Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

1. Description of Business, Basis of Presentation, and Changes in Significant Accounting Policies

Ally Financial Inc. (formerly GMAC Inc. and referred to herein as Ally, we, our, or us) is a leading, independent, globally diversified, financial services firm. Founded in 1919, we are a leading automotive financial services company with over 90 years experience providing a broad array of financial products and services to automotive dealers and their customers. We became a bank holding company on December 24, 2008, under the Bank Holding Company Act of 1956, as amended. Our banking subsidiary, Ally Bank, is an indirect wholly owned subsidiary of Ally Financial Inc. and a leading franchise in the growing direct (online and telephonic) banking market.

Our accounting and reporting policies conform to accounting principles generally accepted in the United States of America (GAAP). Additionally, where applicable, the policies conform to the accounting and reporting guidelines prescribed by bank regulatory authorities. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and that affect income and expenses during the reporting period. In developing the estimates and assumptions, management uses all available evidence; however, actual results could differ because of uncertainties associated with estimating the amounts, timing, and likelihood of possible outcomes.

The Condensed Consolidated Financial Statements at June 30, 2012, and for the three months and six months ended June 30, 2012, and 2011, are unaudited but reflect all adjustments that are, in management's opinion, necessary for the fair presentation of the results for the interim periods presented. All such adjustments are of a normal recurring nature. These unaudited Condensed Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements (and the related notes) included in our Annual Report on Form 10-K for the year ended December 31, 2011, as filed on February 28, 2012, with the U.S. Securities and Exchange Commission (SEC). Residential Capital, LLC

On May 14, 2012 (the Petition Date), Residential Capital, LLC (ResCap) and certain of its wholly owned direct and indirect subsidiaries (collectively, the Debtors) filed voluntary petitions for relief under Chapter 11 of the Bankruptcy Code in the United States Bankruptcy Court for the Southern District of New York (Bankruptcy Court). In connection with the filings, Ally Financial Inc. and its direct and indirect subsidiaries and affiliates (excluding the Debtors and their direct and indirect subsidiaries) (collectively, AFI) reached an agreement with the Debtors and certain creditor constituencies on a prearranged Chapter 11 plan (the Plan).

In connection with the Plan, the Debtors expect to sell certain of their assets, consisting of the Debtors' mortgage origination and servicing business and certain other mortgage-related assets, to Nationstar Mortgage LLC and Berkshire Hathaway Inc., or one or more alternate purchasers with higher and better offers for such assets, under section 363 of the Bankruptcy Code. The Bankruptcy Court entered an order on June 28, 2012, approving Nationstar Mortgage LLC as stalking horse bidder for the Debtors' mortgage origination and servicing platform, and Berkshire Hathaway Inc. as stalking horse bidder for the Debtors' held-for-sale loan portfolio. The bid provided by Berkshire Hathaway Inc. supplanted the stalking horse bid provided by AFI that is described below. The Debtors' remaining assets are expected to be sold, wound down, or otherwise liquidated over time.

The contemplated Plan, which has not yet been filed with the Bankruptcy Court, is subject to Bankruptcy Court approval. The Plan is based on a settlement (the Settlement) between AFI and the Debtors under which, in exchange for the releases described below, AFI, among other things: (a) agreed to serve as the stalking horse bidder for the Debtors' held-for-sale loan portfolio, with a purchase price of approximately \$1.6 billion (which, as noted above, was supplanted by Berkshire Hathaway Inc. pursuant to an order entered by the Bankruptcy Court on June 28, 2012); (b) will make a cash contribution to the Debtors' estates of \$750 million that will enable certain recoveries to creditors of the Debtors' estates under the Plan; (c) provided the Debtors with a \$220 million post-petition debtor-in-possession financing facility; (d) consented to the Debtors' use of cash collateral pledged to Ally-funded, pre-petition senior secured credit facilities; (e) agreed to enter into and perform a shared services agreement with the Debtors to enable the Debtors to continue to operate their businesses during their bankruptcy cases; (f) agreed to enter into and perform

a transition services agreement with the purchaser of the Debtors' mortgage origination and servicing business to facilitate the sale of such assets; (g) continues to provide the Debtors with consumer lending origination support during their bankruptcy cases, including to allow implementation of the aforementioned asset sales; (h) provides the support necessary for the Debtors to satisfy certain regulatory obligations; and (i) agreed to provide indemnification of ResCap's current directors and officers. The Settlement, which is subject to Bankruptcy Court approval, provides for the release of all existing or potential causes of action between AFI and the Debtors, as well as a release of all existing or potential ResCap-related causes of action against AFI held by third parties.

Also ResCap has obtained support for the Plan from the ad hoc steering committee representing ResCap's junior secured notes (Ad Hoc Committee), as well as other certain noteholders, and as of the Petition Date, had affirmative support from entities holding \$791 million of these notes, out of a total of approximately \$2.1 billion. Additionally, institutional investors in residential mortgage-backed securities issued by ResCap's affiliates and holding more than 25 percent of at least one class in each of 290 securitizations agreed to support the Plan as of the Petition Date. To date, institutional investors holding more than 25 percent of at least one class in each of 336 securitizations have agreed to support the Plan. These 336 securitizations have an aggregate original principal balance of approximately \$189 billion (out of a total of 392 outstanding securitizations with an original principal balance of \$221 billion). The settlements reached are subject to Bankruptcy Court approval.

The Debtors have failed to satisfy certain milestone requirements in the Plan support agreements (the PSAs) with the Ad Hoc Committee and AFI, which relieves the Ad Hoc Committee and AFI of their obligations to perform under each of their respective PSAs. Notwithstanding

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

this, to date, AFI has continued to comply with its obligations under its PSAs. Furthermore, the Ad Hoc Committee has not indicated any intention to terminate its PSA.

On June 4, 2012, Berkshire Hathaway Inc. filed a motion in the Bankruptcy Court for the appointment of an independent examiner to investigate, among other things, certain of the Debtors' transactions with AFI occurring prior to the Petition Date, any claims the Debtors may hold against AFI's officers and directors, and any claims the Debtors propose to release under the Plan. On June 18, 2012, the Bankruptcy Court approved the appointment of an examiner and, subsequently, the United States Trustee for the Southern District of New York appointed former bankruptcy judge Arthur J. Gonzalez, Esq. as the examiner. On July 27, 2012, the Bankruptcy Court entered an order approving the scope of the examiner's investigation. The investigation will include, among other things: (a) all material pre-petition transactions between or among the Debtors and AFI, Cerberus Capital Management, L.P. and its subsidiaries and affiliates, and/or Ally Bank; (b) certain post-petition negotiations and transactions with the Debtors, including with respect to plan sponsor, plan support, and settlement agreements, the debtor-in-possession financing with AFI, the stalking horse asset purchase agreement with AFI, and the servicing agreement with Ally Bank; (c) all state and federal law claims or causes of action the Debtors propose to release as part of the Plan; and (d) the release of all existing or potential ResCap-related causes of action against AFI held by third parties. The examiner's preliminary estimate regarding the time necessary for the examiner to complete the examiner's investigation and related report is six months.

As a result of the bankruptcy filing, effective May 14, 2012, we have deconsolidated ResCap from our financial statements and ResCap is prospectively accounted for using the cost method. Furthermore, circumstances indicated to us that as of May 14, 2012, our investment in ResCap would not be recoverable, and accordingly we recorded a full impairment of such investment. The deconsolidation resulted in the removal of the following assets, liabilities, and accumulated other comprehensive income items from our Condensed Consolidated Balance Sheet.

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

ResCap's results of operations have been removed from our Condensed Consolidated Financial Statements since May 14, 2012. As ResCap remains a wholly owned subsidiary of Ally as of June 30, 2012, and they do not meet the requirements of a discontinued operation, ResCap's results of operations continue to be included in our Condensed Consolidated Statement of Comprehensive Income for periods prior to May 14, 2012. Our Condensed Consolidated Statements of Comprehensive Income include the following for ResCap's results of operations (amounts presented are before the elimination of balances and transactions with Ally).

(\$ in millions)	Period from April 1, 2012 to May 13, 2012	Three months ended June 30, 2011	Period from January 1, 2012 to May 13, 2012	Six months ended June 30, 2011	
Total net revenue	\$49	\$277	\$476	\$576	
Provision for loan losses	1	1	—	7	
Total noninterest expense	128	389	437	632	
(Loss) income from continuing operations before income tax expense	(80	) (113	) 39	(63	)
Income tax expense from continuing operations	2	—	7	9	
Net (loss) income from continuing operations	\$(82	) \$(113	) \$32	\$(72	)

Based on our assessment of the effect of the deconsolidation of ResCap, obligations under the Plan, and other impacts related to the Chapter 11 filing, we recorded a charge of \$1.2 billion during the three months ended June 30, 2012, within our other operating expenses. This charge primarily consists of the impairment of Ally's \$442 million investment in ResCap and the \$750 million cash contribution to be made by us to the Debtors' estate described above. As of June 30, 2012, we have \$1.2 billion of financing due from ResCap, which is classified as Finance Receivables and Loans, net on our Condensed Consolidated Balance Sheet. We maintain no allowance or impairment against these receivables because management considers them to be fully collectible. At June 30, 2012, our hedging arrangements with ResCap were fully collateralized. Additionally, under a shared services agreement (SSA), each entity agreed to provide services to the other for a period of one year. The SSA will automatically renew each year unless either entity provides written notice of nonrenewal to the other party at least three months prior to the expiration. The SSA fees received by Ally and the expenses paid to the Debtors will be reflected within the Condensed Consolidated Statement of Comprehensive Income as a reduction or increase of noninterest expense. Because of the uncertain nature of the bankruptcy proceedings, we cannot predict the ultimate financial impact to Ally. Refer to Note 25 to the Condensed Consolidated Financial Statements for additional information regarding these bankruptcy proceedings.

International Businesses

We have determined to explore strategic alternatives for all of our international operations, which includes automotive finance, insurance, and banking and deposit operations. As of June 30, 2012, the businesses did not meet the requirements of a discontinued operation.

Significant Accounting Policies**Income Taxes**

In calculating the provision for interim income taxes, in accordance with Accounting Standards Codification (ASC) 740, Income Taxes, we apply an estimated annual effective tax rate to year-to-date ordinary income. At the end of each interim period, we estimate the effective tax rate expected to be applicable for the full fiscal year. We exclude and record discretely the tax effect of unusual or infrequently occurring items, including, for example, changes in judgment about valuation allowances and effects of changes in tax law or rates. The provision for income taxes in tax jurisdictions with a projected full year or year-to-date loss for which a tax benefit cannot be realized are estimated using tax rates specific to that jurisdiction.

Refer to Note 1 to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K regarding additional significant accounting policies.

Recently Adopted Accounting Standards

Financial Services - Insurance - Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts (ASU 2010-26)

As of January 1, 2012, we adopted Accounting Standards Update (ASU) 2010-26, which amends ASC 944, Financial Services - Insurance. The amendments in this ASU specify which costs incurred in the acquisition of new and renewal insurance contracts should be capitalized. All other acquisition-related costs should be expensed as incurred. If the initial application of the amendments in this ASU results in the capitalization of acquisition costs that had not been previously capitalized, an entity may elect not to capitalize those types of costs. Both retrospective application and early adoption was permitted. We elected prospective application and did not early adopt the ASU. The adoption did not have a material impact to our consolidated financial condition or results of operations.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

Fair Value Measurement - Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs (ASU 2011-04)

As of January 1, 2012, we adopted ASU 2011-04, which amends ASC 820, Fair Value Measurements. The amendments in this ASU clarify how to measure fair value and it contains new disclosure requirements to provide more transparency into Level 3 fair value measurements. It is intended to improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with U.S. GAAP and International Financial Reporting Standards (IFRS). The ASU must be applied prospectively. The adoption did not have a material impact to our consolidated financial condition or results of operations.

Intangibles-Goodwill and Other - Testing Goodwill for Impairment (ASU 2011-08)

As of January 1, 2012, we adopted ASU 2011-08, which amends ASC 350, Intangibles-Goodwill and Other. This ASU permits the option of performing a qualitative assessment before calculating the fair value of a reporting unit in step 1 of the goodwill impairment test. If it is determined, on the basis of qualitative factors, that the fair value of a reporting unit is more likely than not more than the carrying amount, the two-step impairment test would not be required. Otherwise, further evaluation under the existing two-step framework would be required. The adoption did not have a material impact to our consolidated financial condition or results of operation.

Recently Issued Accounting Standards

Balance Sheet - Disclosures about Offsetting Assets and Liabilities (ASU 2011-11)

In December 2011, the Financial Accounting Standards Board issued ASU 2011-11, which amends ASC 210, Balance Sheet. This ASU contains new disclosure requirements regarding the nature of an entity's rights of setoff and related arrangements associated with its financial instruments and derivative instruments. The new disclosures will give financial statement users information about both gross and net exposures. ASU 2011-11 is effective for us on January 1, 2013, and retrospective application is required. Since the guidance relates only to disclosures, adoption is not expected to have a material effect on our consolidated financial condition or results of operations.

2. Discontinued and Held-for-sale Operations

We classify operations as discontinued when operations and cash flows will be eliminated from our ongoing operations and we do not expect to retain any significant continuing involvement in their operations after the respective sale transactions. For all periods presented, all of the operating results for these discontinued operations have been removed from continuing operations and presented separately as discontinued operations, net of tax, in the Condensed Consolidated Statement of Comprehensive Income. The Notes to the Condensed Consolidated Financial Statements have been adjusted to exclude discontinued operations unless otherwise noted.

Select Mortgage Operations

During the second quarter of 2012, we sold the Canadian mortgage operations of ResMor Trust.

Select Global Automotive Services — Insurance Operations

During the fourth quarter of 2011, we committed to sell our U.K.-based operations that provide vehicle service contracts and insurance products in Europe and Latin America. During the second quarter of 2011, we completed the sale of our U.K. consumer property and casualty insurance business.

Select Global Automotive Services — International Automotive Finance Operations

During the fourth quarter of 2011, we committed to sell our full-service leasing operations in Austria, Germany, Greece, Portugal, and Spain. During the first quarter of 2012, we completed the sale of our Venezuela operations.

Ally Financial Inc. • Form 10-Q

Select Financial Information

Select financial information of discontinued operations is summarized below. The pretax income or loss, including direct costs to transact, includes any impairment recognized to present the operations at the lower-of-cost or fair value. Fair value was based on the estimated sales price, which could differ from the ultimate sales price due to the fluidity of ongoing negotiations, price volatility, changing interest rates, changing foreign-currency rates, and future economic conditions.

