WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2018

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-4448

BAXTER INTERNATIONAL INC.

(Exact name of registrant as specified in its charter)

Delaware	36-0781620
(State or other jurisdiction of	(I.R.S. Employer
incorporation or organization)	Identification No.)
One Baxter Parkway, Deerfield, Illinois	60015
(Address of principal executive offices)	(Zip Code)
224-948-2000	
(Registrant's telephone number, including area code)	

Edgar Filing: BAXTER INTERNATIONAL INC - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company,” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer	Accelerated filer
Non-accelerated filer	Smaller reporting company
Emerging growth company	

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of the registrant’s Common Stock, par value \$1.00 per share, outstanding as of October 31, 2018 was 532,140,998 shares.

BAXTER INTERNATIONAL INC.

Baxter International Inc.

Notes to Condensed Consolidated Financial Statements (unaudited)

1. BASIS OF PRESENTATION

The unaudited interim condensed consolidated financial statements of Baxter International Inc. and its subsidiaries (the company or Baxter) have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles (GAAP) in the United States have been condensed or omitted. These unaudited interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes included in the company's Current Report on Form 8-K filed with the SEC on August 23, 2018 (2017 Annual Report), which revised and superseded the corresponding sections of the Annual Report on Form 10-K for the year ended December 31, 2017.

In the opinion of management, the unaudited interim condensed consolidated financial statements reflect all adjustments necessary for a fair statement of the interim periods. All such adjustments, unless otherwise noted herein, are of a normal, recurring nature. The results of operations for the interim period are not necessarily indicative of the results of operations to be expected for the full year.

Certain reclassifications have been made to conform the prior period condensed consolidated statements to the current period presentation.

Accounting for Venezuelan Operations

Effective as of the end of the second quarter of 2017, the company no longer met the accounting criteria for control over its business in Venezuela and therefore deconsolidated its Venezuelan operations. As a result of deconsolidating the Venezuelan operations, the company recorded a pre-tax charge of \$33 million in other (income) expense, net in the second quarter of 2017.

Hurricane Maria

In September 2017, Hurricane Maria caused damage to certain of the company's assets in Puerto Rico and disrupted operations. Insurance, less applicable deductibles and subject to any coverage exclusions, covers the repair or replacement of the company's assets that suffered loss or damage, and also provides coverage for interruption to its business, including lost profits, and reimbursement for other expenses and costs that have been incurred relating to the damages and losses suffered. In the third quarter of 2017, the company recorded \$21 million of pre-tax charges related to damages caused by the hurricane, including \$11 million related to the impairment of damaged inventory and fixed assets as well as \$10 million of idle facility and other costs. These amounts were recorded as a component of cost of sales in the condensed consolidated statements of income for the three and nine month periods ended September 30, 2017. In the third quarter of 2018, the company recognized \$23 million of insurance recoveries related to the previously mentioned asset impairments and idle facility and other costs suffered as a result of the hurricane. This benefit was recorded as a reduction of cost of sales in the condensed consolidated statements of income for the three and nine month periods ended September 30, 2018. At this time, any additional insurance recoveries are not realizable, and accordingly, no additional amounts have been recorded as of September 30, 2018.

New accounting standards

Recently adopted accounting pronouncements

As of January 1, 2018, the company adopted Accounting Standards Update (ASU) No. 2017-07, Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost, which amends ASC 715, Compensation – Retirement Benefits, to require employers that present a measure of operating income in their statements of earnings to include only the service cost component of net periodic postretirement benefit cost in operating expenses. The service cost component of net periodic postretirement benefit cost should be presented in the same operating expense line items as other employee compensation costs arising from services rendered during the period. The other components of net benefit cost, including interest costs, expected return on assets, amortization of prior service cost/credit and actuarial gains/losses, and settlement and curtailment effects, are to be included separately and outside of any subtotal of operating income. This guidance impacted the presentation of the company's condensed consolidated statements of income with no significant impact on net income. The company elected to apply the practical expedient which allows it to reclassify amounts disclosed previously in the retirement and other benefits footnote as the basis for applying retrospective presentation for prior comparative periods. The retrospective impact of adoption for the three and nine months ended September 30, 2017 is shown in the following table.

	Three months ended September 30, 2017			Nine months ended September 30, 2017		
	As Previously Reported	As Reclassification	As Reclassified	As Previously Reported	As Reclassification	As Reclassified
Cost of sales	\$ 1,579	\$ (2)	\$ 1,577	\$ 4,487	\$ (6)	\$ 4,481
Gross margin	1,128	2	1,130	3,300	6	3,306
Marketing and administrative expenses	685	(5)	680	1,890	(16)	1,874
Research and development expenses	151	(1)	150	435	(3)	432
Operating income	292	8	300	975	25	1,000
Other (income) expense, net	(12)	8	(4)	10	25	35

As of January 1, 2018, the company adopted ASU No. 2016-16, Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other than Inventory. ASU No. 2016-16 generally accelerates the recognition of income tax consequences for asset transfers between entities under common control. Entities are required to adopt using a modified retrospective approach with a cumulative adjustment to opening retained earnings in the year of adoption for previously unrecognized income tax expense. The company recorded a net negative retained earnings adjustment of approximately \$66 million upon adoption of the standard on January 1, 2018 related to the unrecognized income tax effects of asset transfers that occurred prior to adoption. Net income increased \$4 million and \$11 million, respectively, for the three and nine months ended September 30, 2018 as a result of the adoption of the standard.

As of January 1, 2018, the company adopted ASU No. 2016-01, Financial Instruments: Recognition and Measurement of Financial Assets and Liabilities. The new standard amends certain aspects of accounting and disclosure requirements of financial instruments, including the requirement that equity investments with readily determinable fair values be measured at fair value with changes in fair value recognized in the results of operations. The adoption of this standard did not have a material impact on the company's condensed consolidated financial statements.

As of January 1, 2018, the company adopted ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which amends the existing accounting standards for revenue recognition. ASU No. 2014-09 is based on principles that govern the recognition of revenue at an amount an entity expects to be entitled when products are transferred to customers. The company adopted the standard using the modified retrospective method. The primary impact of the new standard relates to the company's contract manufacturing operations and software arrangements. Certain contract manufacturing arrangements require revenue recognition over-time in situations in which the company produces products that have no alternative use and the company has an enforceable right to payment for performance completed to date, inclusive of a reasonable profit margin. This results in an acceleration of revenue recognition for certain contractual arrangements as compared to recognition under prior accounting literature. The new guidance also impacts the company's arrangements subject to previous software revenue recognition guidance, as the company is required to recognize as revenue a significant portion of the contract consideration upon delivery of the software compared to the previous practice of recognizing the contract consideration ratably over time for certain arrangements. The company adopted Topic 606 using the modified retrospective method. The adjustment upon adoption increased the company's opening balance of retained earnings by approximately \$48 million, net of tax, on January 1, 2018. The impact to net sales as a result of the adoption was an increase of \$4 million and \$8 million, respectively, for the three and nine months ended September 30, 2018. The impact to cost of sales was an increase of \$1 million and \$5 million, respectively, for the three and nine months ended September 30, 2018. Refer to Note 2 for further information regarding the company's revenues.

Recently issued accounting standards not yet adopted

In February 2016, the Financial Accounting Standards Board (FASB) issued ASU No. 2016-02, Leases. In July 2018, the FASB issued an update to the leasing guidance to allow an additional transition option which would allow companies to adopt the standard as of the beginning of the year of adoption as opposed to the earliest comparative period presented. Under the new guidance, lessees are required to recognize a right-of-use asset and a lease liability on the balance sheet for all leases, other than those that meet the definition of a short-term lease. This ASU is effective for the company beginning January 1, 2019 and the company expects the adoption to materially increase assets and liabilities on the condensed consolidated balance sheet related to those leases classified as operating and not recognized on the condensed consolidated balance sheets under current GAAP. The company does not anticipate any material change on the condensed consolidated balance sheets related to capital leases under current GAAP or to the condensed consolidated statement of income. Under the new standard, lessor accounting will be largely unchanged from current GAAP, however disclosures will be expanded.

2. REVENUES

Revenue is recognized when obligations under the terms of a contract with a customer are satisfied; generally this occurs with the transfer of control of the company's products or services. The company's global payment terms are typically between 30-90 days. Revenue is measured as the amount of consideration the company expects to receive in exchange for transferring goods or providing services. A performance obligation is a promise in a contract to transfer a distinct good or service to the customer, and is the unit of account in the contract. A contract's transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied. Some of the company's contracts have multiple performance obligations. For contracts with multiple performance obligations, the company allocates the contract's transaction price to each performance obligation using its best estimate of the standalone selling price of each distinct good or service in the contract.

The majority of the company's performance obligations are satisfied at a point in time. This includes sales of the company's broad portfolio of essential healthcare products across its geographic segments including acute and chronic dialysis therapies; sterile IV solutions; infusion systems and devices; parenteral nutrition therapies; inhaled anesthetics; generic injectable pharmaceuticals; and surgical hemostat and sealant products. For a majority of these sales, the company's performance obligation is satisfied upon delivery to the customer. Shipping and handling activities are considered to be fulfillment activities and are not considered to be a separate performance obligation.

To a lesser extent, in all the company's segments, the company enters into other types of contracts including contract manufacturing arrangements, equipment leases, and certain subscription software and licensing arrangements. The company recognizes revenue for these arrangements over time or at a point in time depending on its evaluation of when the customer obtains control of the promised goods or service. Revenue is recognized over time when the company is creating or enhancing an asset that the customer controls as the asset is created or enhanced or the company's performance does not create an asset with an alternative use and the company has an enforceable right to payment for performance completed.

On September 30, 2018, the company had \$7.9 billion of transaction price allocated to remaining performance obligations related to executed contracts with an original duration of one year or more which are primarily included in the Americas segment. Some contracts in the United States included in this amount may contain index-dependent price increases, which are not known at this time. The company expects to recognize approximately 5% of this amount as revenue in 2018, 20% each in 2019, 2020, 2021, and 2022, and the remaining balance thereafter.

Significant Judgments

Revenues from product sales are recorded at the net sales price (transaction price), which includes estimates of variable consideration for reserves related to rebates, product returns, sales discounts and wholesaler chargebacks. These reserves are based on estimates of the amounts earned or to be claimed on the related sales and are included in accounts payable and accrued liabilities on the condensed consolidated balance sheet. Management's estimates take into consideration historical experience, current contractual and statutory requirements, specific known market events and trends, industry data, and forecasted customer buying and payment patterns. Overall, these reserves reflect the company's best estimates of the amount of consideration to which it is entitled based on the terms of the contract. The amount of variable consideration included in the net sales price is limited to the amount that is probable not to result in a significant reversal in the amount of the cumulative revenue recognized in a future period. Revenue recognized in the current period related to performance obligations satisfied in prior periods was not material.

The company's contracts with customers sometimes include promises to transfer multiple products and services to a customer. Determining whether products and services are considered distinct performance obligations that should be accounted for separately versus together may require significant judgment. Judgment is also required to determine the stand-alone selling price for each distinct performance obligation and whether there is a discount to be allocated based on the relative stand-alone selling price of the various products and services.

Contract Balances

The timing of revenue recognition, billings and cash collections results in billed accounts receivable, unbilled receivables (contract assets), and customer advances and deposits (contract liabilities) on the condensed consolidated balance sheet. Net trade accounts receivable at September 30, 2018 and January 1, 2018 were \$1.8 billion and \$1.7 billion, respectively. Generally, for certain contract manufacturing and software arrangements, revenue recognition occurs prior to billing, resulting in contract assets. These assets are reported on the condensed consolidated balance sheet on an individual basis at the end of each reporting period. The contract asset balances at September 30, 2018 and January 1, 2018 were \$81 million and \$73 million, respectively. The contract assets as of September 30, 2018 are presented within accounts and other current receivables, net (\$54 million) and other (\$27 million) on the condensed consolidated balance sheet. The company had contract assets of \$36 million and \$31 million as of September 30, 2018 and

January 1, 2018, respectively, related to certain contract manufacturing arrangements for which revenue is recognized throughout the production cycle which typically lasts up to 90 days. The company had contract assets of \$45 million and \$42 million as of September 30, 2018 and January 1, 2018, respectively, related to certain software arrangements for which revenue is recognized upon delivery to the customer, however the customer is billed over time, generally between one and five years. The company had no contract liabilities as of September 30, 2018 and January 1, 2018, respectively.

Practical Expedients

The company applies a practical expedient to expense costs as incurred for costs to obtain a contract with a customer when the amortization period would have been one year or less. These costs include the company's internal sales force compensation programs as the company has determined annual compensation is commensurate with annual sales activities. The company does not disclose the value of transaction price allocated to unsatisfied performance obligations for contracts with an original expected length of one year or less. The company has elected to use the practical expedient to not adjust the promised amount of consideration for the effects of a significant financing component if it is expected, at contract inception, that the period between when the company transfers a promised good or service to a customer, and when the customer pays for that good or service, will be one year or less. Additionally, all taxes assessed by a governmental authority that are both imposed on and concurrent with a specific revenue-producing transaction and collected from a customer are excluded from revenue.

3. SEPARATION OF BAXALTA INCORPORATED

On July 1, 2015, Baxter completed the distribution of approximately 80.5% of the outstanding common stock of Baxalta Incorporated (Baxalta) to Baxter shareholders (the Distribution). Baxter and Baxalta entered into several agreements in connection with the July 1, 2015 separation, including a transition services agreement (TSA), separation and distribution agreement, manufacturing and supply agreements (MSA), tax matters agreement, an employee matters agreement, a long-term services agreement, and a shareholder's and registration rights agreement.

