to-one-borrower is 15.0% of unimpaired capital and surplus. An additional amount may be lent, equal to 10.0% of total capital, if the loan is fully secured by certain readily marketable collateral, which is defined to include certain financial instruments and bullion, but generally does not include real estate.

The federal banking agencies, have adopted guidelines establishing safety and soundness standards on such matters as loan underwriting and documentation, asset quality, earnings standards, internal controls and audit systems, interest rate risk exposure and compensation and other employee benefits. If the appropriate federal banking agency determines that an institution fails to meet any standard prescribed by the guidelines, the agency may require the institution to submit to the agency an acceptable plan to achieve compliance with the standard. If an institution fails to submit or implement an acceptable plan, the appropriate federal banking agency may issue an enforceable order requiring correction of the deficiencies.

*Federal Home Loan Bank System*

The Bank is a member of the FHLB of Des Moines. FHLB Des Moines is one of 11 regional FHLBs that administer the home financing credit function of banks, credit unions and savings institutions. Each FHLB serves as a reserve or central bank for its members within its assigned region. It is funded primarily from proceeds derived from the sale of consolidated obligations of the FHLB System. It makes loans or advances to members in accordance with policies and procedures, established by the Board of Directors of the FHLB, which are subject to the oversight of the Federal Housing Finance Board. All advances from the FHLB are required to be fully secured by sufficient collateral as determined by the FHLB. In addition, all long-term advances are required to provide funds for residential home financing. As a member, the Bank is required to purchase and maintain a specified amount of shares of capital stock in the FHLB of Des Moines.

The FHLBs continue to contribute to low- and moderately-priced housing programs through direct loans or interest subsidies on advances targeted for community investment and low- and moderate-income housing projects. These contributions have affected adversely the level of FHLB dividends paid and could continue to do so in the future. These contributions could also have an adverse effect on the value of FHLB stock in the future. A reduction in value of the Bank's FHLB stock may result in a corresponding reduction in the Bank's capital.

### ***Federal Reserve System***

The Federal Reserve System requires all depository institutions to maintain noninterest-bearing reserves at specified levels against their checking and non-personal time deposits. The balances maintained to meet the reserve requirements imposed by the Federal Reserve System may be used to satisfy liquidity requirements.

The Bank has authority to borrow from the Federal Reserve System "discount window". The Bank maintains a "primary credit" facility at the Federal Reserve's discount window.

As a new member of the Federal Reserve System, the Company is required to maintain a minimum level of investment in FRB stock based on a specific percentage of its capital and surplus. A reduction in value of the Bank's FRB stock may result in a corresponding reduction in the Bank's capital.

### ***Insurance of Deposit Accounts***

Deposit accounts at the Bank are insured by the FDIC, generally up to a maximum of \$250,000 per separately insured depositor and up to a maximum of \$250,000 for self-directed retirement accounts. The Bank's deposits, therefore, are subject to FDIC deposit insurance assessments. Assessments paid to the FDIC by the Bank and other banking institutions are used to fund the FDIC's Federal Deposit Insurance Fund.

Table of Contents

***Insurance of Accounts and Regulation by the FDIC***

As insurer of deposits in banks, the FDIC imposes deposit insurance premiums and is authorized to conduct examinations of and to require reporting by FDIC-insured institutions. It also may prohibit any FDIC-insured institution from engaging in any activity the FDIC determines by regulation or order to pose a serious risk to the fund. The FDIC also has the authority to initiate enforcement actions against savings institutions, after giving FRB an opportunity to take such action. Insurance of deposits may be terminated by the FDIC upon a finding that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC or written agreement with the FDIC. We are not aware of any practice, condition or violation that might lead to the termination of the Bank's deposit insurance.

***New Assessments Under Dodd-Frank***

The FDIC assesses deposit insurance premiums on each insured institution quarterly based on annualized rates for one of four risk categories. The assessment base for calculating deposit insurance assessments is an institution's average total assets minus its average tangible equity (defined as Tier I capital). Under the FDIC's risk-based assessment system, insured institutions are assigned to one of four risk categories based on supervisory evaluations, regulatory capital levels and certain other risk factors. Rates are based on each institution's risk category and certain specified risk adjustments. Stronger institutions pay lower rates while riskier institutions pay higher rates. The assessment rate schedule establishes assessments ranging from 2.5 to 45 basis points. The FDIC may increase or decrease its rates for each quarter by 2 basis points without further rulemaking. In an emergency, the FDIC may also impose a special assessment.

***Minimum Reserve Ratios***

The Dodd-Frank Act establishes 1.35% as the minimum reserve ratio for the Deposit Insurance Fund ("DIF"). The FDIC had adopted a plan under which it would meet this ratio by September 30, 2020, the deadline imposed by the Dodd-Frank Act. The Dodd-Frank Act required the FDIC to offset the effect on institutions, with assets less than \$10 billion, of the increase in the statutory minimum reserve ratio to 1.35% from the former statutory minimum of 1.15%. During 2018 the DIF ratio reached 1.36%. Once the ratio hits 1.38%, the FDIC indicated it will automatically apply a small Bank's credits to reduce its regular insurance assessment up to the entire amount of the assessment. In addition to the statutory minimum ratio, the FDIC must designate a reserve ratio, known as the designated reserve ratio, or DRR, which may exceed the statutory minimum. The FDIC has established 2.0% as the DRR.

The FDIC has authority to increase insurance assessments. A significant increase in insurance premiums would likely have an adverse effect on the operating expenses and results of operations of the Bank. There can be no prediction as to what insurance assessment rates will be in the future. In addition to the assessment for deposit insurance, through 2019, institutions are required to make payments on bonds issued in the late 1980s by the Financing Corporation to recapitalize a predecessor deposit insurance fund.

### ***Capital Requirements***

State chartered commercial banks, such as the Bank, are required by the FRB to maintain minimum levels of regulatory capital. These minimum capital standards include: a ratio of total capital to risk-weighted assets of 9.875%, a ratio of Tier 1 capital to risk-weighted assets of 7.875%, a ratio of common equity Tier 1 capital to risk-weighted assets of 6.375%, or a ratio of Tier 1 capital to total assets of 4.00%. All of these ratios except for the ratio of Tier 1 capital to total assets include the capital conservation buffer of 1.875% phased-in beginning January 1, 2018. The regulations require that, in meeting the capital standards, institutions must generally deduct investments in and loans to subsidiaries engaged in activities as principal that are not permissible for a national bank.

The risk-based capital standard requires state chartered commercial banks to maintain Tier 1 and total capital (which is defined as core capital and supplementary capital) to risk-weighted assets of at least 7.875% and 9.875%, respectively. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet assets, recourse obligations, residual interests and direct credit substitutes, are multiplied by a risk-weight factor of 0.0% to 100.0%, assigned by the FRB capital regulation based on the risks believed inherent in the type of asset. Tier 1 capital is defined as common stockholders' equity (including retained earnings), certain noncumulative perpetual preferred stock and related surplus and minority interests in equity accounts of consolidated subsidiaries, less intangibles other than certain mortgage servicing rights and credit card relationships. The components of supplementary capital currently include cumulative preferred stock, long-term perpetual preferred stock, mandatory convertible securities, subordinated debt and intermediate preferred stock. Also included is the allowance for loan and lease losses limited to a maximum of 1.25% of risk-weighted assets. Overall, the amount of supplementary capital included as part of total capital cannot exceed 100.0% of core capital. The FRB also has authority to establish individual minimum capital requirements for financial institutions.

## Table of Contents

*Basel III – New Capital and Prompt Corrective Action Regulations.* In July 2013, the federal bank regulatory agencies issued interim final rules that revise and replace the current risk-based capital requirements in order to implement the “Basel III” regulatory capital reforms released by the Basel Committee on Banking Supervision and changes required by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Basel III reforms reflected in the final rules include an increase in the risk-based capital requirements and certain changes to capital components and the calculation of risk-weighted assets.

Effective January 1, 2015, bank holding companies with consolidated assets of \$1 billion or more and banks like Opportunity Bank must comply with new minimum capital ratio requirements to be phased-in between January 1, 2015 and January 1, 2019, which would consist of the following: (i) a new common equity Tier 1 capital to total risk weighted assets ratio of 4.5% which increased to 6.375% during 2018 with the capital conservation buffer of 1.875%; (ii) a Tier 1 capital to total risk weighted assets ratio of 6.0% which increased to 7.875% during 2018 with the capital conservation buffer of 1.875%; (iii) a total capital to total risk weighted assets ratio of 8.0% which increased to 9.875% during 2018 with the capital conservation buffer of 1.875%; and (iv) a Tier 1 capital to adjusted average total assets (“leverage”) ratio of 4.0%.

The capital conservation buffer, when fully phased-in will require maintenance of a minimum of 2.5% of common equity Tier 1 capital to total risk weighted assets in excess of the regulatory minimum capital ratio requirements described above. The 2.5% buffer will increase the minimum capital ratios to (i) a common equity Tier 1 capital ratio of 7.0%, (ii) a Tier 1 capital ratio of 8.5%, and (iii) a total capital ratio of 10.5%. The new buffer requirement will be phased-in between January 1, 2016 and January 1, 2019. If the capital ratio levels of a banking organization fall below the capital conservation buffer amount, the organization will be subject to limitations on (i) the payment of dividends; (ii) discretionary bonus payments; (iii) discretionary payments under Tier 1 instruments; and (iv) engaging in share repurchases.

The federal bank regulatory agencies also implemented changes to the prompt corrective action framework, which is designed to place restrictions on insured depository institutions if their capital ratios begin to show signs of weakness. These changes will take effect beginning January 1, 2015 and will require insured depository institutions to meet the following increased capital ratio requirements in order to qualify as “well capitalized:” (i) a new common equity Tier 1 capital ratio of 6.5%; (ii) a Tier 1 capital ratio of 8.0%; (iii) a total capital ratio of 10.0%; and (iv) a Tier 1 leverage ratio of 5.0%. See also the additional discussion below under “Prompt Corrective Action.”

Management believes that, as of December 31, 2018, the Company and the Bank would meet all capital adequacy requirements under the Basel III Capital rules on a fully phased-in basis as if such requirements were currently in effect; however, final rules are subject to regulatory discretion and could result in the need for additional capital levels in the future.

### ***Prompt Corrective Action***

Federal bank regulatory agencies are required to take certain supervisory actions against undercapitalized institutions, the severity of which depends upon the institution's degree of undercapitalization. Generally, an institution that has a ratio of total capital to risk-weighted assets of less than 8.0%, a ratio of Tier 1 capital to risk-weighted assets of less than 6.0%, a ratio of common equity Tier 1 capital to risk-weighted assets of less than 4.5%, or a ratio of Tier 1 capital to total assets of less than 4.0% is considered to be "undercapitalized." An institution that has a total risk-based capital ratio less than 6.0%, a Tier 1 capital ratio of less than 4.0%, a common equity Tier 1 capital ratio of less than 3.0% or a Tier 1 leverage ratio that is less than 3.0% is considered to be "significantly undercapitalized." An institution that has a tangible capital to assets ratio equal to or less than 2.0% is deemed to be "critically undercapitalized." Subject to a narrow exception, the FRB is required to appoint a receiver or conservator for a bank that is "critically undercapitalized." Regulations also require that a capital restoration plan be filed with the FRB within 45 days of the date a bank receives notice that it is "undercapitalized," "significantly undercapitalized" or "critically undercapitalized." In addition, numerous mandatory supervisory actions become immediately applicable to an undercapitalized institution, including, but not limited to, increased monitoring by regulators and restrictions on growth, capital distributions and expansion. "Significantly undercapitalized" and "critically undercapitalized" institutions are subject to more extensive mandatory regulatory actions. The FRB also could take any one of a number of discretionary supervisory actions, including the issuance of a capital directive and the replacement of senior executive officers and directors. At December 31, 2018, the Bank's capital ratios met the "well capitalized" standards.

Table of Contents

***Limitations on Capital Distributions***

A principal source of the parent holding company's cash is from dividends received from the Bank, which are subject to government regulation and limitation. Regulatory authorities may prohibit banks and bank holding companies from paying dividends in a manner that would constitute an unsafe or unsound banking practice. In addition, a bank may not pay cash dividends if that payment could reduce the amount of its capital below that necessary to meet minimum applicable regulatory capital requirements. The Bank is subject to Montana state law and cannot declare a dividend greater than the previous two years' net earnings without providing notice to the state. Additionally, current guidance from the FRB provides, among other things, that dividends per share on the Company's common stock generally should not exceed earnings per share, measured over the previous four fiscal quarters. Basel III also introduces additional limitations on banks' ability to issue dividends by imposing a capital conservation buffer requirement.

***Transactions with Affiliates***

The Bank's authority to engage in transactions with "affiliates" is limited by regulations and by Sections 23A and 23B of the Federal Reserve Act as implemented by the FRB's Regulation W. The term "affiliates" for these purposes generally means any company that controls or is under common control with an institution. Eagle is an affiliate of the Bank. In general, transactions with affiliates must be on terms that are as favorable to the institution as comparable transactions with non-affiliates. In addition, certain types of transactions, *i.e.* "covered transactions," are restricted to an aggregate percentage of the institution's capital. Collateral in specified amounts must be provided by affiliates in order to receive loans from an institution. In addition, banks are prohibited from lending to any affiliate that is engaged in activities that are not permissible for bank holding companies and no bank may purchase the securities of any affiliate other than a subsidiary.

Our authority to extend credit to executive officers, directors and 10.0% or greater shareholders ("insiders"), as well as entities controlled by these persons, is governed by Sections 22(g) and 22(h) of the Federal Reserve Act and its implementing regulation, FRB Regulation O. Among other things, loans to insiders must be made on terms substantially the same as those offered to unaffiliated individuals and not involve more than the normal risk of repayment. There is an exception for bank-wide lending programs that do not discriminate in favor of insiders. Regulation O also places individual and aggregate limits on the amount of loans that may be made to insiders based, in part, on the institution's capital position, and requires that certain prior board approval procedures be followed. Extensions of credit to executive officers are subject to additional restrictions on the types and amounts of loans that may be made. At December 31, 2018, we were in compliance with these regulations.

**Holding Company Regulation**

*General*

Eagle is a bank holding company subject to regulatory oversight of the FRB. Eagle is required to register and file reports with the FRB and is subject to regulation and examination by the FRB. In addition, the FRB has enforcement authority over Eagle and its non-bank institution subsidiaries which also permits the FRB to restrict or prohibit activities that are determined to present a serious risk to the Bank.

*Mergers and Acquisitions*

Eagle must obtain approval from the FRB before acquiring more than 5.0% of the voting stock of another bank or bank holding company or acquiring such an institution or holding company by merger, consolidation or purchase of its assets. In evaluating an application for Eagle to acquire control of a bank, the FRB would consider the financial and managerial resources and future prospects of Eagle and the target institution, the effect of the acquisition on the risk to the Deposit Insurance Fund, the convenience and the needs of the community and competitive factors.

Eagle obtained the necessary approvals from the FRB and the Montana Division of Banking and Financial Institutions before acquiring TwinCo on January 31, 2018 and BMB on January 1, 2019.

Table of Contents

*Acquisition of Eagle*

Under the Bank Holding Company Act and the Change in Bank Control Act, a notice or application must be submitted to the FRB if any person (including a company), or a group acting in concert, seeks to acquire 10.0% or more of Eagle's outstanding voting stock, unless the FRB has found that the acquisition will not result in a change in control of Eagle. In acting on such a notice or application, the FRB must take into consideration certain factors, including the financial and managerial resources of the acquirer and the anti-trust effect of the acquisition. Any company that acquires control will be subject to regulation as a bank holding company.

**Federal Securities Laws**

Eagle's common stock is registered with the SEC under the Exchange Act. We are subject to the information, proxy solicitation, insider trading restrictions and other requirements under the Exchange Act. Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and all amendments to those reports, filed with or furnished to the SEC, are available free of charge through our Internet website, [www.opportunitybank.com](http://www.opportunitybank.com), as soon as reasonably practical after we have electronically filed such material with, or furnished it to, the SEC. The SEC maintains an Internet site that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC at [www.sec.gov](http://www.sec.gov). The contents on or accessible through, these websites are not incorporated into this filing. Further, our references to the URLs for these websites are intended to be inactive textual references only.

**Sarbanes-Oxley Act of 2002**

The Sarbanes-Oxley Act addresses, among other issues, corporate governance, auditing and accounting, executive compensation and enhanced and timely disclosure of corporate information. As directed by the Sarbanes-Oxley Act, our Chief Executive Officer and Chief Financial Officer are required to certify that our quarterly and annual reports do not contain any untrue statement of a material fact. The rules adopted by the Securities and Exchange Commission under the Sarbanes-Oxley Act have several requirements, including having these officers certify that: they are responsible for establishing, maintaining and regularly evaluating the effectiveness of our internal control over financial reporting; they have made certain disclosures to our auditors and the audit committee of the board of directors about our internal control over financial reporting; and they have included information in our quarterly and annual reports about their evaluation and whether there have been changes in our internal control over financial reporting or in other factors that could materially affect internal control over financial reporting.

Table of Contents

**ITEM 1A. RISK FACTORS**

**We hold certain intangible assets that could be classified as impaired in the future. If these assets are considered to be either partially or fully impaired in the future, our earnings and the book values of these assets would decrease.**

As a result of the branch acquisition from Sterling in 2012, the final goodwill recorded related to the acquisition was \$7.03 million. In addition, we recorded goodwill related to the TwinCo acquisition of \$5.09 million during the first quarter of 2018. We are required to test our goodwill for impairment on a periodic basis. The impairment testing process considers a variety of factors, including the current market price of our common shares, the estimated net present value of our assets and liabilities and information concerning the terminal valuation of similarly situated insured depository institutions. It is possible that future impairment testing could result in a partial or full impairment of the value of our goodwill. If an impairment determination is made in a future reporting period, our earnings and the book value of goodwill will be reduced by the amount of the impairment.

**Risks associated with system failures, interruptions, or breaches of security could negatively affect our earnings.**

Information technology systems are critical to our business. We use various technology systems to manage our customer relationships, general ledger, securities, deposits, and loans. We have established policies and procedures to prevent or limit the impact of system failures, interruptions, and security breaches, but such events may still occur or may not be adequately addressed if they do occur. In addition, any compromise of our systems could deter customers from using our products and services. Although we rely on security systems to provide security and authentication necessary to effect the secure transmission of data, these precautions may not protect our systems from compromises or breaches of security.

In addition, we outsource a majority of our data processing to certain third-party providers. If these third-party providers encounter difficulties, or if we have difficulty communicating with them, our ability to adequately process and account for transactions could be affected, and our business operations could be adversely affected. Threats to information security also exist in the processing of customer information through various other vendors and their personnel.

The occurrence of any system failures, interruption, or breach of security could damage our reputation and result in a loss of customers and business thereby subjecting us to additional regulatory scrutiny, or could expose us to litigation and possible financial liability. Any of these events could have a material adverse effect on our financial condition and results of operations.

**Changes in the structure of Fannie Mae and Freddie Mac (“GSEs”) and the relationship among the GSEs, the federal government and the private markets, or the conversion of the current conservatorship of the GSEs into receivership, could result in significant changes to our securities portfolio.**

The GSEs are currently in conservatorship, with their primary regulator, the Federal Housing Finance Agency, acting as conservator. We cannot predict if, when or how the conservatorships will end, or any associated changes to the GSEs’ business structure that could result. There are several proposed approaches, including possible legislative changes in discussion in both the House Financial Services Committee and the Senate Banking Committee which, if enacted, could change the nature of government participation in the private mortgage market or alternatively the structure of the GSEs, the relationship among the GSEs, the government and the private markets, including the trading markets for agency conforming mortgage loans and markets for mortgage-related securities in which we participate. We cannot predict the prospects for the enactment, timing or content of legislative or rulemaking proposals regarding the future status of any of these approaches. Accordingly, there continues to be uncertainty regarding the future of the GSEs, including whether they will continue to exist in their current form. GSE reform, if enacted, could result in a significant change and adversely impact our business operations, particularly as to our residential mortgage lending activities.

**Our business may be adversely affected by conditions in the financial markets and economic conditions generally and in our market areas in particular.**

Our financial performance generally, and in particular the ability of our borrowers to pay interest on and repay principal of outstanding loans and the value of collateral securing those loans, as well as demand for loans and other products and services we offer and whose success we rely on to drive our future growth, is highly dependent upon the business environment in the markets in which we operate, principally in Montana, and in the United States as a whole. Unlike larger banks that are more geographically diversified, we provide banking and financial services to customers primarily in Montana. The economic conditions in our local markets may be different from, and in some instances worse than, the economic conditions in the United States as a whole. Some elements of the business environment that affect our financial performance include short-term and long-term interest rates, the prevailing yield curve, inflation and price levels, monetary policy, unemployment and strength of the domestic economy and local economy in the markets in which we operate. Unfavorable market conditions can result in deterioration in the credit quality of our borrowers and the demand for our products and services, an increase in the number of loan delinquencies, defaults and charge-offs, additional provisions for loan and lease losses, adverse asset values and an overall material adverse effect on the quality of our loan portfolio.

Unfavorable or uncertain economic and market conditions can be caused by declines in economic growth, business activity or investor or business confidence; limitations on the availability or increases in the cost of credit and capital; increases in inflation or interest rates; high unemployment; natural disasters; state or local government insolvency; or a combination of these or other factors.