Ally Financial Inc. • Form 10-Q

The following table presents interest and dividends on available-for-sale securities.

(\$ in millions)	Three months ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Taxable interest	\$79	\$100	\$158	\$198
Taxable dividends	7	6	12	11
Interest and dividends on available-for-sale securities	\$86	\$106	\$170	\$209

The table below summarizes available-for-sale securities in an unrealized loss position in accumulated other comprehensive income. Based on the methodology described below that was applied to these securities, we believe that the unrealized losses relate to factors other than credit losses in the current market environment. As of June 30, 2012, we did not have the intent to sell the debt securities with an unrealized loss position in accumulated other comprehensive income, and it is not more likely than not that we will be required to sell these securities before recovery of their amortized cost basis. As of June 30, 2012, we had the ability and intent to hold equity securities with an unrealized loss position in accumulated other comprehensive income. As a result, we believe that the securities with an unrealized loss position in accumulated other comprehensive income are not considered to be other-than-temporarily impaired at June 30, 2012. Refer to Note 1 to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K for additional information related to investment securities and our methodology for evaluating potential other-than-temporary impairments.

Impaired Loans and Troubled Debt Restructurings

Impaired Loans

Loans are considered impaired when we determine it is probable that we will be unable to collect all amounts due according to the terms of the loan agreement. For more information on our impaired finance receivables and loans, refer to Note 1 to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K.

The following table presents information about our impaired finance receivables and loans recorded at historical cost.

Troubled Debt Restructurings

TDRs are loan modifications where concessions were granted to borrowers experiencing financial difficulties.

Numerous initiatives, such as the Home Affordable Modification Program (HARP) are in place to provide support to our mortgage customers in financial distress, including principal forgiveness, maturity extensions, delinquent interest capitalization, and changes to contractual interest rates. Additionally for automobile loans, we offer several types of assistance to aid our customers including changing the due date and rewriting the loan terms. Total TDRs recorded at historical cost and reported at carrying value before allowance for loan losses were \$829 million at June 30, 2012, reflecting an increase of \$95 million from December 31, 2011. Refer to Note 1 to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K for additional information.

10. Securitizations and Variable Interest Entities

Overview

We are involved in several types of securitization and financing transactions that utilize special purpose entities (SPEs). An SPE is an entity that is designed to fulfill a specified limited need of the sponsor. Our principal use of SPEs is to obtain liquidity and favorable capital treatment by securitizing certain of our financial assets.

The SPEs involved in securitization and other financing transactions are generally considered variable interest entities (VIEs). VIEs are entities that have either a total equity investment that is insufficient to permit the entity to finance its activities without additional subordinated financial support or whose equity investors lack the ability to control the entity's activities. Due to the deconsolidation of ResCap, our mortgage securitization activity and involvement with certain mortgage-related VIEs has substantially changed. Refer to Note 1 for additional information related to ResCap.

Securitizations

We provide a wide range of consumer and commercial automobile loans, operating leases, and mortgage loan products to a diverse customer base. We often securitize these loans and leases (which we collectively describe as loans or financial assets) through the use of securitization entities, which may or may not be consolidated on our Condensed Consolidated Balance Sheet. We securitize consumer and commercial automobile loans and operating leases through private-label securitizations. We securitize consumer mortgage loans through transactions involving the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac). We previously securitized consumer mortgage loans through private-label mortgage securitizations and through transactions involving the Government National Mortgage Association (Ginnie Mae). We refer to Fannie Mae, Freddie Mac, and Ginnie Mae collectively as the Government-Sponsored Enterprises or GSEs. During the six months ended June 30, 2012 and 2011, our consumer mortgage loans were primarily securitized through the GSEs.

In executing a securitization transaction, we typically sell pools of financial assets to a wholly owned, bankruptcy-remote SPE, which then transfers the financial assets to a separate, transaction-specific securitization entity for cash, servicing rights, and in some transactions, other retained interests. The securitization entity is funded through the issuance of beneficial interests in the securitized financial assets. The beneficial interests take the form of either notes or trust certificates which are sold to investors and/or retained by us. These beneficial interests are collateralized by the transferred loans and entitle the investors to specified cash flows generated from the securitized loans. In addition to providing a source of liquidity and cost-efficient funding, securitizing these financial assets also reduces our credit exposure to the borrowers beyond any economic interest we may retain.

Each securitization is governed by various legal documents that limit and specify the activities of the securitization entity. The securitization entity is generally allowed to acquire the loans, to issue beneficial interests to investors to fund the acquisition of the loans, and to enter into derivatives or other yield maintenance contracts to hedge or mitigate certain risks related to the financial assets or beneficial interests of the entity. A servicer, who is generally us, is appointed pursuant to the underlying legal documents to service the assets the securitization entity holds and the beneficial interests it issues. Servicing functions include, but are not limited to, making certain payments of property taxes and insurance premiums, default and property maintenance payments, as well as advancing principal and interest payments before collecting them from individual borrowers. Our servicing responsibilities, which constitute continued involvement in the transferred financial assets, consist of primary servicing (i.e., servicing the underlying transferred financial assets) and previously master servicing (i.e., servicing the beneficial interests that result from the securitization transactions). Certain securitization entities also require the servicer to advance scheduled principal and interest payments due on the beneficial interests issued by the entity regardless of whether cash payments are received on the underlying transferred financial assets. Accordingly, we are required to provide these servicing advances when applicable. Refer to Note 11 for additional information regarding our servicing rights.

The GSEs provide a guarantee of the payment of principal and interest on the beneficial interests issued in securitizations. In private-label securitizations, cash flows from the assets initially transferred into the securitization entity represent the sole source for payment of distributions on the beneficial interests issued by the securitization

entity and for payments to the parties that perform services for the securitization entity, such as the servicer or the trustee. In certain private-label securitization transactions, a liquidity facility may exist to provide temporary liquidity to the entity. The liquidity provider generally is reimbursed prior to other parties in subsequent distribution periods. In previous certain private-label securitizations monoline insurance may have existed to cover certain shortfalls to certain investors in the beneficial interests issued by the securitization entity. As noted above, in certain private-label securitizations, the servicer is required to advance scheduled principal and interest payments due on the beneficial interests regardless of whether cash payments are received on the underlying transferred financial assets. The servicer is allowed to reimburse itself for these servicing advances. Additionally, certain private-label securitization transactions may have previously allowed for the acquisition of additional loans subsequent to the initial loan transfer. Principal collections on other loans and/or the issuance of new beneficial interests, such as variable funding notes, generally funded those loans; we were often contractually required to invest in these new interests. We may retain beneficial interests in our private-label securitizations, which may represent a form of significant continuing economic interest. These retained interests include, but are not limited to, senior or subordinate asset-backed securities and residuals, and previously included senior or subordinate mortgage-backed securities, interest-only strips, and principal-only strips. Certain of these retained interests provide credit enhancement to the trust as they may absorb credit losses or other cash shortfalls. Additionally, the securitization agreements may require cash flows to be directed away from certain of our retained interests due to specific over-collateralization requirements, which

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

may or may not be performance-driven.

We generally hold certain conditional repurchase options that allow us to repurchase assets from the securitization entity. The majority of the securitizations provide us, as servicer, with a call option that allows us to repurchase the remaining transferred financial assets or outstanding beneficial interests at our discretion once the asset pool reaches a predefined level, which represents the point where servicing becomes burdensome (a clean-up call option). The repurchase price is typically the par amount of the loans plus accrued interest. Additionally, we may hold other conditional repurchase options that allow us to repurchase a transferred financial asset if certain events outside our control are met. The typical conditional repurchase option is a delinquent loan repurchase option that gives us the option to purchase the loan or contract if it exceeds a certain prespecified delinquency level. We generally have complete discretion regarding when or if we will exercise these options, but we would do so only when it is in our best interest.

Other than our customary representation and warranty provisions, these securitizations are nonrecourse to us, thereby transferring the risk of future credit losses to the extent the beneficial interests in the securitization entities are held by third parties. Representation and warranty provisions generally require us to repurchase loans or indemnify the investor or other party for incurred losses to the extent it is determined that the loans were ineligible or were otherwise defective at the time of sale. Refer to Note 25 for detail on representation and warranty provisions. We did not provide any noncontractual financial support to any of these entities during the six months ended June 30, 2012 and 2011.

Other Variable Interest Entities

Servicer Advance Funding Entity

We previously assisted in the financing of our servicer advance receivables; we formed a VIE that issued variable funding notes to third-party investors that were collateralized by servicer advance receivables. These servicer advance receivables were transferred to the VIE and consisted of delinquent principal and interest advances we made as servicer to various investors; property taxes and insurance premiums advanced to taxing authorities and insurance companies on behalf of borrowers; and amounts advanced for mortgages in foreclosure. The VIE funded the purchase of the receivables through financing obtained from the third-party investors and subordinated loans or an equity contribution from our mortgage activities. This VIE was not consolidated on our balance sheet at June 30, 2012 as a result of the deconsolidation of ResCap, but was consolidated on our balance sheet at December 31, 2011. The beneficial interest holder of this VIE does not have legal recourse to our general credit. We do not have a contractual obligation to provide any type of financial support in the future, nor have we provided noncontractual financial support to the entity during the six months ended June 30, 2012 and 2011.

Other

We had involvements with various other on-balance sheet, immaterial VIEs. Most of these VIEs were used for additional liquidity whereby we sold certain financial assets into the VIE and issued beneficial interests to third parties for cash.

We also provide long-term guarantee contracts to investors in certain nonconsolidated affordable housing entities and have extended a line of credit to provide liquidity and minimize our exposure under these contracts. Since we do not have control over the entities or the power to make decisions, we do not consolidate the entities and our involvement is limited to the guarantee and the line of credit.

Involvement with Variable Interest Entities

The determination of whether financial assets transferred by us to these VIEs (and related liabilities) are consolidated on our balance sheet (also referred to as on-balance sheet) or not consolidated on our balance sheet (also referred to as off-balance sheet) depends on the terms of the related transaction and our continuing involvement (if any) with the SPE. We are deemed the primary beneficiary and therefore consolidate VIEs for which we have both (a) the power, through voting rights or similar rights, to direct the activities that most significantly impact the VIE's economic performance, and (b) a variable interest (or variable interests) that (i) obligates us to absorb losses that could potentially be significant to the VIE and/or (ii) provides us the right to receive residual returns of the VIE that could

potentially be significant to the VIE. We determine whether we hold a significant variable interest in a VIE based on a consideration of both qualitative and quantitative factors regarding the nature, size, and form of our involvement with the VIE. We assess whether we are the primary beneficiary of a VIE on an ongoing basis.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

Our involvement with consolidated and nonconsolidated VIEs in which we hold variable interests is presented below.

(\$ in millions)	Consolidated involvement with VIEs	Assets of nonconsolidated VIEs (a)	Maximum exposure to loss in nonconsolidated VIEs	
June 30, 2012				
On-balance sheet variable interest entities				
Consumer automobile	\$26,852	\$—	\$—	
Commercial automobile	18,371	—	—	
Commercial other	656	—	—	
Off-balance sheet variable interest entities				
Consumer automobile	—	1,829	1,829	(b)
Consumer mortgage — other	—	—	(c) 15	(d)
Commercial other	8	(e) —	(f) 135	
Total	\$45,887	\$1,829	\$1,979	
December 31, 2011				
On-balance sheet variable interest entities				
Consumer automobile	\$26,504	\$—	\$—	
Consumer mortgage — private-label	1,098	—	—	
Commercial automobile	19,594	—	—	
Other	956	—	—	
Off-balance sheet variable interest entities				
Consumer mortgage — Ginnie Mae	2,652	(g) 44,127	44,127	(b)
Consumer mortgage — CMHC	66	(g) 3,222	66	(h)
Consumer mortgage — private-label	141	(g) 4,408	4,408	(b)
Consumer mortgage — other	—	—	(c) 17	(d)
Commercial other	83	(e) —	(f) 242	
Total	\$51,094	\$51,757	\$48,860	

(a) Asset values represent the current unpaid principal balance of outstanding consumer finance receivables and loans within the VIEs.

(b) Maximum exposure to loss represents the current unpaid principal balance of outstanding loans based on our customary representation and warranty provisions. This measure is based on the unlikely event that all of the loans have underwriting defects or other defects that trigger a representation and warranty provision and the collateral supporting the loans are worthless. This required disclosure is not an indication of our expected loss.

(c) Includes a VIE for which we have no management oversight and therefore we are not able to provide the total assets of the VIE. However, in March 2011 we sold excess servicing rights valued at \$266 million to the VIE. Our maximum exposure to loss in this VIE is a component of servicer advances made that are allocated to the trust.

(d) The maximum exposure to loss presented represents the unlikely event that every loan underlying the excess servicing rights sold defaults, and we, as servicer, are required to advance the entire excess service fee to the trust for the contractually established period. This required disclosure is not an indication of our expected loss.

(e) Includes \$0 million and \$100 million classified as finance receivables and loans, net, and \$36 million and \$20 million classified as other assets, offset by \$28 million and \$37 million classified as accrued expenses and other liabilities at June 30, 2012, and December 31, 2011, respectively.

(f) Includes VIEs for which we have no management oversight and therefore we are not able to provide the total assets of the VIEs.

(g) Includes \$0 billion and \$2.4 billion classified as mortgage loans held-for-sale, \$0 million and \$92 million classified as trading securities or other assets, and \$0 million and \$386 million classified as mortgage servicing rights at

June 30, 2012, and December 31, 2011, respectively. CMHC is the Canada Mortgage and Housing Corporation.

- (h) Due to combination of the credit loss insurance on the mortgages and the guarantee by CMHC on the issued securities, the maximum exposure to loss would be limited to the amount of the retained interests. Additionally, the maximum loss would occur only in the event that CMHC dismisses us as servicer of the loans due to servicer performance or insolvency.

On-balance Sheet Variable Interest Entities

We engage in securitization and other financing transactions that do not qualify for off-balance sheet treatment. In these situations, we hold beneficial interests or other interests in the VIE, which represent a form of significant continuing economic interest. These retained interests include, but are not limited to, senior or subordinate asset-backed securities and residuals, and previously included senior or subordinate mortgage-backed securities, interest-only strips, and principal-only strips. Certain of these retained interests provide credit enhancement to the securitization entity as they may absorb credit losses or other cash shortfalls. Additionally, the securitization documents may require cash flows to be directed away from certain of our retained interests due to specific over-collateralization requirements, which may or may not be performance-driven. Because these securitization entities are consolidated, these retained interests and servicing rights are not recognized as separate assets on our Condensed Consolidated Balance Sheet.