Pursuant to the TSA, Baxter and Baxalta and their respective subsidiaries were providing to each other, on an interim, transitional basis, various services. Services provided by Baxter included, among others, finance, information technology, human resources, quality supply chain and certain other administrative services. The services generally commenced on the Distribution date and terminated as of July 1, 2018. Billings by Baxter under the TSA were recorded as a reduction of the costs to provide the respective service in the applicable expense category, primarily in marketing and administrative expenses, in the condensed consolidated statements of income. In the nine months ended September 30, 2018, the company recognized approximately \$9 million as a reduction to marketing and administrative expenses related to the TSA. In the three and nine months ended September 30, 2017, the company recognized approximately \$11 million and \$47 million, respectively, as a reduction to marketing and administrative expenses related to the TSA.

Pursuant to the MSA, Baxalta or Baxter, as the case may be, manufactures, labels, and packages products for the other party. The terms of the agreements range in initial duration from five to 10 years. In the three and nine months ended September 30, 2018, Baxter recognized approximately \$8 million and \$21 million in sales to Baxalta. In the three and nine months ended September 30, 2017, Baxter recognized approximately \$6 million and \$18 million, respectively, in sales to Baxalta. In addition, in the three and nine months ended September 30, 2018, Baxter recognized \$38 million and \$111 million, respectively, in cost of sales related to purchases from Baxalta pursuant to the MSA. In the three and nine months ended September 30, 2017, Baxter recognized \$35 million and \$133 million, respectively, in cost of sales related to purchases from Baxalta pursuant to the MSA. The cash flows associated with these agreements are

included in cash flows from operations — continuing operations.

Cash outflows of \$20 million were reported in cash flows from operations — discontinued operations for the nine-month period ending September 30, 2017. These related to non-assignable tenders whereby Baxter was the seller of Baxalta products, transactions related to importation services Baxter provides in certain countries, in addition to trade payables settled post local separation on Baxalta's behalf.

	September 30,	December 31,
(in millions)	2018	2017
Raw materials	\$ 373	\$ 347
Work in process	224	116
Finished goods	1,121	1,012
Inventories	\$ 1,718	\$ 1,475

Property, plant and equipment, net

	September 30, 2018	December 31, 2017
(in millions)		
Property, plant and equipment, at cost	\$ 10,323	\$ 10,148
Accumulated depreciation	(5,803)	(5,560)
Property, plant and equipment, net	\$ 4,520	\$ 4,588

In the first quarter of 2018, the estimated useful life of the company's enterprise resource planning (ERP) software was extended from 2020 on a prospective basis based on the company's commitment to upgrade, enhance and support its existing systems through 2028. This change in estimate resulted in a reduction of depreciation expense of \$6 million and increase in net income of \$5 million, or \$0.01 per diluted share, for the three months ended September 30, 2018 and a reduction of depreciation expense of \$18 million and increase in net income of \$15 million, or \$0.03 per diluted share, for the nine months ended September 30, 2018.

5. EARNINGS PER SHARE

The numerator for both basic and diluted earnings per share (EPS) is either net income, income from continuing operations, or income from discontinued operations. The denominator for basic EPS is the weighted-average number of common shares outstanding during the period. The dilutive effect of outstanding stock options, restricted stock units (RSUs) and performance share units (PSUs) is reflected in the denominator for diluted EPS using the treasury stock method.

The following table is a reconciliation of basic shares to diluted shares.

	Three months ended September 30,		Nine months ended September 30,	
(in millions)	2018	2017	2018	2017
Basic shares	534	545	536	543
Effect of dilutive securities	12	12	12	11
Diluted shares	546	557	548	554

The effect of dilutive securities included unexercised stock options, unvested RSUs and contingently issuable shares related to granted PSUs. The computation of diluted EPS excluded 3.3 million and 3.1 million equity awards for the three and nine months ended September 30, 2018, respectively, and 0.1 million and 2.8 million equity awards for the three and nine months ended September 30, 2017, respectively, because their inclusion would have had an anti-dilutive effect on diluted EPS.

Stock repurchases

In July 2012, the Board of Directors authorized the repurchase of up to \$2.0 billion of the company's common stock. The Board of Directors increased this authority by an additional \$1.5 billion in each of November 2016 and February 2018. During the first three quarters of 2018, the company repurchased 14.9 million shares pursuant to one or more Rule 10b5-1 plans for \$1.0 billion in cash. During the first three quarters of 2017, the company repurchased 4.7 million shares for \$275 million in cash. The company had \$1.6 billion remaining available under the authorization (as amended and after giving effect to stock repurchases) as of September 30, 2018.

Dividends declared

Cash dividends declared per common share for the three and nine months ended September 30, 2018 were \$0.19 and \$0.54, respectively. Cash dividends declared per common share for the three and nine months ended September 30, 2017 were \$0.16 and \$0.45, respectively.

6. ACQUISITIONS AND OTHER ARRANGEMENTS

Claris Injectables Limited

On July 27, 2017, Baxter acquired 100 percent of Claris Injectables Limited (Claris), a wholly owned subsidiary of Claris Lifesciences Limited, for total cash consideration of approximately \$629 million, net of cash acquired. Through the acquisition, Baxter added capabilities in production of essential generic injectable medicines, such as anesthesia and analgesics, renal, anti-infectives and critical care in a variety of presentations including bags, vials and ampoules. In the third quarter of 2018, the company finalized its valuation of the acquisition date assets acquired and liabilities assumed. The measurement period adjustments in 2018 include a \$2 million reduction in property, plant and equipment, a \$1 million increase in accounts payable and accrued liabilities and a \$2 million increase in other long-term liabilities. These adjustments resulted in a corresponding increase to goodwill of \$5 million. These adjustments did not have a material impact on the company's results of operations in 2018. The following table summarizes the fair value of the assets acquired and liabilities assumed as of the acquisition date for the company's acquisition of Claris:

(in millions)

Assets acquired and liabilities assumed

Cash	\$11
Accounts and other current receivables	16
Inventories	30
Prepaid expenses and other	16
Property, plant and equipment	130
Goodwill	296
Other intangible assets	280
Other	20
Accounts payable and accrued liabilities	(23)
Other long-term liabilities	(136)
Total assets acquired and liabilities assumed	\$640

11

The results of operations of Claris have been included in the company's condensed consolidated statement of income since the date the business was acquired. The Claris acquisition contributed \$38 million and \$107 million, respectively, of net sales for the three and nine months ended September 30, 2018, and \$27 million of net sales for the three and nine months ended September 30, 2017. Acquisition and integration costs associated with the Claris acquisition were \$5 million and \$19 million, respectively, for the three and nine months ended September 30, 2018, and \$15 million and \$20 million, respectively, for the three and nine months ended September 30, 2017, and were primarily included within marketing and administrative expenses and cost of sales on the condensed consolidated statements of income.

Baxter allocated \$280 million of the total consideration to acquired intangible assets. The acquired intangible assets include \$140 million of developed technology with a weighted-average useful life of eight years and \$140 million of in-process research and development (IPR&D) with an indefinite useful life. For the IPR&D, additional R&D will be required to assess technological feasibility.

The fair value of intangible assets was determined using the income approach. The income approach is a valuation technique that provides an estimate of the fair value of an asset based on market participant expectations of the cash flows an asset would generate over its remaining useful life, discounted to present value. The discount rates used to measure the developed technology and IPR&D intangible assets were 12% and 13%, respectively. The company considers the fair value of each of the acquired intangible assets to be Level 3 assets due to the significant estimates and assumptions used by management in establishing the estimated fair values. Refer to Note 10 within the 2017 Annual Report for additional information regarding fair value measurements.

The goodwill, which is not deductible for tax purposes, includes the value of potential future technologies as well as the overall strategic benefits provided to Baxter in the injectables market, and is included primarily in the Americas segment.

In the first quarter of 2018, Baxter and Claris Lifesciences Limited settled certain claims related to the acquired operations and terminated a development agreement with Dorizoe Lifesciences Limited. As a result, Baxter received \$73 million in February 2018 and was released from an accrued liability to Claris Lifesciences Limited of \$7 million. The total of \$80 million is reflected as a benefit in the 2018 condensed consolidated statements of income.

RECOTHROM and PREVELEAK

On March 16, 2018, Baxter acquired two hemostat and sealant products from Mallinckrodt plc: RECOTHROM Thrombin topical (Recombinant), the first and only stand-alone recombinant thrombin, and PREVELEAK Surgical Sealant, which is used in vascular reconstruction. The company concluded that the acquired assets met the definition of a business and accounted for the transaction as a business combination using the acquisition method of accounting. The purchase price included an upfront payment of approximately \$148 million in the first quarter of 2018 and a \$15 million post-closing payment in the third quarter of 2018. The company made additional measurement period adjustments, in the third quarter of 2018, which included finalizing the post-closing settlement and adjusting its acquisition-date estimate of the fair value of contingent consideration, acquired inventory and intangible assets. These adjustments resulted in a \$10 million increase in the total consideration transferred, a \$19 million increase to acquired inventory, a \$2 million decrease in other intangible assets and a \$7 million decrease in goodwill. The measurement period adjustments did not have a material impact on the company's results of operations.

In addition, the purchase price included new and assumed contingent payments in the future related to inventory and technology transfer milestones and net revenue royalty payments with an estimated fair value of \$21 million as of the acquisition date. The maximum aggregate amount payable for the inventory and technology transfer and net revenue royalties was \$7 million, \$15 million and \$143 million, respectively. The fair value of the potential contingent

consideration payments was estimated by applying a probability-weighted expected payment model for the inventory and technology transfer payments and a Monte Carlo simulation model for contingent royalty payments, which were then discounted to present value. The fair value measurements were based on Level 3 inputs. Refer to Note 10 within the 2017 annual report for additional information regarding fair value measurements.

The following table summarizes total consideration:

(in millions)	
Cash	\$163
Contingent consideration	21
Total consideration	\$184

The following table summarizes the fair value of the assets acquired as of the acquisition date.

(in millions)	
Assets acquired	
Accounts receivable	\$2
Inventory	80
Goodwill	2
Other intangible assets	100
Total assets acquired	\$184

The valuation of the assets acquired are preliminary and measurement period adjustments may be recorded in the future as the company finalizes its fair value estimates. The results of operations of the acquired business have been included in the company's condensed consolidated statements of income since the date the business was acquired. The RECOTHROM and PREVELEAK acquisitions contributed \$14 million and \$31 million, respectively, of net sales for the three and nine months ended September 30, 2018. Acquisition and integration costs associated with the acquisition were \$6 million and \$11 million, respectively, for the three and nine months ended September 30, 2018.

Baxter allocated \$100 million of the total consideration to the RECOTHROM and PREVELEAK developed product rights with a weighted-average useful life of 10 years. The fair value of the intangible assets was determined using the income approach. The discount rates used to measure the RECOTHROM and PREVELEAK intangible assets were 12.5% and 13%, respectively. The company considers the fair value of the intangible assets to be Level 3 assets due to the significant estimates and assumptions used by management in establishing the estimated fair values. Refer to Note 10 within the 2017 annual report for additional information regarding fair value measurements.

The goodwill, which is deductible for tax purposes, includes the value of potential future technologies as well as the overall strategic benefits provided to Baxter's surgical portfolio of hemostats and sealants, and is included in the Americas segment.

Other

Total consideration transferred for other acquisitions totaled \$24 million in 2018 and primarily resulted in the recognition of intangible assets. These acquisitions did not materially affect the company's results of operations.

Celerity Pharmaceuticals, LLC

In the first quarter of 2018, Baxter paid approximately \$37 million and \$35 million, respectively, to acquire the rights to Bivalirudin and Dexmedetomidine from Celerity Pharmaceuticals, LLC (Celerity). The payment for Dexmedetomidine was based on tentative approval from the U.S. Food and Drug Administration (FDA). Full approval from the FDA was received in the third quarter of 2018. Baxter capitalized the purchase price of both products and is amortizing the assets over their estimated economic lives of 12 years. Refer to Note 5 within the 2017 Annual Report for additional information regarding the company's agreement with Celerity.

In the third quarter of 2017, Baxter paid approximately \$10 million to acquire the rights to Clindamycin Dextrose from Celerity. In the second quarter of 2017, Baxter paid approximately \$10 million to acquire the rights to Clindamycin Saline from Celerity. Baxter capitalized the purchase price of both products as intangible assets and is amortizing them asset over their estimated economic lives of 12 years.

7. GOODWILL AND OTHER INTANGIBLE ASSETS, NET

Goodwill

The following is a reconciliation of goodwill by business segment.

(in millions)	Americas	EMEA	APAC	Total
Balance as of December 31, 2017	\$ 2,474	\$ 392	\$ 233	\$3,099
Additions	9	—	—	9
Currency translation adjustments	(102)	(16)	(10)	(128)
Balance as of September 30, 2018	\$ 2,381	\$ 376	\$ 223	\$2,980

As of September 30, 2018, there were no accumulated goodwill impairment losses.

Other intangible assets, net

The following is a summary of the company's other intangible assets.