Table of Contents

In recent years, economic growth and business activity across a wide range of industries and regions in the U.S. has been slow and uneven. There are continuing concerns related to the level of U.S. government debt and fiscal actions that may be taken to address that debt, further declining oil prices and ongoing federal budget negotiations that may have a destabilizing effect on financial markets. There can be no assurance that economic conditions will continue to improve, and these conditions could worsen. Economic pressure on consumers and uncertainty regarding continuing economic improvement may result in changes in consumer and business spending, borrowing and saving habits. Such conditions could have a material adverse effect on the credit quality of our loans or our business, financial condition or results of operations.

**If the allowance for credit losses is not sufficient to cover actual loan losses, our earnings could decrease.**

Our customers may not repay their loans according to the original terms, and the collateral, if any, securing the payment of these loans may be insufficient to pay any remaining loan balance. We may experience significant loan losses, which may have a material adverse effect on operating results. We make various assumptions and judgments about the collectability of the loan portfolio, including the creditworthiness of borrowers and the value of the real estate and other assets serving as collateral for the repayment of loans. If the assumptions prove to be incorrect, the allowance for credit losses may not be sufficient to cover losses inherent in our loan portfolio, resulting in additions to the allowance. Material additions to the allowance would materially decrease net income.

Our emphasis on the origination of consumer, commercial real estate and commercial business loans is one of the more significant factors in evaluating the allowance for loan losses. As we continue to increase the amount of such loans, additional or increased provisions for loan losses may be necessary and would decrease earnings.

Bank regulators periodically review our allowance for loan losses and may require an increase to the provision for loan losses or further loan charge-offs. Any increase in our allowance for loan losses or loan charge-offs as required by these regulatory authorities may have a material adverse effect on our results of operations or financial condition.

**We could record future losses on our securities portfolio.**

A number of factors or combinations of factors could require us to conclude in one or more future reporting periods that an unrealized loss exists with respect to our investment securities portfolio that constitutes an impairment that is other than temporary, which could result in material losses to us. These factors include, but are not limited to, continued failure by the issuer to make scheduled interest payments, an increase in the severity of the unrealized loss on a particular security, an increase in the continuous duration of the unrealized loss without an improvement in value or changes in market conditions and/or industry or issuer specific factors that would render us unable to forecast a full recovery in value. In addition, the fair values of securities could decline if the overall economy and the financial

condition of some of the issuers deteriorates and there is limited liquidity for these securities.

**Changes in our accounting policies or in accounting standards could materially affect how we report our financial condition and results of operations.**

Our accounting policies are essential to understanding our financial results and condition. Some of these policies require the use of estimates and assumptions that may affect the value of our assets or liabilities and financial results. Some of our accounting policies are critical because they require management to make difficult, subjective, and complex judgments about matters that are inherently uncertain and because it is likely that materially different amounts would be reported under different conditions or using different assumptions. If such estimates or assumptions underlying our financial statements are incorrect, we may experience material losses.

From time to time, the Financial Accounting Standards Board and the Securities and Exchange Commission change the financial accounting and reporting standards or the interpretation of those standards that govern the preparation of our financial statements. These changes are beyond our control, can be hard to predict and could materially impact how we report our results of operations and financial condition. We could also be required to apply a new or revised standard retroactively, resulting in our restating prior period financial statements in material amounts.

Table of Contents

**Because we have increased our commercial real estate and commercial business loan originations, our credit risk has increased and continued downturns in the local real estate market or economy could adversely affect our earnings.**

We intend to continue our recent emphasis on originating commercial real estate and commercial business loans. Commercial real estate and commercial business loans generally have more risk than the residential real estate (1-4 family) loans we originate. Because the repayment of commercial real estate and commercial business loans depends on the successful management and operation of the borrower's properties or related businesses, repayment of such loans can be affected by adverse conditions in the local real estate market or economy. Commercial real estate and commercial business loans may also involve relatively large loan balances to individual borrowers or groups of related borrowers. A downturn in the real estate market or the local economy could adversely affect the value of properties securing the loan or the revenues from the borrower's business, thereby increasing the risk of nonperforming loans. As our commercial real estate and commercial business loan portfolios increase, the corresponding risks and potential for losses from these loans may also increase.

**Declines in home values could decrease our loan originations and increase delinquencies and defaults.**

Declines in home values in our markets could adversely impact results from operations. Like all financial institutions, we are subject to the effects of any economic downturn, and in particular, a significant decline in home values would likely lead to a decrease in new home equity loan originations and increased delinquencies and defaults in both the consumer home equity loan and residential real estate loan portfolios and result in increased losses in these portfolios. Declines in the average sale prices of homes in our primary markets could lead to higher loan losses.

**We continually encounter technological change.**

The financial services industry is continually undergoing rapid technological change with frequent introductions of new, technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Our future success depends, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements than we do. We may not be able to effectively implement new, technology-driven products and services or be successful in marketing these products and services to our customers. In addition, the implementation of technological changes and upgrades to maintain current systems and integrate new ones may also cause service interruptions, transaction processing errors and system conversion delays and may cause us to fail to comply with applicable laws. Failure to successfully keep pace with technological change affecting the financial services industry and avoid interruptions, errors and delays could have a material adverse effect on our business, financial condition or results of operations.

We expect that new technologies and business processes applicable to the consumer credit industry will continue to emerge, and these new technologies and business processes may be better than those we currently use. Because the pace of technological change is high and our industry is intensely competitive, we may not be able to sustain our investment in new technology as critical systems and applications become obsolete or as better ones become available. A failure to maintain current technology and business processes could cause disruptions in our operations or cause our products and services to be less competitive, all of which could have a material adverse effect on our business, financial condition or results of operations.

**We depend on the services of our executive officers and other key employees.**

Our success depends upon the continued employment of certain members of our senior management team. We also depend upon the continued employment of the individuals that manage several of our key functional areas. The departure of any member of our senior management team may adversely affect our operations.

**Changes in interest rates could adversely affect our results of operations and financial condition.**

Our results of operations and financial condition are significantly affected by changes in interest rates. Our results of operations depend substantially on our net interest income, which is the difference between the interest income we earn on our interest-earning assets, such as loans and securities, and the interest expense we pay on our interest-bearing liabilities, such as deposits, borrowings and trust preferred securities.

Table of Contents

Changes in interest rates may also affect the average life of loans and mortgage-related securities. Decreases in interest rates can result in increased prepayments of loans and mortgage-related securities, as borrowers refinance to reduce their borrowing costs. Under these circumstances, we are subject to reinvestment risk to the extent that we are unable to reinvest the cash received from such prepayments at rates that are comparable to the rates on existing loans and securities. Additionally, increases in interest rates may decrease loan demand and make it more difficult for borrowers to repay adjustable rate loans. Also, increases in interest rates may extend the life of fixed rate assets, which would restrict our ability to reinvest in higher yielding alternatives, and may result in customers withdrawing certificates of deposit early so long as the early withdrawal penalty is less than the interest they could receive as a result of the higher interest rates.

Changes in interest rates also affect the current fair value of our interest-earning securities portfolio. Generally, the value of securities moves inversely with changes in interest rates.

**We earn a significant portion of our noninterest income through sales of residential mortgages in the secondary market. We rely on the mortgage secondary market for some of our liquidity.**

Our noninterest income attributable to mortgage banking activities has grown significantly in recent years. We originate and sell mortgage loans, including \$279.74 million of mortgage loans sold during 2018. We rely on Federal National Mortgage Association (“FNMA”), Federal Home Loan Mortgage Corporation (“FHLMC”) and other purchasers to purchase loans in order to reduce our credit risk and provide funding for additional loans we desire to originate. We cannot provide assurance that these purchasers will not materially limit their purchases from us due to capital constraints or other factors, including, with respect to FNMA and FHLMC, a change in the criteria for conforming loans. In addition, various proposals have been made to reform the U.S. residential mortgage finance market, including the role of FNMA and FHLMC. The exact effects of any such reforms are not yet known, but may limit our ability to sell conforming loans to FNMA and FHLMC. In addition, mortgage lending is highly regulated, and our inability to comply with all federal and state regulations and investor guidelines regarding the origination, underwriting documentation and servicing of mortgage loans may also impact our ability to continue selling mortgage loans. If we are unable to continue to sell loans in the secondary market or we experience a period of low mortgage activity, our noninterest income as well as our ability to fund, and thus originate, additional mortgage loans may be adversely affected, which could have a material adverse effect on our business, financial condition or results of operations.

**There can be no assurance we will be able to continue paying dividends on our common stock at recent levels.**

We may not be able to continue paying quarterly dividends commensurate with recent levels given that the ability to pay dividends on our common stock depends on a variety of factors. The payment of dividends is subject to government regulation in that the regulatory authorities may prohibit banks and bank holding companies from paying dividends that would constitute an unsafe or unsound banking practice. Our ability to pay dividends is subject to

certain regulatory requirements. The Federal Reserve generally prohibits a bank holding company from declaring or paying a cash dividend which would impose undue pressure on the capital of a subsidiary bank or would be funded only through borrowing or other arrangements that might adversely affect a bank holding company's financial position. The Federal Reserve Board policy is that a bank holding company should not continue its existing rate of cash dividends on its common stock unless its net income is sufficient to fully fund each dividend and its prospective rate of earnings retention appears consistent with its capital needs, asset quality and overall financial condition. The power of the board of directors of an insured depository institution to declare a cash dividend or other distribution with respect to capital is subject to statutory and regulatory restrictions which limit the amount available for such distribution depending upon the earnings, financial condition and cash needs of the institution, as well as general business conditions.

As a result, future dividends will generally depend on the level of earnings at the Bank. The Bank is subject to Montana law and cannot declare a dividend greater than the previous two year's earnings without providing notice to the state. Also, in the event there shall occur an event of default on any of our debt instruments, we would be unable to pay any dividends on our common stock.

**Our business strategy includes significant growth plans, and our financial condition and results of operations could be negatively affected if we fail to grow or fail to manage our growth effectively.**

We intend to pursue an organic growth strategy for our business; however, we regularly evaluate potential acquisitions and expansion opportunities. If appropriate opportunities present themselves, we expect to engage in selected acquisitions of financial institutions, branch acquisitions and other business growth initiatives or undertakings. There can be no assurance that we will successfully identify appropriate opportunities, that we will be able to negotiate or finance such activities or that such activities, if undertaken, will be successful. There are risks associated with our growth strategy. To the extent that we grow through acquisitions, we cannot ensure that we will be able to adequately or profitably manage this growth.

Table of Contents

Acquiring other banks, branches or other assets, as well as other expansion activities, involves various risks including the risks of incorrectly assessing the credit quality of acquired assets, encountering greater than expected costs of integrating acquired banks or branches, the risk of loss of customers and/or employees of the acquired institution or branch, executing cost savings measures, not achieving revenue enhancements and otherwise not realizing the transaction's anticipated benefits. Our ability to address these matters successfully cannot be assured. In addition, our strategic efforts may divert resources or management's attention from ongoing business operations, may require investment in integration and in development and enhancement of additional operational and reporting processes and controls and may subject us to additional regulatory scrutiny.

Our growth initiatives may also require us to recruit and retain experienced personnel to assist in such initiatives. Accordingly, the failure to identify and retain such personnel would place significant limitations on our ability to successfully execute our growth strategy. In addition, to the extent we expand our lending beyond our current market areas, we could incur additional risks related to those new market areas. We may not be able to expand our market presence in our existing market areas or successfully enter new markets.

If we do not successfully execute our acquisition growth plan, it could adversely affect our business, financial condition, results of operations, reputation and growth prospects. In addition, if we were to conclude that the value of an acquired business had decreased and that the related goodwill had been impaired, that conclusion would result in an impairment of goodwill charge, which would adversely affect our results of operations. While we believe we will have the executive management resources and internal systems in place to successfully manage our future growth, there can be no assurance growth opportunities will be available or that we will successfully manage our growth.

**Strong competition may limit growth and profitability.**

Competition in the banking and financial services industry is intense. We compete with commercial banks, savings institutions, mortgage brokerage firms, credit unions, finance companies, mutual funds, insurance companies, and brokerage and investment banking firms operating locally and elsewhere. Many of these competitors (whether regional or national institutions) have substantially greater resources and lending limits than we have and may offer certain services that we do not or cannot provide. Our profitability depends upon our ability to successfully compete in our market areas.

**We operate in a highly regulated environment and may be adversely affected by changes in laws and regulations.**

We are subject to extensive regulation, supervision and examination by the Board of Governors of the Federal Reserve Board and the Montana Division of Banking and Financial Institutions. The federal banking laws and

regulations govern the activities in which we may engage, and are primarily for the protection of depositors and the Deposit Insurance Fund at the FDIC. These regulatory authorities have extensive discretion in connection with their supervisory and enforcement activities, including the ability to impose restrictions on a bank's operations, reclassify assets, determine the adequacy of a bank's allowance for loan losses and determine the level of deposit insurance premiums assessed. Any change in such regulation and oversight, whether in the form of regulatory policy, new regulations or legislation or additional deposit insurance premiums could have a material impact on our operations. Because our business is highly regulated, the laws and applicable regulations are subject to frequent change. Any new laws, rules and regulations could make compliance more difficult or expensive or otherwise adversely affect our business, financial condition or prospects.

**Financial reform legislation enacted by Congress has, among other things, tightened capital standards, created a new Consumer Financial Protection Bureau and resulted in new laws and regulations that are expected to increase our costs of operations.**

Since the recent financial crisis, federal and state banking laws and regulations, as well as interpretations and implementations of these laws and regulations, have undergone substantial review and change. In particular, the Dodd-Frank Act drastically revised the laws and regulations under which we operate. Financial institutions generally have also been subjected to increased scrutiny from regulatory authorities.

The Dodd-Frank Act created the Consumer Financial Protection Bureau with broad powers to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all banks and savings institutions, including the authority to prohibit "unfair, deceptive or abusive" acts and practices. The Consumer Financial Protection Bureau has examination and enforcement authority over all banks and savings institutions with more than \$10 billion in assets. Banks with \$10 billion or less in assets will continue to be examined for compliance with the consumer laws by their primary bank regulators, which in the case of the Bank is the FRB.

Table of Contents

It is difficult to predict at this time what impact the Dodd-Frank Act and its implementing rules will have on community banks like the Bank. However, it is expected that at a minimum they will increase our operating and compliance costs and could increase our interest expense.

**If our investment in the Federal Home Loan Bank of Des Moines becomes impaired, our earnings and shareholders' equity could decrease.**

We are required to own common stock of the Federal Home Loan Bank of Des Moines ("FHLB") to qualify for membership in the FHLB System and to be eligible to borrow funds under the FHLB's advance program. The aggregate cost of our FHLB common stock as of December 31, 2018 was \$5.01 million. FHLB common stock is not a marketable security and can only be redeemed by the FHLB.

FHLB's may be subject to accounting rules and asset quality risks that could materially lower their regulatory capital. In an extreme situation, it is possible that the capitalization of a FHLB, including the FHLB of Des Moines, could be substantially diminished or reduced to zero. Consequently, we believe that there is a risk that our investment in FHLB of Des Moines common stock could be deemed impaired at some time in the future, and if this occurs, it would cause our earnings and shareholders' equity to decrease by the amount of the impairment charge.

**ITEM 1B. UNRESOLVED STAFF COMMENTS.**

None.

Table of Contents**ITEM 2. PROPERTIES.**

Eagle's and the Bank's executive office is located at 1400 Prospect Avenue in Helena, Montana. As of December 31, 2018, the Bank conducted its business through 19 offices. These offices are located in Helena, Butte, Bozeman, Townsend, Livingston, Big Timber, Billings, Missoula, Hamilton, Great Falls, Sheridan, and Twin Bridges, Montana. The Sheridan and Twin Bridges branches were acquired in 2018 as part of the TwinCo acquisition. In December 2018, the Great Falls office moved to a new location on River Drive South. The principal banking office in Helena also serves as the executive headquarters. This headquarters houses approximately 31.0% of the Bank's full-time employees. In addition, an operations center is located in Helena. The following table includes the location of each of the Bank's offices, the year the office was opened and the net book value including land, buildings and furniture and equipment. The square footage at each location is also presented.

\*\*Property under construction. Not an operational branch as of December 31, 2018

As of December 31, 2018, the net book value of land, buildings and furniture and equipment owned by the Bank, less accumulated depreciation, totaled \$29.34 million. This includes construction in progress of \$1.79 million, primarily relating to the construction of new branch locations. The Company is in the process of building a future branch in Billings on North 27<sup>th</sup> Street.

### ITEM 3. LEGAL PROCEEDINGS.

The Bank, from time to time, is a party to routine litigation, which arises in the normal course of business, such as claims to enforce liens, condemnation proceedings on properties in which the Bank holds security interests, claims involving the making and servicing of real property loans, and other issues incident to the business of the Bank. There were no lawsuits pending or known by the Company to be contemplated against Eagle or the Bank as of December 31, 2018.

### ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

Table of Contents**PART II****ITEM MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS  
5. AND ISSUER PURCHASES OF EQUITY SECURITIES.**

Our common stock is traded on the Nasdaq Global Market under the symbol "EBMT." At the close of business on December 31, 2018, there were 5,477,652 shares of common stock outstanding, held by approximately 802 shareholders of record. The closing price of the common stock on December 31, 2018, was \$16.50 per share. The following table includes the high and low prices for our common stock for each quarter presented, as well as, dividends paid during each quarter:

| Quarter Ended              | High    | Low     | Dividends<br>Paid |
|----------------------------|---------|---------|-------------------|
| <b>Calendar Year 2018:</b> |         |         |                   |
| December 31, 2018          | \$18.45 | \$14.20 | \$ 0.0925         |
| September 30, 2018         | 19.35   | 16.85   | 0.0925            |

Payment of dividends on our shares of common stock is subject to determination and declaration by the Board of Directors (the "Board") and will depend upon a number of factors, including capital requirements, regulatory limitations on the payment of dividends, our results of operations and financial condition, tax considerations and general economic conditions. No assurance can be given that dividends will be declared or, if declared, what the amount of dividends will be, or whether such dividends, once declared, will continue.

On July 19, 2018, the Board authorized the repurchase of up to 100,000 shares of its common stock. Under the plan, shares may be purchased by the Company on the open market or in privately negotiated transactions. The extent to which the company repurchases its shares and the timing of such repurchase will depend upon market conditions and other corporate considerations. No shares were purchased under this plan during the three months ended December 31, 2018 or September 30, 2018. However, during 2019, 36,000 shares were purchased at an average price of \$17.49 per share. The plan expires on July 19, 2019.

On July 20, 2017, the Board authorized the repurchase of up to 100,000 shares of its common stock. Under the plan, shares could be purchased by the Company on the open market or in privately negotiated transactions. No shares were purchased under this plan. The plan expired on July 20, 2018.

On July 21, 2016, the Board authorized the repurchase of up to 100,000 shares of its common stock. Under the plan, shares could be purchased by the Company on the open market or in privately negotiated transactions. No shares were purchased under this plan. The plan expired on July 21, 2017.

**ITEM 6. SELECTED FINANCIAL DATA.**

This item has been omitted based on Eagle's status as a smaller reporting company.

Table of Contents

**ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS  
7. OF OPERATIONS.**

The following discussion and analysis of the financial condition and results of operations of Eagle is intended to help investors understand our company and our operations. The financial review is provided as a supplement to, and should be read in conjunction with the Consolidated Financial Statements and the related Notes included elsewhere in this report.

**Overview**

Historically, our principal business has consisted of attracting deposits from the general public and the business community and making loans secured by various types of collateral, including real estate and other consumer assets. We are significantly affected by prevailing economic conditions, particularly interest rates, as well as government policies concerning, among other things, monetary and fiscal affairs, housing and financial institutions and regulations regarding lending and other operations, privacy and consumer disclosure. Attracting and maintaining deposits is influenced by a number of factors, including interest rates paid on competing investments offered by other financial and non-financial institutions, account maturities, fee structures and levels of personal income and savings. Lending activities are affected by the demand for funds and thus are influenced by interest rates, the number and quality of lenders and regional economic conditions. Sources of funds for lending activities include deposits, borrowings, repayments on loans, cash flows from maturities of investment securities and income provided from operations.

Our earnings depend primarily on our level of net interest income, which is the difference between interest earned on our interest-earning assets, consisting primarily of loans and investment securities, and the interest paid on interest-bearing liabilities, consisting primarily of deposits, borrowed funds, and trust-preferred securities. Net interest income is a function of our interest rate spread, which is the difference between the average yield earned on our interest-earning assets and the average rate paid on our interest-bearing liabilities, as well as a function of the average balance of interest-earning assets compared to interest-bearing liabilities. Also contributing to our earnings is noninterest income, which consists primarily of service charges and fees on loan and deposit products and services, net gains and losses on sale of assets, and mortgage loan service fees. Net interest income and noninterest income are offset by provisions for loan losses, general administrative and other expenses, including salaries and employee benefits and occupancy and equipment costs, as well as by state and federal income tax expense.

The Bank has a strong mortgage lending focus, with loan originations in single-family residential mortgages, which has enabled it to successfully market home equity loans, as well as a wide range of shorter term consumer loans for various personal needs (automobiles, recreational vehicles, etc.). In recent years we have also focused on adding commercial loans to our portfolio, both real estate and non-real estate. We have made significant progress in this initiative. As of December 31, 2018, commercial real estate and commercial business loans represented 53.13% and 12.43% of the total loan portfolio, respectively. The purpose of this diversification is to mitigate our dependence on the mortgage market, as well as to improve our ability to manage our interest rate spread. The Bank's management

recognizes that fee income will also enable it to be less dependent on specialized lending and it maintains a significant loan serviced portfolio, which provides a steady source of fee income. As of December 31, 2018, we had mortgage servicing rights, net of \$7.10 million compared to \$6.58 million as of December 31, 2017. Gain on sale of loans also provides significant fee income or noninterest income in periods of high mortgage loan origination volumes. Such income will be adversely affected in periods of lower mortgage activity.