We consolidated certain of these entities because we had a controlling financial interest in the VIE, primarily due to our servicing

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

activities, and because we hold a significant variable interest in the VIE. We are generally the primary beneficiary of automobile securitization entities for which we perform servicing activities and have retained a significant variable interest in the form of a beneficial interest. We were previously the primary beneficiary of certain mortgage private-label securitization entities.

The consolidated VIEs included in the Condensed Consolidated Balance Sheet represent separate entities with which we are involved. The third-party investors in the obligations of consolidated VIEs have legal recourse only to the assets of the VIEs and do not have such recourse to us, except for the customary representation and warranty provisions or when we are the counterparty to certain derivative transactions involving the VIE. In addition, the cash flows from the assets are restricted only to pay such liabilities. Thus, our economic exposure to loss from outstanding third-party financing related to consolidated VIEs is significantly less than the carrying value of the consolidated VIE assets. All assets are restricted for the benefit of the beneficial interest holders. Refer to Note 22 for discussion of the assets and liabilities for which the fair value option has been elected.

Off-balance Sheet Variable Interest Entities

The nature, purpose, and activities of nonconsolidated securitization entities are similar to those of our consolidated securitization entities with the primary difference being the nature and extent of our continuing involvement. The cash flows from the assets of nonconsolidated securitization entities generally are the sole source of payment on the securitization entities' liabilities. The creditors of these securitization entities have no recourse to us with the exception of market customary representation and warranty provisions as described in Note 25.

Nonconsolidated VIEs include entities for which we either do not hold potentially significant variable interests or do not provide servicing or asset management functions for the financial assets held by the securitization entity. Additionally, to qualify for off-balance sheet treatment, transfers of financial assets must meet the sale accounting conditions in ASC 860, Transfers and Servicing. Previously, our residential mortgage loan securitizations consisted of Ginnie Mae and private-label securitizations. We are not the primary beneficiary of any GSE loan securitization transaction because we do not have the power to direct the significant activities of such entities. Previously, we did not consolidate certain private-label mortgage securitizations because we did not have a variable interest that could potentially have been significant or we did not have power to direct the activities that most significantly impacted the performance of the VIE.

For nonconsolidated securitization entities, the transferred financial assets are removed from our balance sheet provided the conditions for sale accounting are met. The financial assets obtained from the securitization are primarily reported as cash, servicing rights, or retained interests (if applicable). Typically, we conclude that the fee we are paid for servicing consumer automobile finance receivables represents adequate compensation, and consequently, we do not recognize a servicing asset or liability. As an accounting policy election, we elected fair value treatment for our mortgage servicing rights (MSR) portfolio. Liabilities incurred as part of these securitization transactions, such as representation and warranty provisions, are recorded at fair value at the time of sale and are reported as accrued expenses and other liabilities on our Condensed Consolidated Balance Sheet. Upon the sale of the loans, we recognize a gain or loss on sale for the difference between the assets recognized, the assets derecognized, and the liabilities recognized as part of the transaction.

The following summarizes all pretax gains and losses recognized on financial assets sold into nonconsolidated securitization and similar asset-backed financing entities.

(\$ in millions)	Three months ended		Six months ended	
	June 30,		June 30,	
	2012	2011	2012	2011
Consumer automobile	\$6	\$—	\$6	\$—
Consumer mortgage — GSEs	85	267	365	265
Consumer mortgage — private-label	—	2	—	1
Total pretax gain	\$91	\$269	\$371	\$266

n/m = not meaningful

(a) Anticipated credit losses are not meaningful due to the GSE guarantees.

11. Servicing Activities

Mortgage Servicing Rights

The following tables summarize activity related to MSR, which are carried at fair value. As MSR do not trade in an active market with observable prices, management estimates fair value using internally developed discounted cash flow models (an income approach) to estimate the fair value. These internal valuation models estimate net cash flows based on internal operating assumptions that we believe would be used by market participants in orderly transactions combined with market-based assumptions for loan prepayment rates, interest rates, and discount rates that we believe approximate yields required by investors in this asset.

Three months ended June 30, (\$ in millions)	2012	2011
Estimated fair value at April 1,	\$2,595	\$3,774
Additions recognized on sale of mortgage loans	—	144
Additions from purchases of servicing rights	42	15
Subtractions from sales of servicing assets	—	—
Changes in fair value		
Due to changes in valuation inputs or assumptions used in the valuation model	(301)	(135)
Other changes in fair value	(101)	(97)
Deconsolidation of ResCap	(1,130)	—
Estimated fair value at June 30, (a)	\$1,105	\$3,701

(a) For the three months ended June 30, 2012, the remaining balance was at Ally Bank. Please see Note 1 for more information regarding the Debtors' Bankruptcy and the deconsolidation of ResCap.

Six months ended June 30, (\$ in millions)	2012	2011
Estimated fair value at January 1,	\$2,519	\$3,738
Additions recognized on sale of mortgage loans	—	328
Additions from purchases of servicing rights	117	16
Subtractions from sales of servicing assets	—	(266)

Changes in fair value

Due to changes in valuation inputs or assumptions used in the valuation model	(138	)	163
Other changes in fair value	(263	)	(278)
Deconsolidation of ResCap	(1,130	)	—
Estimated fair value at June 30, (a)	\$1,105		\$3,701

(a) For the six months ended June 30, 2012, the remaining balance was at Ally Bank. Please see Note 1 for more information regarding the Debtors' Bankruptcy and the deconsolidation of ResCap.

Changes in fair value due to changes in valuation inputs or assumptions used in the valuation model include all changes due to a revaluation by a model or by a benchmarking exercise. Other changes in fair value primarily include the accretion of the present value of the discount related to forecasted cash flows and the economic runoff of the portfolio. Refer to Note 1 to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K for additional information regarding our significant assumptions and valuation techniques used in the valuation of mortgage servicing rights.

The key economic assumptions and sensitivity of the fair value of MSRs to immediate 10% and 20% adverse changes in those assumptions were as follows.

(\$ in millions)	June 30, 2012	December 31, 2011
Weighted average life (in years)	4.8	4.7
Weighted average prepayment speed	13.1 %	15.7 %
Impact on fair value of 10% adverse change	\$(78)	\$(135)
Impact on fair value of 20% adverse change	(147)	(257)
Weighted average discount rate	8.0 %	10.2 %
Impact on fair value of 10% adverse change	\$(14)	\$(59)
Impact on fair value of 20% adverse change	(26)	(114)

These sensitivities are hypothetical and should be considered with caution. Changes in fair value based on a 10% and 20% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumptions to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another (e.g., increased market interest rates may result in lower prepayments and increased credit losses) that could magnify or counteract the sensitivities. Further, these sensitivities show only the change in the asset balances and do not show any expected change in the fair value of the instruments used to manage the interest rates and prepayment risks associated with these assets.

Risk Mitigation Activities

The primary risk of our servicing rights is interest rate risk and the resulting impact on prepayments. A significant decline in interest rates could lead to higher-than-expected prepayments that could reduce the value of the MSRs. We economically hedge the impact of these risks with both derivative and nonderivative financial instruments. Refer to Note 20 for additional information regarding the derivative financial instruments used to economically hedge MSRs. The components of servicing valuation and hedge activities, net, were as follows.

(\$ in millions)	Three months ended June 30, 2012	2011	Six months ended June 30, 2012	2011
Change in estimated fair value of mortgage servicing rights	\$(402)	\$(232)	\$(401)	\$(115)
Change in fair value of derivative financial instruments	329	127	337	(77)
Servicing asset valuation and hedge activities, net	\$(73)	\$(105)	\$(64)	\$(192)
Mortgage Servicing Fees				

The components of mortgage servicing fees were as follows.

(\$ in millions)	Three months ended June 30, 2012	2011	Six months ended June 30, 2012	2011
Contractual servicing fees, net of guarantee fees and including subservicing	\$160	\$247	\$386	\$504

Edgar Filing: Ally Financial Inc. - Form 10-Q

Late fees	8	16	27	37
Ancillary fees	18	37	53	70
Total mortgage servicing fees	\$186	\$300	\$466	\$611

Mortgage Servicing Advances

In connection with our primary Mortgage servicing activities (i.e., servicing of mortgage loans), we make certain payments for property taxes and insurance premiums, default and property maintenance payments, as well as advances of principal and interest payments before collecting them from individual borrowers. Servicing advances including contractual interest, are priority cash flows in the event of a loan principal reduction or foreclosure and ultimate liquidation of the real estate-owned property, thus making their collection reasonably assured. These servicing advances are included in other assets on the Condensed Consolidated Balance Sheet and totaled \$66 million and \$1.9 billion at June 30, 2012, and December 31, 2011, respectively. We maintain an allowance for uncollected primary servicing advances of \$1 million and \$43 million at June 30, 2012, and December 31, 2011, respectively. Our potential obligation is influenced by the loan's performance and credit quality.

When we acted as a subservicer of mortgage loans we performed the responsibilities of a primary servicer but did not own the corresponding primary servicing rights. We received a fee from the primary servicer for such services. As the subservicer, we had the same responsibilities of a primary servicer in that we made certain payments of property taxes and insurance premiums, default and property maintenance, as well as advances of principal and interest payments before collecting them from individual borrowers. At June 30, 2012, and December 31, 2011, outstanding servicer advances related to subserviced loans were \$0 million and \$125 million, respectively, and we had a reserve for uncollected subservicer advances of \$0 million and \$1.1 million, respectively.

In many cases, where we acted as master servicer, we also acted as primary servicer. In connection with our master-servicing activities, we serviced the mortgage-backed and mortgage-related asset-backed securities and whole-loan packages sold to investors. As the master servicer, we collected mortgage loan payments from primary servicers and distributed those funds to investors in the mortgage-backed and mortgage-related asset-backed securities and whole-loan packages. As the master servicer, we were required to advance scheduled payments to the securitization trust or whole-loan investors. To the extent the primary servicer does not advance the payments, we were responsible for advancing the payment to the trust or whole-loan investors. Master-servicing advances, including contractual interest, are priority cash flows in the event of a default, thus making their collection reasonably assured. In most cases, we were required to advance these payments to the point of liquidation of the loan or reimbursement of the trust or whole-loan investors. We had outstanding master-servicing advances of \$0 million and \$158 million at June 30, 2012, and December 31, 2011, respectively. We had no reserve for uncollected master-servicing advances at June 30, 2012, or December 31, 2011.

Serviced Mortgage Assets

Total serviced mortgage assets consist of primary servicing activities. These include loans owned by Ally Bank, where Ally Bank is the primary servicer, and loans sold to third-party investors, where Ally Bank has retained primary servicing. Loans owned by Ally Bank are categorized as loans held-for-sale or consumer finance receivables and loans which are discussed in further detail in Note 7 and Note 8, respectively. The loans sold to third-party investors were sold through off-balance sheet GSE securitization transactions.

The unpaid principal balance of our serviced mortgage assets were as follows.

(\$ in millions)	June 30, 2012 (a)	December 31, 2011
On-balance sheet mortgage loans		
Held-for-sale and investment	\$9,716	\$ 18,871
Operations held-for-sale	—	541
Off-balance sheet mortgage loans		
Loans sold to third-party investors		
Private-label	—	50,886
GSEs	127,383	262,868
Whole-loan	3	15,105
Purchased servicing rights	—	3,247
Operations held-for-sale	—	4,912

Total primary serviced mortgage loans	137,102	356,430
Subserviced mortgage loans	—	26,358
Subserviced operations held-for-sale	—	4
Total subserviced mortgage loans	—	26,362
Master-servicing-only mortgage loans	—	8,557
Total serviced mortgage loans	\$ 137,102	\$ 391,349

(a) At June 30, 2012 the remaining balances were at Ally Bank, due to the deconsolidation of ResCap. Please see Note 1 for more information regarding the Debtors' Bankruptcy and the deconsolidation of ResCap.

Ally Bank is subject to certain net worth requirements associated with its servicing agreements with Fannie Mae and Freddie Mac. The majority of Ally Bank's serviced mortgage assets are subserviced by GMAC Mortgage, LLC (GMACM), a subsidiary of ResCap, pursuant to a servicing agreement. GMACM is required to maintain certain servicer ratings in accordance with master agreements with the GSEs, which are highly correlated with GMACM's consolidated tangible net worth and overall financial strength. At June 30, 2012, Ally Bank was in compliance with the requirements of the servicing agreements.

Automobile Servicing Activities

We service consumer automobile contracts. Historically, we have sold a portion of our consumer automobile contracts. With respect to contracts we sell, we retain the right to service and earn a servicing fee for our servicing function. Typically, we conclude that the fee we are paid for servicing consumer automobile finance receivables represents adequate compensation, and consequently, we do not recognize a servicing asset or liability. We recognized automobile servicing fees of \$30 million and \$60 million during the three months and six months ended June 30, 2012, respectively, compared to \$41 million and \$87 million for three months and six months ended June 30, 2011, respectively.

Automobile Serviced Assets

The total serviced automobile loans outstanding were as follows.

(\$ in millions)	June 30, 2012	December 31, 2011
On-balance sheet automobile loans and leases		
Consumer automobile	\$68,759	\$ 63,884
Commercial automobile	38,373	37,302
Operating leases	11,197	9,275
Operations held-for-sale	43	102
Off-balance sheet automobile loans		
Loans sold to third-party investors		
Securitizations	—4,803	—
Whole-loan	8,805	12,318
Total serviced automobile loans and leases	\$ 128,980	\$ 122,881

12. Other Assets

The components of other assets were as follows.

(\$ in millions)	June 30, 2012	December 31, 2011
Property and equipment at cost	\$903	\$ 1,152
Accumulated depreciation	(592)	(787)
Net property and equipment	311	365
Fair value of derivative contracts in receivable position	4,874	5,687
Restricted cash collections for securitization trusts (a)	1,695	1,596
Collateral placed with counterparties	1,323	1,448
Restricted cash and cash equivalents	875	1,381
Cash reserve deposits held-for-securitization trusts (b)	742	838
Unamortized debt issuance costs	551	612
Goodwill	518	518

Prepaid expenses and deposits	471	568
Real estate and other investments	428	385
Other accounts receivable	419	1,110
Nonmarketable equity securities	374	419
Interests retained in financial asset sales	193	231
Accrued interest and rent receivable	191	232
Servicer advances	91	2,142
Other assets	954	1,209
Total other assets	\$14,010	\$18,741

(a) Represents cash collection from customer payments on securitized receivables. These funds are distributed to investors as payments on the related secured debt.

(b) Represents credit enhancement in the form of cash reserves for various securitization transactions.