	Developed technology, including patents		Other amortized intangible assets	Indefinite-lived intangible assets	Total
(in millions)					
September 30, 2018					
Gross other intangible assets	\$ 2,123		\$ 420	\$ 188	\$2,731
Accumulated amortization	(1,084))	(245))	(1,329)
Other intangible assets, net	\$ 1,039		\$ 175	\$ 188	\$1,402
December 31, 2017					
Gross other intangible assets	\$ 2,002		\$ 435	\$ 172	\$2,609
Accumulated amortization	(1,010))	(225))	(1,235)
Other intangible assets, net	\$ 992		\$ 210	\$ 172	\$1,374

Intangible asset amortization expense was \$42 million and \$38 million in the three months ended September 30, 2018 and 2017, respectively, and \$127 million and \$112 million in the nine months ended September 30, 2018 and 2017, respectively.

8. INFUSION PUMP CHARGES

In 2017, the company recorded a charge of \$22 million related to a second field corrective action with respect to the SIGMA Spectrum Infusion Pump, which is predominantly sold in the United States. Remediation primarily includes inspection and repair charges as well as a temporary replacement pump in a limited number of cases. The charge includes estimated cash costs associated with remediation efforts and the remaining liability was \$4 million as of September 30, 2018.

9. BUSINESS OPTIMIZATION CHARGES

Beginning in the second half of 2015, the company initiated actions to transform its cost structure and enhance operational efficiency. These efforts include restructuring the organization, optimizing the manufacturing footprint, R&D operations and supply chain network, employing disciplined cost management, and centralizing and streamlining certain support functions. Through September 30, 2018, the company has incurred cumulative pretax costs of \$751 million related to these actions. The costs consisted primarily of employee termination, implementation costs and accelerated depreciation. The company expects to incur additional pretax costs of approximately \$130 million and capital expenditures of \$50 million through the completion of these initiatives. The costs will primarily include employee termination costs, implementation costs, and accelerated depreciation.

During the three and nine months ended September 30, 2018 and 2017, the company recorded the following charges related to business optimization programs.

Three months	Nine months
--------------	-------------

Edgar Filing: BAXTER INTERNATIONAL INC - Form 10-Q

	ended September 30,		ended September 30,	
(in millions)	2018	2017	2018	2017
Restructuring charges, net	\$ 63	\$ 31	\$ 96	\$ 50
Costs to implement business optimization programs	24	21	74	58
Accelerated depreciation	3	—	5	8
Total business optimization charges	\$ 90	\$ 52	\$ 175	\$ 116

For segment reporting, business optimization charges are unallocated expenses.

During the three and nine months ended September 30, 2018 and 2017, the company recorded the following restructuring charges.

	Three months ended September 30, 2018			
(in millions)	COGS	SGA	R&D	Total
Employee termination costs	\$ 16	\$ 33	\$ 9	\$ 58
Contract termination and other costs	—	4	—	4
Asset impairments	—	1	—	1
Total restructuring charges	\$ 16	\$ 38	\$ 9	\$ 63

(in millions)	Three months ended September 30, 2017			
	COGS	SGA	R&D	Total
Employee termination costs	\$ 7	\$ 24	\$ —	\$ 31
Total restructuring charges	\$ 7	\$ 24	\$ —	\$ 31

(in millions)	Nine months ended September 30, 2018			
	COGS	SGA	R&D	Total
Employee termination costs	\$ 20	\$ 47	\$ 19	\$ 86
Contract termination and other costs	—	6	—	6
Asset impairments	1	3	—	4
Total restructuring charges	\$ 21	\$ 56	\$ 19	\$ 96

(in millions)	Nine months ended September 30, 2017			
	COGS	SGA	R&D	Total
Employee termination costs	\$ 21	\$ 33	\$ —	\$ 54
Contract termination costs	—	5	—	5
Asset impairments	5	—	—	5
Reserve adjustments	(7)	(5)	(2)	(14)
Total restructuring charges	\$ 19	\$ 33	\$ (2)	\$ 50

Costs to implement business optimization programs for the three and nine months ended September 30, 2018 were \$24 million and \$74 million, respectively, and consisted primarily of external consulting and transition costs as well as employee salary and related costs. These costs were included within cost of sales, marketing and administrative expense and R&D expense.

Costs to implement business optimization programs for the three and nine months ended September 30, 2017 were \$21 million and \$58 million, respectively, and consisted primarily of external consulting and transition costs as well as employee salary related costs. These costs were included within cost of sales and marketing and administrative expense.

For the three and nine months ended September 30, 2018, the company recognized accelerated depreciation, primarily associated with facilities to be closed, of \$3 million and \$5 million, respectively. The costs were recorded within cost of sales and marketing and administrative expense.

For the nine months ended September 30, 2017, the company recognized accelerated depreciation, primarily associated with facilities to be closed, of \$8 million. The costs were recorded within cost of sales, marketing and administrative expense and R&D expense.

The following table summarizes activity in the reserves related to the company's business optimization initiatives.

(in millions)	
Reserves as of December 31, 2017	\$112
Charges	92
Utilization	(72)
CTA	(19)
Reserves as of September 30, 2018	\$113

Substantially all of the company's restructuring reserves as of September 30, 2018 relate to employee termination costs. The reserves are expected to be substantially utilized by the end of 2019.

10. DEBT, FINANCIAL INSTRUMENTS AND FAIR VALUE MEASUREMENTS

Debt Issuance

In May 2017, Baxter issued senior notes with a total aggregate principal amount of €600 million at a fixed coupon rate of 1.30% due in May 2025. The company has designated this debt as a non-derivative net investment hedge of its European operations for accounting purposes.

Securitization arrangement

The following is a summary of the activity relating to the company's securitization arrangement in Japan.

(in millions)	Three months ended		Nine months ended	
	September 30, 2018	September 30, 2017	September 30, 2018	September 30, 2017
Sold receivables at beginning of period	\$64	\$63	\$71	\$68
Proceeds from sales of receivables	66	69	195	198
Cash collections (remitted to the owners of the receivables)	(67)	(66)	(203)	(203)
Effect of currency exchange rate changes	(1)	—	(1)	3
Sold receivables at end of period	\$62	\$66	\$62	\$66

The impacts on the condensed consolidated statements of income relating to the sale of receivables were immaterial for each period. Refer to the 2017 Annual Report for further information regarding the company's securitization agreements.

Concentrations of credit risk

The company invests excess cash in certificates of deposit or money market funds and diversifies the concentration of cash among different financial institutions. With respect to financial instruments, where appropriate, the company has diversified its selection of counterparties, and has arranged collateralization and master-netting agreements to minimize the risk of loss.

The company continues to do business with foreign governments in certain countries including Greece, Spain, Portugal and Italy that have experienced a deterioration in credit and economic conditions. As of September 30, 2018, the company's net accounts receivable from the public sector in Greece, Spain, Portugal and Italy totaled \$141 million.

Global economic conditions and liquidity issues in certain countries have resulted, and may continue to result, in delays in the collection of receivables and credit losses. Governmental actions and customer-specific factors may also require the company to re-evaluate the collectability of its receivables and the company could potentially incur additional credit losses. These conditions may also impact the stability of the Euro.

Derivatives and hedging activities

The company operates on a global basis and is exposed to the risk that its earnings, cash flows and equity could be adversely impacted by fluctuations in foreign exchange and interest rates. The company's hedging policy attempts to manage these risks to an acceptable level based on the company's judgment of the appropriate trade-off between risk, opportunity and costs.

The company is primarily exposed to foreign exchange risk with respect to recognized assets and liabilities, forecasted transactions and net assets denominated in the Euro, British Pound, Chinese Yuan, Korean Won, Australian Dollar, Canadian Dollar, Japanese Yen, Colombian Peso, Brazilian Real, Mexican Peso and Swedish Krona. The company manages its foreign currency exposures on a consolidated basis, which allows the company to net exposures and take advantage of any natural offsets. In addition, the company uses derivative and nonderivative instruments to further reduce the net exposure to foreign exchange. Gains and losses on the hedging instruments offset losses and gains on the hedged transactions and reduce the earnings and equity volatility resulting from foreign exchange. Financial market and currency volatility may limit the company's ability to cost-effectively hedge these exposures.

The company is also exposed to the risk that its earnings and cash flows could be adversely impacted by fluctuations in interest rates. The company's policy is to manage interest costs using a mix of fixed- and floating-rate debt that the company believes is appropriate.

To manage this mix in a cost-efficient manner, the company periodically enters into interest rate swaps in which the company agrees to exchange, at specified intervals, the difference between fixed and floating interest amounts calculated by reference to an agreed-upon notional amount.

The company does not hold any instruments for trading purposes and none of the company's outstanding derivative instruments contain credit-risk-related contingent features.

All derivative instruments are recognized as either assets or liabilities at fair value in the condensed consolidated balance sheets and are classified as short-term or long-term based on the scheduled maturity of the instrument. Based upon the exposure being hedged, the company designates its hedging instruments as cash flow, fair value, or net investment hedges.

Cash Flow Hedges

The company may use options, including collars and purchased options, forwards and cross-currency swaps to hedge the foreign exchange risk to earnings relating to forecasted transactions and recognized assets and liabilities.

For each derivative instrument that is designated and effective as a cash flow hedge, the gain or loss on the derivative is accumulated in accumulated other comprehensive income (AOCI) and then recognized in earnings consistent with the underlying hedged item. Option premiums or net premiums paid are initially recorded as assets and reclassified to other comprehensive income (OCI) over the life of the option, and then recognized in earnings consistent with the underlying hedged item. Cash flow hedges are classified in net sales, cost of sales, net interest expense, and other (income) expense, net, and primarily relate to forecasted third-party sales denominated in foreign currencies, forecasted intercompany sales denominated in foreign currencies, and anticipated issuances of debt, respectively.

The notional amounts of foreign exchange contracts were \$656 million and \$660 million as of September 30, 2018 and December 31, 2017, respectively. There were no outstanding interest rate contracts designated as cash flow hedges as of September 30, 2018 and December 31, 2017. The maximum term over which the company has cash flow hedge contracts in place related to forecasted transactions as of September 30, 2018 is 18 months.

Fair Value Hedges

The company uses interest rate swaps to convert a portion of its fixed-rate debt into variable-rate debt. These instruments hedge the company's earnings from changes in the fair value of debt due to fluctuations in the designated benchmark interest rate. For each derivative instrument that is designated and effective as a fair value hedge, the gain or loss on the derivative is recognized immediately to earnings, and offsets the loss or gain on the underlying hedged item. Fair value hedges are classified in net interest expense, as they hedge the interest rate risk associated with certain of the company's fixed-rate debt.

There were no outstanding interest rate swap contracts designated as a fair value hedge as of September 30, 2018. The total notional amount of interest rate contracts designated as fair value hedges was \$200 million as of December 31, 2017.

Net Investment Hedges

In May 2017, the company issued €600 million of senior notes due May 2025. The company has designated this debt as a hedge of a portion of its net investment in its European operations and, as a result, mark to spot rate adjustments of the outstanding debt balances have been and will be recorded as a component of AOCI. As of September 30, 2018, the company had an accumulated pre-tax unrealized translation loss in AOCI of \$57 million related to the

Euro-denominated senior notes.

Dedesignations

If it is determined that a derivative or nonderivative hedging instrument is no longer highly effective as a hedge, the company discontinues hedge accounting prospectively. If the company removes the cash flow hedge designation because the hedged forecasted transactions are no longer probable of occurring, any gains or losses are immediately reclassified from AOCI to earnings. Gains or losses relating to terminations of effective cash flow hedges in which the forecasted transactions are still probable of occurring are deferred and recognized consistent with the loss or income recognition of the underlying hedged items.

There were no hedge dedesignations in the first nine months of 2018 or 2017 resulting from changes in the company's assessment of the probability that the hedged forecasted transactions would occur.

If the company terminates a fair value hedge, an amount equal to the cumulative fair value adjustment to the hedged items at the date of termination is amortized to earnings over the remaining term of the hedged item. In the first nine months of 2018, the company terminated its interest rate fair value hedges and the cumulative fair value adjustment to the hedged item was insignificant. There were no fair value hedges terminated during the first nine months of 2017.

If the company terminates a net investments hedge, any gain or loss recognized in AOCI is not reclassified to earnings until the company sells, liquidates, or deconsolidates the foreign investments that were being hedged.

Undesignated Derivative Instruments

The company uses forward contracts to hedge earnings from the effects of foreign exchange relating to certain of the company's intercompany and third-party receivables and payables denominated in a foreign currency. These derivative instruments are generally not formally designated as hedges, and the change in fair value, which substantially offsets the change in book value of the hedged items, is recorded directly to other (income) expense, net. The terms of these instruments generally do not exceed one month.

The total notional amount of undesignated derivative instruments was \$699 million as of September 30, 2018 and \$885 million as of December 31, 2017.

Gains and Losses on Hedging Activities

The following tables summarize the income statement locations and gains and losses on the company's derivative instruments for the three months ended September 30, 2018 and 2017.

(in millions)	Gain (loss) recognized in OCI		Location of gain (loss) in income statement	Gain (loss) reclassified from AOCI into income	
	2018	2017		2018	2017
Cash flow hedges					
Foreign exchange contracts	\$ 3	\$ (11)	Cost of sales	\$ (1)	\$ (3)
Net investment hedge	5	\$ (39)	Other (income) expense, net	—	—
Total	\$ 8	\$ (50)		\$ (1)	\$ (3)

(in millions)	Location of gain (loss) in income statement	Gain (loss) recognized in income	
		2018	2017
Fair value hedges			
Interest rate contracts	Net interest expense	\$ —	\$ (1)
Undesignated derivative instruments			
Foreign exchange contracts	Other (income) expense, net	\$ 10	\$ (3)

The following tables summarize the income statement locations and gains and losses on the company's derivative instruments for the nine months ended September 30, 2018 and 2017.