Fee income is also supplemented with fees generated from our deposit accounts. The Bank has a high percentage of non-maturity deposits, such as checking accounts and savings accounts, which allows management flexibility in managing its spread. Non-maturity deposits and certificates of deposit do not automatically reprice as interest rates rise.

In recent years, management's focus has been on improving our core earnings. Core earnings can be described as income before taxes, with the exclusion of gain on sale of loans and adjustments to the market value of our loans serviced portfolio. Management believes that we will need to continue to focus on increasing net interest margin, other areas of fee income, and control operating expenses to achieve earnings growth going forward. Management's strategy of growing the loan portfolio and deposit base is expected to help achieve these goals: loans typically earn higher rates of return than investments; a larger deposit base will yield higher fee income; increasing the asset base will reduce the relative impact of fixed operating costs. The biggest challenge to management's strategy is funding the growth of our balance sheet in an efficient manner. Though deposit growth this last year was steady, it may become more difficult to maintain due to significant competition and possible reduced customer demand for deposits as customers may shift into other asset classes.

## Table of Contents

Other than in limited circumstances for certain high-credit-quality customers, we do not offer “interest only” mortgage loans on residential 1-4 family properties (where the borrower pays interest but no principal for an initial period, after which the loan converts to a fully amortizing loan). We also do not offer loans that provide for negative amortization of principal, such as “Option ARM” loans, where the borrower can pay less than the interest owed on their loan, resulting in an increased principal balance during the life of the loan. We do not offer “subprime loans” (loans that generally target borrowers with weakened credit histories typically characterized by payment delinquencies, previous charge-offs, judgments, bankruptcies, or borrowers with questionable repayment capacity as evidenced by low credit scores or high debt-burden ratios) or Alt-A loans (traditionally defined as loans having less than full documentation).

The level and movement of interest rates impacts the Bank’s earnings as well. The Federal Open Market Committee (“FOMC”) increased the federal funds target rate during the year ended December 31, 2018 from 1.50% to 2.50%.

From time to time the Bank has considered growth through mergers or acquisition as an alternative to its strategy of organic growth. On September 5, 2017, the Company entered into an Agreement and Plan of Merger with TwinCo, a Montana corporation, and TwinCo’s wholly-owned subsidiary, Ruby Valley Bank, a Montana chartered commercial bank to acquire 100% of TwinCo’s equity voting interests. The merger agreement provided that Ruby Valley Bank would merge with and into Opportunity Bank of Montana and that TwinCo would merge with and into the Company. Ruby Valley Bank operated 2 branches in Madison County, Montana. The transaction provided an opportunity to expand market presence and lending activities, particularly in agricultural lending. The acquisition closed January 31, 2018, after receipt of approvals from regulatory authorities, approval of TwinCo shareholders and the satisfaction of other closing conditions. The total consideration paid was \$18.93 million and included cash consideration of \$9.90 million and common stock issued of \$9.03 million.

Effective January 1, 2019, Eagle completed its previously announced merger (the “Merger”) with Big Muddy Bancorp, Inc. (“BMB”), pursuant to an Agreement and Plan of Merger, dated as of August 21, 2018, by and among Eagle, Opportunity Bank of Montana, BMB and BMB’s wholly-owned subsidiary, The State Bank of Townsend, a Montana chartered commercial bank (“SBOT”). At the effective time of the Merger, BMB merged with and into Eagle, with Eagle continuing as the surviving corporation. SBOT operates four branches in Townsend, Dutton, Denton and Choteau, Montana. Eagle acquired approximately \$108.00 million in assets, \$92.00 million in deposits and \$92.00 million in gross loans based on BMB’s September 30, 2018 financial statements.

## Recent Accounting Pronouncements

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606). This guidance is a comprehensive new revenue recognition standard that supersedes substantially all existing revenue recognition guidance. The new standard’s core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make

more estimates than under existing guidance. These may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. In July 2015, the FASB agreed to delay the effective date of the standard by one year. Therefore, the new standard was effective in the first quarter of 2018 and was adopted by the Company.

Our revenue is comprised of net interest income on financial assets and financial liabilities, which is explicitly excluded from the scope of ASU 2014-09, and non-interest income. The largest percentage of our non-interest income is derived from the gain on sale of mortgage loans. The gains are recognized at the time of the sale of the loan, when proceeds are sent to us by the investor purchasing the loan.

No change in the recognition of revenue on that portion of our noninterest income was recognized. We also evaluated the impact of this standard on our revenue from our wealth management division and it did not have a significant impact on our consolidated financial statements.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments – Overall: Recognition and Measurement of Financial Assets and Financial Liabilities (Subtopic 825-10). The amendment has a number of provisions including the requirements that public business entities use the exit price notion when measuring the fair value of financial instruments for disclosure purposes, a separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (i.e. securities or loans receivables), and eliminating the requirement for public business entities to disclose the methods and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost. The amendment is effective for annual and interim reporting periods beginning after December 15, 2017 and was adopted by the Company in the first quarter of 2018.

## Table of Contents

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) intended to improve financial reporting regarding leasing transactions. The new standard affects all companies and organizations that lease assets. The standard will require organizations to recognize on the balance sheet the assets and liabilities for the rights and obligations created by those leases if the lease terms are more than 12 months. The guidance also will require qualitative and quantitative disclosures providing additional information about the amounts recorded in the financial statements. The amendments in this update are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company is evaluating the potential impact of the amendment on the Company's consolidated financial statements. We currently lease seven locations that serve as full-service branches, with the longest running lease expiring in 2028. We are using a third party vendor to assist with the implementation of this standard.

In September 2016, the FASB issued ASU No. 2016-13, Financial Instruments – Credit Losses (Topic 326) intended to improve financial reporting by requiring timelier recording of credit losses on loans and other financial instruments held by financial institutions and other organizations. The standard requires an organization to measure all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions and reasonable and supportable forecasts. Financial institutions and other organizations will now use forward-looking information to better inform their credit loss estimates. The standard also requires enhanced disclosures to help investors and other financial statement users better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an organization's portfolio. These disclosures include qualitative and quantitative requirements that provide additional information about the amounts recorded in the financial statements. Additionally, the standard amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration.

The amendments in this update are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. All entities may adopt the amendments in this update earlier as of the fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. An entity will apply the amendments in this update through a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective (that is, a modified-retrospective approach).

The Company believes the amendments in this update will have an impact on the Company's consolidated financial statements and is working to evaluate the significance of that impact. In that regard, we have established a working group under the direction of our Chief Financial Officer and Chief Credit Officer. The group is composed of individuals from the finance and credit administration areas of the Company. We are currently developing an implementation plan, including assessment of processes, segmentation of the loan portfolio and identifying and adding data fields necessary for analysis. The adoption of this standard is likely to result in an increase in the allowance for loan and lease losses as a result of changing from an "incurred loss" model to an "expected loss" model. While we currently cannot reasonably estimate the impact of adopting this standard, we expect the impact will be influenced by the composition, characteristics and quality of our loan and securities portfolios, as well as the general economic conditions and forecasts as of the adoption date.

In January 2017, the FASB issued ASU No. 2017-04, Intangibles – Goodwill and Other (Topic 350) to amend and simplify current goodwill impairment testing to eliminate Step 2 from the current provisions. Under the new guidance, an entity should perform the goodwill impairment test by comparing the fair value of a reporting unit with its carrying value and recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value. An entity still has the option to perform the qualitative assessment for a reporting unit to determine if a quantitative impairment test is necessary. The guidance will be effective for the Company on January 1, 2020 and is not expected to have a significant impact on the Company's consolidated financial statements. We have improved our internal reporting systems as it relates to profitability by divisions and markets within the Company. We expect these systems to help in our evaluation of potential impairment.

In March 2017, the FASB issued ASU No. 2017-08, Receivables–Nonrefundable Fees and Other Costs (Subtopic 310-20) to shorten the amortization period for certain purchased callable debt securities held at a premium to the earliest call date. Currently, entities generally amortize the premium as a yield adjustment over the contractual life of the security. The guidance does not change the accounting for callable debt securities held at a discount. For public business entities, the guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted, including in an interim period. We have currently been following this guidance based on our internal investment policy guidelines. There is little impact on our consolidated financial statements, as we typically do not invest in these types of securities.

Table of Contents

**Critical Accounting Policies**

Certain accounting policies are important to the understanding of our financial condition, since they require management to make difficult, complex or subjective judgments, some of which may relate to matters that are inherently uncertain. Estimates associated with these policies are susceptible to material changes as a result of changes in facts and circumstances, including, but without limitation, changes in interest rates, performance of the economy, financial condition of borrowers and laws and regulations. The following are the accounting policies we believe are critical.

**Allowance for Loan Losses**

We recognize that losses will be experienced on loans and that the risk of loss will vary with, among other things, the type of loan, the creditworthiness of the borrower, general economic conditions and the quality of the collateral for the loan. We maintain an allowance for loan losses to absorb losses inherent in the loan portfolio. The allowance for loan losses represents management's estimate of probable losses based on all available information. The allowance for loan losses is based on management's evaluation of the collectability of the loan portfolio, including past loan loss experience, known and inherent losses, information about specific borrower situations and estimated collateral values, and current economic conditions. The loan portfolio and other credit exposures are regularly reviewed by management in its determination of the allowance for loan losses. The methodology for assessing the appropriateness of the allowance includes a review of historical losses, internal data including delinquencies among others, industry data, and economic conditions.

As an integral part of their examination process, the FRB and the Montana Division of Banking will periodically review our allowance for loan losses and may require us to make additional provisions for estimated losses based upon judgments different from those of management. In establishing the allowance for loan losses, loss factors are applied to various pools of outstanding loans. Loss factors are derived using our historical loss experience and may be adjusted for factors that affect the collectability of the portfolio as of the evaluation date. Commercial business loans that are criticized are evaluated individually to determine the required allowance for loan losses and to evaluate the potential impairment of such loans under FASB ASC Topic 310 *Receivables*. Although management believes that it uses the best information available to establish the allowance for loan losses, future adjustments to the allowance for loan losses may be necessary and results of operations could be adversely affected if circumstances differ substantially from the assumptions used in making the determinations. Because future events affecting borrowers and collateral cannot be predicted with certainty, there can be no assurance that the existing allowance for loan losses is adequate or that increases will not be necessary should the quality of loans deteriorate as a result of the factors discussed previously. Any material increase in the allowance for loan losses may adversely affect our financial condition and results of operations. The allowance is based on information known at the time of the review. Changes in factors underlying the assessment could have a material impact on the amount of the allowance that is necessary and the amount of provision to be charged against earnings. Such changes could impact future results.

## Valuation of Investment Securities

All of our investment securities are classified as available-for-sale and recorded at current fair value. Unrealized gains or losses, net of deferred taxes, are reported in other comprehensive income as a separate component of shareholders' equity. In general, fair value is based upon quoted market prices of identical assets, when available. If quoted market prices are not available, fair value is based upon valuation models that use cash flow, security structure and other observable information. Where sufficient data is not available to produce a fair valuation, fair value is based on broker quotes for similar assets. Broker quotes may be adjusted to ensure that financial instruments are recorded at fair value. Adjustments may include unobservable parameters, among other things. No adjustments were made to any broker quotes received by us.

We conduct a quarterly review and evaluation of our investment securities to determine if any declines in fair value are other than temporary. In making this determination, we consider the period of time the securities were in a loss position, the percentage decline in comparison to the securities' amortized cost, the financial condition of the issuer, if applicable, and the delinquency or default rates of underlying collateral. We consider our intent to sell the investment securities and the likelihood that we will not have to sell the investment securities before recovery of their cost basis. If impairment exists, credit related impairment losses are recorded in earnings while noncredit related impairment losses are recorded in accumulated other comprehensive income.

Table of Contents

**Deferred Income Taxes**

We use the asset and liability method of accounting for income taxes as prescribed in FASB ASC Topic 740 *Income Taxes*. Using this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. If current available information raises doubt as to the realization of the deferred tax assets, a valuation allowance is established. Deferred tax assets and liabilities are measured using enacted tax rates expected to be applied to taxable income in the years in which those temporary differences are expected to be recovered or settled. We exercise significant judgment in evaluating the amount and timing of recognition of the resulting tax liabilities and assets. These judgments require us to make projections of future taxable income. The judgments and estimates we make in determining our deferred tax assets, which are inherently subjective, are reviewed on an ongoing basis as regulatory and business factors change. A reduction in estimated future taxable income could require us to record a valuation allowance. Changes in levels of valuation allowances could result in increased income tax expense, and could negatively affect earnings.

**Financial Condition**

***December 31, 2018 compared to December 31, 2017***

Total assets increased \$137.12 million, or 19.1%, to \$853.90 million at December 31, 2018 from \$716.78 million at December 31, 2017. The largest driver of the increase was the increase in loans receivable, net, partly due to the acquisition of TwinCo. Loans receivable, net increased by \$102.93 million or 20.3%, to \$610.33 million at December 31, 2018 from \$507.40 million at December 31, 2017. Total liabilities increased by \$125.93 million, or 19.9%, to \$759.10 million from \$633.17 million at December 31, 2017. The increase was primarily due to an increase in deposits due in part to the TwinCo acquisition, as well as an increase in FHLB advances and other borrowings. Total deposits increased \$106.05 million or 20.4%, to \$626.61 million at December 31, 2018 from \$520.56 million at December 31, 2017. FHLB advances and other borrowings increased \$19.25 million to \$102.22 million at December 31, 2018 compared to \$82.97 million at December 31, 2017. Total shareholders' equity increased \$11.19 million to \$94.81 million at December 31, 2018 compared to \$83.62 million at December 31, 2017.

**Balance Sheet Details**

***Investment Activities***

We maintain a portfolio of investment securities, classified as either available-for-sale (including those accounted for under FASB ASC Topic 825) or held-to-maturity to enhance total return on investments. Our investment securities include U.S. government and agency obligations, Small Business Administration pools, municipal securities, mortgage-backed securities (“MBSs”), collateralized mortgage obligations (“CMOs”), asset-backed securities (“ABSs”), and corporate obligations, all with varying characteristics as to rate, maturity and call provisions. There were no held-to-maturity investment securities included in the investment portfolio at December 31, 2018 or 2017. All investment securities included in the investment portfolio are available-for-sale. Eagle also has interest-bearing deposits in other banks and stock in FHLB and FRB.

The following table summarizes investment activities:

|                                     | December 31,<br>2018 |                        | 2017          |                        | 2016          |                        |   |  |

Table of Contents

Securities available-for-sale increased \$10.13 million or 7.7%, to \$142.17 million at December 31, 2018 compared to \$132.04 million at December 31, 2017. The net increase was due in part to the acquisition of TwinCo. The largest increase in securities available-for-sale was for ABSs, which increased to \$10.20 million at December 31, 2018 primarily due to purchase activity. U.S. government and agency securities increased \$4.49 million, also primarily due to purchase activity. CMOs increased \$4.09 million mainly due to purchase activity. Municipal obligations increased slightly by \$392,000 due to investment purchases largely offset by investment sales. MBSs decreased \$5.52 million primarily due to principal payments. MBSs sales activity was offset by purchases activity. Corporate obligations decreased by \$3.53 million largely due to investment sales and the maturities.

Table of Contents

The following table sets forth information regarding the values, weighted average yields and maturities of investments. The yields on municipal bonds have been computed on a tax equivalent basis.

Table of Contents*Lending Activities*

Loans receivable increased \$102.93 million to \$610.33 at December 31, 2018 due in part to the TwinCo acquisition. The TwinCo acquisition included \$55.06 million of acquired loans. Excluding acquired loans, loans receivable, net increased by \$47.87 million. Including acquired loans, total commercial real estate loans increased \$83.65 million, total commercial loans increased \$10.90 million, total residential loans increased \$8.89 million, and consumer loans increased \$853,000. These increases were slightly offset by a decrease in home equity loans of \$513,000. Total loan originations were \$517.47 million for the year ended December 31, 2018, with total residential 1-4 family accounting for \$346.44 million of the total. Total commercial real estate originations were \$97.71 million. Total commercial and home equity loan originations totaled \$49.12 million and \$14.94 million, respectively, for the same period. Consumer loan originations totaled \$9.26 million. Loans held-for-sale decreased by \$1.63 million, to \$7.32 million at December 31, 2018 from \$8.95 million at December 31, 2017.

*Loan Maturities.* The following table sets forth the estimated maturity of the loan portfolio of the Bank at December 31, 2018. Balances exclude deferred loan fees and allowance for loan losses. Scheduled principal repayments of loans do not necessarily reflect the actual life of such assets. The average life of a loan is typically substantially less than its contractual terms because of prepayments. In addition, due on sale clauses on loans generally give the Bank the right to declare loans immediately due and payable in the event, among other things, the borrower sells the real property, subject to the mortgage, and the loan is not paid off. All mortgage loans are shown to be maturing based on the date of the last payment required by the loan agreement, except as noted.

Loans having no stated maturity, those without a scheduled payment, demand loans and matured loans, are shown as due within six months.

<sup>(1)</sup> Includes loans held-for-sale.

Table of Contents

*Nonperforming Assets.* Generally, our collection procedures provide that when a loan is 15 or more days delinquent, the borrower is sent a past due notice. If the loan becomes 30 days delinquent, the borrower is sent a written delinquency notice requiring payment. If the delinquency continues, subsequent efforts are made to contact the delinquent borrower, including face to face meetings and counseling to resolve the delinquency. All collection actions are undertaken with the objective of compliance with the Fair Debt Collection Act.

For mortgage loans and home equity loans, if the borrower is unable to cure the delinquency or reach a payment agreement, we will institute foreclosure actions. If a foreclosure action is taken and the loan is not reinstated, paid in full or refinanced, the property is sold at judicial sale at which we may be the buyer if there are no adequate offers to satisfy the debt. Any property acquired as the result of foreclosure, or by deed in lieu of foreclosure, is classified as real estate owned until such time as it is sold or otherwise disposed of. When real estate owned is acquired, it is recorded at its fair market value less estimated selling costs. The initial recording of any loss is charged to the allowance for loan losses. Subsequent write-downs are recorded as a charge to operations. As of December 31, 2018, the Bank had \$107,000 of real estate owned.

Loans are reviewed on a quarterly basis and are placed on non-accrual status when they are 90 days or more delinquent. Loans may be placed on non-accrual status at any time if, in the opinion of management, the collection of additional interest is doubtful. Interest accrued and unpaid at the time a loan is placed on non-accrual status is charged against interest income. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured. At December 31, 2018, we had \$2.29 million (there were no specific reserves for loan losses) of loans that were nonperforming and held on non-accrual status.

The following table provides information regarding the Bank's loans that are delinquent 30 to 89 days:

|   | December 31, 2018      |        |               |   |

During the year ended December 31, 2018, the Bank sold five real estate owned and other repossessed assets resulting in a net loss of \$54,000. There was one write-down on real estate owned and other repossessed assets for a loss of \$28,000 during the year ended December 31, 2018. During the year ended December 31, 2017, the Bank sold five real estate owned and other repossessed assets resulting in a net loss of \$29,000. There were two write-downs on real estate owned and other repossessed assets for a loss of \$45,000 during the year ended December 31, 2017. During the year ended December 31, 2018 and 2017, an insignificant amount of interest was recorded on loans previously accounted for on a non-accrual basis.

Management, in compliance with regulatory guidelines, conducts an internal loan review program, whereby loans are placed or classified in categories depending upon the level of risk of nonpayment or loss. These categories are special mention, substandard, doubtful or loss. When a loan is classified as substandard or doubtful, management is required to establish an allowance for loan loss in an amount that is deemed prudent. When management classifies a loan as a loss asset, an allowance equal up to 100.0% of the loan balance is required to be established or the loan is required to be charged-off. The allowance for loan losses is composed of an allowance for both inherent risk associated with lending activities and specific problem assets.

Management's evaluation of classification of assets and adequacy of the allowance for loan losses is reviewed by the Board on a regular basis and by regulatory agencies as part of their examination process. We also utilize a third party review as part of our loan classification process. In addition, each loan that exceeds \$750,000 is monitored more closely.

Table of Contents

*Allowance for Loan Losses and Real Estate Owned.* The Bank segregates its loan portfolio for loan losses into the following broad categories: residential 1-4 family, commercial real estate, home equity, consumer and commercial. The Bank provides for a general allowance for losses inherent in the portfolio in the categories referenced above. General loss percentages which are calculated based on historical analyses and other factors such as volume and severity of delinquencies, local and national economy, underwriting standards and other factors. This portion of the allowance is calculated for inherent losses which probably exist as of the evaluation date even though they might not have been identified by the more objective processes used. This is due to the risk of error and/or inherent imprecision in the process. This portion of the allowance is subjective in nature and requires judgments based on qualitative factors which do not lend themselves to exact mathematical calculations such as: trends in delinquencies and non-accruals; trends in volume; terms and portfolio mix; new credit products; changes in lending policies and procedures; and changes in the outlook for the local, regional and national economy.

At least quarterly, the management of the Bank evaluates the need to establish an allowance against losses on loans based on estimated losses on specific loans when a finding is made that a loss is estimable and probable. Such evaluation includes a review of all loans for which full collectability may not be reasonably assured and considers, among other matters: the estimated market value of the underlying collateral of problem loans; prior loss experience; economic conditions; and overall portfolio quality. Real estate owned is evaluated annually and recorded at fair value.