13. Deposit Liabilities

Deposit liabilities consisted of the following.

(\$ in millions)	June 30, 2012	December 31, 2011
Domestic deposits		
Noninterest-bearing deposits	\$2,411	\$2,029
Interest-bearing deposits		
Savings and money market checking accounts	10,314	9,035
Certificates of deposit	29,994	28,540
Dealer deposits	1,524	1,769
Total domestic deposit liabilities	44,243	41,373
Foreign deposits		
Interest-bearing deposits		
Savings and money market checking accounts	1,422	1,408
Certificates of deposit	2,070	1,958
Dealer deposits	257	311
Total foreign deposit liabilities	3,749	3,677
Total deposit liabilities	\$47,992	\$45,050

Noninterest-bearing deposits primarily represent third-party escrows associated with our mortgage loan-servicing portfolio. The escrow deposits are not subject to an executed agreement and can be withdrawn without penalty at any time. At June 30, 2012, and December 31, 2011, certificates of deposit included \$11.0 billion and \$10.0 billion, respectively, of domestic certificates of deposit in denominations of \$100 thousand or more.

14. Short-term Borrowings

The following table presents the composition of our short-term borrowings portfolio.

(\$ in millions)	June 30, 2012			December 31, 2011		
	Unsecured	Secured	Total	Unsecured	Secured	Total
Demand notes	\$2,958	\$—	\$2,958	\$2,756	\$—	\$2,756
Bank loans and overdrafts	857	—	857	1,613	—	1,613
Federal Home Loan Bank	—	—	—	—	1,400	1,400
Other (a)	188	2,007	2,195	146	1,765	1,911
Total short-term borrowings	\$4,003	\$2,007	\$6,010	\$4,515	\$3,165	\$7,680

(a) Other primarily includes nonbank secured borrowings at our International Automotive Finance operations.

15. Long-term Debt

The following tables present the composition of our long-term debt portfolio.

(\$ in millions)	June 30, 2012			December 31, 2011		
	Unsecured	Secured	Total	Unsecured	Secured	Total
Long-term debt						
Due within one year (a)	\$10,541	\$15,243	\$25,784	\$11,664	\$14,521	\$26,185
Due after one year (b)	31,858	32,329	64,187	30,272	35,279	65,551
Fair value adjustment	1,125	—	1,125	1,058	—	1,058
Total long-term debt (c)	\$43,524	\$47,572	\$91,096	\$42,994	\$49,800	\$92,794

(a) Includes \$7.4 billion and \$7.4 billion guaranteed by the Federal Deposit Insurance Corporation (FDIC) under the Temporary Liquidity Guarantee Program (TLGP) at June 30, 2012, and December 31, 2011, respectively.

(b) Includes \$2.6 billion and \$2.6 billion of trust preferred securities at June 30, 2012, and December 31, 2011, respectively.

(c) Includes fair value option-elected secured long-term debt of \$0 million and \$830 million at June 30, 2012, and December 31, 2011, respectively. Refer to Note 22 for additional information.

The following table presents the scheduled remaining maturity of long-term debt at June 30, 2012, assuming no early redemptions will occur. The actual payment of secured debt may vary based on the payment activity of the related pledged assets.

Year ended December 31, (\$ in millions)	2012	2013	2014	2015	2016	2017 and thereafter	Fair value adjustment	Total
Unsecured								
Long-term debt	\$9,888	\$2,321	\$5,797	\$4,465	\$1,510	\$20,410	\$1,125	\$45,516
Original issue discount	(140)	(266)	(193)	(58)	(63)	(1,272)	—	(1,992)

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

The following summarizes assets restricted as collateral for the payment of the related debt obligation primarily arising from securitization transactions accounted for as secured borrowings and repurchase agreements.

(\$ in millions)	June 30, 2012		December 31, 2011	
	Total	Ally Bank (a)	Total	Ally Bank (a)
Trading assets	\$—	\$—	\$27	\$—
Investment securities	428	428	780	780
Loans held-for-sale	—	—	805	—
Mortgage assets held-for-investment and lending receivables	10,496	10,496	12,197	11,188
Consumer automobile finance receivables	35,016	17,164	33,888	17,320
Commercial automobile finance receivables	21,745	16,138	20,355	14,881
Investment in operating leases, net	4,789	358	4,555	431
Mortgage servicing rights	1,105	1,105	1,920	1,286
Other assets	2,041	2,041	3,973	1,816
Total assets restricted as collateral (b)	\$75,620	\$47,730	\$78,500	\$47,702
Secured debt (c)	\$49,579	\$26,101	\$52,965	\$25,533

(a) Ally Bank is a component of the total column.

Ally Bank has an advance agreement with the Federal Home Loan Bank of Pittsburgh (FHLB) and access to the Federal Reserve Bank Discount Window. Ally Bank had assets pledged and restricted as collateral to the FHLB and Federal Reserve Bank totaling \$9.4 billion and \$11.8 billion at June 30, 2012, and December 31, 2011, respectively. These assets were composed of consumer and commercial mortgage finance receivables and loans, net; consumer automobile finance receivables and loans, net; and investment securities. Under the agreement with

(b) the FHLB, Ally Bank also had assets pledged as collateral under a blanket-lien totaling \$9.0 billion and \$7.3 billion at June 30, 2012, and December 31, 2011, respectively. These assets were primarily composed of mortgage servicing rights; consumer and commercial mortgage finance receivables and loans, net; and other assets.

Availability under these programs is generally only for the operations of Ally Bank and cannot be used to fund the operations or liabilities of Ally or its subsidiaries.

(c) Includes \$2.0 billion and \$3.2 billion of short-term borrowings at June 30, 2012, and December 31, 2011, respectively.

Trust Preferred Securities

On December 30, 2009, we entered into a Securities Purchase and Exchange Agreement with U.S. Department of Treasury (Treasury) and GMAC Capital Trust I, a Delaware statutory trust (the Trust), which is a finance subsidiary that is wholly owned by Ally. As part of the agreement, the Trust sold to Treasury 2,540,000 trust preferred securities (TRUPS) issued by the Trust with an aggregate liquidation preference of \$2.5 billion. Additionally, we issued and sold to Treasury a ten-year warrant to purchase up to 127,000 additional TRUPS with an aggregate liquidation preference of \$127 million, at an initial exercise price of \$0.01 per security, which Treasury immediately exercised in full.

On March 1, 2011, the Declaration of Trust and certain other documents related to the TRUPS were amended and all the outstanding TRUPS held by Treasury were designated 8.125% Fixed Rate / Floating Rate Trust Preferred Securities, Series (Series 2 TRUPS). On March 7, 2011, Treasury sold 100% of the Series 2 TRUPS in an offering registered with the SEC. Ally did not receive any proceeds from the sale.

Each Series 2 TRUPS security has a liquidation amount of \$25. Distributions are cumulative and are payable until redemption at the applicable coupon rate. Distributions are payable at an annual rate of 8.125% payable quarterly in arrears, beginning August 15, 2011, to but excluding February 15, 2016. From and including February 15, 2016, to but excluding February 15, 2040, distributions will be payable at an annual rate equal to three-month London interbank offer rate plus 5.785% payable quarterly in arrears, beginning May 15, 2016. Ally has the right to defer payments of interest for a period not exceeding 20 consecutive quarters. The Series 2 TRUPS have no stated maturity date, but

must be redeemed upon the redemption or maturity of the related debentures (Debentures), which mature on February 15, 2040. The Series 2 TRUPS are generally nonvoting, other than with respect to certain limited matters. During any period in which any Series 2 TRUPS remain outstanding but in which distributions on the Series 2 TRUPS have not been fully paid, none of Ally or its subsidiaries will be permitted to (i) declare or pay dividends on, make any distributions with respect to, or redeem, purchase, acquire or otherwise make a liquidation payment with respect to, any of Ally's capital stock or make any guarantee payment with respect thereto; or (ii) make any payments of principal, interest, or premium on, or repay, repurchase or redeem, any debt securities or guarantees that rank on a parity with or junior in interest to the Debentures with certain specified exceptions in each case.

Funding Facilities

We utilize both committed and uncommitted credit facilities. The financial institutions providing the uncommitted facilities are not contractually obligated to advance funds under them. The amounts outstanding under our various funding facilities are included on our Condensed Consolidated Balance Sheet.

As of June 30, 2012, Ally Bank had exclusive access to \$9.5 billion of funding capacity from committed credit facilities. Ally Bank also has access to a \$3.9 billion committed facility that is shared with the parent company. Funding programs supported by the Federal Reserve and the FHLB, together with repurchase agreements, complement Ally Bank's private committed facilities.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

The total capacity in our committed funding facilities is provided by banks and other financial institutions through private transactions. The committed secured funding facilities can be revolving in nature and allow for additional funding during the commitment period, or they can be amortizing and do not allow for any further funding after the closing date. At June 30, 2012, \$33.2 billion of our \$42.3 billion of committed capacity was revolving. Our revolving facilities generally have an original tenor ranging from 364 days to two years. As of June 30, 2012, we had \$17.5 billion of committed funding capacity from revolving facilities with a remaining tenor greater than 364 days.

Committed Funding Facilities

(\$ in billions)	Outstanding		Unused capacity (a)		Total capacity	
	June 30, 2012	December 31, 2011	June 30, 2012	December 31, 2011	June 30, 2012	December 31, 2011

18. Earnings per Common Share

The following table presents the calculation of basic and diluted earnings per common share.

	Three months ended June 30,		Six months ended June 30,	
(\$ in millions except per share data)	2012	2011	2012	2011
Net (loss) income from continuing operations	\$(864)	\$108	\$(562)	\$277
Preferred stock dividends — U.S. Department of Treasury	(134)	(134)	(267)	(267)
Preferred stock dividends	(67)	(57)	(134)	(127)
Impact of preferred stock amendment (a)	—	—	—	32
Net loss from continuing operations attributable to common shareholders (b)	(1,065)	(83)	(963)	(85)
(Loss) income from discontinued operations, net of tax	(34)	5	(26)	(18)
Net loss attributable to common shareholders	\$(1,099)	\$(78)	\$(989)	\$(103)
Basic weighted-average common shares outstanding	1,330,970	1,330,970	1,330,970	1,330,970
Diluted weighted-average common shares outstanding (b)	1,330,970	1,330,970	1,330,970	1,330,970
Basic earnings per common share				
Net loss from continuing operations	\$(800)	\$(62)	\$(723)	\$(64)
(Loss) income from discontinued operations, net of tax	(25)	4	(20)	(14)
Net loss	\$(825)	\$(58)	\$(743)	\$(78)
Diluted earnings per common share (b)				
Net loss from continuing operations	\$(800)	\$(62)	\$(723)	\$(64)
(Loss) income from discontinued operations, net of tax	(25)	4	(20)	(14)
Net loss	\$(825)	\$(58)	\$(743)	\$(78)

(a) Refer to Note 20 to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K for further detail.

(b) Due to the antidilutive effect of converting the Fixed Rate Cumulative Mandatorily Convertible Preferred Stock into common shares and the net loss attributable to common shareholders for the three months and six months ended June 30, 2012, and 2011, respectively, loss attributable to common shareholders and basic weighted-average common shares outstanding were used to calculate basic and diluted earnings per share.

The effects of converting the outstanding Fixed Rate Cumulative Mandatorily Convertible Preferred Stock into common shares are not included in the diluted earnings per share calculation for the three months and six months ended June 30, 2012 and 2011, respectively, as the effects would be antidilutive for those periods. As such, 574 thousand of potential common shares were excluded from the diluted earnings per share calculation for the three months and six months ended June 30, 2012, and 2011, respectively.

19. Regulatory Capital

As a bank holding company, we and our wholly owned state-chartered banking subsidiary, Ally Bank, are subject to risk-based capital and leverage guidelines issued by federal and state banking regulators that require that our capital-to-assets ratios meet certain minimum standards. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary action by regulators that, if undertaken, could have a direct material effect on the consolidated financial statements or the results of operations and financial condition of Ally and Ally Bank. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of our assets and certain off-balance sheet items. Our capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk-weightings, and other factors.

The risk-based capital ratios are determined by allocating assets and specified off-balance sheet financial instruments into several broad risk categories with higher levels of capital being required for the categories that present greater risk. Under the guidelines, total capital is divided into two tiers: Tier 1 capital and Tier 2 capital. Tier 1 capital generally consists of common equity, minority interests, qualifying noncumulative preferred stock, and the fixed rate cumulative preferred stock sold to Treasury under the Troubled Asset Relief Program (TARP), less goodwill and other adjustments. Tier 2 capital generally consists of perpetual preferred stock not qualifying as Tier 1 capital, limited amounts of subordinated debt and the allowance for loan losses, and other adjustments. The amount of Tier 2 capital may not exceed the amount of Tier 1 capital.

Total risk-based capital is the sum of Tier 1 and Tier 2 capital. Under the guidelines, banking organizations are required to maintain a minimum Total risk-based capital ratio (Total capital to risk-weighted assets) of 8% and a Tier 1 risk-based capital ratio (Tier 1 capital to risk-weighted assets) of 4%.

The federal banking regulators also have established minimum leverage ratio guidelines. The leverage ratio is defined as Tier 1 capital divided by adjusted quarterly average total assets (which reflect adjustments for disallowed goodwill and certain intangible assets). The minimum Tier 1 leverage ratio is 3% or 4% depending on factors specified in the regulations.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

A banking institution meets the regulatory definition of “well-capitalized” when its Total risk-based capital ratio equals or exceeds 10% and its Tier 1 risk-based capital ratio equals or exceeds 6%; and for insured depository institutions, when its leverage ratio equals or exceeds 5%, unless subject to a regulatory directive to maintain higher capital levels. The banking regulators have also developed a measure of capital called “Tier 1 common” defined as Tier 1 capital less noncommon elements, including qualifying perpetual preferred stock, minority interest in subsidiaries, trust preferred securities, and mandatory convertible preferred securities. Tier 1 common is used by banking regulators, investors and analysts to assess and compare the quality and composition of Ally's capital with the capital of other financial services companies. Also, bank holding companies with assets of \$50 billion or more, such as Ally, must develop and maintain a capital plan annually, and among other elements, the capital plan must include a discussion of how we will maintain a pro forma Tier 1 common ratio (Tier 1 common to risk-weighted assets) above 5% under expected conditions and certain stressed scenarios.

On October 29, 2010, Ally, IB Finance Holding Company, LLC, Ally Bank, and the FDIC entered into a Capital and Liquidity Maintenance Agreement (CLMA). The CLMA requires capital at Ally Bank to be maintained at a level such that Ally Bank's leverage ratio is at least 15%. For this purpose, the leverage ratio is determined in accordance with the FDIC's regulations related to capital maintenance.