Gain (loss) reclassified from AOCI

(in millions)	Gain (loss) recognized in OCI		Location of gain (loss) in income statement	Gain (loss) reclassified from AOCI to income	
	2018	2017		2018	2017
Cash flow hedges					
Foreign exchange contracts	\$ 1	\$ (24)) Cost of sales	\$ (11)	\$ (4)
Interest Rate contracts	—	(3)) Net interest expense	—	—
Net investment hedge) Other (income)		
	22	(70)) expense, net	—	—
Total	\$ 23	\$ (97))	\$ (11)	\$ (4)

18

		Gain (loss) recognized in income	
(in millions)	Location of gain (loss) in income statement	2018	2017
Fair value hedges			
Interest rate contracts	Net interest expense	\$ (4)	\$ (1)
Undesignated derivative instruments			
Foreign exchange contracts	Other (income) expense, net	\$ (1)	\$ (7)

For the company's fair value hedges, equal and offsetting gains of zero and \$4 million were recognized in net interest expense in the third quarter and first nine months of 2018, respectively, and an equal and offsetting gain of \$1 million was recognized in net interest expense in the third quarter and first nine months of 2017, respectively. Ineffectiveness related to the company's cash flow and fair value hedges for all periods presented was not material.

As of September 30, 2018, deferred, net after-tax gains on derivative instruments included in AOCI expected to be recognized in earnings during the next 12 months, coinciding with when the hedged items are expected to impact earnings, were immaterial.

Fair Values of Derivative Instruments

The following table summarizes the classification and fair values of derivative instruments reported in the condensed consolidated balance sheet as of September 30, 2018.

(in millions)	Derivatives in asset positions		Derivatives in liability positions	
	Balance sheet location	Fair value	Balance sheet location	Fair value
Derivative instruments designated as hedges			Accounts payable and	
Foreign exchange contracts	Prepaid expenses and other	\$ 17	accrued liabilities	\$ 1

19

While the company's derivatives are all subject to master netting arrangements, the company presents its assets and liabilities related to derivative instruments on a gross basis within the condensed consolidated balance sheets. Additionally, the company is not required to post collateral for any of its outstanding derivatives.

The following table provides information on the company's derivative positions as if they were presented on a net basis, allowing for the right of offset by counterparty.

	September 30, 2018		December 31, 2017	
(in millions)	Asset	Liability	Asset	Liability

Total	\$ 16	\$ —	\$ 15	\$ —

Fair value measurements

The following tables summarize the bases used to measure financial assets and liabilities that are carried at fair value on a recurring basis in the condensed consolidated balance sheets.

	Basis of fair value measurement			
	Quoted prices in			
	Significant			
	active markets for			
	Significant other			
	unobservable			
	observable inputs			
	inputs			
(in millions)	Balance as of September 30, 2018	(Level 1)	(Level 2)	(Level 3)
Assets				
Foreign currency hedges	\$ 18	\$ —	\$ 18	\$ —
Marketable equity securities	6	6	—	—
Total assets	\$ 24	\$ 6	\$ 18	\$ —
Liabilities				
Foreign currency hedges	\$ 2	\$ —	\$ 2	\$ —
Contingent payments related to acquisitions	32	—	—	32
Total liabilities	\$ 34	\$ —	\$ 2	\$ 32

(in millions)	Balance as of	Basis of fair value measurement		
		Quoted prices in	Significant other	Significant
		active markets for	unobservable	unobservable
		identical assets	observable inputs	inputs
		observable inputs	inputs	inputs

	December 31, 2017	in	observable inputs	unobservable
		active (market)	for	inputs
		identical assets		(Level 3)
		(Level 1)		
Assets				
Foreign currency hedges	\$ 15	\$ —	\$ 15	\$ —
Interest rate hedges	4	—	4	—
Marketable equity securities	8	8	—	—
Total assets	\$ 27	\$ 8	\$ 19	\$ —
Liabilities				
Foreign currency hedges	\$ 4	\$ —	\$ 4	\$ —
Contingent payments related to acquisitions	9	—	—	9
Total liabilities	\$ 13	\$ —	\$ 4	\$ 9

As of September 30, 2018, cash and equivalents of \$2.9 billion included money market funds of approximately \$1.3 billion, and as of December 31, 2017, cash and equivalents of \$3.4 billion included money market funds of approximately \$0.7 billion. Money market funds are considered Level 2 in the fair value hierarchy.

For assets that are measured using quoted prices in active markets, the fair value is the published market price per unit multiplied by the number of units held, without consideration of transaction costs. The majority of the derivatives entered into by the company are valued using internal valuation techniques as no quoted market prices exist for such instruments. The principal techniques used to

value these instruments are discounted cash flow and Black-Scholes models. The key inputs are considered observable and vary depending on the type of derivative, and include contractual terms, interest rate yield curves, foreign exchange rates and volatility.

Contingent payments related to acquisitions consist of milestone payments and sales-based payments, and are valued using discounted cash flow techniques. The fair value of milestone payments reflects management's expectations of probability of payment, and increases as the probability of payment increases or expectation of timing of payments is accelerated. The fair value of sales-based payments is based upon probability-weighted future revenue estimates, and increases as revenue estimates increase, probability weighting of higher revenue scenarios increase or expectation of timing of payment is accelerated. The change in the liability for contingent payments related to Baxter's acquisitions, which use significant unobservable inputs (Level 3) in the fair value measurement, were primarily driven by new contingent liabilities recognized as a result of the RECOTHROM and PREVELEAK acquisitions of approximately \$21 million in the first nine months of 2018.

Equity investments not measured at fair value and excluded from the above table are comprised of other equity investments without readily determinable fair values of \$39 million at September 30, 2018 and \$43 million at December 31, 2017. These amounts are included in Other assets.

The following table provides information relating to the company's investments in marketable equity securities.

(in millions)	Amortized cost	Unrealized gains	Unrealized losses	Fair value
September 30, 2018	\$ 8	\$ —	\$ 2	\$ 6
December 31, 2017	\$ 8	\$ —	\$ —	\$ 8

In the first quarter of 2017, the company recorded an other-than-temporary impairment charge related to a marketable equity security of \$4 million within other (income) expense, net.

Book Values and Fair Values of Financial Instruments

In addition to the financial instruments that the company is required to recognize at fair value in the condensed consolidated balance sheets, the company has certain financial instruments that are recognized at historical cost or some basis other than fair value. For these financial instruments, the following table provides the values recognized in the condensed consolidated balance sheets and the approximate fair values as of September 30, 2018 and December 31, 2017.

(in millions)	Book values		Approximate fair values	
	2018	2017	2018	2017
Liabilities				
Current maturities of long-term debt and lease obligations	\$3	\$3	\$3	\$3
Long-term debt and lease obligations	3,485	3,509	3,467	3,595

Edgar Filing: BAXTER INTERNATIONAL INC - Form 10-Q

The following tables summarize the bases used to measure the approximate fair value of the financial instruments as of September 30, 2018 and December 31, 2017.

(in millions)	Balance as of September 30, 2018	Basis of fair value measurement			
		Quoted prices in			
		active markets for			
		identifiable assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	
Liabilities					
Current maturities of long-term debt and lease obligations	\$ 3	\$ —	\$ 3	\$	—
Long-term debt and lease obligations	3,467	—	3,467		—
Total liabilities	\$ 3,470	\$ —	\$ 3,470	\$	—

(in millions)	Basis of fair value measurement			
	Quoted prices in active markets for			
	Balance as of December 31, 2017	identifiable assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Liabilities				
Current maturities of long-term debt and lease obligations	\$ 3	\$ —	\$ 3	\$ —
Long-term debt and lease obligations	3,595	—	3,595	—
Total liabilities	\$ 3,598	\$ —	\$ 3,598	\$ —

The estimated fair values of current and long-term debt were computed by multiplying price by the notional amount of the respective debt instrument. Price is calculated using the stated terms of the respective debt instrument and yield curves commensurate with the company's credit risk. The carrying values of the other financial instruments approximate their fair values due to the short-term maturities of most of these assets and liabilities.

11. RETIREMENT AND OTHER BENEFIT PROGRAMS

The following is a summary of net periodic benefit cost relating to the company's pension and other postemployment benefit (OPEB) plans.

(in millions)	Three months ended September 30,		Nine months ended September 30,	
	2018	2017	2018	2017
Pension benefits				
Service cost	\$23	\$23	\$70	\$68
Interest cost	45	46	136	136
Expected return on plan assets	(78)	(75)	(235)	(220)
Amortization of net losses and other deferred amounts	24	42	72	123
Net periodic pension benefit cost	\$14	\$36	\$43	\$107
OPEB				
Service cost	\$—	\$—	\$—	\$—
Interest cost	2	2	6	6
Amortization of net loss and prior service credit	(6)	(7)	(18)	(20)
Net periodic OPEB cost	\$(4)	\$(5)	\$(12)	\$(14)

U.S Pension Plan Amendments

In January 2018, the company announced changes to its U.S. pension plans. The company spun off the assets and liabilities of the qualified plan attributable to current employees into a new plan and will freeze the pay and service amounts used to calculate pension benefits for active participants in the U.S. pension plans as of December 31, 2022. The assets and liabilities attributable to retired and former company employees remained with the original qualified plan. Years of additional service earned and eligible compensation received after December 31, 2022 will not be included in the determination of the benefits payable to participants. These changes resulted in a \$57 million decline in the projected benefit obligation (PBO) with an offsetting adjustment against AOCI upon the effective date of the changes.

12. ACCUMULATED OTHER COMPREHENSIVE INCOME

Comprehensive income includes all changes in shareholders' equity that do not arise from transactions with shareholders, and consists of net income, CTA, pension and other employee benefits, unrealized gains and losses on cash flow hedges and unrealized gains and losses on available-for-sale equity securities. As a result of recent changes in accounting guidance related to available-for-sale equity securities, the unrealized gains and losses associated with these assets are no longer recognized in AOCI beginning January 1, 2018. The following table is a net-of-tax summary of the changes in AOCI by component for the nine months ended September 30, 2018 and 2017.

		Pension and other employee	Hedging	Available- for-sale	
(in millions)	CTA	benefits	activities	securities	Total
Gains (losses)					
Balance as of December 31, 2017	\$(3,013)	\$ (981)	\$ (10)	\$ 3	\$(4,001)

Total reclassification for the period	\$(25)	\$ (104)	Total net of tax

(a) Amounts in parentheses indicate reductions to net income.

(b) These AOCI components are included in the computation of net periodic benefit cost disclosed in Note 11. Refer to Note 10 for additional information regarding hedging activity and Note 11 for additional information regarding the amortization of pension and other employee benefits items.

13. INCOME TAXES

Effective tax rate

The company's effective income tax rate for continuing operations was (34.0)% and 14.5% in the third quarters of 2018 and 2017, respectively, and (2.2)% and 15.0% in the nine months ended September 30, 2018 and 2017, respectively. The company's effective income tax rate differs from the U.S. federal statutory rate each year due to certain operations that are subject to tax incentives, state and local taxes, and foreign taxes that are different than the

U.S. federal statutory rate. In addition, the effective tax rate can be impacted each period by discrete factors and events.

The effective income tax rate for continuing operations during the three months ended September 30, 2018 was benefitted from an adjustment to the Tax Cuts and Job Act of 2017 (the 2017 Tax Act) provisional amounts as permitted by Staff Accounting Bulletin 118. Specifically, the company released a \$200 million valuation allowance related to the company's U.S. foreign tax credit deferred tax assets. The company continues to evaluate the 2017 Tax Act along with regulations and guidance issued by the Internal Revenue Service and will complete the accounting for the initial impact of the 2017 Tax Act by the end of 2018. The effective income tax rate for continuing operations during the nine months ended September 30, 2018 was further benefitted from a settlement of a 2008 through 2010 transfer pricing Competent Authority proceeding between the U.S. and Germany, the reversal of a foreign valuation allowance as a result of continued profit improvements, receipt of tax free income from the settlement of Claris contingent matters (as described in Note 6), and adjustments of state income tax provisional amounts related to the 2017 Tax Act toll charge. In addition, windfall benefits realized from stock option exercises and vesting of RSUs associated with the company's stock compensation programs favorably impacted the effective tax rate by approximately 3.0 percentage points. Partially offsetting the foregoing benefits

was interest on the reserve for uncertain tax benefits (UTPs), the revaluation of Swedish net deferred tax assets, and some miscellaneous transfer pricing UTP accruals.

The company, while not expecting to be subject to a tax charge under the 2017 Tax Act Global Intangible Low Tax Income (GILTI) provisions, elects to recognize this tax as a period cost.

14. LEGAL PROCEEDINGS

Baxter is involved in product liability, patent, commercial, and other legal matters that arise in the normal course of the company's business. The company records a liability when a loss is considered probable and the amount can be reasonably estimated. If the reasonable estimate of a probable loss is a range, and no amount within the range is a better estimate, the minimum amount in the range is recorded. If a loss is not probable or a probable loss cannot be reasonably estimated, no liability is recorded. As of September 30, 2018 and December 31, 2017, the company's total recorded reserves with respect to legal matters were \$30 million and \$41 million, respectively, and there were no related receivables.

Baxter has established reserves for certain of the matters discussed below. The company is not able to estimate the amount or range of any loss for certain contingencies for which there is no reserve or additional loss for matters already reserved. While the liability of the company in connection with these claims cannot be estimated and the resolution thereof in any reporting period could have a significant impact on the company's results of operations and cash flows for that period, the outcome of these legal proceedings is not expected to have a material adverse effect on the company's consolidated financial position. While the company believes that it has valid defenses in the matters set forth below, litigation is inherently uncertain, excessive verdicts do occur, and the company may incur material judgments or enter into material settlements of claims.