Provisions for, or adjustments to, estimated losses are included in earnings in the period they are established. At December 31, 2018, we had \$6.60 million in allowances for loan losses.

While we believe we have established our existing allowance for loan losses in accordance with generally accepted accounting principles, there can be no assurance that bank regulators, in reviewing our loan portfolio, will not request that we significantly increase our allowance for loan losses, or that general economic conditions, a deteriorating real estate market, or other factors will not cause us to significantly increase our allowance for loan losses, therefore negatively affecting our financial condition and earnings.

In making loans, we recognize that credit losses will be experienced and that the risk of loss will vary with, among other things, the type of loan being made, the creditworthiness of the borrower over the term of the loan and, in the case of a secured loan, the quality of the security for the loan.

It is our policy to review our loan portfolio, in accordance with regulatory classification procedures, on at least a quarterly basis.

Table of Contents

Table of Contents*Deposits and Other Sources of Funds*

*Deposits.* Deposits are the Company's primary source of funds. Core deposits are deposits that are more stable and somewhat less sensitive to rate changes. They also represent a lower cost source of funds than rate sensitive, more volatile accounts such as certificates of deposit. We believe that our core deposits are our checking, savings accounts, money market accounts and IRA accounts. Based on our historical experience, we include IRA accounts funded by certificates of deposit as core deposits because they exhibit the principal features of core deposits in that they are stable and generally are not rate sensitive. Core deposits were \$492.39 million or 78.6% of the Bank's total deposits at December 31, 2018 (\$464.19 million or 74.1% excluding IRA certificates of deposit). The presence of a high percentage of core deposits and, in particular, transaction accounts reflects in part our strategy to restructure our liabilities to more closely resemble the lower cost liabilities of a commercial bank. However, a significant portion of our deposits remains in certificate of deposit form. These certificates of deposit, if they mature and are renewed at higher rates, would result in an increase in our cost of funds.

The following table includes deposit accounts and associated weighted average interest rates for each category of deposits:

|                                   | December 31,<br>2018   |                        |                             |  | 2017      |                        |                             |  | 2016      |                        |                             |  |

| Total certificates of deposit     | 162,424                | 25.92 %                | 1.31 %                      |  | 143,349   | 27.54 %                | 0.96 %                      |  | 165,278   | 32.23 %                | 0.84 %                      |  |
| Total deposits                    | \$626,611              | 100.00 %               | 0.41 %                      |  | \$520,564 | 100.00 %               | 0.31 %                      |  | \$512,795 | 100.00 %               | 0.30 %                      |  |

All deposit products increased during the period with the exception of time brokered certificates. The increase was due in part to the TwinCo acquisition. Noninterest checking increased \$42.99 million or 43.1%, to \$142.79 million at December 31, 2018. Interest bearing checking increased \$5.86 million or 5.9%, to \$105.12 million at December 31, 2018. Savings increased \$19.63 million or 22.2%, to \$108.23 million at December 31, 2018. Money markets increased by \$18.49 million, or 20.6%, to \$108.05 million at December 31, 2018. Certificates of deposit increased \$19.08 million or 13.3%, to \$162.42 million at December 31, 2018. The largest decrease in certificates of deposit was in brokered certificates. The decrease is due to the maturity of the two remaining brokered certificates during the year ended December 31, 2018.

The following table shows the amount of certificates of deposit with balances of \$250,000 and greater by time remaining until maturity as of December 31, 2018:

|                     | Balance<br>\$250<br>and Greater<br>(In<br>Thousands) |
|---------------------|--|
| 3 months or less    | \$ 3,766   |
| Over 3 to 6 months  | 8,538  |
| Over 6 to 12 months | 8,076  |
| Over 12 months      | 13,255   |
| Total               | \$ 33,635  |

Our depositors are primarily residents of the state of Montana.

*Borrowings.* Deposits are the primary source of funds for our lending and investment activities and for general business purposes. However, as the need arises, or in order to take advantage of funding opportunities, we also borrow funds in the form of advances from FHLB of Des Moines to supplement our supply of lendable funds and to meet deposit withdrawal requirements. We also have Federal funds line of credits with PCBB, PNC, Zions Bank and United Bankers' Bank.

Table of Contents

| (Dollars in Thousands)                           |               |                        |               |                        |
| Senior notes fixed at 5.75%, due 2022            | \$9,864       | 39.66 %                | \$9,820       | 39.58 %                |
| Subordinated debentures fixed at 6.75%, due 2025 | 9,857         | 39.62 %                | 9,836         | 39.64 %                |
| Subordinated debentures variable, due 2035       | 5,155         | 20.72 %                | 5,155         | 20.78 %                |
| Total other long-term debt                       | \$24,876      | 100.00%                | \$24,811      | 100.00%                |

Other long-term debt increased slightly by \$65,000 to \$24.88 million at December 31, 2018 from \$24.81 million at December 31, 2017.

Table of Contents**Shareholders' Equity**

Total shareholders' equity increased by \$11.19 million or 13.4%, to \$94.81 million at December 31, 2018 from \$83.62 million at December 31, 2017. The increase is primarily due to stock issued in connection with the TwinCo acquisition of \$9.03 million. The increase was also impacted by net income of \$4.98 million partially offset by dividends paid of \$2.00 million and other comprehensive loss of \$1.42 million.

**Analysis of Net Interest Income**

The Bank's earnings have historically depended primarily upon net interest income, which is the difference between interest income earned on loans and investments and interest paid on deposits and any borrowed funds. It is the single largest component of Eagle's operating income. Net interest income is affected by (i) the difference between rates of interest earned on loans and investments and rates paid on interest-bearing deposits and borrowings (the "interest rate spread") and (ii) the relative amounts of loans and investments and interest-bearing deposits and borrowings.

The following table includes average balances for balance sheet items, as well as, interest and dividends and average yields related to the average balances. All average balances are daily average balances. Non-accrual loans were included in the computation of average balances, but have been reflected in the table as loans carrying a zero yield. The yields include the effect of deferred fees and discounts and premiums that are amortized or accreted to interest income or expense.

<sup>(1)</sup> Includes loans held-for-sale.

- (2) Interest rate spread represents the difference between the average yield on interest earning assets and the average rate on interest bearing liabilities.
- (3) Net interest margin represents income before the provision for loan losses divided by average interest earning assets.
- (4) For purposes of this table, tax exempt income is not calculated on a tax equivalent basis.

Table of Contents**Rate/Volume Analysis**

The following table presents the dollar amount of changes in interest income and interest expense for major components of interest-earning assets and interest-bearing liabilities. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to: (1) changes in volume multiplied by the old rate; (2) changes in rate, which are changes in rate multiplied by the old volume; and (3) changes not solely attributable to rate or volume, which have been allocated proportionately to the change due to volume and the change due to rate.

**Results of Operations****Comparison of Operating Results for the Years Ended December 31, 2018 and 2017*****Net Income***

Eagle's net income for the year ended December 31, 2018 was \$4.98 million compared to \$4.10 million for the year ended December 31, 2017. The increase of \$879,000 was primarily due to an increase of \$6.22 million in net interest income after loan loss provision and a decrease in income tax expense of \$1.22 million. These increases were largely offset by an increase in noninterest expense of \$5.55 million and a decrease in noninterest income of \$1.00 million. Basic and diluted earnings per share were \$0.92 and \$0.91, respectively, for the year ended December 31, 2018 compared to \$1.01 and \$0.99, respectively, for the prior period.

### ***Net Interest Income***

Net interest income increased to \$29.74 million for the year ended December 31, 2018, from \$23.77 million for the year ended December 31, 2017. This increase of \$5.97 million, or 25.1%, was due to an increase in interest and dividend income of \$6.98 million partially offset by an increase in interest expense of \$1.01 million.

### ***Interest and Dividend Income***

Total interest and dividend income was \$34.84 million for the year ended December 31, 2018, compared to \$27.86 million for the year ended December 31, 2017, an increase of \$6.98 million, or 25.1%. Interest and fees on loans increased to \$30.40 million for the year ended December 31, 2018 from \$24.78 million for the same period ended December 31, 2017. This increase of \$5.62 million, or 22.7%, was due to an increase in the average balance of loans, as well as an increase in the average yield of loans for the year ended December 31, 2018. Average balances for loans receivable, net, including loans held for sale, for the year ended December 31, 2018 were \$590.06 million, compared to \$507.98 million for the prior year period. This represents an increase of \$82.08 million, or 16.2% and was due in part to the TwinCo acquisition. The average interest rate earned on loans receivable increased by 27 basis points, from 4.88% to 5.15%. Interest and dividends on investment securities available-for-sale increased by \$1.17 million or 40.3% for the year ended December 31, 2018 compared to the same period last year.

## Table of Contents

Average balances on investments increased to \$151.02 million for the year ended December 31, 2018, from \$126.56 million for the year ended December 31, 2017. This increase is largely due to the TwinCo acquisition. The average interest rate earned on investments increased to 2.69% for the year ended December 31, 2018 from 2.29% for the year ended December 31, 2017.

### *Interest Expense*

Total interest expense increased for the year ended December 31, 2018 to \$5.10 million from \$4.09 million for the year ended December 31, 2017, an increase of \$1.01 million, or 24.7%. The increase was due to an increase in interest expense on deposits, as well as interest expense on borrowings. The average balance for total deposits was \$617.18 million for the year ended December 31, 2018 compared to \$518.64 million for the same period in the prior year. This increase was due in part to the TwinCo acquisition. The overall average rate on total deposits was 0.33% for the year ended December 31, 2018 compared to 0.30% for the same period in the prior year. The average borrowing balance increased from \$107.29 million for the year ended December 31, 2017 to \$111.26 million for the year ended December 31, 2018. The average rate paid on total borrowings also increased from 2.37% for the year ended December 31, 2017, to 2.74% for the year ended December 31, 2018.

### *Provision for Loan Losses*

Provisions for loan losses are charged to earnings to maintain the total allowance for loan losses at a level considered adequate by the Bank to provide for probable loan losses based on prior loss experience, volume and type of lending we conduct and past due loans in portfolio. The Bank's policies require the review of assets on a quarterly basis. The Bank classifies loans as well as other assets if warranted. While management believes it uses the best information available to make a determination with respect to the allowance for loan losses, it recognizes that future adjustments may be necessary. Using this methodology, the Bank recorded \$980,000 in provision for loan losses for the year ended December 31, 2018 and \$1.23 million for the year ended December 31, 2017. Management believes the level of total allowances is adequate. Total nonperforming loans, including restructured loans, net, was \$3.77 million at December 31, 2018 compared to \$977,000 at December 31, 2017. The Bank has \$107,000 in other real estate owned and other repossessed assets at December 31, 2018 compared to \$525,000 at December 31, 2017.

### *Noninterest Income*

Noninterest income decreased to \$13.33 million for the year ended December 31, 2018, from \$14.33 million for the year ended December 31, 2017, a decrease of \$1.00 million or 7.0%. The decrease is largely due to decreases in net gain on sale of loans which decreased to \$7.74 million for the year ended December 31, 2018 from \$8.80 million for the year ended December 31, 2017. During the year ended December 31, 2018, \$279.74 million residential mortgage

loans were sold compared to \$288.94 million in the same period in the prior year. In addition, gross margin on sale of mortgage loans for the year ended December 31, 2018 was 2.77% compared to 3.05% for the year ended December 31, 2017. The decrease in gross margin on sale of mortgage loans is due to interest rate movements in the mortgage market and strategic defensive posture due to competitive pressure.

### *Noninterest Expense*

Noninterest expense was \$36.19 million for the year ended December 31, 2018 compared to \$30.64 million for the year ended December 31, 2017. The increase of \$5.55 million, or 18.1%, is largely due to increased salaries and employee benefits expenses of \$3.02 million. The increase in salaries expense is due in part to higher commission-based compensation related to the continued loan growth in both commercial and mortgage lending activities as well as the TwinCo acquisition. Occupancy and equipment expense increased \$621,000 as a result of facility improvements and bringing in acquired branches. Data processing increased \$579,000, largely due to one-time costs to improve network infrastructure and to support growth. In addition, the Company incurred acquisition costs totaling \$1.17 million for the year ended December 31, 2018 compared to \$676,000 for the year ended December 31, 2017.

### *Income Tax*

Income tax expense was \$914,000 for the year ended December 31, 2018, compared to \$2.13 million for the year ended December 31, 2017. The effective tax rate was 15.5% for the year ended December 31, 2018. The tax was lower due to lower income before income taxes for the year ended December 31, 2018 compared to the same period in the prior year, as well as the impact of the Tax Cuts and Job Act enacted in December 2017. In addition, tax free municipal bond income and Bank owned life insurance income help to lower the overall effective tax rate.

## Table of Contents

The effective tax rate is further reduced by a tax credit investment entered into by the Company in fiscal year 2013. The Bank made an investment in Certified Development Entities which have received allocations of New Markets Tax Credits (“NMTC”). Administered by the Community Development Financial Institutions Fund of the U.S. Department of the Treasury, the NMTC program is aimed at stimulating economic and community development and job creation in low-income communities. The federal income tax credits received are claimed over an estimated seven-year credit allowance period.

As a result of the Tax Cuts and Job Act, Eagle revalued its deferred tax assets and liabilities to account for the future impact of lower corporate tax rates and other provisions of the legislation. Based on its preliminary analysis, Eagle recorded a one-time net tax charge of \$715,000 related to the revaluation of these deferred tax items. This increase in income tax expense was reflected in Eagle’s operating results for the fourth quarter of 2017 and was in addition to the normal provision for income tax related to pre-tax net operating income.

## **Liquidity and Capital Resources**

### **Liquidity**

The Bank is required to maintain minimum levels of liquid assets as defined by the Montana Division of Banking and FRB regulations. The liquidity requirement is retained for safety and soundness purposes, and that appropriate levels of liquidity will depend upon the types of activities in which the company engages. For internal reporting purposes, the Bank uses policy minimums of 1.0%, and 8.0% for “basic surplus” and “basic surplus with FHLB” as internally defined. In general, the “basic surplus” is a calculation of the ratio of unencumbered short-term assets reduced by estimated percentages of CD maturities and other deposits that may leave the Bank in the next 90 days divided by total assets. “Basic surplus with FHLB” adds to “basic surplus” the additional borrowing capacity the Bank has with the FHLB of Des Moines. The Bank exceeded those minimum ratios as of December 31, 2018 and 2017.

The Bank’s primary sources of funds are deposits, repayment of loans and mortgage-backed securities, maturities of investments, funds provided from operations, advances from the FHLB of Des Moines and other borrowings. Scheduled repayments of loans and mortgage-backed securities and maturities of investment securities are generally predictable. However, other sources of funds, such as deposit flows and loan prepayments, can be greatly influenced by the general level of interest rates, economic conditions and competition. The Bank uses liquidity resources principally to fund existing and future loan commitments. It also uses them to fund maturing certificates of deposit, demand deposit withdrawals and to invest in other loans and investments, maintain liquidity, and meet operating expenses.

Liquidity may be adversely affected by unexpected deposit outflows, higher interest rates paid by competitors, and similar matters. Management monitors projected liquidity needs and determines the level desirable based in part on Eagle's commitments to make loans and management's assessment of Eagle's ability to generate funds.

*Comparison of Cash Flow for Years Ended December 31, 2018 and 2017*

Net cash provided by the Company's operating activities, which is primarily comprised of cash transactions affecting net income, was \$13.57 million for the year ended December 31, 2018 compared to \$20.05 million for the prior year. Net cash provided by operating activities was lower for the year ended December 31, 2018 primarily due to changes in loans held-for-sale.

Net cash used in the Company's investing activities, which is primarily comprised of cash transactions from investment securities and the loan portfolio, was \$50.92 million for the year ended December 31, 2018 compared to \$56.79 million for the year ended December 31, 2017. Net cash used in investing activities for the year ended December 31, 2018 was largely due to loan originations being higher than loan pay-off and principal payments during the year. Loan origination and principal collection, net was \$50.58 million for the year ended December 31, 2018. Available-for-sale securities purchases were \$45.97 million during the year ended December 31, 2018. In addition, there was \$5.60 million in Bank owned life insurance purchased and \$4.24 million paid for the TwinCo acquisition, net of cash received for the year ended December 31, 2018. These uses of cash were partially offset by available-for-sale securities sales and maturities, principal payments and calls of \$63.23 million. Net cash used in investing activities for the year ended December 31, 2017 was also impacted by loan originations being higher than loan pay-off and principal payments during the year. Loan origination and principal collection, net was \$49.12 million for the year ended December 31, 2017. In addition, there was \$24.37 million in available-for-sale securities purchases during the year ended December 31, 2017. These uses of cash were partially offset by available-for-sale securities sales and maturities, principal payments and calls of \$20.60 million.

## Table of Contents

Net cash provided by the Company's financing activities was \$41.12 million for the year ended December 31, 2018 compared to \$36.86 million for the year ended December 31, 2017. Net cash provided by financing activities for the year ended December 31, 2018 was primarily due to a net increase in deposits of \$23.86 million, as well as net advances from FHLB and other borrowings of \$19.25 million. Net cash provided by financing activities for the year ended December 31, 2017 was largely impacted by proceeds from issuance of common stock of \$20.16 million and proceeds from issuance of long-term debt of \$10.00 million. A net increase in deposits of \$7.77 million also contributed to net cash provided by financing activities for the year ended December 31, 2017.

## **Capital Resources**

At December 31, 2018, the Bank's internally determined measurement of sensitivity to interest rate movements as measured by a 200 basis point rise in interest rates scenario, increased the economic value of equity ("EVE") by 2.3% compared to an increase of 2.7% at December 31, 2017. The Bank is within the guidelines set forth by the Board of Directors for interest rate sensitivity.

The Bank's Tier I leverage ratio, as measured under State of Montana and FRB rules, decreased from 12.17% as of December 31, 2017 to 11.22% as of December 31, 2018. The Bank's strong capital position helps to mitigate its interest rate risk exposure.

As of December 31, 2018, the Bank's regulatory capital was in excess of all applicable regulatory requirements and the Bank is deemed "well capitalized" pursuant to State of Montana and FRB rules. At December 31, 2018, the Bank's total capital, Tier 1 capital, common equity Tier 1 capital and Tier 1 leverage ratios amounted to 16.02%, 14.97%, 14.97% and 11.22%, respectively, compared to regulatory requirements of 9.875%, 7.875%, 6.375% and 4.00%, respectively.

## **Impact of Inflation and Changing Prices**

Our consolidated financial statements and the accompanying notes, which are found in Item 8, have been prepared in accordance with generally accepted accounting principles, which require the measurement of financial position and operating results in terms of historical dollars without considering the change in the relative purchasing power of money over time and due to inflation. The impact of inflation is reflected in the increased cost of our operations. Interest rates have a greater impact on our performance than do the general levels of inflation. Interest rates do not necessarily move in the same direction or to the same extent as the prices of goods and services.

## **Interest Rate Risk**

Interest rate risk is the potential for loss of future earnings resulting from adverse changes in the level of interest rates. Interest rate risk results from several factors and could have a significant impact on the Company's net interest income, which is the Company primary source of net income. Net interest income is affected by changes in interest rates, the relationship between rates on interest bearing assets and liabilities, the impact of interest fluctuations on asset prepayments and the mix of interest bearing assets and liabilities.

Although interest rate risk is inherent in the banking industry, banks are expected to have sound risk management practices in place to measure, monitor and control interest rate exposures. The objective of interest rate risk management is to contain the risks associated with interest rate fluctuations. The process involves identification and management of the sensitivity of net interest income to changing interest rates.

The ongoing monitoring and management of this risk is an important component of the Company's asset/liability committee, which is governed by policies established by the Company's Board that are reviewed and approved annually. The Board delegates responsibility for carrying out the asset/liability management policies to the Bank's asset/liability committee. In this capacity, the asset/liability committee develops guidelines and strategies impacting the Company's asset/liability management related activities based upon estimated market risk sensitivity, policy limits and overall market interest rate levels and trends. The Company's goal of its asset and liability management practices is to maintain or increase the level of net interest income within an acceptable level of interest rate risk. Our asset and liability policy and strategies are expected to continue as described so long as competitive and regulatory conditions in the financial institution industry and market interest rates continue as they have in recent years.

The Bank has established acceptable levels of interest rate risk as follows for an instantaneous and permanent shock in rates: Projected net interest income over the next twelve months (i.e. year-1) will not be reduced by more than 15.0% given an immediate change in interest rates of up to 200 basis points (+ or -). Furthermore, projected net interest income over the subsequent twelve months (i.e. year-2) will not be reduced by more than 15.0%.

Table of Contents

The following table includes the Banks's net interest income sensitivity analysis.

| Changes in Market<br>Interest Rates<br>(Basis Points) | Rate Sensitivity<br>As of December<br>31, 2018 |        | Policy<br>Limits |
|---|--|--------|------------------|
|   | Year 1   | Year 2 |                  |
| +200  | 0.35%  | 1.79%  | -15.0%           |
| -200  | -2.19%   | -7.84% | -15.0%           |

The following table discloses how the Bank's economic value of equity ("EVE") would react to interest rate changes.

| -200  | -18.3%  | -30.0% |  |

**Off-Balance Sheet Arrangements**

As a financial services provider, we routinely are a party to various financial instruments with off-balance-sheet risks, such as commitments to extend credit and unused lines of credit. While these contractual obligations represent our future cash requirements, a significant portion of commitments to extend credit may expire without being drawn upon. Such commitments are subject to the same credit policies and approval process accorded to loans we make. In

addition, we use mandatory sell forward delivery commitments to sell whole loans to the secondary markets. These commitments are also used as a hedge against exposure to interest rate risks relating from rate locked loan origination commitments on certain mortgage loans held-for-sale.

**ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.**

This item has been omitted based on Eagle's status as a smaller reporting company.

**ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.**

Eagle's audited consolidated financial statements, notes thereto, and auditor's reports are found immediately following Part III of this report.

**ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.**

None.

Table of Contents

**ITEM 9A. CONTROLS AND PROCEDURES.**

**Disclosure Controls and Procedures**

We conducted an evaluation under the supervision and with the participation of our management including our Chief Executive Officer (“CEO”) and our Chief Financial Officer (“CFO”) of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, as amended, as of December 31, 2018, to ensure that information required to be disclosed by us in the reports filed or submitted by us under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission’s rules and forms, including to ensure that information required to be disclosed by us in the reports filed or submitted by us under the Exchange Act is accumulated and communicated to management to allow timely decisions regarding required disclosure. Based on that evaluation, our CEO and CFO concluded that as of December 31, 2018, our disclosure controls and procedures were effective.

**Management Annual Report on Internal Control over Financial Reporting**

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Our management conducted an assessment of the effectiveness of our internal control over financial reporting. This assessment was based upon the criteria for effective internal control over financial reporting established in the 2013 *Internal Control - Integrated Framework*, issued by the Committee of Sponsoring Organizations of the Treadway Commission.

The Company’s internal control over financial reporting involves a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes the controls themselves, as well as monitoring of the controls and internal auditing practices and actions to correct deficiencies identified. Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements.

Management assessed the effectiveness of the Company’s internal control over financial reporting as of December 31, 2018. Based on this assessment, management concluded that, as of December 31, 2018, the Company’s internal control over financial reporting was effective.

Eide Bailly LLP, the independent registered public accounting firm that audited our consolidated financial statements included in this Annual Report on Form 10-K, has issued an audit report on the effectiveness of our internal control

over financial reporting as of December 31, 2018. The report expresses an unqualified opinion on the effectiveness of our internal control over financial reporting as of December 31, 2018.

### **Changes in Internal Control over Financial Reporting**

There were no changes in the Company's internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rules 13a-15 or 15d-15 that occurred during the quarter ended December 31, 2018 that have materially affected, or were reasonably likely to materially affect, the Company's internal control over financial reporting.

### **ITEM 9B. OTHER INFORMATION.**

None.

Table of Contents

**PART III**

Except as provided below, the information required by Items 10, 11, 12, 13 and 14 is hereby incorporated by reference from our definitive proxy statement to be filed with the Securities and Exchange Commission within 120 days after the close of our year ended December 31, 2017.

**ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE.**

Information about our directors may be found under the caption “Proposal I – Election of Directors” in our Proxy Statement for the 2019 Annual Meeting of Stockholders (the “Proxy Statement”). The information in the Proxy Statement set forth under the captions of “Section 16 (a) Beneficial Ownership Reporting Compliance”, “Board Meetings and Committees”, “Structure of the Board of Directors”, “The Board’s Role in Risk Oversight”, and “Code of Ethics” is incorporated herein by reference.

**Executive Officers of the Registrant**

The following is a list of the names and ages of our executive officers, all positions and offices held by each person and each person’s principal occupations or employment during the past five years. There are no family relationships between any executive officers and directors.

**Peter J. Johnson, President/Chief Executive Officer Age 61**

Mr. Johnson has served as President and CEO of Eagle since December 2009. He has also served as President of the Bank since July 2007 and CEO since November 2007. Prior to being named President, he had served as the Company’s Executive Vice President and Chief Financial Officer. He joined the Bank in 1981. He currently serves on the Montana Independent Bankers Association board of directors and served as a member of the Federal Reserve Board’s Community Depository Institution Advisory Council from 2010-2012. He is a past chairman of both the Helena Area Chamber of Commerce and the Diocese of Helena Finance Council. He serves on the Independent Community Bankers of America’s Political Action Committee and is the current chair of St. Peter’s Health Foundation board.

**Laura F. Clark, Executive Vice President/Chief Financial Officer Age 62**

Ms. Clark has served as the Executive Vice President and Chief Financial Officer of the Bank and Eagle since March 2014. Prior to being named the Chief Financial Officer, she had served as the Senior Vice President and Chief Financial Officer of the Bank of Bozeman since 2005. Her experience spans over 30 years and includes a variety of executive positions with First National Bancorp, Bankers Resource Center, Security Bank, Bank of Montana System and Montana Bancsystem. Ms. Clark holds a Bachelor of Arts degree in Business Administration from Montana State University-Billings. She currently serves as a board member of ExplorationWorks, a local Science Center that provides programs for early childhood education, STEM (science, technology, engineering and math) and healthy

living.

**Rachel R. Amdahl, Senior Vice President/Chief Operations Officer Age 50**

Mrs. Amdahl has served as Senior Vice President/Chief Operations Officer of the Bank since February 2006. Prior to being named the Senior Vice President/Chief Operations Officer, she served as Vice President/Operations since 2000. She joined the Bank in 1987. She is a past board member of the Lewis and Clark County United Way and the Women's Leadership Network in Helena.

**Tracy A. Zepeda, Senior Vice President/Chief Retail Officer Age 39**

Ms. Zepeda joined the Bank in December 2012 at the time of the acquisition of seven branches from Sterling Financial Corporation. She had served as Vice President/Territory Manager of Sterling Financial Corporation since January 1, 2011. Prior to that position Ms. Zepeda served as Assistant Vice President/Community Manager of Sterling Financial Corporation since July 2007. She is a board member of the Missoula chapter of Big Brothers Big Sisters.

**Dale F. Field, Senior Vice President/Chief Credit Officer Age 47**

Mr. Field joined Eagle in 2001 as Vice President/Commercial Lender and was promoted to Vice President/Chief Credit Administration Officer in 2011. He was promoted to Senior Vice President/Chief Credit Officer in July 2014. He serves on the Helena Exchange Club board of directors and is a school board trustee in Clancy, Montana.

**Chantelle R. Nash, Senior Vice President/Chief Risk Officer Age 48**

Ms. Nash joined Eagle as a Compliance Manager in 2006 and served as Vice President/Compliance Officer since 2010. She was promoted to Senior Vice President/Chief Risk Officer in July 2014. Ms. Nash holds a Juris Doctor degree from University of Idaho College of Law in Moscow, Idaho. She is a past board member of the Helena YWCA.

Table of Contents

**P. Darryl Rensmon, Senior Vice President/Chief Information Officer Age 57**

Mr. Rensmon joined Eagle in September 2016 as Vice President/Chief Information Officer and was promoted to Senior Vice President in October 2017. He is responsible for all facets of information systems and technology for the Company. **Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Shareholders of  
Eagle Bancorp Montana, Inc. and Subsidiaries  
Helena, Montana

**Opinion on the Financial Statements and Internal Control Over Financial Reporting**

We have audited the accompanying consolidated statements of financial condition of Eagle Bancorp Montana, Inc. and Subsidiaries (the Company) as of December 31, 2018 and 2017, and the related consolidated statements of income, comprehensive income, change in shareholders' equity, and cash flows for each of the years in the two-year period ended December 31, 2018, and the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in 2013 Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the years in the two-year period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in 2013 Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

**Basis for Opinion**

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the entity's consolidated financial statements and an opinion on the entity's internal control over financial reporting based on our audits. We are a public accounting firm registered with

the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

---

Table of Contents

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that responds to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

**Definition and Limitations of Internal Control Over Financial Reporting**

An entity's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. An entity's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and directors of the entity; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the entity's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

We have served as the Company's auditor since 2017.

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE 1: Organization and Operations**

On April 5, 2010, Eagle Bancorp completed its second-step conversion from a partially-public mutual holding company structure to a fully publicly-owned stock holding company structure. As part of that transaction it also completed a related stock offering. As a result of the conversion and offering, Eagle Bancorp Montana, Inc. (“the Company”, or “Eagle”) became the stock holding company for American Federal Savings Bank (“AFSB”), and Eagle Financial MHC and Eagle Bancorp ceased to exist. The Company sold a total of 2,464,274 shares of common stock at a purchase price of \$10.00 per share in the offering for gross proceeds of \$24,643,000. Concurrent with the completion of the offering, shares of Eagle Bancorp common stock owned by the public were exchanged. Shareholders of Eagle Bancorp received 3.80 shares of the Company's common stock for each share of Eagle Bancorp common stock that they owned immediately prior to completion of the transaction.

The Company's Employee Stock Ownership Plan (“ESOP”), which purchased shares in the offering, was authorized to purchase up to 8.00% of the shares sold in the offering, or 197,142 shares. The ESOP completed its purchase of all such authorized shares in the offering, at a total cost of \$1,971,000.

On October 13, 2017, the Company successfully completed a public offering of its common stock, and issued 1,189,041 shares and received approximately \$20,157,000 in net cash proceeds.

In 2014, the Board of Directors (the “Board”) determined that it was in the Company's best interests to adopt a Montana community bank charter and the Company applied to the State of Montana to form an interim bank for the purpose of facilitating the conversion of AFSB from a federally chartered savings bank to a Montana-chartered commercial bank. Upon receiving required approvals of the Montana Division of Banking and Financial Institutions and the federal banking agencies for the conversion the conversion became effective on October 14, 2014. Concurrent with the conversion, the Bank applied, and was approved, for membership in the Federal Reserve System of the Board of Governors. In connection with the conversion, AFSB changed its name to Opportunity Bank of Montana (“the Bank”). As a result of the conversion, the Bank is regulated by the Montana Division of Banking and Financial Institutions. As a Federal Reserve Board (“FRB”) member bank, its primary federal regulator is the FRB, and the Company is a registered bank holding company regulated by the FRB. The Bank is a member of the Federal Home Loan Bank System and its deposit accounts are insured to the applicable limits by the Federal Deposit Insurance Corporation (“FDIC”).

Edgar Filing: Eagle Bancorp Montana, Inc. - Form 10-K

The Bank is headquartered in Helena, Montana, and operates additional branches in Big Timber, Billings, Bozeman, Butte, Great Falls, Hamilton, Livingston, Missoula, Sheridan, Townsend and Twin Bridges, Montana. It also operates a separate mortgage loan origination location in Missoula, Montana. The Bank's principal business is accepting deposits and, together with funds generated from operations and borrowings, investing in various types of loans and securities. Collectively, Eagle Bancorp Montana Inc. and its subsidiaries are referred to herein as "the Company."

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 2: Summary of Significant Accounting Policies**

*Principles of Consolidation*

The consolidated financial statements include Eagle Bancorp Montana Inc., the Bank, Eagle Bancorp Statutory Trust I and AFSB NMTC Investment Fund, LLC. All significant intercompany transactions and balances have been eliminated in consolidation.

*Consolidated Financial Statement Presentation and Use of Estimates*

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). In preparing consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated statement of financial condition and reported amounts of revenues and expenses during the reporting period. Actual results could differ from estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, mortgage servicing rights, the valuation of financial instruments, deferred tax assets and liabilities and the valuation of foreclosed assets. In connection with the determination of the estimated losses on loans, foreclosed assets and valuation of mortgage servicing rights, management obtains independent appraisals and valuations.

Certain prior period amounts were reclassified to conform to the presentation for 2018. These reclassifications had no impact on net income or total shareholders’ equity. Certain loan amounts were reclassified for prior periods to be consistent with loan category classification for December 31, 2018. During the quarter ended March 31, 2018, Eagle completed the acquisition of TwinCo, Inc. (“TwinCo”). See Note 24. Mergers and Acquisitions for more information. The acquisition included the addition of over \$55,000,000 in gross loans and added a considerable amount to Eagle’s agricultural loans. There was no impact to Eagle’s loan policies due to the acquisition. Other loan related costs that are not considered an adjustment of yield were previously included in other noninterest expense on the Consolidated Statements of Income. These amounts were presented on their own line for the year ended December 31, 2018 and prior year amounts were reclassified to be consistent with the current year presentation.

The Company evaluated subsequent events for potential recognition and/or disclosure through the date the consolidated financial statements were issued.

***Significant Group Concentrations of Credit Risk***

Most of the Company's business activity is with customers located within Montana. Note 4: Investment Securities discusses the types of securities that the Company invests in. Note 5: Loans discusses the types of lending that the Company engages in. The Company does not have any significant concentrations to any one industry or customer.

The Company carries certain assets with other financial institutions which are subject to credit risk by the amount such assets exceed federal deposit insurance limits. At December 31, 2018 and 2017, no account balances were held with correspondent banks that were in excess of FDIC insured levels, except for federal funds sold or deposit balances held at, Pacific Coast Bankers Bank ("PCBB") and Zions Bank. Also, from time to time, the Company is due amounts in excess of FDIC insurance limits for checks and transit items.

Management monitors financial stability of correspondent banks and considers amounts advanced in excess of FDIC insurance limits to present no significant additional risk to the Company.

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 2: Summary of Significant Accounting Policies – continued**

***Revenue Recognition***

Accounting Standards Codification (“ASC”) 606, Revenue from Contracts with Customers, establishes principles for reporting information about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity’s contracts to provide goods or services to customers. The core principle requires an entity to recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration that it expects to be entitled to receive in exchange for those goods or services recognized as performance obligations are satisfied. The new revenue recognition standards became effective for the Company on January 1, 2018.

The majority of our revenue-generating transactions are not subject to ASC 606, including revenue generated from financial instruments, such as our loans, guarantees, derivatives and investment securities, as well as revenue related to our mortgage servicing activities, as these activities are subject to other GAAP discussed elsewhere within our disclosures. ASC 606 is applicable to non-interest revenue streams such as wealth management income, service charges on deposit accounts and interchange and other fees. However, the recognition of these revenue streams did not change significantly upon the adoption of ASC 606. Substantially all of the Company’s revenue is generated from contracts with customers. Descriptions of our revenue-generating activities that are within the scope of ASC 606 are discussed below:

*Wealth Management Income* – We offer wealth management products and services through our wealth management division and financial consultants located in several of our markets. Revenue from wealth management represents fees due from wealth management customers as consideration for managing the customers’ assets. The Company’s performance obligation for these transactional-based services is generally satisfied, and related revenue recognized, at a point in time (i.e., as incurred).

*Service Charges* – Revenue from service charges consists of service charges and fees on deposit accounts under depository agreements with customers to provide access to deposited funds and, when applicable, pay interest on deposits. Service charges on deposit accounts may be transactional or non-transactional in nature. Transactional service charges occur in the form of a service or penalty and are charged upon the occurrence of an event (e.g., overdraft fees, ATM fees, wire transfer fees). Transactional service charges are recognized as services are delivered to and consumed by the customer, or as penalty fees are charged. Non-transactional service charges are charges that are based on a broader service, such as account maintenance fees and dormancy fees, and are recognized on a monthly

basis.

*Interchange and Other Fees* – Revenue from debit card fees includes interchange fee income from debit cards processed through card association networks. Interchange fees represent a portion of a transaction amount that the Company and other involved parties retain to compensate themselves for giving the cardholder immediate access to funds. Interchange rates are generally set by the card association networks and are based on purchase volumes and other factors. The Company records interchange fees as services are provided.

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 2: Summary of Significant Accounting Policies – continued**

*Cash and Cash Equivalents*

For the purpose of presentation in the consolidated statements of cash flows, cash and cash equivalents are defined as those amounts included in the balance sheet captions “cash and due from banks” and “interest bearing deposits in banks” all of which mature within ninety days.

The Bank properly maintains amounts in excess of reserve balances as required by the FRB. The Bank had vault cash reserves in excess of the required reserve amount of \$1,036,000 and \$880,000 as of December 31, 2018 and 2017, respectively.

*Investment Securities*

The Company can designate debt and equity securities as held-to-maturity, available-for-sale or trading. At December 31, 2018 and 2017 all securities were designated as available-for-sale.

*Held-to-Maturity* – Debt investment securities that management has the positive intent and ability to hold until maturity are classified as held-to-maturity and are carried at their remaining unpaid principal balance, net of unamortized premiums or unaccreted discounts. Premiums are amortized and discounts are accreted using the interest method over the period remaining until maturity.

*Available-for-Sale* – Investment securities that will be held for indefinite periods of time, including securities that may be sold in response to changes in market interest or prepayment rates, need for liquidity and changes in the availability of and the yield of alternative investments, are classified as available-for-sale. These assets are carried at fair value. Unrealized gains and losses, net of tax, are reported as other comprehensive income. Gains and losses on the sale of available-for-sale securities are recorded on the trade date and determined using the specific identification method.

Declines in the fair value of individual held-to-maturity and available-for-sale securities below their cost that are other than temporary are recognized by write-downs of the individual securities to their fair value. Such write-downs would be included in earnings as realized losses.

*Trading* – Investments that are purchased with the intent of selling them within a short period of time.

***Federal Home Loan Bank Stock***

The Company's investment in Federal Home Loan Bank ("FHLB") of Des Moines stock is a restricted investment carried at cost (\$100 per share par value), which approximates its fair value. As a member of the FHLB system, the Company is required to maintain a minimum level of investment in FHLB stock based on total assets and a specific percentage of its outstanding FHLB advances. The Company had 50,114 and 40,861 FHLB shares at December 31, 2018 and 2017, respectively. Dividends are paid quarterly and are subject to FHLB board approval.

Table of Contents

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 2: Summary of Significant Accounting Policies – continued**

*Federal Reserve Bank Stock*

The Company's investment in FRB stock is a restricted investment carried at cost, which approximates its fair value. Although the par value of the stock is \$100 per share, banks pay only \$50 per share at the time of purchase, with the understanding that the other half of the subscription amount is subject to call at any time. As a member of the Federal Reserve System, the Company is required to maintain a minimum level of investment in FRB stock based on a specific percentage of its capital and surplus. The Company had 40,650 and 29,295 FRB shares at December 31, 2018 and 2017, respectively. Dividends are received semi-annually at a fixed rate of 6.00% on the total number of shares.

*Mortgage Loans Held-for-Sale*

Mortgage loans originated and intended for sale in the secondary market are carried at fair value, determined in aggregate, plus the fair value of associated derivative financial instruments. Net unrealized losses, if any, are recognized in a valuation allowance by a charge to income.

*Loans*

The Bank grants mortgage, commercial and consumer loans to customers. A substantial portion of the loan portfolio is represented by mortgage loans in Montana. The ability of the Bank's debtors to honor their contracts is dependent upon the general economic conditions in this area.

Loans receivable that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at their outstanding unpaid principal balances net of any unearned income, allowance for loan losses, and unamortized deferred fees or costs on originated loans and unamortized premiums or unaccrued discounts on purchased loans. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs are deferred and amortized over the contractual life of the loan, and recorded as an adjustment to the yield, using the interest method.

*Loan Origination/Risk Management* – The Bank selectively extends credit for the purpose of establishing long-term relationships with its customers. The Bank mitigates the risks inherent in lending by focusing on businesses and individuals with demonstrated payment history, historically favorable profitability trends and stable cash flows. In addition to these primary sources of repayment, the Bank considers tangible collateral and personal guarantees as secondary sources of repayment. Lending officers are provided with detailed underwriting policies covering all lending activities in which the Bank is engaged and require all lenders to obtain appropriate approvals for the extension of credit. The Bank also maintains documentation requirements and extensive credit quality assurance practices in order to identify credit portfolio weaknesses as early as possible so any exposures that are discovered may be reduced.

A reporting system supplements the loan review process by providing management with frequent reports related to loan production, loan quality, concentrations of credit, loan delinquencies and nonperforming and potential problem loans. Diversification in the loan portfolio is a means of managing risk associated with fluctuations in economic conditions.

Table of Contents

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 2: Summary of Significant Accounting Policies – continued**

*Loans – continued*

The Bank regularly contracts for independent loan reviews that validate the credit risk program. Results of these reviews are presented to management. The loan review process compliments and reinforces the risk identification and assessment decisions made by lenders and credit personnel, as well as, the Company's policies and procedures.

*Residential 1-4 Family Loans* – The Bank originates 1-4 family residential mortgage loans collateralized by owner-occupied and non-owner-occupied real estate. Repayment of these loans may be subject to adverse conditions in the real estate market or the economy to a greater extent than other types of loans. Loans collateralized by 1-4 family residential real estate generally have been originated in amounts up to 80.00% of appraised values before requiring private mortgage insurance. The underwriting analysis includes credit verification, appraisals and a review of the financial condition of the borrower. The Company will either hold these loans in its portfolio or sell them on the secondary market, depending upon market conditions and the type and term of the loan originations. Generally, all 30-year fixed rate loans are sold in the secondary market.

*Commercial Real Estate Loans* – The Bank makes commercial real estate loans, land loans (both developed and undeveloped) and loans on multi-family dwellings. Commercial real estate loans are collateralized by owner-occupied and non-owner-occupied real estate. Payments on loans secured by such properties are often dependent on the successful operation or management of the properties. Accordingly, repayment of these loans may be subject to adverse conditions in the real estate market or the economy to a greater extent than other types of loans. When underwriting these loans, the Bank seeks to minimize these risks in a variety of ways, including giving careful consideration to the property's operating history, future operating projections, current and projected occupancy, location and physical condition. The underwriting analysis also includes credit verification, analysis of global cash flow, appraisals and a review of the financial condition of the borrower.