The following table summarizes our capital ratios.

(\$ in millions)	June 30, 2012		December 31, 2011		Required		Well-capitalized	
	Amount	Ratio	Amount	Ratio	minimum		minimum	
Risk-based capital								
Tier 1 (to risk-weighted assets)								
Ally Financial Inc.	\$20,235	13.68 %	\$21,158	13.71 %	4.00 %		6.00%	
Ally Bank	13,502	16.82 %	12,953	17.42 %	4.00 %		6.00 %	
Total (to risk-weighted assets)								
Ally Financial Inc.	\$21,738	14.70 %	\$22,755	14.75 %	8.00 %		10.00%	
Ally Bank	14,333	17.85 %	13,675	18.40 %	8.00 %		10.00 %	
Tier 1 leverage (to adjusted quarterly average assets) (a)								
Ally Financial Inc.	\$20,235	10.99 %	\$21,158	11.50 %	3.00–4.00 %		(b)	
Ally Bank	13,502	15.49 %	12,953	15.50 %	15.00 %		(c) 5.00%	
Tier 1 common (to risk-weighted assets)								
Ally Financial Inc.	\$10,752	7.27 %	\$11,676	7.57 %	n/a		n/a	
Ally Bank	n/a	n/a	n/a	n/a	n/a		n/a	

n/a = not applicable

(a) Federal regulatory reporting guidelines require the calculation of adjusted quarterly average assets using a daily average methodology.

(b) There is no Tier 1 leverage component in the definition of a well-capitalized bank holding company.

(c) Ally Bank, in accordance with the CLMA, is required to maintain a Tier 1 leverage ratio of at least 15%.

At June 30, 2012, Ally and Ally Bank were “well-capitalized” and met all capital requirements to which each was subject.

Basel Capital Accord

In June 2012, the U.S. federal banking agencies released three notices of proposed rulemaking (NPRs) and a Market Risk Final Rule. The three NPRs represent substantial revisions to the regulatory capital rules for banking organizations. If adopted, as proposed, these NPRs would incorporate the international Basel III capital framework, as well as implement certain provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). Public comments to the NPRs are due in September 2012.

Highlights of the NPRs include a revised definition of capital in order to implement the Basel III reforms as well as higher minimum capital ratios that will apply to most banking organizations and would be phased in between 2013 and 2019 consistent with the Basel Committee's international implementation time line. The NPRs remove the use of credit ratings from both the standardized and advanced approaches, as required by the Dodd-Frank Act. In addition, the standards in the existing Basel I risk-based capital rules, which the NPRs refer to as the "general risk-based capital requirements," would be revised, effective January 1, 2015, to include a more risk-sensitive risk-weighting approach. The Market Risk Final Rule that amends the calculation of market risk capital only applies to banking organizations with significant trading assets and liabilities. We do not currently meet the qualifications; accordingly, this rule is not currently applicable to us.

Compliance with evolving capital requirements is a strategic priority for Ally. We expect to be in compliance with all applicable requirements within the established timeframes.

Ally Financial Inc. • Form 10-Q

20. Derivative Instruments and Hedging Activities

We enter into interest rate and foreign-currency swaps, futures, forwards, options, and swaptions in connection with our market risk management activities. Derivative instruments are used to manage interest rate risk relating to specific groups of assets and liabilities, including investment securities, MSRs, debt, and deposits. In addition, we use foreign exchange contracts to mitigate foreign-currency risk associated with foreign-currency-denominated investment securities, foreign-currency-denominated debt, foreign exchange transactions, and our net investment in foreign subsidiaries. Our primary objective for utilizing derivative financial instruments is to manage market risk volatility associated with interest rate and foreign-currency risks related to the assets and liabilities.

Interest Rate Risk

We execute interest rate swaps to modify our exposure to interest rate risk by converting certain fixed-rate instruments to a variable-rate and certain variable-rate instruments to a fixed rate. We monitor our mix of fixed- and variable-rate debt in relation to the rate profile of our assets. When it is cost-effective to do so, we may enter into interest rate swaps to achieve our desired mix of fixed- and variable-rate debt. Derivatives qualifying for hedge accounting consist of fixed-rate debt obligations in which receive-fixed swaps are designated as hedges of specific fixed-rate debt obligations. Other derivatives qualifying for hedge accounting consist of an existing variable-rate liability in which pay fixed swaps are designated as hedges of the expected future cash flows in the form of interest payments on the outstanding borrowing associated with Ally Bank's secured floating-rate credit facility.

We enter into economic hedges to mitigate exposure for the following categories.

MSRs and retained interests — Our MSRs and retained interest portfolios are generally subject to loss in value when mortgage rates decline. Declining mortgage rates generally result in an increase in refinancing activity that increases prepayments and results in a decline in the value of MSRs and retained interests. To mitigate the impact of this risk, we maintain a portfolio of financial instruments, primarily derivative instruments that increase in value when interest rates decline. The primary objective is to minimize the overall risk of loss in the value of MSRs and retained interests due to the change in fair value caused by interest rate changes.

We may use a multitude of derivative instruments to manage the interest rate risk related to MSRs and retained interests. They include, but are not limited to, interest rate futures contracts, call or put options on U.S. Treasuries, swaptions, MBS, futures, U.S. Treasury futures, interest rate swaps, interest rate floors, and interest rate caps. We monitor and actively manage our risk on a daily basis.

Mortgage loan commitments and mortgage and automobile loans held-for-sale — We are exposed to interest rate risk from the time an interest rate lock commitment (IRLC) is made until the time the mortgage loan is sold. Changes in interest rates impact the market price for our loans; as market interest rates decline, the value of existing IRLCs and loans held-for-sale increase and vice versa. Our primary objective in risk management activities related to IRLCs and mortgage loans held-for-sale is to eliminate or greatly reduce any interest rate risk associated with these items.

The primary derivative instrument we use to accomplish the risk management objective for mortgage loans and IRLCs is forward sales of MBS, primarily Fannie Mae or Freddie Mac to-be-announced securities. These instruments typically are entered into at the time the IRLC is made. The value of the forward sales contracts moves in the opposite direction of the value of our IRLCs and mortgage loans held-for-sale. We also use other derivatives, such as interest rate swaps, options, and futures, to economically hedge automobile loans held-for-sale and certain portions of the mortgage portfolio. Nonderivative instruments, such as short positions of U.S. Treasuries, may also be periodically used to economically hedge the mortgage portfolio.

Debt — With the exception of a portion of our fixed-rate debt and a portion of our outstanding floating-rate borrowing associated with Ally Bank's secured floating-rate credit facility, we do not apply hedge accounting to our derivative portfolio held to mitigate interest rate risk associated with our debt portfolio. Typically, the significant terms of the interest rate swaps match the significant terms of the underlying debt resulting in an effective conversion of the rate of the related debt.

Other — We enter into futures, options, and swaptions to economically hedge our net fixed versus variable interest rate exposure. We also enter into equity options to economically hedge our exposure to the equity markets.

Foreign Currency Risk

We enter into derivative financial instrument contracts to mitigate the risk associated with variability in cash flows related to foreign-currency financial instruments. Currency swaps and forwards are used to economically hedge foreign exchange exposure on foreign-currency-denominated debt by converting the funding currency to the same currency of the assets being financed. Similar to our interest rate derivatives, the swaps are generally entered into or traded concurrent with the debt issuance with the terms of the swap matching the terms of the underlying debt.

Our foreign subsidiaries maintain both assets and liabilities in local currencies; these local currencies are generally the subsidiaries' functional currencies for accounting purposes. Foreign-currency exchange-rate gains and losses arise when the assets or liabilities of our subsidiaries are denominated in currencies that differ from its functional currency. In addition, our equity is impacted by the cumulative translation adjustments resulting from the translation of foreign subsidiary results; this impact is reflected in our accumulated other comprehensive income (loss). We enter into foreign-currency forwards and option-based contracts with external counterparties to hedge

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

foreign exchange exposure on our net investments in foreign subsidiaries. In March 2011, we elected to dedesignate all of our existing net investment hedge relationships and changed our method of measuring hedge effectiveness from the spot method to the forward method for new hedge relationships entered into prospectively. For the net investment hedges that were designated under the spot method up until dedesignation date, the hedges were recorded at fair value with changes recorded to accumulated other comprehensive income (loss) with the exception of the spot to forward difference that was recorded to earnings. For current net investment hedges designated under the forward method, the hedges are recorded at fair value with the changes recorded to accumulated other comprehensive income (loss) including the spot to forward difference. The net derivative gain or loss remains in accumulated other comprehensive income (loss) until earnings are impacted by the sale or the liquidation of the associated foreign operation.

We also have a centralized-lending program to manage liquidity for all of our subsidiary businesses.

Foreign-currency-denominated loan agreements are executed with our foreign subsidiaries in their local currencies.

We evaluate our foreign-currency exposure resulting from intercompany lending and manage our currency risk exposure by entering into foreign-currency derivatives with external counterparties. Our foreign-currency derivatives are recorded at fair value with changes recorded as income offsetting the gains and losses on the associated foreign-currency transactions.

We also periodically purchase nonfunctional currency denominated investment securities and enter into foreign currency forward contracts with external counterparties to hedge against changes in the fair value of the securities, through maturity, due to changes in the related foreign-currency exchange rate. The foreign-currency forward contracts are recorded at fair value with changes recorded to earnings. The changes in value of the securities due to changes in foreign-currency exchange rates are also recorded to earnings. In the case of securities classified as available-for-sale, any changes in fair value due to unhedged risks are recorded to accumulated other comprehensive income.

Except for our net investment hedges and fair value foreign currency hedges of available-for-sale securities, we generally have not elected to treat any foreign-currency derivatives as hedges for accounting purposes principally because the changes in the fair values of the foreign-currency swaps are substantially offset by the foreign-currency revaluation gains and losses of the underlying assets and liabilities.

Counterparty Credit Risk

Derivative financial instruments contain an element of credit risk if counterparties are unable to meet the terms of the agreements. Credit risk associated with derivative financial instruments is measured as the net replacement cost should the counterparties that owe us under the contract completely fail to perform under the terms of those contracts, assuming no recoveries of underlying collateral as measured by the market value of the derivative financial instrument.

To mitigate the risk of counterparty default, we maintain collateral agreements with certain counterparties. The agreements require both parties to maintain collateral in the event the fair values of the derivative financial instruments meet established thresholds. In the event that either party defaults on the obligation, the secured party may seize the collateral. Generally, our collateral arrangements are bilateral such that we and the counterparty post collateral for the value of our total obligation to each other. Contractual terms provide for standard and customary exchange of collateral based on changes in the market value of the outstanding derivatives. The securing party posts additional collateral when their obligation rises or removes collateral when it falls. We also have unilateral collateral agreements whereby we are the only entity required to post collateral.

Certain derivative instruments contain provisions that require us to either post additional collateral or immediately settle any outstanding liability balances upon the occurrence of a specified credit risk-related event. If a credit risk-related event had been triggered the amount of additional collateral required to be posted by us would have been insignificant.

We placed cash and securities collateral totaling \$1.3 billion and \$1.4 billion at June 30, 2012, and December 31, 2011, respectively, in accounts maintained by counterparties. We received cash collateral from counterparties totaling

\$1.0 billion and \$1.4 billion at June 30, 2012, and December 31, 2011, respectively. The receivables for collateral placed and the payables for collateral received are included on our Condensed Consolidated Balance Sheet in other assets and accrued expenses and other liabilities, respectively. In certain circumstances, we receive or post securities as collateral with counterparties. We do not record such collateral received on our Condensed Consolidated Balance Sheet unless certain conditions are met. At June 30, 2012, and December 31, 2011, we received noncash collateral of \$13 million and \$43 million, respectively.

Balance Sheet Presentation

The following table summarizes the fair value amounts of derivative instruments reported on our Condensed Consolidated Balance Sheet. The fair value amounts are presented on a gross basis, are segregated by derivatives that are designated and qualifying as hedging instruments or those that are not, and are further segregated by type of contract within those two categories. At June 30, 2012, \$4.9 billion of the derivative contracts in a receivable position were classified as other assets on the Condensed Consolidated Balance Sheet. At December 31, 2011, \$5.7 billion and \$14 million of the derivative contracts in a receivable position were classified as other assets and trading assets, respectively, on the Condensed Consolidated Balance Sheet. At June 30, 2012, \$5.1 billion of derivative contracts in a liability position were classified as accrued expenses and other liabilities on the Condensed Consolidated Balance Sheet. At December 31, 2011, \$5.4 billion of derivative contracts in a liability position and \$12 million of trading derivatives were both classified as accrued expenses and other liabilities on the Condensed Consolidated Balance Sheet.

(\$ in millions)	June 30, 2012			December 31, 2011		
	Derivative contracts in a receivable position (a)	payable position (b)	Notional amount	Derivative contracts in a receivable position (a)	payable position (b)	Notional amount

Statement of Comprehensive Income Presentation

The following table summarizes the location and amounts of gains and losses on derivative instruments reported in our Condensed Consolidated Statement of Comprehensive Income.

	Three months ended June 30,		Six months ended June 30,	
(\$ in millions)	2012	2011	2012	2011
Derivatives qualifying for hedge accounting				
Gain recognized in earnings on derivatives (a)				
Interest rate contracts				
Interest on long-term debt	\$ 267	\$ 262	\$ 196	\$ 114
Loss recognized in earnings on hedged items (b)				
Interest rate contracts				
Interest on long-term debt	(257)	(254)	(205)	(108)
Total derivatives qualifying for hedge accounting	10	8	(9)	6
Economic and trading derivatives				
(Loss) gain recognized in earnings on derivatives				
Interest rate contracts				
Interest on long-term debt	(1)	—	(3)	—
Servicing asset valuation and hedge activities, net	329	127	337	(77)
Loss on mortgage and automotive loans, net	(67)	(190)	(124)	(230)
Other gain on investments, net	—	—	—	1
Other income, net of losses	(46)	(41)	(30)	(33)
Other operating expenses	—	4	—	8
Total interest rate contracts	215	(100)	180	(331)
Foreign exchange contracts (c)				
Interest on long-term debt	(1)	48	(12)	61
Other income, net of losses	50	(28)	25	(133)
Other operating expenses	(4)	—	2	—
Total foreign exchange contracts	45	20	15	(72)
Gain (loss) recognized in earnings on derivatives	\$ 270	\$(72)	\$ 186	\$(397)

(a) Amounts exclude gains related to interest for qualifying accounting hedges of debt, which are primarily offset by the fixed coupon payment on the long-term debt. The gains were \$30 million and \$82 million for the three months ended June 30, 2012 and 2011, respectively, and \$59 million and \$170 million for the six months ended June 30, 2012 and 2011, respectively.