In addition to the matters described below, the company remains subject to the risk of future administrative and legal actions. With respect to governmental and regulatory matters, these actions may lead to product recalls, injunctions, and other restrictions on the company's operations and monetary sanctions, including significant civil or criminal penalties. With respect to intellectual property, the company may be exposed to significant litigation concerning the scope of the company's and others' rights. Such litigation could result in a loss of patent protection or the ability to market products, which could lead to a significant loss of sales, or otherwise materially affect future results of operations.

Environmental

Baxter is involved as a potentially responsible party (PRP) for environmental clean-up costs at seven Superfund sites. Under the U.S. Superfund statute and many state laws, generators of hazardous waste sent to a disposal or recycling site are liable for site cleanup if contaminants from that property later leak into the environment. The laws generally provide that a PRP may be held jointly and severally liable for the costs of investigating and remediating the site. Separate from the Superfund cases noted above, Baxter is involved in an ongoing voluntary environmental remediation associated with historic operations at the company's Irvine, California, United States, facility. As of September 30, 2018 and December 31, 2017, environmental reserves of approximately \$19 million and \$21 million, respectively, were established to address these specific estimated potential liabilities. Such reserves are undiscounted and do not include anticipated recoveries, if any, from insurance companies. After considering these reserves, management is of the opinion that the outcome of these matters will not have a material adverse effect on the company's financial position or results of operations.

General litigation

On July 31, 2015, Davita Healthcare Partners, Inc. filed suit against Baxter Healthcare Corporation in the District Court of the State of Colorado regarding an ongoing commercial dispute relating to the provision of peritoneal dialysis products. A bench trial concluded in third quarter 2016. On February 16, 2018, the parties entered into a settlement agreement providing for a full and final release of all claims and damages that were or could have been asserted in the commercial dispute in connection with their entry into a new peritoneal dialysis products supply agreement. The court granted an order to dismiss the litigation on February 21, 2018.

In November 2016, a purported antitrust class action complaint seeking monetary and injunctive relief was filed in the United States District Court for the Northern District of Illinois. The complaint alleges a conspiracy among manufacturers of IV solutions to restrict output and affect pricing in connection with a shortage of such solutions. Similar parallel actions subsequently were filed. In January 2017, a single consolidated complaint covering these matters was filed in the Northern District of Illinois. On July 5, 2018, the court granted the company's motion to dismiss the consolidated complaint (which had been previously filed in February 2017) without prejudice. The plaintiffs filed an amended complaint on September 6, 2018.

In April 2017, the company became aware of a criminal investigation by the U.S. Department of Justice, Antitrust Division and a federal grand jury in the United States District Court for the Eastern District of Pennsylvania. The company and an employee received subpoenas seeking production of documents and testimony regarding the manufacturing, selling, pricing and shortages of IV solutions and containers (including saline solutions and certain other injectable medicines sold by the company) and communications with competitors regarding the same. The company is cooperating with the investigation. The New York Attorney General has also requested that Baxter provide information regarding business practices in the IV saline industry. The company is cooperating with the New York Attorney General.

Other

In December 2016, the company received a civil investigative demand from the Commercial Litigation Branch of the United States Department of Justice (DOJ) primarily relating to contingent discount arrangements for, and other promotion of, the company's TISSEEL and ARTISS products. In April 2018, the DOJ filed a notice of its decision not to intervene and an underlying qui tam complaint (U.S. ex rel. Andrew Capp v. Baxter) was unsealed in the United States District Court for the District of Columbia. The attorney for the relator/plaintiff voluntarily dismissed the qui tam complaint on June 16, 2018. The complaint which is now fully resolved, related to contingent discount arrangements for, and other promotion of, the company's TISSEEL, ARTISS and VERITAS products.

15. SEGMENT INFORMATION

In 2017, Baxter announced a change in its commercial structure to improve performance, optimize costs, increase speed in the decision-making process and drive improved accountability across the company. As a result, the company now reports its financial performance based on its new segments: Americas (North and South America), EMEA (Europe, Middle East and Africa) and APAC (Asia Pacific). Segment results for the three and nine months ended September 30, 2017 have been recast to conform to the current year presentation.

The company's segments provide a broad portfolio of essential healthcare products across its portfolio, including acute and chronic dialysis therapies; sterile IV solutions; infusion systems and devices; parenteral nutrition therapies; inhaled anesthetics; generic injectable pharmaceuticals; and surgical hemostat and sealant products.

The company uses operating income on a segment basis to make resource allocation decisions and assess the ongoing performance of the company's business segments. Intersegment sales are eliminated in consolidation.

Certain items are maintained at Corporate and are not allocated to a segment. They primarily include most of the company's debt and cash and equivalents and related net interest expense, foreign exchange rate fluctuations (principally relating to intercompany receivables, payables and loans denominated in a foreign currency) and the majority of the foreign currency hedging activities, corporate headquarters costs, certain research and development costs, certain Global Business Unit (GBU) support costs, stock compensation expense, nonstrategic investments and related income and expense, certain employee benefit plan costs as well as certain gains, losses, and other charges (such as business optimization, integration and separation-related costs, and asset impairments). The company's chief operating decision maker does not receive any asset information by operating segment and, accordingly, the company does not report asset information by operating segment. Financial information for the company's segments is as follows.

Edgar Filing: BAXTER INTERNATIONAL INC - Form 10-Q

Other ⁷	146	124	388	345
Total Baxter	\$2,767	\$2,707	\$8,286	\$7,787

1 Renal Care includes sales of the company's peritoneal dialysis (PD) and hemodialysis (HD) and additional dialysis therapies and services.

2 Medication Delivery includes sales of the company's IV therapies, infusion pumps, administration sets and drug reconstitution devices.

3 Pharmaceuticals includes sales of the company's premixed and oncology drug platforms, inhaled anesthesia and critical care products and pharmacy compounding services.

4 Clinical Nutrition includes sales of the company's parenteral nutrition (PN) therapies.

5 Advanced Surgery includes sales of the company's biological products and medical devices used in surgical procedures for hemostasis, tissue sealing and adhesion prevention.

Acute Therapies includes sales of the company's continuous renal replacement therapies (CRRT) and other organ support therapies focused in the ICU.

7Other includes sales primarily from the company's pharmaceutical partnering business.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Refer to the company's Current Report on Form 8-K filed with the SEC on August 23, 2018 (2017 Annual Report), which revised and superseded the Management's Discussion and Analysis of Financial Condition and Results of Operations section of the Annual Report on Form 10-K for the year ended December 31, 2017, for management's discussion and analysis of the financial condition and results of operations of the company. The following is management's discussion and analysis of the financial condition and results of operations of the company for the three and nine months ended September 30, 2018.

RESULTS OF OPERATIONS

Baxter's income from continuing operations for the three and nine months ended September 30, 2018 totaled \$544 million, or \$1.00 per diluted share and \$1,276 million, or \$2.33 per diluted share, compared to \$248 million, or \$0.45 per diluted share, and \$785 million, or \$1.42 per diluted share, for the three and nine months ended September 30, 2017. Income from continuing operations for the three and nine months ended September 30, 2018 included special items which increased income from continuing operations by \$108 million and \$31 million, respectively, or \$0.20 and \$0.06 per diluted share, respectively, as further discussed below. Income from continuing operations for the three and nine months ended September 30, 2017 included special items which decreased income from continuing operations by \$108 million and \$237 million, respectively, or \$0.19 and \$0.42 per diluted share, respectively, as further discussed below.

Special Items

The following table provides a summary of the company's special items and the related impact by line item on the company's results of continuing operations for the three and nine months ended September 30, 2018 and 2017.

(in millions)	Three months ended September 30,		Nine months ended September 30,

Intangible asset amortization expense is identified as a special item to facilitate an evaluation of current and past operating performance and is similar to how management internally assesses performance. Additional special items are identified above because they are highly variable, difficult to predict and of a size that may substantially impact the company's reported operations for a period. Management believes that providing the separate impact of the above items on the company's results in accordance with GAAP in the United States may provide a more complete understanding of the company's operations and can facilitate a fuller analysis of the company's results of operations, particularly in evaluating performance from one period to another. This information should be considered in addition to, and not as a substitute for, information prepared in accordance with GAAP.

¹ The company's results in the third quarter of 2018 included a charge of \$90 million related to business optimization initiatives. This included a charge of \$63 million related to restructuring activities, \$24 million of costs to implement business optimization programs which primarily included external consulting and project employee costs, and \$3 million of accelerated depreciation associated with facilities to be closed. The \$63 million of restructuring included \$58 million of employee termination costs, \$4 million related to contract termination and other costs and \$1 million related to asset impairments.

The company's results in the first nine months of 2018 included a charge of \$175 million related to business optimization initiatives. This included a charge of \$96 million related to restructuring activities, \$74 million of costs to implement business optimization programs which primarily included external consulting and project employee costs, and \$5 million of accelerated depreciation associated with facilities to be closed. The \$96 million of restructuring included \$86 million of employee termination costs, \$6 million related to contract termination and other costs and \$4 million related to asset impairments.

The company's results in the third quarter of 2017 included a charge of \$52 million related to business optimization initiatives. This included a charge of \$31 million related to restructuring activities, \$21 million of costs to implement business optimization programs which primarily included external consulting and project employee costs. The \$31 million of restructuring charges were comprised of employee termination costs.

The company's results in the first nine months of 2017 included a net charge of \$116 million related to business optimization initiatives. This included a net charge of \$50 million related to restructuring activities, \$58 million of costs to implement business optimization programs which primarily included external consulting and project employee costs, and \$8 million of accelerated depreciation associated with facilities to be closed. The \$50 million of net restructuring included \$40 million of employee termination costs, \$5 million related to contract termination costs, and \$5 million of asset impairment charges primarily related to facility closures.

² The company's results in 2017 included costs incurred related to the Baxalta separation totaling \$2 million in the third quarter and \$17 million in the first nine months.

³ The company's results in the first nine months of 2017 included a benefit of \$12 million related to an adjustment to the company's historical rebates and discounts reserve.

⁴ The company's results in 2018 included acquisition and integration costs related to the company's acquisitions of Claris Injectables Limited (Claris) and the RECOTHROM and PREVELEAK products of \$11 million in the third quarter and \$30 million in the first nine months. The company's results in the third quarter and first nine months of 2017 included acquisition and integration costs of \$15 million and \$20 million, respectively, related to the company's acquisition of Claris.

⁵ The company's results in 2018 included a benefit of \$80 million for the February 2018 settlement of certain claims related to the acquired operations of Claris.

⁶ The company's results in 2018 included a charge of \$10 million related to certain product litigation.

⁷ The company's results in 2017 included a charge of \$33 million related to the deconsolidation of its Venezuelan operations.

The company's results in 2018 included a net benefit of \$3 million related to an adjustment to its accrual for SIGMA SPECTRUM infusion pump inspection and remediation activities. The company's results in the third quarter and first nine months of 2017 included a net charge of \$21 million and \$17 million, respectively, related to SIGMA SPECTRUM infusion pump inspection and remediation activities, partially offset by a benefit related to an adjustment to historical product reserves.

⁹ The company's results in 2018 included a benefit of \$23 million related to insurance recoveries as a result of losses incurred due to Hurricane Maria. The company's results in 2017 included a charge of \$21 million related to the impact of Hurricane Maria on the company's operations in Puerto Rico. The costs primarily included inventory and fixed asset impairments as well as idle facility costs.

¹⁰ The company's results in 2018 included costs of \$3 million specific to updating its quality systems and product labeling to comply with the new medical device reporting regulations and other requirements of the European Union's regulations for medical devices that will become effective in 2020.

30

¹¹ Reflected in this item is the tax impact of the special items identified in this table as well as a benefit of \$200 million in the third quarter and \$208 million in the first nine months of 2018 related to an update to the estimated impact of U.S. federal tax reform previously made by the company. The tax effect of each adjustment is based on the jurisdiction in which the adjustment is incurred and the tax laws in effect for each such jurisdiction.

NET SALES

(in millions)	Three months ended September 30,		Percent change			U.S. Cyclophosphamide	Acquisitions
	2018	2017	At actual currency rates	At constant currency rates	%		
United States	\$1,194	\$1,148	4%	4	%	(1)	2
International	1,573	1,559	1%	2	%	0	0
Total net sales	\$2,767	\$2,707	2%	3	%	0	1

(in millions)	Nine months ended September 30,		Percent change			U.S. Cyclophosphamide	Acquisitions
	2018	2017	At actual currency rates	At constant currency rates	%		
United States	\$3,551	\$3,382	5%	5	%	(1)	3
International	4,735	4,405	7%	3	%	0	1
Total net sales	\$8,286	\$7,787	6%	4	%	0	1

Foreign currency unfavorably impacted net sales by 1 percentage point during the third quarter of 2018 compared to the prior period principally due to the strengthening of the U.S. dollar relative to the Mexican Peso, Australian Dollar and Brazilian Real. Foreign currency favorably impacted net sales by 2 percentage points during the first nine months of 2018, compared to the prior period principally due to the weakening of the U.S. dollar relative to the Euro, British Pound and Chinese Yuan partially offset by the strengthening of the U.S. dollar relative to the Brazilian Real.

The comparisons presented at constant currency rates reflect comparative local currency sales at the prior period's foreign exchange rates. This measure provides information on the change in net sales assuming that foreign currency exchange rates have not changed between the prior and the current period. The company believes that the non-GAAP measure of change in net sales at constant currency rates, when used in conjunction with the GAAP measure of change in net sales at actual currency rates, may provide a more complete understanding of the company's operations and can facilitate a fuller analysis of the company's results of operations, particularly in evaluating performance from one period to another.