*Construction Loans* – The Bank makes loans to finance the construction of residential properties. The majority of the Bank's residential construction loans are made to individual homeowners for the construction of their primary residence and, to a lesser extent, to local builders for the construction of pre-sold houses or houses that are being built for sale in the future. The Bank also originates commercial construction and development loans. Construction loans involve additional risks attributable to the fact that loan funds are advanced upon the security of a project under construction, and the project is of uncertain value prior to its completion. Because of uncertainties inherent in

estimating construction costs, the market value of the completed project and the effects of governmental regulation on real property, it can be difficult to accurately evaluate the total funds required to complete a project and the related loan to value ratio. As a result of these uncertainties, construction lending often involves the disbursement of substantial funds with repayment dependent, in part, on the success of the ultimate project rather than the ability of a borrower or guarantor to repay the loan. If the Company is forced to foreclose on a project prior to completion, there is no assurance that the Company will be able to recover the entire unpaid portion of the loan. In addition, the Company may be required to fund additional amounts to complete a project and may have to hold the property for an indeterminable period of time. While the Bank has underwriting procedures designed to identify what it believes to be acceptable levels of risks in construction lending, no assurance can be given that these procedures will prevent losses from the risks described above.

Table of Contents

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 2: Summary of Significant Accounting Policies – continued**

*Loans – continued*

*Agricultural Loans* – The Bank makes agricultural operating loans as well as long term agricultural real estate loans. Agricultural operating loans are generally secured with equipment, cattle, crops or other non-real property and at times the underlying real property. Agricultural real estate loans are secured with farm and ranch real estate. Payments on both types of agricultural loans are dependent on successful operation of the farm and/or ranch. Repayment is also affected by agricultural conditions that may include adverse weather conditions such as, drought, hail, flooding and severe winters. Also impacting the borrower's ability to repay are commodity prices associated with the agricultural operation. When underwriting these loans, the Bank seeks to minimize these risks in a variety of ways, including giving careful consideration to the farm or ranch's operating history, future operating projections, current and projected commodity prices and crop insurance. The underwriting analysis also includes credit verification, analysis of global cash flow, appraisals and a review of the financial condition of the borrower.

*Home Equity Loans* – The Bank originates home equity loans that are secured by the borrowers' primary residence. These loans are typically subject to a prior lien, which may or may not be held by the Bank. Although these loans are secured by real estate, they carry a greater risk than first lien 1-4 family residential mortgages because of the existence of a prior lien on the property as well as the flexibility the borrower has with respect to the proceeds. The Bank attempts to minimize this risk by maintaining conservative underwriting policies on these types of loans. Generally, home equity loans are made for up to 85.00% of the appraised value of the underlying real estate collateral, less the amount of any existing prior liens on the property securing the loan.

*Consumer Loans* – Consumer loans made by the Bank include automobile loans, recreational vehicle loans, boat loans, personal loans, credit lines, loans secured by deposit accounts and other personal loans. Risk is minimized due to relatively small loan amounts that are spread across many individual borrowers.

*Commercial Loans* – A broad array of commercial lending products are made available to businesses for working capital (including inventory and accounts receivable), purchases of equipment and machinery and business. Bank's commercial loans are underwritten on the basis of the borrower's ability to service such debt as reflected by cash flow projections. Commercial loans are generally collateralized by business assets, accounts receivable and inventory, certificates of deposit, securities, guarantees or other collateral. The Bank also generally obtains personal guarantees from the principals of the business. Working capital loans are primarily collateralized by short-term assets, whereas

term loans are primarily collateralized by long-term assets. As a result, commercial loans involve additional complexities, variables and risks and require more thorough underwriting and servicing than other types of loans.

- 14 -

---

Table of Contents

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 2: Summary of Significant Accounting Policies – continued**

*Loans – continued*

*Non-Accrual and Past Due Loans* – Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are placed on non-accrual status when, in management's opinion, the borrower may be unable to meet payment obligations as they become due, as well as when required by regulatory provisions. In determining whether or not a borrower may be unable to meet payment obligations for each class of loans, the Bank considers the borrower's debt service capacity through the analysis of current financial information, if available, and/or current information with regards to the Bank's collateral position. Regulatory provisions would typically require the placement of a loan on non-accrual status if (i) principal or interest has been in default for a period of 90 days or more unless the loan is both well secured and in the process of collection or (ii) full payment of principal and interest is not expected. Loans may be placed on non-accrual status regardless of whether or not such loans are considered past due. When interest accrual is discontinued, all unpaid accrued interest is reversed. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

*Allowance for Loan Losses*

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revisions as more information becomes available.

The allowance consists of specific, general and unallocated components. For such loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers non-classified loans and is based on historical loss experience adjusted for qualitative factors. An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses.

The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

Table of Contents

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE 2: Summary of Significant Accounting Policies – continued**

*Allowance for Loan Losses – continued*

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all the circumstances surrounding the loan and the borrower, including the length of delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent. Large groups of smaller balance homogeneous loans are collectively evaluated for impairment.

*Troubled Debt Restructured Loans*

A troubled debt restructured loan is a loan in which the Bank grants a concession to the borrower that it would not otherwise consider, for reasons related to a borrower's financial difficulties. The loan terms which have been modified or restructured due to a borrower's financial difficulty, include but are not limited to a reduction in the stated interest rate; an extension of the maturity at an interest rate below current market rates; a reduction in the face amount of the debt; a reduction in the accrued interest; or re-aging, extensions, deferrals, renewals and rewrites or a combination of these modification methods. A troubled debt restructured loan would generally be considered impaired in the year of modification and will be assessed periodically for continued impairment.

*Mortgage Servicing Rights*

Servicing assets are recognized as separate assets when rights are acquired through purchase or through sale of financial assets. Generally, purchased servicing rights are capitalized at the cost to acquire the rights. For sales of mortgage loans, a portion of the cost of originating the loan is allocated to the servicing right based on relative fair value. Fair value is based on a market price valuation model that calculates the present value of estimated future net

servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the cost to service, the discount rate, the custodial earnings rate, an inflation rate, ancillary income, prepayment speeds and default rates and losses.

Servicing assets are evaluated for impairment based upon the fair value of the rights as compared to amortized cost. Impairment is determined by stratifying rights into tranches based on predominant characteristics, such as interest rate, loan type and investor type. Impairment is recognized through a valuation allowance for an individual tranche, to the extent that the fair value is less than the capitalized amount for the tranches. If the Company later determines that all or a portion of the impairment no longer exists for a particular tranche, a reduction of the allowance may be recorded as an increase to income. Capitalized servicing rights are reported as assets and are amortized into noninterest expense in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets.

Table of Contents

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 2: Summary of Significant Accounting Policies – continued**

*Mortgage Servicing Rights – continued*

Servicing fee income is recorded for fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal and are recorded as income when earned. The amortization of mortgage servicing rights is netted against loan servicing fee income.

*Cash Surrender Value of Life Insurance*

Life insurance policies are initially recorded at cost at the date of purchase. Subsequent to purchase, the policies are periodically adjusted for fair value. The adjustment to fair value increases or decreases the carrying value of the policies and is recorded as an income or expense on the consolidated statement of income. For the years ended December 31, 2018 and 2017, there were no adjustments to fair value that were outside the normal appreciation in cash surrender value.

*Foreclosed Assets*

Assets acquired through, or in lieu of, loan foreclosure are initially recorded at fair value less estimated selling cost at the date of foreclosure. All write-downs based on the asset's fair value at the date of acquisition are charged to the allowance for loan losses. After foreclosure, property held-for-sale is carried at fair value less cost to sell. Impairment losses on property to be held and used are measured as the amount by which the carrying amount of a property exceeds its fair value. Costs of significant property improvements are capitalized, whereas costs relating to holding property are expensed. Valuations are periodically performed by management, and any subsequent write-downs are recorded as a charge to operations, if necessary, to reduce the carrying value of a property to the lower of its cost or fair value less cost to sell.

*Premises and Equipment*

Land is carried at cost. Property and equipment is recorded at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the expected useful lives of the assets, ranging from 3 to 40 years. The costs of maintenance and repairs are expensed as incurred, while major expenditures for renewals and betterments are capitalized.

### *Income Taxes*

The Company adopted authoritative guidance related to accounting for uncertainty in income taxes, which sets out a consistent framework to determine the appropriate level of tax reserves to maintain for uncertain tax positions.

The Company's income tax expense consists of the following components: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. The Company determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur.

Table of Contents

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 2: Summary of Significant Accounting Policies – continued**

*Income Taxes – continued*

Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances, and information available at the reporting date and is subject to management's judgment. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized.

The Company recognizes interest accrued on penalties related to unrecognized tax benefits in tax expense. During the years ended December 31, 2018 and 2017 the Company recognized no interest and penalties. Based on management's analysis, the Company did not have any uncertain tax positions as of December 31, 2018 or 2017. The Company files tax returns in the U.S. federal jurisdiction and the State of Montana. There are currently no income tax examinations underway for these jurisdictions. The Company's income tax returns are subject to examination by relevant taxing authorities as follows: U.S. Federal income tax returns for tax years 2015 and forward; Montana income tax returns for tax years 2015 and forward.

*Treasury Stock*

Treasury stock is accounted for on the cost method and consists of 241,290 and 258,490 shares at December 31, 2018 and 2017, respectively.

On July 19, 2018, the Board authorized the repurchase of up to 100,000 shares of its common stock. Under the plan, shares may be purchased by the Company on the open market or in privately negotiated transactions. The extent to which the company repurchases its shares and the timing of such repurchase will depend upon market conditions and other corporate considerations. No shares were purchased under this plan during the three months ended December 31, 2018 or September 30, 2018. However, during 2019, 36,000 shares were purchased at an average price of \$17.49 per share. The plan expires on July 19, 2019.

On July 20, 2017, the Board authorized the repurchase of up to 100,000 shares of its common stock. Under the plan, shares could be purchased by the Company on the open market or in privately negotiated transactions. No shares were purchased under this plan. The plan expired on July 20, 2018.

On July 21, 2016, the Board authorized the repurchase of up to 100,000 shares of its common stock. Under the plan, shares could be purchased by the Company on the open market or in privately negotiated transactions. No shares were purchased under this plan. The plan expired on July 21, 2017.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 2: Summary of Significant Accounting Policies – continued**

*Advertising Costs*

The Company expenses advertising costs as they are incurred. Advertising costs were \$1,158,000 and \$966,000 for the years ended December 31, 2018 and 2017, respectively.

*Employee Stock Ownership Plan*

Compensation expense recognized for the Company's ESOP equals the fair value of shares that have been allocated or committed to be released for allocation to participants. Any difference between the fair value of the shares at the time and the ESOP's original acquisition cost is charged or credited to shareholders' equity (capital surplus). The cost of ESOP shares that have not yet been allocated or committed to be released is deducted from shareholders' equity.

*Earnings Per Share*

Earnings per common share is computed using the two-class method prescribed under ASC Topic 260, "Earnings Per Share." ASC Topic 260 provides that unvested share based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share pursuant to the two-class method. The Company has determined that its outstanding non-vested stock awards are participating securities. Under the two-class method, basic earnings per common share is computed by dividing net earnings allocated to common stock by the weighted-average number of common shares outstanding during the applicable period, excluding outstanding participating securities. Diluted earnings per common share is computed using the weighted-average number of shares determined for the basic earnings per common share computation plus the dilutive effect of stock compensation using the treasury stock method. A reconciliation of the weighted-average shares used in calculating basic earnings per common share and the weighted average common shares used in calculating diluted earnings per common share for the reported periods is provided in Note 3: Earnings Per Share.

*Derivatives*

Derivatives are recognized as assets and liabilities on the consolidated statement of financial condition and measured at fair value. For exchange-traded contracts, fair value is based on quoted market prices. For non-exchange traded contracts, fair value is based on dealer quotes, pricing models, discounted cash flow methodologies, or similar techniques for which the determination of fair value may require significant management judgment or estimation.

*Mortgage Loan Commitments* – Mortgage loan commitments that relate to the origination of a mortgage that will be held-for-sale upon funding are considered derivative instruments. The Company enters into commitments to fund residential mortgage loans at specified times in the future, with the intention that these loans will subsequently be sold in the secondary market. A mortgage loan commitment binds the Company to lend funds to a potential borrower at a specified interest rate and within a specified period of time after inception of the rate lock.

*Interest Rate Lock Commitments* – The Company enters into agreements to extend credit to a borrower under certain specified terms and conditions in which the interest rate and the maximum amount of the loan are set prior to funding. Under the agreement, the lender commits to lend funds to a potential borrower (subject to the lender's approval of the loan) on a fixed or adjustable rate basis, regardless of whether interest rates change in the market, or on a floating rate basis.

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 2: Summary of Significant Accounting Policies – continued**

*Derivatives – continued*

*Forward Delivery Commitments* – The Company uses mandatory sell forward delivery commitments to sell whole loans. These commitments are used as a hedge against exposure to interest rate risks resulting from rate locked loan origination commitments on certain mortgage loans held-for-sale. Gains and losses on the items hedged are deferred and recognized in accumulated other comprehensive income until the commitments are completed. At the point of completion of the commitments the gains and losses are recognized in the Company's income statement.

*Interest Rate Swap Agreements* – For asset/liability management purposes, the Company may use interest rate swap agreements to hedge various exposures or to modify interest rate characteristics of various balance sheet accounts. Interest rate swaps are contracts in which a series of interest rate flows are exchanged over a prescribed period. The notional amount on which the interest payments are based is not exchanged. These swap agreements are derivative instruments and generally convert a portion of the Company's fixed-rate loans to a variable rate.

The gain or loss on a derivative designated and qualifying as a fair value hedging instrument, as well as the offsetting gain or loss on the hedged item attributable to the risk being hedged, is recognized currently in earnings in the same accounting period. The ineffective portion of the gain or loss on the derivative instrument, if any, is recognized currently in earnings. For fair value hedges, the net settlement (upon close-out or termination) that offsets changes in the value of the loans adjusts the basis of the loans and is deferred and amortized over the life of the loans.

The Company did not have any interest rate swap agreements during the years ended December 31, 2018 or 2017.

*Transfers of Financial Assets*

Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership (2) the

transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity or the ability to unilaterally cause the holder to return specific assets.

***Business Combinations, Goodwill and Other Intangible Assets***

Authoritative guidance requires that all business combinations initiated after December 31, 2001 be accounted for under the purchase method and addresses the initial recognition and measurement of goodwill and other intangible assets acquired in a business combination. The guidance also addresses the initial recognition and measurement of intangible assets acquired in a business combination and the accounting for goodwill and other intangible assets subsequent to their acquisition. The guidance provides that intangible assets with finite useful lives be amortized and that goodwill and intangible assets with indefinite lives not be amortized, but rather be tested at least annually for impairment.

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE 2: Summary of Significant Accounting Policies – continued**

***Business Combinations, Goodwill and Other Intangible Assets – continued***

The goodwill recorded for the acquisition of the branches of Sterling Financial Corporation (“Sterling”) in 2012 was \$6,890,000. Final valuation adjustments were recorded in 2013 for \$144,000 and impacted goodwill. The final goodwill recorded related to the acquisition was \$7,034,000. Goodwill recorded for the TwinCo acquisition during the first quarter of 2018 was \$5,090,000. Goodwill is not subject to amortization in accordance with accounting guidance. The Company performs a goodwill impairment test annually as of June 30. There have been no reductions of recorded goodwill resulting from the impairment tests. Other identifiable intangible assets recorded by the Company represent the future benefit associated with the acquisition of the core deposits. The Sterling core deposit intangible assets are being amortized over 7 years and the TwinCo core deposit intangible assets are being amortized over 10 years utilizing methods that approximate the expected attrition of the deposits. The amortization expense is included in the noninterest expense section of the consolidated statements of income.

***Recent Accounting Pronouncements***

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606). This guidance is a comprehensive new revenue recognition standard that supersedes substantially all existing revenue recognition guidance. The new standard’s core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under existing guidance. These may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. In July 2015, the FASB agreed to delay the effective date of the standard by one year. Therefore, the new standard was effective in the first quarter of 2018. The adoption of the standard in the first quarter of 2018 did not have a significant impact on our consolidated financial statements.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments – Overall: Recognition and Measurement of Financial Assets and Financial Liabilities (Subtopic 825-10). The amendment has a number of provisions including the requirements that public business entities use the exit price notion when measuring the fair value of financial instruments for disclosure purposes, a separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (i.e. securities or loans receivables), and eliminating the requirement for public

business entities to disclose the methods and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost. The amendment is effective for annual and interim reporting periods beginning after December 15, 2017 and was adopted by the Company in the first quarter of 2018. Note 23. Fair Value Disclosures for December 31, 2018, reflects the provisions of this pronouncement.

*Recent Accounting Pronouncements – continued*

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) intended to improve financial reporting regarding leasing transactions. The new standard affects all companies and organizations that lease assets. The standard will require organizations to recognize on the balance sheet the assets and liabilities for the rights and obligations created by those leases if the lease terms are more than 12 months. The guidance also will require qualitative and quantitative disclosures providing additional information about the amounts recorded in the financial statements. The amendments in this update are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company is evaluating the potential impact of the amendment on the Company's consolidated financial statements. We currently lease seven locations that serve as full-service branches, with the longest running lease expiring in 2028. We are using a third party vendor to assist with the implementation of this standard.

In September 2016, the FASB issued ASU No. 2016-13, Financial Instruments – Credit Losses (Topic 326) intended to improve financial reporting by requiring timelier recording of credit losses on loans and other financial instruments held by financial institutions and other organizations. The standard requires an organization to measure all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions and reasonable and supportable forecasts. Financial institutions and other organizations will now use forward-looking information to better inform their credit loss estimates. The standard also requires enhanced disclosures to help investors and other financial statement users better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an organization's portfolio. These disclosures include qualitative and quantitative requirements that provide additional information about the amounts recorded in the financial statements. Additionally, the standard amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration.

The amendments in this update are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. All entities may adopt the amendments in this update earlier as of the fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. An entity will apply the amendments in this update through a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective (that is, a modified-retrospective approach).

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE 2: Summary of Significant Accounting Policies – continued**

*Recent Accounting Pronouncements – continued*

The Company believes the amendments in this update will have an impact on the Company's consolidated financial statements and is working to evaluate the significance of that impact. In that regard, we have established a working group under the direction of our Chief Financial Officer and Chief Credit Officer. The group is composed of individuals from the finance and credit administration areas of the Company. We are currently developing an implementation plan, including assessment of processes, segmentation of the loan portfolio and identifying and adding data fields necessary for analysis. The adoption of this standard is likely to result in an increase in the allowance for loan and lease losses as a result of changing from an "incurred loss" model to an "expected loss" model. While we currently cannot reasonably estimate the impact of adopting this standard, we expect the impact will be influenced by the composition, characteristics and quality of our loan and securities portfolios, as well as the general economic conditions and forecasts as of the adoption date.

In January 2017, the FASB issued ASU No. 2017-04, Intangibles – Goodwill and Other (Topic 350) to amend and simplify current goodwill impairment testing to eliminate Step 2 from the current provisions. Under the new guidance, an entity should perform the goodwill impairment test by comparing the fair value of a reporting unit with its carrying value and recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value. An entity still has the option to perform the qualitative assessment for a reporting unit to determine if a quantitative impairment test is necessary. The guidance will be effective for the Company on January 1, 2020 and is not expected to have a significant impact on the Company's consolidated financial statements. We have improved our internal reporting systems as it relates to profitability by divisions and markets within the Company. We expect these systems to help in our evaluation of potential impairment.

In March 2017, the FASB issued ASU No. 2017-08, Receivables–Nonrefundable Fees and Other Costs (Subtopic 310-20) to shorten the amortization period for certain purchased callable debt securities held at a premium to the earliest call date. Currently, entities generally amortize the premium as a yield adjustment over the contractual life of the security. The guidance does not change the accounting for callable debt securities held at a discount. For public business entities, the guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted, including in an interim period. We have currently been following this guidance based on our internal investment policy guidelines. There is little impact on our consolidated financial statements, as we typically do not invest in these types of securities.

Table of Contents**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 3: Earnings Per Share**

The computations of basic and diluted earnings per share are below. The weighted average shares for the year ended December 31, 2017 include the impact of the public offering of common stock in October 2017 which resulted in the issuance of 1,189,041 shares.

|   | Years Ended<br>December 31,<br>2018          2017<br>(Dollars in Thousands,<br>Except<br>for Per Share Data) |           |
|---|--|-----------|
| Weighted average shares outstanding during the period in which basic earnings per share is calculated | 5,426,605  | 4,074,231 |
| Dilutive effect of stock compensation   | 63,742   | 58,359    |
| Average outstanding shares on which diluted earnings per share is calculated                          | 5,490,347  | 4,132,590 |
| Net income applicable to common stockholders  | \$4,982  | \$4,103   |
| Basic earnings per share  | \$0.92   | \$1.01    |
| Diluted earnings per share  | \$0.91   | \$0.99    |

**NOTE 4: Investment Securities**

The Company's investment policy requires that the Company purchase only high-grade investment securities. Most municipal obligations are categorized as "A" or better by a nationally recognized statistical rating organization. These ratings are achieved because the securities are backed by the full faith and credit of the municipality and also supported by third-party credit insurance policies.

Mortgage-backed securities ("MBSs") and collateralized mortgage obligations ("CMOs") are issued by government sponsored corporations, including Federal Home Loan Mortgage Corporation, Fannie Mae and the Guaranteed

National Mortgage Association. Asset-backed securities (“ABSs”) are financial securities collateralized by a pool of assets, such as loans, leases, credit card debt, royalties or receivables. An ABS is similar to an MBS, except that the underlying securities are not mortgage-based.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 4: Investment Securities – continued**

The amortized cost and fair value of securities at December 31, 2018 by contractual maturity are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

|                                     | Amortized Fair<br>Cost      Value<br>(In Thousands) |            |
|-------------------------------------|---|------------|
| Due in one year or less             | \$-   | \$-        |
| Due from one to five years          | 15,337  | 15,033     |
| Due from five to ten years          | 12,084  | 12,039     |
| Due after ten years                 | 72,697  | 71,870     |
|                                     | 100,118   | 98,942     |
| Mortgage-backed securities          | 19,635  | 19,348     |
| Collateralized mortgage obligations | 24,229  | 23,875     |
| Total                               | \$ 143,982  | \$ 142,165 |

Maturities of securities do not reflect repricing opportunities present in adjustable rate securities.