(b) Amounts exclude gains related to amortization of deferred basis adjustments on the hedged items. The gains were \$61 million and \$53 million for the three months ended June 30, 2012 and 2011, respectively, and \$124 million and \$117 million for the six months ended June 30, 2012 and 2011, respectively.

(c) Amounts exclude gains and losses related to the revaluation of the related foreign-denominated debt or receivable. Losses of \$55 million and \$33 million were recognized for the three months ended June 30, 2012 and 2011, respectively. Losses of \$26 million and gains of \$57 million were recognized for the six months ended June 30, 2012 and 2011, respectively.

Ally Financial Inc. • Form 10-Q

The following table summarizes derivative instruments used in cash flow and net investment hedge accounting relationships.

	Three months ended June 30,		Six months ended June 30,		
(\$ in millions)	2012	2011	2012	2011	
Cash flow hedges					
Interest rate contracts					
(Loss) gain recorded directly to interest on long-term debt	\$(1	) \$1	\$(6	) \$1	
Gain (loss) recognized in other comprehensive income	1	4	(2	) 4	
Net investment hedges					
Foreign exchange contracts					
Loss reclassified from accumulated other comprehensive income to other income, net of losses	\$—	\$(5	) \$—	\$(8	)
Loss recorded directly to other income, net of losses (a)	—	—	—	(3	)
Total other income, net of losses	\$—	\$(5	) \$—	\$(11	)
Gain (loss) recognized in other comprehensive income (b)	\$249	\$(79	) \$46	\$(226	)

(a) The amounts represent the forward points excluded from the assessment of hedge effectiveness.

The amounts represent the effective portion of net investment hedges. There are offsetting amounts recognized in accumulated other comprehensive income related to the revaluation of the related net investment in foreign (b) operations. There were losses of \$343 million and gains of \$63 million for three months ended June 30, 2012 and 2011, respectively. There were losses of \$43 million and gains of \$209 million for the six months ended June 30, 2012 and 2011, respectively.

21. Income Taxes

We recognized total income tax expense from continuing operations of \$15 million and \$79 million during the three months and six months ended June 30, 2012, respectively, compared to \$83 million and \$13 million for the same periods in 2011. Income tax expense resulted primarily from tax expense attributable to profitable foreign entities. Our U.S. net deferred tax assets continue to be offset fully by a valuation allowance, and as such, we continue to experience a significant variation in the customary relationship between income tax expense and pretax accounting income. As discussed in Note 1, during the six months ended June 30, 2012, we incurred material U.S. pretax charges related to the Debtors' Bankruptcy filing. No net tax benefit was currently recognized on these charges due to an offsetting increase in the valuation allowance. This was partially offset by a \$23 million reversal of a valuation allowance on net deferred tax assets in our Italian subsidiary.

During the six months ended June 30, 2012, income tax expense from continuing operations was also reduced by \$26 million stemming from the application of intraperiod tax allocation requirements which provide that all sources of future taxable income (e.g., other comprehensive income and discontinued operations) be considered in determining the amount of tax benefit that results from a continuing operations loss. Income tax expenses of \$23 million and \$3 million were recorded in other comprehensive income and discontinued operations, respectively, offsetting the \$26 million benefit.

A sustained period of profitability in our U.S. operations is required before we would change our judgment regarding the need for a full valuation allowance against our net U.S. deferred tax assets. Continued improvement in our U.S. operating results throughout 2012 could lead to the reversal of a portion of our U.S. valuation allowance during the next twelve months.

As discussed in Note 1, on May 14, 2012, we deconsolidated ResCap for financial reporting purposes. For U.S. federal tax purposes, however, ResCap will continue to be included in our consolidated return filing until ultimate disposition of our ownership in ResCap. Under the proposed Bankruptcy Plan and given that the Debtors are disregarded entities for U.S. tax purposes, we do not anticipate a reduction to our net deferred tax assets as a result of

the Bankruptcy filing.

22. Fair Value

Fair Value Measurements

For purposes of this disclosure, fair value is defined as the exchange price that would be received to sell an asset or paid to transfer a liability (exit price) in the principal or most advantageous market in an orderly transaction between market participants at the measurement date. Fair value is based on the assumptions market participants would use when pricing an asset or liability. Additionally, entities are required to consider all aspects of nonperformance risk, including the entity's own credit standing, when measuring the fair value of a liability.

GAAP specifies a three-level hierarchy that is used when measuring and disclosing fair value. The fair value hierarchy gives the highest priority to quoted prices available in active markets (i.e., observable inputs) and the lowest priority to data lacking transparency (i.e., unobservable inputs). An instrument's categorization within the fair value hierarchy is based on the lowest level of significant input to its valuation. The following is a description of the three hierarchy levels.

Level 1 Inputs are quoted prices in active markets for identical assets or liabilities at the measurement date. Additionally, the entity

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

must have the ability to access the active market, and the quoted prices cannot be adjusted by the entity.

Inputs are other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices in active markets for similar assets or liabilities; Level 2 quoted prices in inactive markets for identical or similar assets or liabilities; or inputs that are observable or can be corroborated by observable market data by correlation or other means for substantially the full term of the assets or liabilities.

Unobservable inputs are supported by little or no market activity. The unobservable inputs represent management's best assumptions of how market participants would price the assets or liabilities. Generally, Level 3 assets and liabilities are valued using pricing models, discounted cash flow methodologies, or similar techniques that require significant judgment or estimation.

Transfers into or out of any hierarchy level are recognized at the end of the reporting period in which the transfer occurred. There were no transfers between any levels during the six months ended June 30, 2012.

Following are descriptions of the valuation methodologies used to measure material assets and liabilities at fair value and details of the valuation models, key inputs to those models, and significant assumptions utilized.

Trading assets (excluding derivatives) — Trading assets were recorded at fair value. Our portfolio included MBS (including senior and subordinated interests) that were either investment-grade, noninvestment grade, or unrated securities. Valuations were primarily based on internally developed discounted cash flow models (an income approach) that used assumptions consistent with current market conditions. The valuation considered recent market transactions, experience with similar securities, current business conditions, and analysis of the underlying collateral, as available. To estimate cash flows, we utilized various significant assumptions including market observable inputs (e.g., forward interest rates) and internally developed inputs (e.g., prepayment speeds, delinquency levels, and credit losses).

Available-for-sale securities — Available-for-sale securities are carried at fair value based on observable market prices, when available. If observable market prices are not available, our valuations are based on internally developed discounted cash flow models (an income approach) that use a market-based discount rate and consider recent market transactions, experience with similar securities, current business conditions, and analysis of the underlying collateral, as available. To estimate cash flows, we are required to utilize various significant assumptions including market observable inputs (e.g., forward interest rates) and internally developed inputs (including prepayment speeds, delinquency levels, and credit losses).

Mortgage loans held-for-sale, net — Our mortgage loans held-for-sale are accounted for at either fair value because of fair value option elections or they were accounted for at the lower-of-cost or fair value. Mortgage loans held-for-sale are typically pooled together and sold into certain exit markets depending on underlying attributes of the loan, such as GSE eligibility (domestic only), product type, interest rate, and credit quality. Two valuation methodologies are used to determine the fair value of mortgage loans held-for-sale. The methodology used depends on the exit market as described below.

Level 2 mortgage loans — This includes all GSE-eligible mortgage loans carried at fair value due to fair value option election, which are valued predominantly using published forward agency prices. It also includes any domestic loans and foreign loans where recently negotiated market prices for the loan pool exist with a counterparty (which approximates fair value) or quoted market prices for similar loans are available.

Level 3 mortgage loans — This included all conditional repurchase option loans carried at fair value due to the fair value option election and all GSE-ineligible residential mortgage loans that were accounted for at the lower-of-cost or fair value. The fair value of these residential mortgage loans were determined using internally developed valuation models because observable market prices were not available. The loans were priced on a discounted cash flow basis utilizing cash flow projections from internally developed models that utilized prepayment, default, and discount rate assumptions. To the extent available, we utilized market observable inputs such as interest rates and market spreads. If market observable inputs were not available, we were required to utilize internal inputs, such as prepayment speeds,

credit losses, and discount rates.

Refer to the section within this note titled Fair Value Option for Financial Assets and Financial Liabilities for further information about the fair value elections.

Consumer mortgage finance receivables and loans, net — We elected the fair value option for certain consumer mortgage finance receivables and loans. The elected mortgage loans collateralized on-balance sheet securitization debt in which we estimated credit reserves pertaining to securitized assets that could have exceeded or already had exceeded our economic exposure. We also elected the fair value option for all mortgage securitization trusts required to be consolidated. The elected mortgage loans represented a portion of the consumer finance receivables and loans. The balance for which the fair value option was not elected was reported on the balance sheet at the principal amount outstanding, net of charge-offs, allowance for loan losses, and premiums or discounts.

The loans were measured at fair value using a portfolio approach. The objective in fair valuing the loans and related securitization debt was to account properly for our retained economic interest in the securitizations. As a result of reduced liquidity in capital markets, values of both these loans and the securitized bonds were expected to be volatile. Since this approach involved

Ally Financial Inc. • Form 10-Q

the use of significant unobservable inputs, we classified all the mortgage loans elected under the fair value option as Level 3. Refer to the section within this note titled Fair Value Option of Financial Assets and Financial Liabilities for additional information.

MSRs — MSRs are classified as Level 3 because they currently do not trade in an active market with observable prices; therefore, we use internally developed discounted cash flow models (an income approach) to estimate the fair value. These internal valuation models estimate net cash flows based on internal operating assumptions that we believe would be used by market participants in orderly transactions combined with market-based assumptions for loan prepayment rates, interest rates, and discount rates that we believe approximate yields required by investors in this asset. Cash flows primarily include servicing fees, float income, and late fees in each case less operating costs to service the loans. The estimated cash flows are discounted using an option-adjusted spread-derived discount rate.

Interests retained in financial asset sales — The interests retained are in securitization trusts and deferred purchase prices on the sale of whole-loans. Due to inactivity in the market, valuations are based on internally developed discounted cash flow models (an income approach) that use a market-based discount rate; therefore, we classified these assets as Level 3. The valuation considers recent market transactions, experience with similar assets, current business conditions, and analysis of the underlying collateral, as available. To estimate cash flows, we utilize various significant assumptions, including market observable inputs (e.g., forward interest rates) and internally developed inputs (e.g., prepayment speeds, delinquency levels, and credit losses).

Derivative instruments — We enter into a variety of derivative financial instruments as part of our risk management strategies. Certain of these derivatives are exchange traded, such as Eurodollar futures. To determine the fair value of these instruments, we utilize the quoted market prices for the particular derivative contracts; therefore, we classified these contracts as Level 1.

We also execute over-the-counter derivative contracts, such as interest rate swaps, swaptions, forwards, caps, floors, and agency to-be-announced securities. We utilize third-party-developed valuation models that are widely accepted in the market to value these over-the-counter derivative contracts. The specific terms of the contract and market observable inputs (such as interest rate forward curves and interpolated volatility assumptions) are used in the model. We classified these over-the-counter derivative contracts as Level 2 because all significant inputs into these models were market observable.

We also hold certain derivative contracts that are structured specifically to meet a particular hedging objective. These derivative contracts often are utilized to hedge risks inherent within certain on-balance sheet securitizations. To hedge risks on particular bond classes or securitization collateral, the derivative's notional amount is often indexed to the hedged item. As a result, we typically are required to use internally developed prepayment assumptions as an input into the model to forecast future notional amounts on these structured derivative contracts. Accordingly, we classified these derivative contracts as Level 3.

We are required to consider all aspects of nonperformance risk, including our own credit standing, when measuring fair value of a liability. We reduce credit risk on the majority of our derivatives by entering into legally enforceable agreements that enable the posting and receiving of collateral associated with the fair value of our derivative positions on an ongoing basis. In the event that we do not enter into legally enforceable agreements that enable the posting and receiving of collateral, we will consider our credit risk and the credit risk of our counterparties in the valuation of derivative instruments through a credit valuation adjustment (CVA), if warranted. The CVA calculation utilizes our credit default swap spreads and the spreads of the counterparty.

On-balance sheet securitization debt — We elected the fair value option for certain mortgage loans held-for-investment and the related on-balance sheet securitization debt. We valued securitization debt that was elected pursuant to the fair value option and any economically retained positions using market observable prices whenever possible. The securitization debt was principally in the form of asset- and MBS collateralized by the underlying mortgage loans held-for-investment. Due to the attributes of the underlying collateral and current market conditions, observable prices for these instruments were typically not available. In these situations, we considered observed transactions as Level 2

inputs in our discounted cash flow models. Additionally, the discounted cash flow models utilized other market observable inputs, such as interest rates, and internally derived inputs including prepayment speeds, credit losses, and discount rates. Fair value option-elected financing securitization debt was classified as Level 3 as a result of the reliance on significant assumptions and estimates for model inputs. Refer to the section within this note titled Fair Value Option for Financial Assets and Financial Liabilities for further information about the election. The debt that was not elected under the fair value option is reported on the balance sheet at cost, net of premiums or discounts and issuance costs.

Recurring Fair Value

The following tables display the assets and liabilities measured at fair value on a recurring basis including financial instruments elected for the fair value option. We often economically hedge the fair value change of our assets or liabilities with derivatives and other financial instruments. The tables below display the hedges separately from the hedged items; therefore, they do not directly display the impact of our risk management activities.

Nonrecurring Fair Value

We may be required to measure certain assets and liabilities at fair value from time to time. These periodic fair value measures typically result from the application of lower-of-cost or fair value accounting or certain impairment measures. These items would constitute nonrecurring fair value measures.

The following tables display the assets and liabilities measured at fair value on a nonrecurring basis.

	Nonrecurring fair value measures				Lower-of-cost or fair value or valuation reserve allowance	Total loss included in earnings for the three months ended	Total loss included in earnings for the six months ended
June 30, 2012 (\$ in millions)	Level 1	Level 2	Level 3	Total

Total assets	\$—	\$7	\$162	\$169	\$(34)	) \$(442)	) \$(442)

n/m = not meaningful

(a) Represents the portion of the portfolio specifically impaired during 2012. The related valuation allowance represents the cumulative adjustment to fair value of those specific receivables.