The company is presenting the impact of generic competition for U.S. cyclophosphamide to enhance comparability between periods and better identify operating trends.

On July 27, 2017, Baxter completed the acquisition of Claris, a wholly owned subsidiary of Claris Lifesciences Limited, for total cash consideration of \$629 million, net of cash acquired. The Claris acquisition contributed \$38 million and \$107 million, respectively, of net sales for the three and nine months ended September 30, 2018, and \$27 million of net sales for the three and nine months ended September 30, 2017.

On March 19, 2018, Baxter acquired two hemostat and sealant products from Mallinckrodt plc: RECOTHROM Thrombin topical (Recombinant), the first and only stand-alone recombinant thrombin, and PREVELEAK Surgical Sealant, which is used in vascular reconstruction. The purchase price includes cash payments of \$163 million and potential contingent payments in the future. In the three and nine months ended September 30, 2018, consolidated Baxter results include \$14 million and \$31 million, respectively, of net sales of RECOTHROM and PREVELEAK.

Global Business Unit Net Sales Reporting

The company's global business units (GBUs) include the following:

Renal Care includes sales of the company's peritoneal dialysis (PD) and hemodialysis (HD) and additional dialysis therapies and services.

• **Medication Delivery** includes sales of the company’s IV therapies, infusion pumps, administration sets and drug reconstitution devices.

Pharmaceuticals includes sales of the company's premixed and oncology drug platforms, inhaled anesthesia and critical care products and pharmacy compounding services.

• **Clinical Nutrition** includes sales of the company's parenteral nutrition (PN) therapies.

• **Advanced Surgery** includes sales of the company's biological products and medical devices used in surgical procedures for hemostasis, tissue sealing and adhesion prevention.

• **Acute Therapies** includes sales of the company’s continuous renal replacement therapies (CRRT) and other organ support therapies focused in the ICU.

• Other includes sales primarily from the company's pharmaceutical partnering business.

The following is a summary of net sales by GBU.

	Three months ended		September 30, 2018			September 30, 2017			September 30, 2016			
			Percent change			Percent change			Percent change

Advanced Surgery	586	521	12 %	10 %	0	%	6	%	6	%
Acute Therapies	380	330	15 %	11 %	0	%	0	%	0	%
Other	388	345	12 %	9 %	0	%	0	%	0	%
Total Baxter	\$8,286	\$7,787	6 %	4 %	0	%	1	%	1	%

Renal Care net sales increased 2% and 7%, respectively, during the third quarter and first nine months of 2018. Excluding the impact of foreign currency, net sales increased 3% and 4%, respectively, during the third quarter and first nine months of 2018, driven by global growth in the PD business as well as increased sales in the HD business.

Medication Delivery net sales decreased 4% and 1%, respectively, during the third quarter and first nine months of 2018. Excluding the impact of foreign currency, net sales decreased 3% and 2%, respectively, during the third quarter and first nine months of 2018. Net sales were impacted by supply constraints associated with the company's small volume parenterals (SVPs) due to Hurricane Maria. As a result of those supply constraints, some customers have changed their protocols for use of these products and some others

shifted to competitive products. In addition, sales declined in the third quarter in the U.S. for the company's large volume parenterals (LVPs) due to the impact of distributor destocking. Demand was higher in the first five months of 2018 as customers increased purchases due to industry-wide supply challenges and an intense flu season.

Pharmaceuticals net sales increased 4% during the third quarter of 2018. Excluding the impact of foreign currency, net sales increased 5% in the third quarter. The increase during the quarter was a result of the benefit from the acquisition of Claris, strength in the anesthesia business and increased sales of the company's premixed injectables. The acquisition of Claris in 2017 contributed \$38 million of net sales in the third quarter of 2018 compared to \$27 million of net sales in the third quarter of 2017. Partially offsetting the increase in the quarter was reduced sales of BREVIBLOC and U.S. cyclophosphamide and a one-time benefit from an early contract settlement in the prior year. Sales of U.S. cyclophosphamide decreased from \$47 million in the third quarter of 2017 to \$40 million in the third quarter of 2018. The company continues to expect future sales of BREVIBLOC and U.S. Cyclophosphamide to be negatively impacted due to additional competition entering the market. Pharmaceuticals net sales increased 13% during the nine months ended September 30, 2018. Excluding the impact of foreign currency, net sales increased 11% in the nine months ended September 30, 2018. The increase was a result of the benefit from the acquisition of Claris, increased sales of the company's premixed injectables and increased sales of BREVIBLOC due to competitive supply constraints. The acquisition of Claris in 2017 contributed \$107 million of net sales for the nine months ended September 30, 2018 compared to \$27 million of net sales for the nine months ended September 30, 2017. Partially offsetting the increase in the first nine months of 2018 was reduced sales of U.S. cyclophosphamide. Sales of U.S. cyclophosphamide decreased from \$143 million for the nine months ended September 30, 2017 to \$127 million for the nine months ended September 30, 2018. Additionally offsetting the increase was a reduction in net sales for TransDerm Scop in the first quarter of 2018 due to a temporary supply disruption for an alternative product in the prior year, a reduction in U.S. sales due to the impact of Hurricane Maria in the first quarter of 2018 and a one-time benefit from an early contract settlement in the third quarter of 2017.

Clinical Nutrition net sales decreased 2% during the third quarter of 2018 and increased 2% during the first nine months of 2018. Excluding the impact of foreign currency, net sales decreased 2% during the third quarter and first nine months of 2018, respectively. Results were driven by improved volumes internationally for the company's nutritional therapies offset by the impact of Hurricane Maria related supply constraints which resulted in some customers in the U.S. changing protocols for parenteral nutritional therapies or shifting to outsourced nutrition compounding centers and competitive products.

Advanced Surgery net sales increased 14% and 12%, respectively, during the third quarter and first nine months of 2018. Excluding the impact of foreign currency, net sales increased 15% and 10% in the third quarter and first nine months of 2018, respectively, primarily driven by the acquisition of RECOTHROM and PREVELEAK from Mallinckrodt, which contributed \$14 million and \$31 million of net sales in the third quarter and first nine months of 2018, respectively, and improved sales for the company's core hemostats and sealants.

Acute Therapies net sales increased 9% and 15%, respectively, during the third quarter and first nine months of 2018. Excluding the impact of foreign currency, net sales increased 10% and 11% in the third quarter and first nine months of 2018, respectively, due to higher demand for the company's CRRT systems and a benefit from an intense flu season

in the first quarter.

Other net sales increased 18% and 12%, respectively, during the third quarter and first nine months of 2018. Excluding the impact of foreign currency, net sales increased 17% and 9% in the third quarter and first nine months of 2018, respectively, due primarily to favorable performance in the company's contract manufacturing businesses.

Gross Margin and Expense Ratios

	Three months ended September 30,			Nine months ended Sept 30,		
(as a percentage of net sales)	2018	2017	Change	2018	2017	Change
Gross margin	44.7 %	41.7 %	3.0 pts	43.3 %	42.5 %	0.8 pts
Marketing and administrative expenses	24.8 %	25.1 %	(0.3 pts)	24.0 %	24.1 %	(0.1 pts)

Gross Margin

The special items identified above had an unfavorable impact of approximately 1.6 and 1.9 percentage points on the gross margin ratio in the third quarter and first nine months of 2018, respectively. The unfavorable impact was 3.6 and 2.5 percentage points in the third quarter and first nine months of 2017, respectively. Refer to the Special Items caption above for additional detail.

Excluding the impact of the special items, the gross margin ratio increased in the third quarter of 2018 from the prior-year period primarily due to favorable product mix and manufacturing efficiencies partially offset by the negative impact of foreign exchange rates. During the first nine months of 2018, the gross margin ratio increased primarily due to favorable product mix and manufacturing efficiencies, partially offset by the negative impact of foreign exchange rates, incremental supply chain costs the company absorbed during the first nine months of 2018 and the impact of lost sales due to Hurricane Maria in the first quarter of 2018.

Marketing and Administrative Expenses

The special items identified above had an unfavorable impact of approximately 2.3 and 1.7 percentage points on the marketing and administrative expense ratio in the third quarter and first nine months of 2018, respectively. The unfavorable impact was 1.9 and 1.2 percentage points in the third quarter and first nine months of 2017, respectively. Refer to the Special Items caption above for additional detail.

Excluding the impact of the special items, the marketing and administrative expenses ratio in the third quarter and first nine months of 2018 declined due to the actions taken by the company to rebase its cost structure and focus on expense management. These savings were partially offset by decreased benefits to the marketing and administrative expenses ratio from lower transition service income (approximately 40 and 50 basis points in the three and nine months ended September 30, 2018, respectively), as the agreement with Baxalta for these services terminated as of July 1, 2018, and increased freight expenses as the company works to ensure adequate product availability to meet customer needs (approximately 5 and 15 basis points in the three and nine months ended September 30, 2018, respectively). In addition, the change in the estimated useful life of the company's ERP systems contributed to the reduction in the marketing and administrative expense ratio in the third quarter and first nine months of 2018 (approximately 20 basis points in the three and nine months ended September 30, 2018).

Research and Development

	Three months ended			Nine months ended		
	September 30,		Percent	September 30,		Percent
(in millions)	2018	2017	change	2018	2017	change
Research and development expenses	\$166	\$150	11 %	\$480	\$432	11 %
As a percentage of net sales	6.0 %	5.5 %		5.8 %	5.5 %	

The special items identified above had an unfavorable impact of approximately \$13 million and \$26 million in the third quarter and first nine months of 2018, respectively. Refer to the Special Items caption above for additional detail.

Excluding the impact of the special items, research and development expenses increased in the third quarter of 2018 as a result of an increase in project-related expenditures.

Business Optimization Items

Beginning in the second half of 2015, the company initiated actions to transform its cost structure and enhance operational efficiency. These efforts include restructuring the organization, optimizing the manufacturing footprint, R&D operations and supply chain network, employing disciplined cost management, and centralizing and streamlining certain support functions. Through September 30, 2018, the company has incurred pretax costs of \$751 million related to these actions. The costs consisted primarily of employee termination costs, implementation costs, and accelerated depreciation. The company expects to incur additional pretax costs of approximately \$130 million and capital expenditures of \$50 million related to these initiatives substantially by the end of 2020. These costs will primarily include employee termination costs, implementation costs, and accelerated depreciation. These actions in the aggregate are expected to provide future annual pretax savings of approximately \$1.2 billion. The savings from these actions will impact cost of sales, marketing and administrative expenses, and research and development expenses. Approximately 80 percent of the expected annual pretax savings are expected to be realized by the end of 2018, with the remainder by the end of 2020. Refer to Note 9 in Item 1 for additional information regarding the company's business optimization initiatives.

Net Interest Expense

Net interest expense was \$11 million and \$34 million in the third quarter and first nine months of 2018, respectively, and \$14 million and \$41 million in the third quarter and first nine months of 2017, respectively. The decrease in the third quarter and first nine months of 2018 was primarily driven by higher interest income earned in the quarter as a result of favorable interest rates.

Other (Income) Expense, Net

Other (income) expense, net was income of \$32 million and \$81 million in the third quarter and first nine months of 2018, respectively, and income of \$4 million and expense of \$35 million in the third quarter and first nine months of 2017, respectively. The change was a result of a net pension benefit of \$13 million and \$39 million, respectively, in the third quarter and first nine months of 2018, as compared to a net pension expense of \$8 million and \$25 million, respectively, in the third quarter and first nine months of 2017. The benefit in the current year was primarily driven by reduced amortization expense as a result of the changes in the company's U.S. pension plans that were announced in January 2018. Refer to Note 11 within Item 1 for additional information regarding the U.S. pension changes.

Additionally, in the third quarter and first nine months of 2018, the company recognized higher income from foreign currency fluctuations principally related to intercompany receivables, payables and monetary assets denominated in a foreign currency, compared to the prior year periods. Special items during the periods presented included the \$33 million loss on the deconsolidation of the company's Venezuelan subsidiary in the second quarter of 2017.

Income Taxes

The company's effective income tax rate for continuing operations was (34.0)% and 14.5% in the third quarter and (2.2)% and 15.0% for the first nine months of 2018 and 2017, respectively. The company's effective income tax rate differs from the U.S. federal statutory rate each year due to certain operations that are subject to tax incentives, state and local taxes, and foreign taxes that are different than the U.S. federal statutory rate. In addition, the effective tax rate can be impacted each period by discrete factors and events.

The effective income tax rate for continuing operations during the three months ended September 30, 2018 was benefitted from an adjustment to the Tax Cuts and Job Act of 2017 (the 2017 Tax Act) provisional amounts as permitted by Staff Accounting Bulletin 118. Specifically, the company released a \$200 million valuation allowance related to the company's U.S. foreign tax credit deferred tax assets. The company continues to evaluate the 2017 Tax Act along with regulations and guidance issued by the Internal Revenue Service and will complete the accounting for the initial impact of the 2017 Tax Act by the end of 2018. The effective income tax rate for continuing operations during the nine months ended September 30, 2018 was further benefitted from a settlement of a 2008 through 2010 transfer pricing Competent Authority proceeding between the U.S. and Germany, the reversal of a foreign valuation allowance as a result of continued profit improvements, receipt of tax free income from the settlement of Claris contingent matters (as described in Note 6), and adjustments of state income tax provisional amounts related to the 2017 Tax Act toll charge. In addition, windfall benefits realized from stock option exercises and vesting of RSUs associated with the company's stock compensation programs favorably impacted the effective tax rate by approximately 3.0 percentage points. Partially offsetting the foregoing benefits was interest on the reserve for uncertain tax benefits (UTPs), the revaluation of Swedish net deferred tax assets, and some miscellaneous transfer pricing UTP accruals.