At December 31, 2018 and 2017, securities with a fair value of \$21,408,000 and \$8,415,000, respectively, were pledged to secure public deposits and for other purposes required or permitted by law.

The Company's investment securities that have been in a continuous unrealized loss position for less than 12 months and those that have been in a continuous unrealized loss position for 12 or more months were as follows:

| December 31, 2018   |            |                     |            |
|---------------------|------------|---------------------|------------|

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 4: Investment Securities – continued**

Management evaluates securities for other-than-temporary impairment at least quarterly, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. As of December 31, 2018 and 2017, there were, respectively, 108 and 87 securities in an unrealized loss position that were considered to be temporarily impaired and therefore an impairment charge has not been recorded.

As of December 31, 2018, 74 U.S. government and agency securities and municipal obligations had unrealized losses with aggregate depreciation of approximately 1.88% from the Company's amortized cost basis of these securities. At December 31, 2017, 52 U.S. government and agency securities and municipal obligations had unrealized losses with aggregate depreciation of approximately 1.28% from the Company's amortized cost basis of these securities. As of December 31, 2018, 11 corporate obligations had unrealized losses of approximately 2.88% from the Company's amortized cost basis of these securities. At December 31, 2017, 15 corporate obligations had unrealized losses with aggregate depreciation of approximately 0.84% from the Company's amortized cost basis of these securities. As management has the ability to hold debt securities until maturity, or for the foreseeable future, no declines are deemed to be other than temporary.

As of December 31, 2018, 19 MBSs and CMOs had unrealized losses with aggregate depreciation of approximately 2.54% from the Company's amortized cost basis of these securities. At December 31, 2017, 20 MBSs and CMOs had unrealized losses with aggregate depreciation of approximately 1.71% from the Company's amortized cost basis. Management's analysis as of December 31, 2018 revealed no expected credit losses on the securities and therefore, declines are not deemed to be other than temporary.

As of December 31, 2018, 4 ABSs had unrealized losses with aggregate depreciation of approximately 1.89% from the Company's amortized cost basis of these securities. The ABSs were purchased during the quarter ended March 31, 2018. Management's analysis as of December 31, 2018 revealed no expected credit losses on the securities and therefore, declines are not deemed to be other than temporary.

Table of Contents

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 5: Loans – continued**

The Company utilizes an 8-point internal loan rating system, largely based on regulatory classifications, as follows:

*Loans Rated Pass* – these are loans in categories 1 – 5 that are considered to be protected by the current net worth and paying capacity of the obligor, or by the value of the asset or the underlying collateral.

*Loans Rated Special Mention* – these loans in category 6 have potential weaknesses and are watched closely by management. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset at some future date.

*Loans Rated Substandard* – these loans in category 7 are inadequately protected by the current net worth and paying capacity of the obligor or the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

*Loans Rated Doubtful* – these loans in category 8 have all the weaknesses inherent in those classified Substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

*Loans Rated Loss* – these loans are considered uncollectible and are not part of the 8-point rating system. They are of such small value that their continuance as assets without establishment of a specific reserve is not warranted. This classification does not mean that an asset has absolutely no recovery or salvage value, but, rather, that it is not practical or desirable to defer writing off a basically worthless asset even though practical recovery may be effected in the future.

On an annual basis, or more often if needed, the Company formally reviews the ratings of all commercial real estate, real estate construction and commercial business loans that have a principal balance of \$750,000 or more. Quarterly, the Company reviews the rating of any consumer loan, broadly defined, that is delinquent 90 days or more. Likewise,

quarterly, the Company reviews the rating of any commercial loan, broadly defined, that is delinquent 60 days or more. Annually, the Company engages an independent third-party to review a significant portion of loans within these segments. Management uses the results of these reviews as part of its annual review process.

Interest income not accrued on these loans and cash interest income was \$211,000 for the year ended December 31, 2018. Interest income not accrued on these loans and cash interest income was immaterial for the year ended December 31, 2017. The allowance for loan losses on non-accrual loans as of December 31, 2018 and 2017 was \$0 and \$49,000, respectively. Impaired loans with a carrying value of \$2,290,000 were not reduced by specific valuation allowance allocations and therefore resulted in a total reported fair value of \$2,290,000 at December 31, 2018. Impaired loans with a carrying value of \$977,000 were reduced by specific valuation allowance allocations totaling \$49,000 for a total reported fair value of \$928,000 at December 31, 2017.

**NOTE 6: Troubled Debt Restructurings**

A troubled debt restructured (“TDR”) loan is a loan in which the Bank grants a concession to the borrower that it would not otherwise consider, for reasons related to a borrower's financial difficulties. The loan terms which have been modified or restructured due to a borrower's financial difficulty, include but are not limited to a reduction in the stated interest rate; an extension of the maturity at an interest rate below current market rates; a reduction in the face amount of the debt; a reduction in the accrued interest; or re-aging, extensions, deferrals, renewals and rewrites or a combination of these modification methods. A TDR loan would generally be considered impaired in the year of modification and will be assessed periodically for continued impairment.

Table of Contents

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 6: Troubled Debt Restructurings – continued**

The Company offers a variety of modifications to borrowers. The modification categories offered can generally be described in the following categories:

*Rate Modification* – A modification in which the interest rate is changed.

*Term Modification* – A modification in which the maturity date, timing of payments or frequency of payments is changed.

*Interest Only Modification* – A modification in which the loan is converted to interest only payments for a period of time.

*Payment Modification* – A modification in which the dollar amount of the payment is changed, other than an interest only modification described above.

*Combination Modification* – Any other type of modification, including the use of multiple categories above.

The Company had one TDR loan at December 31, 2016 with a recorded investment of \$43,000 and a \$34,000 charge-off at time of restructure. The loan was a home equity loan and was on accrual status. The remaining recorded investment of \$42,000 was paid-off during the quarter ended June 30, 2017 and the \$34,000 charge-off was recovered. During the year ended December 31, 2017, there were no restructured loans.

During the year ended December 31, 2018, there was one new restructured loan. The recorded investment at time of restructure was \$23,000 and no charge-off was incurred. The loan is a home equity loan and is on non-accrual status. The recorded investment was \$22,000 at December 31, 2018.

There were no loans modified as a troubled debt restructured loan that defaulted during the year ended December 31, 2018 where the default occurred within 12 months of restructuring. A default for purposes of this disclosure is a troubled debt restructured loan in which the borrower is 90 days past due or results in the foreclosure and repossession of the applicable collateral.

As of December 31, 2018, the Company had no commitments to lend additional funds to loan customers whose terms had been modified in trouble debt restructures.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 8: Mortgage Servicing Rights – continued**

The following table is a summary of activity in mortgage servicing rights and the valuation allowance:

|   | Years Ended<br>December 31, |         |
|---|-----------------------------|---------|
|   | 2018                        | 2017    |
|   | (In Thousands)              |         |
| Mortgage servicing rights:                |                             |         |
| Beginning balance                         | \$6,578                     | \$5,853 |
| Mortgage servicing rights capitalized     | 1,725                       | 1,811   |
| Amortization of mortgage servicing rights | (1,203)                     | (1,086) |
| Ending balance                            | 7,100                       | 6,578   |
| Valuation allowance:                      |                             |         |
| Beginning balance                         | -                           | -       |
| Provision (credited) to operations        | -                           | -       |
| Ending balance                            | -                           | -       |
| Mortgage servicing rights, net            | \$7,100                     | \$6,578 |

The fair values of these rights were \$8,700,000 and \$7,312,000 at December 31, 2018 and 2017, respectively. The fair value of servicing rights was determined at loan level using a discount rate of 12.00% for all investor types and prepayment speeds ranging from 83.00% to 226.00% PSA (Public Securities Association prepayment model), depending on the interest rate and term of the specific loan. The weighted average prepayment speed was 119.00% PSA. Individual mortgage servicing rights values were capped at a maximum of 1.25% for all investor types.

**NOTE 9: Premises and Equipment**

The cost and accumulated depreciation of premises and equipment was as follows:

|  | December 31,   |      |
|--|----------------|------|
|  | 2018           | 2017 |
|  | (In Thousands) |      |

Edgar Filing: Eagle Bancorp Montana, Inc. - Form 10-K

|                             |          |          |
|-----------------------------|----------|----------|
| Land                        | \$7,257  | \$4,086  |
| Buildings and improvements  | 26,011   | 21,674   |
| Furniture and equipment     | 8,428    | 6,940    |
| Construction in progress    | 1,787    | 2,140    |
|                             | 43,483   | 34,840   |
| Accumulated depreciation    | (14,140) | (12,882) |
| Premises and equipment, net | \$29,343 | \$21,958 |

Construction in progress at December 31, 2018, primarily relates to the development of new branch locations. Depreciation expense was \$1,282,000 and \$969,000 for the years ended December 31, 2018 and 2017, respectively.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE 12: Advances from the Federal Home Loan Bank and Other Borrowings – continued**

*Federal Home Loan Bank Advances*

FHLB advances include both fixed and amortizing advances. Fixed advances are due at maturity. Advances are subject to prepayment penalties. Interest rates on these advances are fixed. Advances are collateralized by a blanket pledge of the Bank's loan portfolio. At December 31, 2018 and 2017, the Company exceeded the collateral requirements of the FHLB. The Company's investment in FHLB stock is also pledged as collateral on these advances. The total FHLB funding available to the Company at December 31, 2018, was 45.00% of total Bank assets as determined by FHLB, or approximately \$373,448,000. The balance of advances was \$101,357,000 and \$82,104,000 at December 31, 2018 and 2017, respectively. The Bank also has a contingent letter of credit with FHLB for \$620,000 and \$405,000 at December 31, 2018 and 2017, respectively.

*Other Borrowings*

At December 31, 2018 and 2017, the Bank's subsidiary had an \$865,000 borrowing related to New Markets Tax Credits. The borrowing is interest only at 1.00% and matures in 2019.

*Federal Funds Purchased*

The Bank has a \$7,000,000 Federal funds line of credit with PNC. The balance was \$0 as of December 31, 2018 and 2017.

The Bank has a \$10,000,000 Federal funds line of credit with Zions Bank. The balance was \$0 as of December 31, 2018 and 2017, respectively.

The Bank previously had a \$7,000,000 Federal funds line of credit with Stockman Bank. The balance was \$0 as of December 31, 2017 and the line of credit was terminated during 2018.

The Bank has a \$10,000,000 Federal funds line of credit with PCBB. The balance was \$0 as of December 31, 2018 and 2017, respectively.

During 2018, the Bank established a \$5,000,000 Federal funds line of credit with United Bankers' Bank. The balance was \$0 as of December 31, 2018.

### ***Federal Reserve Bank Discount Window***

For additional liquidity sources, the Bank has a credit facility at the Federal Reserve Bank's Discount Window. The amount available to the Bank is limited by various collateral requirements. There were no pledged securities at the Federal Reserve Bank as of December 31, 2018 and 2017. The credit facility account had a \$0 balance as of December 31, 2018 and 2017, respectively.

### ***All Borrowings Outstanding***

For all borrowings outstanding the weighted average interest rate for advances at December 31, 2018 and 2017 was 2.20% and 1.58%, respectively. The average amount outstanding was \$87,283,000 and \$84,195,000 for 2018 and 2017, respectively.

The maximum amount outstanding at any month-end was \$102,222,000 and \$120,804,000 for 2018 and 2017, respectively.

| Subordinated<br>debentures<br>variable at<br>3-Month Libor<br>plus 1.42%, due<br>2035 | 5,155                                 | -  | 5,155               | -  |
| Total other<br>long-term debt   | \$ 25,155                             | \$ (279 )                                | \$ 25,155           | \$ (344 )                                |

In February 2017, the Company completed the issuance, through a private placement, of \$10,000,000 aggregate principal amount of 5.75% fixed senior unsecured notes due in 2022. The interest will be paid semi-annually through maturity date. The notes are not subject to redemption at the option of the Company.

In June 2015, the Company completed the issuance of \$10,000,000 in aggregate principal amount of subordinated notes due in 2025 in a private placement transaction to an institutional accredited investor. The notes will bear interest at an annual fixed rate of 6.75% and interest will be paid quarterly through maturity date or earlier redemption. The subordinated debentures qualify as Tier 2 capital for regulatory capital purposes.

In September 2005, the Company completed the private placement of \$5,155,000 in subordinated debentures to Eagle Bancorp Statutory Trust I (“the Trust”). The Trust funded the purchase of the subordinated debentures through the sale of trust preferred securities to First Tennessee Bank, N.A. with a liquidation value of \$5,155,000. Using interest payments made by the Company on the debentures, the Trust began paying quarterly dividends to preferred security holders on December 15, 2005. The annual percentage rate of the interest payable on the subordinated debentures and distributions payable on the preferred securities was fixed at 6.02% until December 2010 then became variable at 3-Month LIBOR plus 1.42%, making the rate 4.228% and 3.114% as of December 31, 2018 and 2017, respectively. Dividends on the preferred securities are cumulative and the Trust may defer the payments for up to five years. The preferred securities mature in December 2035 unless the Company elects and obtains regulatory approval to accelerate the maturity date. The subordinated debentures qualify as Tier 1 capital for regulatory capital purposes.

For 2018 and 2017, interest expense on other long-term debt was \$1,432,000 and \$1,324,000, respectively.

As a result of the Tax Cuts and Job Act enacted December 22, 2017, Eagle revalued its deferred tax assets and liabilities to account for the future impact of lower corporate tax rates and other provisions of the legislation. Based on its preliminary analysis, Eagle recorded a one-time net tax charge of \$715,000 related to the revaluation of these deferred tax items. This increase in income tax expense was reflected in Eagle's operating results for the fourth quarter of 2017 and was in addition to the normal provision for income tax related to pre-tax net operating income. The income tax effects from accumulated other comprehensive income were considered insignificant.

The Company has equity investments in Certified Development Entities which have received allocations of New Markets Tax Credits. Administered by the Community Development Financial Institutions Fund of the U.S. Department of the Treasury, the program is aimed at stimulating economic and community development and job creation in low-income communities. The federal income tax credits received are expected to be \$2,964,000 and will be claimed over an estimated seven-year credit allowance period. The cumulative federal tax credit benefits were \$2,736,000 as of December 31, 2018. Due to not having sufficient taxable income only \$2,277,000 of the federal tax credit benefits were utilized as of December 31, 2018. The remaining federal tax credit benefits of \$459,000 are recorded as deferred tax assets and will be used in future periods.

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 18: Regulatory Capital Requirements**

The Company (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

Beginning January 1, 2015, community banking organizations became subject to a new regulatory rule recently adopted by federal banking agencies (commonly referred to as Basel III). The new rule establishes a new regulatory capital framework that incorporates revisions to the Basel capital framework, strengthens the definition of regulatory capital, increases risk-based capital requirements, and amends the methodologies for determining risk-weighted assets. These changes are expected to increase the amount of capital required by community banking organizations. Basel III includes a multiyear transition period from January 1, 2015 through December 31, 2019.

When fully phased in on January 1, 2019, the Basel III capital rules will require the Bank to maintain a minimum ratio of common equity Tier 1 capital to risk-weighted assets of at least 4.5%, plus a 2.5% "capital conservation buffer" (which is added to the 4.5% common equity Tier 1 capital ratio as the buffer is phased in, effectively resulting in a minimum ratio of common equity Tier 1 capital to risk-weighted assets of 7.0% upon full phase in). The Bank will also be required to maintain a Tier 1 capital to risk-weighted assets ratio of 6.0 (8.5% including the capital conservation buffer), a total capital to risk-weighted assets ratio of 8.0% (10.5% including the capital conservation buffer), and a Tier 1 capital to average assets ratio of 4.0%.

Management believes that, as of December 31, 2018, the Company and the Bank would meet all capital adequacy requirements under the Basel III Capital rules on a fully phased-in basis as if such requirements were currently in effect; however, final rules are subject to regulatory discretion and could result in the need for additional capital levels in the future.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital to risk-weighted assets and Tier 1 capital to total assets (all as defined in the regulations). Management believes, as of December 31, 2018 and 2017, that the Company and the Bank met all capital adequacy requirements to which they are subject.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 18: Regulatory Capital Requirements – continued**

As of December 31, 2018, the most recent notification from the FRB categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well-capitalized, the Bank must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the table below. There are no conditions or events since the notification that management believes have changed the Banks's category. The Bank's actual capital amounts and ratios as of December 31, 2018 are presented in the table below and include the capital conservation buffer of 1.875% phased-in beginning January 1, 2018:

|  | Actual                 |         | Minimum Required for Capital Adequacy |        | Minimum Required for Capital Adequacy |         | Minimum To Be Well Capitalized Under Prompt Corrective Action Provisions |        |
|--|------------------------|---------|---------------------------------------|--------|---------------------------------------|---------|--|--------|

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 18: Regulatory Capital Requirements – continued**

*Dividend Limitations*

Under State of Montana banking regulation, member banks such as the Bank generally may declare annual cash dividends up to an amount equal to the previous two years' net earnings. Dividends in excess of such amount require approval of the Division of Banking. The Bank paid dividends of \$11,400,000 and \$2,000,000 during the years ended December 31, 2018 and 2017, respectively, to Eagle. The dividends paid to Eagle for 2018 include the cash consideration for the TwinCo acquisition of \$9,900,000. Eagle paid quarterly dividends of \$0.09 per share to its shareholders for the first two quarters of 2018 and \$0.0925 for the last two quarters of 2018. Eagle paid quarterly dividends of \$0.08 per share to its shareholders for the first two quarters of 2017 and \$0.09 for the last two quarters of 2017.

*Liquidation Rights*

Eagle Bancorp Montana, Inc. holds a liquidation account for the benefit of certain depositors of the Bank who remain depositors of the Bank at the time of liquidation. The liquidation account is designed to provide payments to these depositors of their liquidation interests in the event of a liquidation of Eagle and the Bank, or the Bank alone. In the unlikely event that Eagle and the Bank were to liquidate in the future, all claims of creditors, including those of depositors, would be paid first, followed by distribution to depositors as of November 30, 2008 (who continue to be the Bank's depositors) of the liquidation account maintained by Eagle. Also, in a complete liquidation of both entities, or of just the Bank, when Eagle has insufficient assets to fund the liquidation account distribution due to depositors and the Bank has positive net worth, the Bank would immediately pay amounts necessary to fund Eagle's remaining obligations under the liquidation account. If Eagle is completely liquidated or sold apart from a sale or liquidation of the Bank, then the rights of such depositors in the liquidation account maintained by Eagle would be surrendered and treated as a liquidation account in the Bank, the "bank liquidation account" and these depositors shall have an equivalent interest in the bank liquidation account and the same rights and terms as the liquidation account.

After two years from the date of conversion and upon the written request of the Office of the Comptroller of the Currency ("OCC"), Eagle will eliminate or transfer the liquidation account and the interests in such account to the Bank and the liquidation account would become the liquidation account of the Bank and not subject in any manner or amount to Eagle's creditors. Also, under the rules and regulations of the OCC, no post-conversion merger, consolidation, or similar combination or transaction with another depository institution in which Eagle or the Bank is

not the surviving institution would be considered a liquidation and, in such a transaction, the liquidation account would be assumed by the surviving institution.

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 19: Related Party Transactions**

In the normal course of lending, the Bank provided a commercial line of credit to an affiliated entity that is partially owned by one of the Company's directors. The commercial line of credit paid off during the year ended December 31, 2018 and had a balance of \$0 as of December 31, 2018 and 2017, respectively. In addition, also in the normal course of lending, the Bank provided a commercial real estate loan to a separate affiliated entity that is partially owned by the same director. The commercial real estate loan had a balance of \$296,000 and \$332,000 as of December 31, 2018 and 2017, respectively.

**NOTE 20: Employee Benefits**

*Profit Sharing Plan*

The Company provides a noncontributory profit sharing plan for eligible employees who have completed one year of service. The amount of the Company's annual contribution is determined by the Board. Profit sharing expense was \$573,000 and \$565,000 for the years ended December 31, 2018 and 2017, respectively.

The Company's profit sharing plan includes a 401(k) feature. At the discretion of the Board, the Company may match up to 50.00% of participants' contributions up to a maximum of 4.00% of participants' salaries. For the years ended December 31, 2018 and 2017, the Company's match totaled \$270,000 and \$206,000, respectively.

*Deferred Compensation Plans*

The Company has entered into deferred compensation contracts with current key employees. The contracts provide fixed benefits payable in equal annual installments upon retirement. The Company purchased life insurance contracts that may be used to fund the payments. The charge to expense is based on the present value computations of anticipated liabilities. For the years ended December 31, 2018 and 2017, the total expense was \$382,000 and \$272,000, respectively. The Company recorded a liability for the deferred compensation plan of \$2,093,000 and

\$1,833,000 at December 31, 2018 and 2017, respectively, which are included in accrued expenses and other liabilities in the consolidated statements of financial condition.