We consider the applicable valuation or loan loss allowance to be the most relevant indicator of the impact on earnings caused by the fair value measurement. Accordingly, the table above excludes total gains and losses included in earnings for these items. The carrying values are inclusive of the respective valuation or loan loss allowance.

(c) The allowance provided for repossessed and foreclosed assets represents any cumulative valuation adjustment recognized to adjust the assets to fair value.

(d) Represents the impairment of our investment in ResCap during 2012. Refer to Note 1 for additional information related to ResCap.

Represents loans held-for-sale that are required to be measured at the lower-of-cost or fair value. The table above (a) includes only loans with fair values below cost during 2011. The related valuation allowance represents the cumulative adjustment to fair value of those specific assets.

We consider the applicable valuation or loan loss allowance to be the most relevant indicator of the impact on earnings caused by the fair value measurement. Accordingly, the table above excludes total gains and losses (b) included in earnings for these items. The carrying values are inclusive of the respective valuation or loan loss allowance.

(c) Represents the portion of the portfolio specifically impaired during 2011. The related valuation allowance represents the cumulative adjustment to fair value of those specific receivables.

(d) The total gain (loss) included in earnings is the most relevant indicator of the impact on earnings.

(e) The allowance provided for reposessed and foreclosed assets represents any cumulative valuation adjustment recognized to adjust the assets to fair value.

Ally Financial Inc. • Form 10-Q

The following table presents quantitative information regarding the significant unobservable inputs used in significant Level 3 assets measured at fair value on a nonrecurring basis.

June 30, 2012 (\$ in millions)	Level 3 nonrecurring measurements	Valuation technique	Unobservable input	Range
Assets				
Commercial finance receivables and loans, net				
Automotive	\$ 130	Fair value of collateral	Adjusted appraisal value	65.0-95.0%

Fair Value Option for Financial Assets and Financial Liabilities

A description of the financial assets and liabilities elected to be measured at fair value is as follows. Our intent in electing fair value for all these items was to mitigate a divergence between accounting losses and economic exposure for certain assets and liabilities.

On-balance sheet mortgage securitizations — We elected to measure at fair value certain domestic consumer mortgage finance receivables and loans and the related debt held in on-balance sheet mortgage securitization structures. The fair value-elected loans were classified as finance receivable and loans, net, on the Condensed Consolidated Balance Sheet. Our policy is to separately record interest income on the fair value-elected loans (unless the loans are placed on nonaccrual status); however, the accrued interest was excluded from the fair value presentation. We classified the fair value adjustment recorded for the loans as other income, net of losses, in the Condensed Consolidated Statement of Comprehensive Income.

We continued to record the fair value-elected debt balances as long-term debt on the Condensed Consolidated Balance Sheet. Our policy is to separately record interest expense on the fair value-elected debt, which continues to be classified as interest on long-term debt in the Condensed Consolidated Statement of Comprehensive Income. We classified the fair value adjustment recorded for this fair value-elected debt as other income, net of losses, in the Condensed Consolidated Statement of Comprehensive Income.

Conforming and government-insured mortgage loans held-for-sale — We elected the fair value option for conforming and government-insured mortgage loans held-for-sale funded after July 31, 2009. We elected the fair value option to mitigate earnings volatility by better matching the accounting for the assets with the related hedges.

Excluded from the fair value option were conforming and government-insured loans funded on or prior to July 31, 2009, and those repurchased or rerecognized. The loans funded on or prior to July 31, 2009, were ineligible because the election must be made at the time of funding. Repurchased and rerecognized conforming and government-insured loans were not elected because the election will not mitigate earning volatility. We repurchase or rerecognize loans due to representation and warranty obligations or conditional repurchase options. Typically, we will be unable to resell these assets through regular channels due to characteristics of the assets. Since the fair value of these assets is influenced by factors that cannot be hedged, we did not elect the fair value option.

We carry the fair value-elected conforming and government-insured loans as loans held-for-sale, net, on the Condensed Consolidated Balance Sheet. Our policy is to separately record interest income on the fair value-elected loans (unless they are placed on nonaccrual status); however, the accrued interest was excluded from the fair value presentation. Upfront fees and costs related to the fair value-elected loans were not deferred or capitalized. The fair value adjustment recorded for these loans is classified as gain (loss) on mortgage loans, net, in the Condensed Consolidated Statement of Comprehensive Income. In accordance with GAAP, the fair value option election is irrevocable once the asset is funded even if it is subsequently determined that a particular loan cannot be sold.

Nongovernment-eligible mortgage loans held-for-sale subject to conditional repurchase options — We elected the fair value option for both nongovernment-eligible mortgage loans held-for-sale subject to conditional repurchase options and the related liability. These conditional repurchase options within our private label securitizations allowed us to

repurchase a transferred financial asset if certain events outside our control were met. The typical conditional repurchase option was a delinquent loan repurchase option that gave us the option to purchase the loan if it exceeded a certain prespecified delinquency level. We had complete discretion regarding when or if we would exercise these options, but generally we would do so only when it is in our best interest. We recorded the asset and the corresponding liability on our balance sheet when the option becomes exercisable. The fair value option election must be made at initial recording. As such, the conditional repurchase option assets and liabilities recorded prior to January 1, 2011, were ineligible for the fair value election.

We carried these fair value-elected optional repurchase loan balance as loans held-for-sale, net, on the Condensed Consolidated Balance Sheet. The fair value adjustment recorded for these loans was classified as other income, net of losses, in the Condensed Consolidated Statement of Comprehensive Income. We carried the fair value-elected corresponding liability as accrued expenses and other liabilities on the Condensed Consolidated Balance Sheet. The fair value adjustment recorded for these liabilities were classified as other income, net of losses, in the Condensed Consolidated Statement of Comprehensive Income.

Ally Financial Inc. • Form 10-Q

The following tables summarize the fair value option elections and information regarding the amounts recorded as earnings for each fair value option-elected item.

Three months ended June 30, (\$ in millions)	Changes included in the Condensed Consolidated Statement of Comprehensive Income							Change in fair value due to credit risk (c)
	Interest and fees on finance receivables and loans (a)	Interest on loans held-for-sale (a)	Interest on long-term debt (b)	Gain on mortgage loans, net	Other income, net of losses	Total included in earnings		
2012								
Assets								
Mortgage loans held-for-sale, net	\$—	\$ 14	\$—	\$63	\$ —	\$ 77	\$ 1	(d)
Consumer mortgage finance receivables and loans, net	15	—	—	—	19	34	3	(e)
Liabilities								
Long-term debt								
On-balance sheet securitization debt	—	—	(8)	—	(24)	(32)	(1)	(f)
Total						\$ 79		
2011								
Assets								
Mortgage loans held-for-sale, net	\$—	\$ 38	\$—	\$244	\$ —	\$ 282	\$—	(d)
Consumer mortgage finance receivables and loans, net	52	—	—	—	49	101	22	(e)
Liabilities								
Long-term debt								
On-balance sheet securitization debt	—	—	(29)	—	(71)	(100)	(50)	(f)
Total						\$ 283		

(a) Interest income is measured by multiplying the unpaid principal balance on the loans by the coupon rate and the number of days of interest due.

(b) Interest expense is measured by multiplying bond principal by the coupon rate and the number of days of interest due to the investor.

Factors other than credit quality that impact fair value include changes in market interest rates and the illiquidity or marketability in the current marketplace. Lower levels of observable data points in illiquid markets generally result in wide bid/offer spreads.

(d) The credit impact for loans held-for-sale is assumed to be zero because the loans are either suitable for sale or are covered by a government guarantee.

(e) The credit impact for consumer mortgage finance receivables and loans was quantified by applying internal credit loss assumptions to cash flow models.

(f) The credit impact for on-balance sheet securitization debt is assumed to be zero until our economic interests in a particular securitization is reduced to zero, at which point the losses on the underlying collateral will be expected to be passed through to third-party bondholders. Losses allocated to third-party bondholders, including changes in the

amount of losses allocated, will result in fair value changes due to credit. We also monitor credit ratings and will make credit adjustments to the extent any bond classes are downgraded by rating agencies.

Ally Financial Inc. • Form 10-Q

The following table provides the aggregate fair value and the aggregate unpaid principal balance for the fair value option-elected loans and long-term debt instruments.

(\$ in millions)	June 30, 2012		December 31, 2011	
	Unpaid principal balance	Fair value (a)	Unpaid principal balance	Fair value (a)
Assets				
Mortgage loans held-for-sale, net				
Total loans	\$1,313	\$1,377	\$3,766	\$3,919
Nonaccrual loans	11	5	54	27
Loans 90+ days past due (b)	11	5	53	27
Consumer mortgage finance receivables and loans, net				
Total loans	—	—	2,436	835
Nonaccrual loans (c)	—	—	506	209
Loans 90+ days past due (b) (c)	—	—	362	163
Liabilities				
Long-term debt				
On-balance sheet securitization debt	\$—	\$—	\$(2,559)	\$(830)
Accrued expenses and other liabilities				
Loan repurchase liabilities	—	—	(57)	(29)

(a) Excludes accrued interest receivable.

(b) Loans 90+ days past due are also presented within the nonaccrual loan balance and the total loan balance; however, excludes government-insured loans that are still accruing interest.

The fair value of consumer mortgage finance receivables and loans is calculated on a pooled basis; therefore, we allocated the fair value of nonaccrual loans and loans 90+ days past due to individual loans based on the unpaid principal balances. For further discussion regarding the pooled basis, refer to the previous section of this note titled Consumer mortgage finance receivables and loans, net.

Fair Value of Financial Instruments

The following table presents the carrying and estimated fair value of financial instruments, except for those recorded at fair value on a recurring basis presented in the previous section of this note titled Recurring Fair Value. When possible, we use quoted market prices to determine fair value. Where quoted market prices are not available, the fair value is internally derived based on appropriate valuation methodologies with respect to the amount and timing of future cash flows and estimated discount rates. However, considerable judgment is required in interpreting market data to develop estimates of fair value, so the estimates are not necessarily indicative of the amounts that could be realized or would be paid in a current market exchange. The effect of using different market assumptions or estimation methodologies could be material to the estimated fair values. Fair value information presented herein was based on information available at June 30, 2012, and December 31, 2011.

(\$ in millions)	June 30, 2012					December 31, 2011	
	Carrying value	Estimated fair value				Carrying value	Estimated fair value
		Level 1	Level 2	Level 3	Total		
Financial assets							
Loans held-for-sale, net (a)	\$2,000	\$—	\$1,377	\$623	\$2,000	\$8,557	\$8,674
Finance receivables and loans, net (a)	118,486	—	—	118,855	118,855	113,252	113,576
Nonmarketable equity investments	374	—	347	32	379	419	423
Financial liabilities							
Deposit liabilities	\$47,992	\$—	\$3,652	\$45,154	\$48,806	\$45,050	\$45,696
Short-term borrowings	6,010	5	—	5,994	5,999	7,680	7,622
Long-term debt (a)(b)	91,799	—	43,593	50,623	94,216	93,434	92,142

Includes financial instruments carried at fair value due to fair value option elections. Refer to the previous section (a) of this note titled Fair Value Option for Financial Assets and Liabilities for further information about the fair value elections.

(b) The carrying value includes deferred interest for zero-coupon bonds of \$703 million and \$640 million at June 30, 2012, and December 31, 2011, respectively.

The following describes the methodologies and assumptions used to determine fair value for the significant classes of financial instruments. In addition to the valuation methods discussed below, we also followed guidelines for determining whether a market was not active and a transaction was not distressed. As such, we assumed the price that would be received in an orderly transaction (including a market-based return) and not in forced liquidation or distressed sale.

Loans held-for-sale, net — Loans held-for-sale classified as Level 2 include all GSE-eligible mortgage loans valued predominantly using published forward agency prices. It also includes any domestic loans and foreign loans where recently negotiated market prices for the loan pool exist with a counterparty (which approximates fair value) or quoted market prices for similar loans are available. Loans held-for-sale classified as Level 3 include all loans valued using internally developed valuation models because observable market prices were not available. The loans are priced on a discounted cash flow basis utilizing cash flow projections from internally developed models that utilize prepayment, default, and discount rate assumptions. To the extent available, we will utilize market observable inputs such as interest rates and market spreads. If market observable inputs are not available, we are required to utilize internal inputs, such as prepayment speeds, credit losses, and discount rates.

Finance receivables and loans, net — With the exception of mortgage loans held-for-investment, the fair value of finance receivables was based on discounted future cash flows using applicable spreads to approximate current rates applicable to each category of finance receivables (an income approach using Level 3 inputs). The carrying value of commercial receivables in certain markets and certain other automotive- and mortgage-lending receivables for which interest rates reset on a short-term basis with applicable market indices are assumed to approximate fair value either

because of the short-term nature or because of the interest rate adjustment feature. The fair value of commercial receivables in other markets was based on discounted future cash flows using applicable spreads to approximate current rates applicable to similar assets in those markets.

For mortgage loans held-for-investment used as collateral for securitization debt, we used a portfolio approach with Level 3 inputs to measure these loans at fair value. The objective in fair valuing these loans (which are legally isolated and beyond the reach of our creditors) and the related collateralized borrowings is to reflect our retained economic position in the securitizations. For mortgage loans held-for-investment that are not securitized, we used valuation methods and assumptions similar to those used for mortgage loans held-for-sale. These valuations consider unique attributes of the loans such as geography, delinquency status, product type, and other factors. Refer to the section above titled Loans held-for-sale, net, for a description of methodologies and assumptions used to determine the fair value of mortgage loans held-for-sale.

Deposit liabilities — Deposit liabilities represent certain consumer and brokered bank deposits, mortgage escrow deposits, and dealer deposits. Deposits classified as Level 2 was valued using quoted market prices from active markets for similar instruments. The fair value of deposits at Level 3 were estimated by discounting projected cash flows based on discount factors derived from the forward interest rate swap curve.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

- Debt — Level 2 debt was valued using quoted market prices in inactive markets. Debt valued using internally derived inputs, such as prepayment speeds and discount rates, was classified as Level 3.

23. Segment and Geographic Information

Operating segments are defined as components of an enterprise that engage in business activity from which revenues are earned and expenses incurred for which discrete financial information is available that is evaluated regularly by our chief operating decision maker in deciding how to allocate resources and in assessing performance.

We report our results of operations on a line-of-business basis through four operating segments - North American Automotive Finance operations, International Automotive Finance operations, Insurance operations, and Mortgage operations, with the remaining activity reported in Corporate and Other. The operating segments are determined based on the products and services offered and geographic considerations, and reflect the manner in which financial information is currently evaluated by management. The following is a description of each of our reportable operating segments.