The 2017 Tax Act lowered the U.S. Federal rate from 35% to 21% and generally exempts foreign income from U.S. taxation. The benefit from the reduction of the U.S. Federal rate on U.S. income and the ability to repatriate foreign earnings exempt from U.S. Federal tax was almost wholly offset by additional tax charges related to the 2017 Tax Act. These charges included the disallowance of salary deductions in excess of \$1 million for certain highly paid executives, including stock compensation, as well as lost tax benefits from the allocations of certain U.S. expenses to exempt foreign income. The company's tax provision for the first nine months of 2018 does not include any tax charge related to either the Global Intangible Low Taxed Income (GILTI) or Base Erosion Anti-Abuse Tax (BEAT) provisions as the company does not believe that it is subject to either.

The company continues to refine its 2017 Tax Act provisional amounts. Additionally, the company continues to evaluate the potential impact of the 2017 Tax Act's GILTI and BEAT provisions. The company, while not expecting to be subject to a tax charge under the 2017 Tax Act GILTI provisions, elects to recognize this tax as a period cost.

The company continues to evaluate other accounting elections related to the 2017 Tax Act and expects to complete its provisional accounting within the one-year measurement period.

Income from Continuing Operations and Earnings per Diluted Share

Income from continuing operations was \$544 million and \$248 million for the three months ended September 30, 2018 and 2017, respectively, and \$1,276 million and \$785 million for the nine months ended September 30, 2018 and 2017, respectively. Income from continuing operations per diluted share was \$1.00 and \$0.45 for the three months ended September 30, 2018 and 2017, respectively, and \$2.33 and \$1.42 for the nine months ended September 30, 2018 and 2017, respectively. The significant factors and events contributing to the changes are discussed above.

Income from Discontinued Operations

Discontinued operations were insignificant for both periods presented. Refer to Note 3 within Item 1 for additional information regarding the separation of Baxalta.

Segment Results

The company uses operating income on a segment basis to make resource allocation decisions and assess the ongoing performance of the company's segments. The following is a summary of significant factors impacting the segments' financial results.

	Net sales				Operating income			
	Three months ended		Nine months ended		Three months ended		Nine months ended	
(in millions)	September 30,		September 30,		September 30,		September 30,	
	2018	2017	2018	2017	2018	2017	2018	2017
Americas	\$1,497	\$1,458	\$4,464	\$4,264	\$624	\$583	\$1,809	\$1,671
EMEA	707	682	2,189	1,979	166	146	479	414
APAC	563	567	1,633	1,544	139	134	387	371
Corporate and other	—	—	—	—	(544)	(563)	(1,474)	(1,456)
Total	\$2,767	\$2,707	\$8,286	\$7,787	\$385	\$300	\$1,201	\$1,000

Americas

Segment operating income was \$624 million and \$1,809 million, respectively, in the third quarter and the first nine months of 2018 and \$583 million and \$1,671 million, respectively, in the third quarter and first nine months of 2017. The increase in 2018 was primarily driven by increased net sales and gross margin as a result of the Claris and RECOTHROM and PREVELEAK acquisitions, higher sales of BREVIBLOC due to its use as a substitute product during a market shortage and higher net sales related to premix injectables. Also, driving performance during the quarter and first nine months of 2018 was improved performance in Renal Care, driven primarily by PD growth, and Acute Therapies. Negatively impacting performance in the first nine months of 2018 was the impact of Hurricane Maria.

EMEA

Segment operating income was \$166 million and \$479 million, respectively, in the third quarter and the first nine months of 2018 and \$146 million and \$414 million, respectively, in the third quarter and first nine months of 2017. The increase in 2018 was primarily driven by higher net sales across multiple GBUs, and improved margins primarily as a result of product mix.

APAC

Segment operating income was \$139 million and \$387 million, respectively, in the third quarter and the first nine months of 2018 and \$134 million and \$371 million, respectively, in the third quarter and first nine months of 2017. Results in 2018 were primarily driven by higher sales, primarily from China in the Renal Care and Clinical Nutrition GBUs.

Corporate and other

Certain income and expense amounts are not allocated to a segment. These amounts primarily include corporate headquarters costs, certain R&D costs, certain GBU support costs, stock compensation expense, non-strategic investments and related income and expense, certain employee benefit plan costs as well as certain gains, losses, and other charges (such as business optimization and asset impairments).

36

LIQUIDITY AND CAPITAL RESOURCES

The following table is a summary of the statement of cash flows for the nine month periods ended September 30, 2018 and 2017.

(in millions)	Nine months ended September 30,	
	2018	2017
Cash flows from operations - continuing operations	\$1,341	\$1,343
Cash flows from investing activities	(715)	(1,088)
Cash flows from financing activities	(1,095)	391

Cash Flows from Operations — Continuing Operations

Operating cash flows from continuing operations were essentially unchanged during the first nine months of 2018 as compared to the prior year period. The change was driven by the factors discussed below.

Net Income

Net income, as adjusted for certain non-cash items, such as depreciation and amortization, net periodic pension benefit and OPEB costs, stock compensation, deferred income taxes and other items increased in the nine months ended September 30, 2018 compared to 2017.

Accounts Receivable

Cash flows relating to accounts receivable decreased compared to the prior year. Days sales outstanding increased from 55.1 days to 55.8 days period over period.

Inventories

Changes in inventories had a negative impact on cash flows in the first nine months of 2018. The following is a summary of inventories as of September 30, 2018 and December 31, 2017, as well as annualized inventory turns for the first nine months of 2018 and 2017.

Inventories	Annualized inventory turns for the nine months ended	
	September 30,	September 30,
	September 30,	September 30,
	December 31,	September 30,

Edgar Filing: BAXTER INTERNATIONAL INC - Form 10-Q

(in millions, except inventory turn data)	2018	2017	2018	2017
Total company	\$1,718	\$ 1,475	3.4	3.9

Other

The changes in accounts payable and accrued liabilities were a \$51 million outflow in the first nine months of 2018 compared to a \$36 million outflow in the first nine months of 2017. The changes were primarily driven by the timing of supplier payments. Days payable outstanding increased to 57.7 days in the first nine months of 2018 compared to 49.9 days in the prior year.

Payments related to the execution of the company's business optimization initiatives decreased from \$114 million in the first nine months of 2017 to \$72 million in the first nine months of 2018. Refer to Note 9 within Item 1 for further information regarding the company's business optimization initiatives.

Changes in other balance sheet items include outflows of \$96 million and \$95 million in the first nine months of 2018 and 2017, respectively. The change is driven by higher pension contributions in the first nine months of 2017 offset by higher infusion pump payments during the first nine months of 2018. Refer to Note 8 within Item 1 for further information regarding the company's infusion pump charges.

Cash Flows from Investing Activities — Continuing Operations

Capital Expenditures

Capital expenditures were \$468 million and \$410 million in the first nine months 2018 and 2017, respectively. The company's capital expenditures in 2018 were driven by targeted investments in projects to support production of PD and IV solutions.

Acquisitions and Investments

Cash outflows relating to acquisitions and investments of \$255 million in the first nine months of 2018 were primarily driven by the \$163 million acquisition of RECOTHROM and PREVELEAK from Mallinckrodt and the acquisition of two products from Celerity for \$72 million. Cash outflows relating to acquisitions and investments of \$680 million in the first nine months of 2017 were driven primarily by the acquisition of Claris and the acquisition of the rights to two products from Celerity.

Divestitures and Other Investing Activities

Cash inflows from divestitures and other investing activities in the first nine months of 2018 and 2017 were not significant.

Cash Flows from Financing Activities

Debt Issuances, Net of Payments of Obligations

Cash flows related to debt and other financing obligations for the first nine months of 2018 were insignificant. Net cash inflows related to debt and other financing obligations totaled \$633 million for the first nine months of 2017 primarily due to the issuance of €600 million of senior notes at a fixed coupon rate of 1.30% due in May 2025.

Other Financing Activities

Cash dividend payments totaled \$274 million and \$228 million in the first nine months of 2018 and 2017, respectively. The increase in cash dividend payments was primarily due to an increase in the quarterly dividend rate from \$0.13 to \$0.16 per share for quarterly dividends declared between May 2017 and May 2018. In addition, the company increased the quarterly dividend rate from \$0.16 to \$0.19 per share for quarterly dividends declared beginning May 2018.

Proceeds from stock issued under employee benefit plans decreased from \$298 million in the first nine months of 2017 to \$232 million in the first nine months of 2018, primarily due to decreased option exercises in the first nine months of 2018.

As authorized by the Board of Directors, the company repurchases its stock depending upon the company's cash flows, net debt level and market conditions. In July 2012, the Board of Directors authorized the repurchase of up to \$2.0 billion of the company's common stock. The Board of Directors increased this authority by an additional \$1.5 billion in November 2016 and an additional \$1.5 billion in February 2018. The company paid \$1.0 billion in cash to repurchase approximately 14.9 million shares under this authority pursuant to Rule 10b5-1 plans in the first nine months of 2018 and had \$1.6 billion remaining available under this authorization (as amended and after giving effect to stock repurchases) as of September 30, 2018.

Credit Facilities, Access to Capital and Credit Ratings

Credit Facilities

As of September 30, 2018, the company's U.S. dollar-denominated revolving credit facility and Euro-denominated senior revolving credit facility had a maximum capacity of \$1.5 billion and approximately €200 million, respectively. As of September 30, 2018, the company was in compliance with the financial covenants in these agreements. The non-performance of any financial institution supporting either of the credit facilities would reduce the maximum

capacity of these facilities by each institution's respective commitment.

Access to Capital

The company intends to fund short-term and long-term obligations as they mature through cash on hand, future cash flows from operations or by issuing additional debt. The company had \$2.9 billion of cash and equivalents as of September 30, 2018, with adequate cash available to meet operating requirements in each jurisdiction in which the company operates. The company invests its excess cash in certificates of deposit and money market funds, and diversifies the concentration of cash among different financial institutions.

The company's ability to generate cash flows from operations, issue debt or enter into other financing arrangements on acceptable terms could be adversely affected if there is a material decline in the demand for the company's products or in the solvency of its customers or suppliers, deterioration in the company's key financial ratios or credit ratings or other significantly unfavorable changes in conditions. However, the company believes it has sufficient financial flexibility to issue debt, enter into other financing arrangements and attract long-term capital on acceptable terms to support the company's growth objectives.

The company continues to do business with foreign governments in certain countries, including Greece, Spain, Portugal and Italy, which have experienced a deterioration in credit and economic conditions. As of September 30, 2018, the company's net accounts receivable from the public sector in Greece, Spain, Portugal and Italy totaled \$141 million.

While these economic conditions have not significantly impacted the company's ability to collect receivables, global economic conditions and liquidity issues in certain countries have resulted, and may continue to result, in delays in the collection of receivables and credit losses.

Credit Ratings

The company's credit ratings at September 30, 2018 were as follows.

	Standard & Poor's	Fitch	Moody's
Ratings			
Senior debt	A-	A-	Baa1
Short-term debt	A2	F2	P2
Outlook	Stable	Stable	Stable

In the first quarter of 2018, Moody's upgraded Baxter's senior unsecured debt ratings from Baa2 to Baa1, and Fitch upgraded Baxter's senior unsecured debt ratings from BBB+ to A-.

CRITICAL ACCOUNTING POLICIES

The preparation of financial statements in accordance with GAAP requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. A summary of the company's significant accounting policies is included in Note 1 to the company's consolidated financial statements in the 2017 Annual Report. Certain of the company's accounting policies are considered critical, as these policies are the most important to the depiction of the company's financial statements and require significant, difficult or complex judgments, often employing the use of estimates about the effects of matters that are inherently uncertain. Such policies are summarized in the Management's Discussion and Analysis of Financial Condition and Results of Operations section in the 2017 Annual Report. Excluding the paragraph below, there have been no significant changes in the company's application of its critical accounting policies during the first nine months of 2018.

Revenue Recognition

The company's revenues from product sales are recorded at the net sales price (transaction price), which includes estimates of variable consideration for reserves related to rebates, product returns, sales discounts and wholesaler chargebacks. These reserves are based on estimates of the amounts earned or to be claimed on the related sales. Management's estimates take into consideration historical experience, current contractual and statutory requirements, specific known market events and trends, industry data, and forecasted customer buying and payment patterns. Overall, these reserves reflect the company's best estimates of the amount of consideration to which it is entitled based on the terms of the contract. The amount of variable consideration included in the net sales price is limited to the amount that is probable not to result in a significant reversal in the amount of the cumulative revenue recognized in a future period.

The company's contracts with customers often include promises to transfer multiple products and services to a customer. Determining whether products and services are considered distinct performance obligations that should be

accounted for separately may require significant judgment.

The company does not expect the new standard related to revenue recognition to have a material impact on its condensed consolidated financial statements as compared to historical revenue recognition guidelines. Refer to Notes 1 and 2 within Item 1 for further information.