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE 20: Employee Benefits – continued**

***Employee Stock Ownership Plan***

The Company has established an ESOP for eligible employees who meet certain age and service requirements. At inception, in April 2000, the ESOP borrowed \$368,000 from Eagle Bancorp and used the funds to purchase 46,006 shares of common stock, at \$8 per share, in the initial offering. This borrowing was fully paid on December 31, 2009. Again, in conjunction with the subsequent offering in April 2010, the ESOP borrowed \$1,971,420 from Eagle Bancorp Montana, Inc. and used the funds to purchase 197,142 shares of common stock, at \$10 per share. The Bank makes periodic contributions to the ESOP sufficient to satisfy the debt service requirements of the loan that has a twelve-year term and bears interest at 8.00%. The ESOP uses these contributions, and any dividends received by the ESOP on unallocated shares, to make principal and interest payments on the loan.

Shares purchased by the ESOP are held in a suspense account by the plan trustee until allocated to participant accounts. Shares released from the suspense account are allocated to participants on the basis of their relative compensation in the year of allocation. Participants become vested in the allocated shares over a period not to exceed seven years. Any forfeited shares are allocated to other participants in the same proportion as contributions.

Total ESOP expenses of \$293,000 and \$292,000 were recognized for the years ended December 31, 2018 and 2017, respectively. Shares totaling 16,616 were released and allocated to participants during the years ended December 31, 2018 and 2017. The cost of the 47,594 ESOP shares (\$477,000 at December 31, 2018) that have not yet been allocated or committed to be released to participants is deducted from shareholders' equity. The fair value of these shares was approximately \$785,000 at December 31, 2018.

***Stock Incentive Plan***

The Company adopted the stock incentive plan on November 1, 2011 and the original number of shares of restricted stock for issuance under the plan was 98,571. The plan provides for different types of awards including stock options, restricted stock and performance shares. Under the plan, 98,571 shares of restricted stock were granted to directors and certain officers during November 2011. The plan was amended during the year ended December 31, 2015 to increase the number of shares of restricted stock for issuance under the plan from 98,571 to 168,571. The plan was

amended again during the year ended December 31, 2017 to increase the number of shares of restricted stock for issuance under the plan from 168,571 to 218,571. Shares of restricted stock vest in equal installments over five years beginning one year from the grant date.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 20: Employee Benefits – continued***Stock Incentive Plan – continued*

The following table shows the activity of the awards granted:

|   | Number<br>of<br>Shares |
|---|------------------------|
| Unvested awards as of January 1, 2017   | 64,268                 |
| Awards granted                          | 30,700                 |
| Awards vested                           | (13,228)               |
| Awards forfeited                        | (17,280)               |
| Unvested awards as of December 31, 2017 | 64,460                 |
| Awards granted                          | 12,900                 |
| Awards vested                           | (17,200)               |
| Awards forfeited                        | -                      |
| Unvested awards as of December 31, 2018 | 60,160                 |

\$287,000 and \$277,000 was recognized as expense during the years ended December 31, 2018 and 2017, respectively, and is included in salaries and employee benefits in the consolidated statements of income. As of December 31, 2018, 60,160 shares of restricted stock remain unvested, for which the Company estimates to recognize expense of approximately \$914,000 by November 2023.

**NOTE 21: Financial Instruments and Off-Balance-Sheet Activities**

All financial instruments held or issued by the Company are held or issued for purposes other than trading. In the ordinary course of business, the Bank enters into off-balance-sheet financial instruments consisting of commitments to extend credit and forward delivery commitments for the sale of whole loans to the secondary market.

In response to marketplace demands, the Bank routinely makes commitments to extend credit for fixed rate and variable rate loans with or without rate lock guarantees. When rate lock guarantees are made to customers, the Bank becomes subject to market risk for changes in interest rates that occur between the rate lock date and the date that a firm commitment to purchase the loan is made by a secondary market investor.

Generally, as interest rates increase, the market value of the loan commitment goes down. The opposite effect takes place when interest rates decline.

Commitments to extend credit are agreements to lend to a customer as long as the borrower satisfies the Bank's underwriting standards and related provisions of the borrowing agreements. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The Bank uses the same credit policies in making commitments to extend credit as it does for on-balance-sheet instruments. Collateral is required for substantially all loans, and normally consists of real property. The Bank's experience has been that substantially all loan commitments are completed or terminated by the borrower within 3 to 12 months.

Table of Contents

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE 21: Financial Instruments and Off-Balance-Sheet Activities – continued**

The Bank has remaining available balances for lines of credit representing credit risk of approximately \$111,460,000 and \$92,740,000 at December 31, 2018 and 2017, respectively. The Bank has letters of credits issued representing credit risk of approximately \$3,925,000 and \$3,534,000 at December 31, 2018 and 2017, respectively.

Mortgage loan commitments are referred to as derivative loan commitments if the loan that will result from exercise of the commitment will be held-for-sale upon funding. The Bank enters into commitments to fund residential mortgage loans at specified times in the future, with the intention that these loans will subsequently be sold in the secondary market. A mortgage loan commitment binds the Bank to lend funds to a potential borrower at a specified interest rate and within a specified period of time, generally up to 60 days after inception of the rate lock.

Outstanding derivative loan commitments expose the Bank to the risk that the price of the loans arising from exercise of the loan commitment might decline from inception of the rate lock to funding of the loan due to increases in mortgage interest rates. If interest rates increase, the value of these loan commitments decreases. Conversely, if interest rates decrease, the value of these loan commitments increases. The notional amount of interest rate lock commitments was \$18,745,000 and \$15,338,000 at December 31, 2018 and 2017, respectively. Fixed rate commitments are extended at rates ranging from 3.75% to 6.25% and 3.25% to 5.00% at December 31, 2018 and 2017, respectively. The fair value of such commitments was insignificant.

The Company has no other off-balance-sheet arrangements or transactions with unconsolidated, special purpose entities that would expose the Company to liability that is not reflected on the face of the financial statements.

**NOTE 22: Derivatives and Hedging Activities**

***Forward Delivery Commitments***

The Company uses mandatory sell forward delivery commitments to sell whole loans. These commitments are also used as a hedge against exposure to interest rate risks resulting from rate locked loan origination commitments on

certain mortgage loans held-for-sale. Gains and losses on the items hedged are deferred and recognized in accumulated other comprehensive income until the commitments are completed. At the completion of the commitments the gains and losses are recognized in the Company's income statement.

As of December 31, 2018 and 2017, the Company had entered into commitments to deliver approximately \$7,104,000 and \$8,735,000, respectively, in loans to various investors, all at fixed interest rates ranging from 3.50% to 6.25% and 2.48% to 4.75% at December 31, 2018 and 2017, respectively. The Company had approximately \$309,000 and \$325,000 of gains deferred as a result of the forward delivery commitments entered into as of December 31, 2018 and 2017, respectively.

Table of Contents

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 22: Derivatives and Hedging Activities – continued**

*Forward Delivery Commitments – continued*

The Company did not have any gains or losses reclassified into earnings as a result of the ineffectiveness of its hedging activities. The Company considers its hedging activities to be highly effective.

The Company did not have any gains or losses reclassified into earnings as a result of the discontinuance of cash flow hedges because it was probable that the original forecasted transaction would not occur by the end of the originally specified time frame as of December 31, 2018.

Refer to Note 21 for additional information regarding the Company's use of derivative loan commitments. These derivative instruments are not designated as hedging instruments.

**NOTE 23: Fair Value Disclosures**

The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

The Company uses valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert

future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement costs). Valuation techniques should be consistently applied.

Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, the Company establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs.

- 56 -

---

Table of Contents

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 23: Fair Value Disclosures – continued**

The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs - Significant unobservable inputs that reflect an entity's own assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

**Available-for-Sale Securities** – Securities classified as available-for-sale are reported at fair value utilizing Level 1 and Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U. S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayments speeds, credit information and the bond's terms and conditions, among other things.

***Impaired Loans*** – Impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on internally customized discounting criteria.

***Loans Held-for-Sale*** – These loans are reported at fair value. Fair value is determined based on expected proceeds based on sales contracts and commitments and are considered Level 2 inputs.

***Repossessed Assets*** – Fair values are valued at the time the loan is foreclosed upon and the asset is transferred from loans. The value is based upon primary third party appraisals, less costs to sell. The appraisals are generally discounted based on management's historical knowledge, changes in market conditions from the time of valuation, and/or management's expertise and knowledge of the client and client's business. Such discounts are typically significant and result in Level 3 classification of the inputs for determining fair value. Repossessed assets are reviewed and evaluated on at least a quarterly basis for additional impairment and adjusted accordingly, based on same or similar factors above.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 23: Fair Value Disclosures – continued**

Certain financial assets and liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

The following tables summarizes financial assets and liabilities measured at fair value on a nonrecurring basis, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

|                    | December 31, 2018 |         |         |         |
|--------------------|-------------------|---------|---------|---------|
|                    | Level 1           | Level 2 | Level 3 | Total   |
|                    | Inputs            |         |         | Fair    |
|                    | Inputs            |         |         | Value   |
|                    | (In Thousands)    |         |         |         |
| Impaired loans     | \$-               | \$ -    | \$2,290 | \$2,290 |
| Repossessed assets | -                 | -       | 107     | 107     |

As of December 31, 2018, certain impaired loans were remeasured and reported at fair value through a specific valuation allowance allocation of the allowance for possible loan losses based on the fair value of the underlying collateral. Impaired loans with a carrying value of \$2,290,000 were not reduced by specific valuation allowance allocations and therefore resulted in a total reported fair value of \$2,290,000 based on collateral valuations utilizing Level 3 valuation inputs.

|                    | December 31, 2017 |         |         |        |
|--------------------|-------------------|---------|---------|--------|
|                    | Level 1           | Level 2 | Level 3 | Total  |
|                    | Inputs            |         |         | Fair   |
|                    | Inputs            |         |         | Value  |
|                    | (In Thousands)    |         |         |        |
| Impaired loans     | \$-               | \$ -    | \$ 928  | \$ 928 |
| Repossessed assets | -                 | -       | 525     | 525    |

As of December 31, 2017, certain impaired loans were remeasured and reported at fair value through a specific valuation allowance allocation of the allowance for possible loan losses based on the fair value of the underlying

collateral. Impaired loans with a carrying value of \$977,000 were reduced by specific valuation allowance allocations totaling \$49,000 to a total reported fair value of \$928,000 based on collateral valuations utilizing Level 3 valuation inputs.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 23: Fair Value Disclosures – continued**

The following table represents the Banks' Level 3 financial assets and liabilities, the valuation techniques used to measure the fair value of those financial assets and liabilities, and the significant unobservable inputs and the ranges of values for those inputs:

| Instrument<br>(Dollars In Thousands) | Fair Value at        |        | Principal<br>Valuation<br>Technique       | Significant<br>Unobservable<br>Inputs | Range of<br>Significant<br>Input<br>Values |
|--------------------------------------|----------------------|--------|---|---------------------------------------|--|
|                                      | December 31,<br>2018 | 2017   |   |                                       |  |
| Impaired loans                       | \$2,290              | \$ 928 | Appraisal of collateral <sup>(1)</sup>    | Appraisal adjustments                 | 10 - 30%                                   |
| Repossessed assets                   | \$ 107               | \$ 525 | Appraisal of collateral <sup>(1)(3)</sup> | Liquidation expenses <sup>(2)</sup>   | 10 - 30%                                   |

(1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various Level 3 inputs which are not identifiable, less associated allowance.

(2) Appraisals may be adjusted for qualitative factors such as economic conditions and estimated liquidation expenses. The range of liquidation expenses and other appraisal adjustments are presented as a percent of the appraisal.

(3) Includes qualitative adjustments by management and estimated liquidation expenses.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 23: Fair Value Disclosures – continued**

FASB ASC Topic 825 requires disclosure of the fair value of financial instruments, both assets and liabilities recognized and not recognized in the statement of financial position, for which it is practicable to estimate fair value. Below is a table that summarizes the fair market values of all financial instruments of the Company at December 31, 2018 and 2017, followed by methods and assumptions that were used by the Company in estimating the fair value of the classes of financial instruments.

The estimated fair value amounts of financial instruments have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

The following methods and assumptions were used by the Company in estimating the fair value of the following classes of financial instruments.

**Cash, Interest Bearing Accounts, Accrued Interest and Dividend Receivable and Accrued Expenses and Other Liabilities** – The carrying amounts approximate fair value due to the relatively short period of time between the origination of these instruments and their expected realization.

**Stock in the FHLB and FRB** – The fair value of stock approximates redemption value.

**Loans Receivable** – Fair values are estimated by stratifying the loan portfolio into groups of loans with similar financial characteristics. Loans are segregated by type such as real estate, commercial, and consumer, with each category further segmented into fixed and adjustable rate interest terms. For mortgage loans, the Company uses the secondary market rates in effect for loans that have similar characteristics. The fair value of other fixed rate loans is calculated by discounting scheduled cash flows through the anticipated maturities adjusted for prepayment estimates. Adjustable interest rate loans are assumed to approximate fair value because they generally reprice within the short term.

Fair values are adjusted for credit risk based on assessment of risk identified with specific loans, and risk adjustments on the remaining portfolio based on credit loss experience.

Assumptions regarding credit risk are judgmentally determined using specific borrower information, internal credit quality analysis, and historical information on segmented loan categories for non-specific borrowers.

Table of Contents

**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 23: Fair Value Disclosures – continued**

***Mortgage Servicing Rights*** – The fair value of servicing rights was determined at loan level using a discount rate of 12.00% for all investor types and prepayment speeds ranging from 83.00% to 226.00% PSA, depending on the interest rate and term of the specific loan. The weighted average prepayment speed was 119.00% PSA. Individual mortgage servicing rights values were capped at a maximum of 1.25% for all investor types.

***Cash Surrender Value of Life Insurance*** – The carrying amount for cash surrender value of life insurance approximates fair value as policies are recorded at redemption value.

***Deposits and Time Certificates of Deposit*** – The fair value of deposits with no stated maturity, such as checking, passbook, and money market, is equal to the amount payable on demand. The fair value of time certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar maturities.

***Advances from the FHLB/Other Borrowings and Other Long-Term Debt*** – The fair value of the Company's advances and debentures are estimated using discounted cash flow analysis based on the interest rate that would be effective December 31, 2018 and 2017, respectively if the borrowings repriced according to their stated terms.

***Off-Balance-Sheet Instruments*** - Fair values for off-balance-sheet, credit-related financial instruments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. The fair values of these financial instruments are considered insignificant. Additionally, those financial instruments have no carrying value.

**NOTE 24: Mergers and Acquisitions**

On September 5, 2017, the Company entered into an Agreement and Plan of Merger with TwinCo, a Montana corporation, and TwinCo's wholly-owned subsidiary, Ruby Valley Bank, a Montana chartered commercial bank to acquire 100% of TwinCo's equity voting interests. The merger agreement provided that Ruby Valley Bank would

merge with and into Opportunity Bank of Montana and that TwinCo would merge with and into the Company. Ruby Valley Bank operated 2 branches in Madison County, Montana. The transaction provided an opportunity to expand market presence and lending activities, particularly in agricultural lending. The acquisition closed January 31, 2018, after receipt of approvals from regulatory authorities, approval of TwinCo shareholders and the satisfaction of other closing conditions. The total consideration paid was \$18,930,000 and included cash consideration of \$9,900,000 and common stock issued of \$9,030,000.

The transaction was accounted for under the acquisition method of accounting in accordance with FASB ASC 805, Business Combinations. In business combination transactions in which the consideration given is not in the form of cash (that is, in the form of non-cash assets, liabilities incurred, or equity interests issued), measurement of the acquisition consideration is based on the fair value of the consideration given or the fair value of the asset (or net assets) acquired, whichever is more clearly evident and, thus, a more reliable measure.

Table of Contents**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 24: Mergers and Acquisitions – continued**

Under FASB ASC 805, all of the assets acquired and liabilities assumed in a business combination are recognized at acquisition at their acquisition-date fair value, while transaction costs and restructuring costs associated with the business combination are expensed as incurred. The excess of the acquisition consideration over the fair value of assets acquired and liabilities assumed, if any, is allocated to goodwill. Goodwill recorded in the acquisition was accounted for in accordance with the authoritative business combination guidance. Accordingly, goodwill will not be amortized, but will be tested for impairment annually. The goodwill recorded is not deductible for federal income tax purposes.

Assets acquired and liabilities assumed were recorded on the consolidated statement of financial condition at estimated fair value on acquisition date. The following table summarizes fair values of assets acquired and liabilities assumed, consideration paid and resulting goodwill.

|  | January 31,<br>2018<br>(In<br>Thousands,<br><br>Except<br>Share Data) |
|--|---|
| Assets acquired:                       |   |
| Cash and cash equivalents              | \$ 5,657  |
| Investment securities                  | 30,728  |
| Loans                                  | 55,057  |
| Premises and equipment                 | 1,605   |
| Other real estate owned                | 135   |
| Core deposit intangible                | 1,609   |
| Other assets                           | 1,258   |
| Total assets acquired                  | \$ 96,049   |
| Liabilities assumed:                   |   |
| Deposits                               | \$ 82,190   |
| Accrued expenses and other liabilities | 19  |
| Total liabilities assumed              | \$ 82,209   |
| Net assets acquired                    | \$ 13,840   |

|                                      |           |
|--------------------------------------|-----------|
| Consideration paid:                  |           |
| Cash                                 | \$ 9,900  |
| Common stock issued (446,774 shares) | 9,030     |
| Total consideration paid             | \$ 18,930 |
|                                      |           |
| Goodwill resulting from acquisition  | \$ 5,090  |

The fair value analysis of the loan portfolio resulted in a valuation adjustment for each loan based on an amortization schedule of expected cash flow. Individual amortization schedules were used for each loan over a certain amount and those with specifically identified loss exposure. The remainder of the loans were grouped by type and risk rating into loan pools (based on loans type, fixed or variable interest rate, revolving or term payments and risk rating). Yield inputs for the amortization schedules included contractual interest rates, estimated prepayment speeds, liquidity adjustments and market yields. Credit inputs for the amortization schedules included probability of payment default, loss given default rates and individually identified loss exposure.

Table of Contents**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 24: Mergers and Acquisitions – continued**

Information regarding loans acquired as of acquisition date is as follows:

|  | January 31,<br>2018<br>(In<br>Thousands) |
|--|--|
| Contractually required principal and interest at acquisition                 | \$ 56,891                                |
| Contractual cash flows not expected to be collected (nonaccretable discount) | (1,346 )                                 |
| Expected cash flows at acquisition   | 55,545                                   |
| Interest component of expected cash flows (accretable discount)              | (488 )                                   |
| Fair value of acquired loans   | \$ 55,057                                |

The total discount on acquired loans was \$1,834,000 as of January 31, 2018. During the year ended December 31, 2018, accretion of the loan discount was \$589,000. The loan discount was \$1,245,000 as of December 31, 2018.

Two impaired loans were acquired through the acquisition with a balance of \$1,188,000 as of January 31, 2018. The balance of the loans as of December 31, 2018 was \$1,170,000.

Core deposit intangible assets of \$1,609,000 are being amortized using an accelerated method over the estimated useful lives of the related deposits of 10 years.

The core deposit intangible value is a function of the difference between the cost of the acquired core deposits and the alternative cost of funds. This cash flow stream was discounted to present value. The fair value of other deposit accounts acquired were valued by estimating future cash flows to be received or paid from individual or homogenous groups of assets and liabilities and then discounting those cash flows to a present value using rates of return that were available in financial markets for similar financial instruments on or near January 31, 2018.

Direct costs related to the acquisition were expensed as incurred. The Company recorded acquisition costs related to the TwinCo acquisition of \$131,000 during the quarter ended June 30, 2018, \$234,000 during the quarter ended March 31, 2018 and \$676,000 during the year ended December 31, 2017. Acquisition costs included legal and professional fees and data processing incurred related to the acquisition.

Operations of TwinCo have been included in the consolidated financial statements since February 1, 2018. The Company does not consider TwinCo a separate reporting segment and does not track the amount of revenues and net income attributable to TwinCo since acquisition. As such, it is impracticable to determine such amounts for the period from February 1, 2018 through December 31, 2018.

Table of Contents**EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES**

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**NOTE 24: Mergers and Acquisitions – continued**

The accompanying consolidated statements of income include the results of operations of the acquired entity since the January 31, 2018 acquisition date. The following table presents unaudited pro forma results of operations for the years ended December 31, 2018 and 2017 as if the acquisition had occurred on January 1, 2017. This pro forma information gives effect to certain adjustments, including purchase accounting fair value adjustments and amortization of the core deposit intangible asset. The pro forma information does not necessarily reflect the results of operations that would have occurred had the Company purchased and assumed the assets and liabilities of TwinCo on January 1, 2017.

| Weighted average shares outstanding, diluted  | 5,490,347   | 4,132,590 |

(1) Significant assumptions utilized include the acquisition cost noted above, accretion of interest rate fair value adjustments, amortization of the core deposit intangible asset and a 28.00% effective tax rate for 2017.

Effective January 1, 2019, Eagle completed its previously announced merger (the “Merger”) with Big Muddy Bancorp, Inc. (“BMB”), pursuant to an Agreement and Plan of Merger, dated as of August 21, 2018, by and among Eagle, Opportunity Bank of Montana, BMB and BMB’s wholly-owned subsidiary, The State Bank of Townsend, a Montana

chartered commercial bank (“SBOT”). At the effective time of the Merger, BMB merged with and into Eagle, with Eagle continuing as the surviving corporation. SBOT operates four branches in Townsend, Dutton, Denton and Choteau, Montana. Eagle acquired approximately \$108,000,000 in assets, \$92,000,000 in deposits and \$92,000,000 in gross loans based on BMB’s September 30, 2018 financial statements. We are still determining the fair value of assets acquired and liabilities assumed as of January 1, 2019 in regards to this merger.