LEGAL CONTINGENCIES

Refer to Note 14 within Item 1 for a discussion of the company's legal contingencies. Upon resolution of any of these uncertainties, the company may incur charges in excess of presently established liabilities. While the liability of the company in connection with certain claims cannot be estimated with any certainty, and although the resolution in any reporting period of one or more of these matters could have a significant impact on the company's results of operations and cash flows for that period, the outcome of these legal proceedings is not expected to have a material adverse effect on the company's consolidated financial position. While the company believes that it has valid defenses in these matters, litigation is inherently uncertain, excessive verdicts do occur, and the company may in the future incur material judgments or enter into material settlements of claims.

CERTAIN REGULATORY MATTERS

The U.S. Food and Drug Administration (FDA) commenced an inspection of Claris' facilities in Ahmedabad, India in July 2017, immediately prior to the closing of the Claris acquisition. FDA completed the inspection, at which time FDA issued a related Form-483 (Claris 483). In July 2018, FDA issued a Warning Letter based on observations identified in the 2017 inspection (Claris Warning Letter).¹ The Claris Warning Letter includes a number of observations across a variety of areas. The company submitted its response to the Claris Warning Letter in August 2018 and is continuing to implement corrective and preventive actions, which have included product recalls that are financially immaterial to the company, to address FDA's observations as set forth in the Claris 483 or the Claris Warning Letter and other items identified in connection with integrating Claris into the company's quality systems. The company is scheduled to have a Regulatory Meeting with the FDA on November 6, 2018.

In June 2013, the company received a Warning Letter from FDA regarding operations and processes at its North Cove, North Carolina and Jayuya, Puerto Rico facilities. The company attended Regulatory Meetings with the FDA regarding one or both of these facilities in October 2014, November 2015, July 2017, April 2018 and October 2018. The Warning Letter addresses observations related to Current Good Manufacturing Practice violations at the two facilities.

FORWARD-LOOKING INFORMATION

This quarterly report includes forward-looking statements. Use of the words "may," "will," "would," "could," "should," "believe," "estimates," "projects," "potential," "expects," "plans," "seeks," "intends," "evaluates," "pursues," "anticipates," "continues," "impacts," "affects," "forecasts," "target," "outlook," "initiative," "objective," "designed," "priorities," "goal," or the negative words or other similar expressions is intended to identify forward-looking statements that represent our current judgment about possible future events. These forward-looking statements may include statements with respect to accounting estimates and assumptions, litigation-related matters including outcomes, future regulatory filings and the company's R&D pipeline (including estimates regarding the company's ability to have new product approved out of its Baxter Ahmedabad facility for distribution in the U.S.), strategic objectives, credit exposure to foreign governments, potential developments with respect to credit ratings, investment of foreign earnings, estimates of liabilities including those related to uncertain tax positions, contingent payments, future pension plan contributions, costs, discount rates and rates of return, the company's exposure to financial market volatility and foreign currency and interest rate risks, potential tax liability associated with the separation of the company's biopharmaceuticals and medical products businesses (including the 2016 disposition of the company's formerly retained shares in Baxalta (Retained Shares)), the impact of competition, future sales growth, business development activities (including the recent acquisitions of Claris Injectables and two surgical products from Mallinckrodt plc) and Hurricane Maria related production disruptions, business optimization initiatives, cost saving initiatives, future capital and R&D expenditures, future debt issuances, manufacturing expansion, the sufficiency of the company's facilities and financial flexibility, the adequacy of credit facilities, tax provisions and reserves, the effective tax rate and all other statements that do not relate to historical facts.

These forward-looking statements are based on certain assumptions and analyses made in light of the company's experience and perception of historical trends, current conditions, and expected future developments as well as other factors that the company believes are appropriate in the circumstances. While these statements represent the company's

current judgment on what the future may hold, and the company believes these judgments are reasonable, these statements are not guarantees of any events or financial results. Whether actual future results and developments will conform to expectations and predictions is subject to a number of risks and uncertainties, including the following factors, many of which are beyond our control:

- failure to achieve our long-term financial improvement goals;
- demand for and market acceptance risks for and competitive pressures related to new and existing products, and the impact of those products on quality and patient safety concerns;
- product development risks, including satisfactory clinical performance, the ability to manufacture at appropriate scale, and the general unpredictability associated with the product development cycle;
- product quality or patient safety issues, leading to product recalls, withdrawals, launch delays, warning letters (including the Claris Warning Letter), import bans, sanctions, seizures, litigation, or declining sales;
- the continuity, availability and pricing of acceptable raw materials and component supply, and therefore the continuity of our manufacturing and distribution;
- inability to create additional production capacity in a timely manner or the occurrence of other manufacturing or supply difficulties (including as a result of natural disaster or otherwise);

breaches or failures of the company's information technology systems, including by cyberattack;
 future actions of (or failures to act or delays in acting by) FDA, the European Medicines Agency or any other regulatory body or government authority (including the DOJ or the Attorney General of any State) that could delay, limit or suspend product development, manufacturing or sale or result in seizures, recalls, injunctions, monetary sanctions or criminal or civil liabilities;
 failures with respect to the company's quality, compliance or ethics programs;
 future actions of third parties, including third-party payers, the impact of healthcare reform and its implementation, suspension, repeal, replacement, amendment, modification and other similar actions undertaken by the United States or foreign governments, including with respect to pricing, reimbursement, taxation and rebate policies; legislation, regulation and other governmental pressures in the United States or globally, including the cost of compliance and potential penalties for purported noncompliance thereof, all of which may affect pricing, reimbursement, taxation and rebate policies of government agencies and private payers or other elements of the company's business, including new or amended laws, rules and regulations (such as the European Union's General Data Protection Regulation which became effective in May 2018 for example);
 the impact of competitive products and pricing, including generic competition, drug reimportation and disruptive technologies;
 global regulatory, trade and tax policies;
 the company's ability to identify business development and growth opportunities and to successfully execute on business development strategies;
 the company's ability to finance and develop new products or enhancements, on commercially acceptable terms or at all;
 the ability to protect or enforce the company's owned or in-licensed patent or other proprietary rights (including trademarks, copyrights, trade secrets and know-how) or patents of third parties preventing or restricting the company's manufacture, sale or use of affected products or technology;
 the impact of any goodwill impairments on our operating results;
 the impact of any future tax liability with respect to the separation and distribution, including with respect to transactions with Baxalta regarding its separation and distribution and the Retained Shares;
 any failure by Baxalta or Shire to satisfy its obligation under the separation agreements, including the tax matters agreement, or that certain letter agreement entered into with Shire and Baxalta;
 the impact of global economic conditions (including potential trade wars) on the company and its customers and suppliers, including foreign governments in countries in which the company operates;
 fluctuations in foreign exchange and interest rates;
 any changes in law concerning the taxation of income (whether with respect to current or future tax reform), including income earned outside the United States;
 actions by tax authorities in connection with ongoing tax audits;
 loss of key employees or inability to identify and recruit new employees;
 the outcome of pending or future litigation;
 the adequacy of the company's cash flows from operations to meet its ongoing cash obligations and fund its investment program; and
 other factors identified elsewhere in this report and other filings with the Securities and Exchange Commission, including those factors described in Item 1A of the company's Annual Report on Form 10-K for the year ended December 31, 2017, all of which are available on the company's website.

Actual results may differ materially from those projected in the forward-looking statements. The company does not undertake to update its forward-looking statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk
Currency Risk

The company is primarily exposed to foreign exchange risk with respect to revenues generated outside of the United States denominated in the Euro, British Pound, Chinese Yuan, Korean Won, Australian Dollar, Canadian Dollar, Japanese Yen, Colombian Peso, Brazilian Real, Mexican Peso and Swedish Krona. The company manages its foreign currency exposures on a consolidated basis, which allows the company to net exposures and take advantage of any natural offsets. In addition, the company uses derivative and nonderivative financial instruments to further reduce the net exposure to foreign exchange. Gains and losses on the hedging instruments offset losses and gains on the hedged transactions and reduce the earnings and stockholders' equity volatility relating to foreign exchange. Financial market and currency volatility may limit the company's ability to cost-effectively hedge these exposures.

The company may use options, forwards and cross-currency swaps to hedge the foreign exchange risk to earnings relating to forecasted transactions denominated in foreign currencies and recognized assets and liabilities. The maximum term over which the company has cash flow hedge contracts in place related to forecasted transactions as of September 30, 2018 is 18 months. The company also enters into derivative instruments to hedge certain intercompany and third-party receivables and payables and debt denominated in foreign currencies.

As part of its risk-management program, the company performs sensitivity analyses to assess potential changes in the fair value of its foreign exchange instruments relating to hypothetical and reasonably possible near-term movements in foreign exchange rates.

A sensitivity analysis of changes in the fair value of foreign exchange option and forward contracts outstanding at September 30, 2018, while not predictive in nature, indicated that if the U.S. Dollar uniformly weakened by 10% against all currencies, on a net-of-tax basis, the net asset balance of \$13 million with respect to those contracts would decrease by \$21 million, resulting in a net liability position.

The sensitivity analysis model recalculates the fair value of the foreign exchange option and forward contracts outstanding at September 30, 2018 by replacing the actual exchange rates at September 30, 2018 with exchange rates that are 10% weaker to the actual exchange rates for each applicable currency. All other factors are held constant. The sensitivity analysis disregards the possibility that currency exchange rates can move in opposite directions and that gains from one currency may or may not be offset by losses from another currency. The analysis also disregards the offsetting change in value of the underlying hedged transactions and balances.

The company's operations in Argentina are reported using highly inflationary accounting effective July 1, 2018. Changes in the value of the Argentine peso applied to our peso-denominated net monetary asset positions are recorded in income at the time of the change. As of September 30, 2018, the company's net monetary assets denominated in Argentine pesos are not significant.

Interest Rate and Other Risks

Refer to the caption "Interest Rate and Other Risks" in the "Financial Instrument Market Risk" section of the 2017 Annual Report. There were no significant changes during the quarter ended September 30, 2018.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Baxter carried out an evaluation, under the supervision and with the participation of its Disclosure Committee and management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of Baxter's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of September 30, 2018. Based on that evaluation the Chief Executive Officer and Chief Financial Officer concluded that the company's disclosure controls and procedures were effective as of September 30, 2018.

Changes in Internal Control over Financial Reporting

In 2017, related to its overall business optimization initiatives, the company began implementation of a business transformation project within the finance, human resources, purchasing and information technology functions which will further centralize and standardize business processes and systems across the company. The company is transitioning some processes to its shared services centers while others are moving to outsourced providers. This multi-year initiative will be conducted in phases and include modifications to the design and operation of controls over financial reporting.

With the exception of the above, there have been no changes in Baxter's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended September 30, 2018 that have materially affected, or are reasonably likely to materially affect, Baxter's internal control over financial reporting.

Review by Independent Registered Public Accounting Firm

A review of the interim condensed consolidated financial information included in this Quarterly Report on Form 10-Q for the three and nine months ended September 30, 2018 and 2017 has been performed by PricewaterhouseCoopers LLP, the company's independent registered public accounting firm. Its report on the interim condensed consolidated financial information follows. This report is not considered a report within the meaning of Sections 7 and 11 of the Securities Act of 1933 and therefore, the independent accountants' liability under Section 11 does not extend to it.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Baxter International Inc.

Results of Review of Financial Statements

We have reviewed the condensed consolidated balance sheet of Baxter International Inc. and its subsidiaries (the “Company”) as of September 30, 2018, and the related condensed consolidated statements of income and of comprehensive income for the three-month and nine-month periods ended September 30, 2018 and 2017 and the condensed consolidated statement of cash flows for the nine-month periods ended September 30, 2018 and 2017, including the related notes, appearing under Part I, Item 1 of this Quarterly Report on Form 10-Q (collectively referred to as the “interim financial statements”). Based on our reviews, we are not aware of any material modifications that should be made to the interim financial statements referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Company as of December 31, 2017, and the related consolidated statements of income, of comprehensive income, of changes in equity and of cash flows for the year then ended (not presented herein), and in our report dated February 23, 2018, except with respect to our opinion on the consolidated financial statements insofar as it relates to the change in the manner in which the Company accounts for certain pension and postretirement net periodic benefit costs discussed in Note 1, as to which the date is August 23, 2018, which included a paragraph describing a change in the manner of accounting for certain pension and postretirement net periodic benefit costs in the 2017 financial statements, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the condensed consolidated balance sheet as of December 31, 2017, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Basis for Review Results

These interim financial statements are the responsibility of the Company’s management. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our review in accordance with the standards of the PCAOB. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The information in Part I, Item 1, Note 14 is incorporated herein by reference.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table includes information about the company's common stock repurchases during the three-month period ended September 30, 2018.

Issuer Purchases of Equity Securities

Period	Total number of shares purchased (1)	Average price paid per share	Total number of shares purchased as part of publicly announced program ⁽¹⁾	Approximate dollar value of shares that may yet be purchased under the program ⁽¹⁾
July 1, 2018 through July 31, 2018	1,078,200	\$ 74.28	1,078,200	
August 1, 2018 through August 30, 2018	1,530,000	\$ 71.80	1,530,000	
September 1, 2018 through September 30, 2018	737,500	\$ 76.51	737,500	
Total	3,345,700	\$ 73.64	3,345,700	\$ 1,591,456,584

(1) In July 2012, the company announced that its board of directors authorized the company to repurchase up to \$2.0 billion of its common stock on the open market or in private transactions. The board of directors increased this authority by an additional \$1.5 billion in each of November 2016 and February 2018. During the third quarter of 2018, the company repurchased 3.3 million shares pursuant to Rule 10b5-1 plans for \$247 million under this program. \$1.6 billion remained available under this program (as amended and after giving effect to stock repurchases) as of September 30, 2018. This program does not have an expiration date.