North American Automotive Finance operations — Provides automotive financing services to consumers and automotive dealers in the United States and Canada and includes the automotive activities of Ally Bank and ResMor Trust. For consumers, we offer retail automotive financing and leasing for new and used vehicles, and through our commercial automotive financing operations, we fund dealer purchases of new and used vehicles through wholesale or floorplan financing.

International Automotive Finance operations — Provides automotive financing and full-service leasing to consumers and dealers outside of the United States and Canada. Our International Automotive Finance operations will focus the majority of new originations in five core international markets: Germany, the United Kingdom, Brazil, Mexico, and China through our joint venture.

Insurance operations — Offers consumer finance and insurance products, and commercial insurance products sold primarily through the dealer channel including vehicle service contracts, commercial insurance coverage in the United States (primarily covering dealers' wholesale vehicle inventory), and personal automobile insurance in certain countries outside the United States.

Mortgage operations — The principal ongoing activities include originating, purchasing, selling, and securitizing conforming and government-insured residential mortgage loans in the United States through Ally Bank; and servicing residential mortgage loans for ourselves and others. We also originate high-quality prime jumbo mortgage loans in the United States. Our Mortgage operations also include noncore business activities that are winding down or were business activities of ResCap, which was deconsolidated on May 14, 2012, including, among other things: portfolios in runoff; our mortgage reinsurance business; and providing collateralized lines of credit to other mortgage originators, which we refer to as warehouse lending.

Corporate and Other primarily consists of our centralized corporate treasury and deposit gathering activities, such as management of the cash and corporate investment securities portfolios, short- and long-term debt, retail and brokered deposit liabilities, derivative instruments, the amortization of the discount associated with new debt issuances and bond exchanges, most notably from the December 2008 bond exchange, and the residual impacts of our corporate funds-transfer pricing (FTP) and treasury asset liability management (ALM) activities. Corporate and Other also includes our Commercial Finance Group, certain equity investments, and reclassifications and eliminations between the reportable operating segments.

We utilize an FTP methodology for the majority of our business operations. The FTP methodology assigns charge rates and credit rates to classes of assets and liabilities based on expected duration and the LIBOR swap curve plus an assumed credit spread. Matching duration allocates interest income and interest expense to these reportable segments so their respective results are insulated from interest rate risk. This methodology is consistent with our ALM practices, which includes managing interest rate risk centrally at a corporate level. The net residual impact of the FTP methodology is included within the results of Corporate and Other.

The information presented in our reportable operating segments and geographic areas tables that follow are based in part on internal allocations, which involve management judgment.

Change in Reportable Segment Information

On May 14, 2012, the Debtors filed for relief under Chapter 11 of the Bankruptcy Code in the United States. As a result of the bankruptcy filing, ResCap was deconsolidated from our financial statements; and beginning in the second quarter of 2012, we are presenting our mortgage business activities under one reportable operating segment, Mortgage operations. Previously our Mortgage operations were presented as two reportable operating segments, Origination and Servicing operations and Legacy Portfolio and Other operations. The new presentation is consistent with the organizational alignment of the business and management's current view of the mortgage business.

Total	\$1,775	\$191	\$113

(a) The 2011 balances for Asia-Pacific and domestic were reclassified to conform with the 2012 presentation. These reclassifications have no impact to our condensed consolidated results of operations.

(b) Revenue consists of net financing revenue and total other revenue as presented in our Condensed Consolidated Statement of Comprehensive Income.

(c) The domestic amounts include original discount amortization of \$100 million and \$257 million for the three months ended June 30, 2012 and 2011, respectively.

(d) Amounts include eliminations between our foreign operations.

(e) Amounts include eliminations between our domestic and foreign operations.

(e) Amounts include eliminations between our domestic and foreign operations.

24. Parent and Guarantor Consolidating Financial Statements

Certain of our senior notes are guaranteed by a group of subsidiaries (the Guarantors). The Guarantors, each of which is a 100% directly owned subsidiary of Ally Financial Inc., are Ally US LLC, IB Finance Holding Company, LLC, GMAC Latin America Holdings LLC, GMAC International Holdings B.V., and GMAC Continental Corporation. The Guarantors fully and unconditionally guarantee the senior notes on a joint and several basis. In order to simplify our note guarantor structure and to provide additional flexibility with respect to potential strategic transactions relating to our international operations, Ally is contemplating a series of transactions in which our note guarantors would be merged with and into or otherwise consolidated with IB Finance Holding Company, LLC.

The following financial statements present condensed consolidating financial data for (i) Ally Financial Inc. (on a parent company-only basis), (ii) the Guarantors, (iii) the nonguarantor subsidiaries (all other subsidiaries), and (iv) an elimination column for adjustments to arrive at (v) the information for the parent company, Guarantors, and nonguarantors on a consolidated basis.

Investments in subsidiaries are accounted for by the parent company and the Guarantors using the equity method for this presentation. Results of operations of subsidiaries are therefore classified in the parent company's and Guarantors' investment in subsidiaries accounts. The elimination entries set forth in the following condensed consolidating financial statements eliminate distributed and undistributed income of subsidiaries, investments in subsidiaries, and intercompany balances and transactions between the parent, Guarantors, and nonguarantors.

25. Contingencies and Other Risks

In the normal course of business, we enter into transactions that expose us to varying degrees of risk. For additional information on contingencies and other risks arising from such transactions, refer to Note 31 to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K.

Mortgage-Related Matters

ResCap Bankruptcy Filing

As described in Note 1 to the Condensed Consolidated Financial Statements, on May 14, 2012, Residential Capital, LLC (ResCap) and certain of its wholly owned direct and indirect subsidiaries (collectively, the Debtors) filed voluntary petitions for relief under Chapter 11 of the Bankruptcy Code in the United States Bankruptcy Court for the Southern District of New York (Bankruptcy Court). In connection with the filings, Ally Financial Inc. and its direct and indirect subsidiaries and affiliates (excluding the Debtors and their direct and indirect subsidiaries) (collectively, AFI) reached an agreement with the Debtors and certain creditor constituencies on a prearranged Chapter 11 plan (the Plan).

The contemplated Plan, which has not yet been filed with the Bankruptcy Court and is subject to Bankruptcy Court approval, is based on a settlement (the Settlement) that provides for the release of all existing or potential causes of action between AFI and the Debtors, as well as a release of all existing or potential ResCap-related causes of action against Ally held by third parties.

There can be no assurances that the Bankruptcy Court will confirm the Settlement or the Plan, and even if confirmed, the Settlement and Plan are each subject to several conditions, which may not occur. In particular, the Bankruptcy Court may not approve the proposed release of all existing or potential ResCap-related causes of action against AFI held by third parties. The failure of the Plan being confirmed could result

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

in modifications to the Plan, or the pursuit of an alternative form of reorganization or liquidation. This could result in delay and significant expense, and any modifications to the Plan or other alternative may be less favorable to Ally. If Ally does not receive the releases contemplated by the Plan, the Debtors and/or third party creditors are likely to assert substantial claims directly against Ally, which could have a material adverse impact on our results of operations, financial position or cash flows.

Based on our assessment of the effect of the deconsolidation of ResCap, obligations under the Plan, and other impacts related to the bankruptcy filing, we recorded a charge of \$1.2 billion during the three months ended June 30, 2012. Given the inherent uncertainty of the bankruptcy process, it is possible that this amount could be modified in the future.

Mortgage Settlements and Consent Order

On February 9, 2012, we announced that we had reached an agreement with respect to investigations into procedures followed by mortgage servicing companies and banks in connection with mortgage origination and servicing activities and foreclosure home sales and evictions (Mortgage Settlement). Further, as a result of an examination conducted by the FRB and FDIC, on April 13, 2011, we entered into a consent order (the Consent Order) with the FRB and the FDIC, that required, among other things, GMAC Mortgage, LLC to retain independent consultants to conduct a risk assessment related to mortgage servicing activities and, separately, to conduct a review of certain past residential mortgage foreclosure actions. The Debtors are primarily liable for all remaining obligations under both the Mortgage Settlement and Consent Order. AFI is secondarily liable for the specific performance of required actions, and is jointly and severally liable for financial obligations.

Loan Repurchases and Obligations Related to Loan Sales**Representation and Warranty Obligation Reserve Methodology**

A significant portion of our representation and warranty obligations were eliminated as a result of the deconsolidation of ResCap. Related to the deconsolidation of ResCap, we allocated a representation and warranty reserve to Ally Bank, which was \$124 million at June 30, 2012 with respect to Ally Bank's sold and serviced loans. The current liability for representation and warranty obligations reflects management's best estimate of probable lifetime losses with respect to Ally Bank's mortgage loans sold to Freddie Mac and Fannie Mae. We considered historical and recent demand trends in establishing the reserve. The methodology used to estimate the reserve considers a variety of assumptions including borrower performance (both actual and estimated future defaults), repurchase demand behavior, historical loan defect experience, historical mortgage insurance rescission experience, and historical and estimated future loss experience, which includes projections of future home price changes as well as other qualitative factors including investor behavior. It is difficult to predict and estimate the level and timing of any potential future demands. In cases where we may not be able to reasonably estimate losses, a liability is not recognized. Management monitors the adequacy of the overall reserve and makes adjustments to the level of reserve, as necessary, after consideration of other qualitative factors including ongoing dialogue and experience with counterparties.

At the time a loan is sold, an estimate of the fair value of the liability is recorded and classified in accrued expenses and other liabilities on our Condensed Consolidated Balance Sheet and recorded as a component of gain (loss) on mortgage and automotive loans, net, in our Condensed Consolidated Statement of Comprehensive Income. We recognize changes in the liability when additional relevant information becomes available. Changes in the estimate are recorded as other operating expenses in our Condensed Consolidated Statement of Comprehensive Income. The repurchase reserve at June 30, 2012, relates exclusively to GSE exposure.

The following tables summarize the changes in our reserve for representation and warranty obligations.

Three months ended June 30, (\$ in millions)	2012	2011
Balance at April 1,	\$811	\$830
Provision for mortgage representation and warranty expenses

Legal Proceedings

We are subject to potential liability under various governmental proceedings, claims, and legal actions that are pending or otherwise asserted against us. We are named as defendants in a number of legal actions, and we are involved in governmental proceedings arising in connection with our respective businesses. Some of the pending actions purport to be class actions, and certain legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. We establish reserves for legal claims when payments associated with the claims become probable and the payments can be reasonably estimated. Given the inherent difficulty of predicting the outcome of litigation and regulatory matters, it is generally very difficult to predict what the eventual outcome will be, and when the matter will be resolved. The actual costs of resolving legal claims may be higher or lower than any amounts reserved for the claims.

We have previously disclosed various litigation matters where certain of Ally's subsidiaries (including the Debtors (as defined above)) were named as defendants in cases relating to mortgage-backed securities and certain other mortgage-related matters. As a result of the bankruptcy filings, all litigation against the Debtors has been automatically stayed and will be resolved in the bankruptcy litigation out of the assets of the estate. Ally believes that it has no potential future liability with respect to any litigation claims pending solely against the Debtors.

Ally Financial Inc. and certain other Ally subsidiaries (excluding the Debtors) are also named as defendants in various cases relating to mortgage-backed securities and certain other mortgage-related matters. These cases include litigation with, among others, the following: Allstate; Assured Guaranty; the Federal Deposit Insurance Corporation (as receiver for Citizens National Bank and Strategic Capital Bank v. Ally Securities LLC, et. a.); the Federal Housing Finance Agency (FHFA); the Federal Home Loan Banks of Indianapolis, Boston and Chicago; Huntington Bancshares; John Hancock; Massachusetts Mutual Life Insurance; New Jersey Carpenters Health Fund; and the Financial Guaranty Insurance Company (collectively, the Remaining Cases). All but two of the Remaining Cases have been stayed through October 31, 2012, subject to permitting certain limited proceedings in some of the Remaining Cases. The FHFA and John Hancock case has not been stayed. We believe that we have strong legal and factual defenses with respect to the Remaining Cases. As described earlier, the proposed bankruptcy Plan provides for a release of all existing and potential causes of action against Ally held by ResCap, and existing and potential ResCap-related causes of action against Ally held by third parties. These releases, if approved by the Bankruptcy Court, would result in Ally being released from any and all potential liability with respect to the Remaining Cases. If the Plan is not approved, or if a Plan is approved that does not include third-party releases, the Remaining Cases would proceed against the Ally defendants. If this occurred, we would vigorously defend them.

Other Contingencies

We are subject to potential liability under various other exposures including tax, nonrecourse loans, self-insurance, and other miscellaneous contingencies. We establish reserves for these contingencies when the item becomes probable and the costs can be reasonably estimated. The actual costs of resolving these items may be substantially higher or

lower than the amounts reserved for any one item. Based on information currently available, it is the opinion of management that the eventual outcome of these items will not have a material adverse impact on our results of operations, financial position, or cash flows.

26. Subsequent Events

Declaration of Quarterly Dividend Payments

On July 10, 2012, the Ally Board of Directors declared quarterly dividend payments on certain outstanding preferred stock. This included a cash dividend of \$1.125 per share, or a total of \$134 million, on Fixed Rate Cumulative Mandatorily Convertible Preferred Stock, Series F-2; a cash dividend of \$17.50 per share, or a total of \$45 million, on Fixed Rate Cumulative Perpetual Preferred Stock, Series G; and a cash dividend of \$0.53 per share, or a total of \$22 million, on Fixed Rate/Floating Rate Perpetual Preferred Stock, Series A. The dividends are payable on August 15, 2012.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Selected Financial Data

The selected historical financial information set forth below should be read in conjunction with Management's Discussion and Analysis (MD&A) of Financial Condition and Results of Operations, our Condensed Consolidated Financial Statements, and the Notes to Condensed Consolidated Financial Statements. The historical financial information presented may not be indicative of our future performance.

The following table presents selected statement of income data.

	Three months ended June 30,		Six months ended June 30,	
(\$ in millions)	2012	2011	2012	2011
Total financing revenue and other interest income	\$2,412	\$2,483	\$4,812	\$4,961
Interest expense	1,312	1,589	2,750	3,253

Total other revenue	928	1,057	2,115	2,065
Total net revenue	1,710	1,775	3,566	3,327
Provision for loan losses	29	50	169	163
Total noninterest expense	2,530	1,534	3,880	2,874
(Loss) income from continuing operations before income tax expense	(849)	) 191	(483)	) 290
Income tax expense from continuing operations	15	83	79	13
Net (loss) income from continuing operations	(864)	) 108	(562)	) 277
(Loss) income from discontinued operations, net of tax	(34)	) 5	(26)	) (18)
Net (loss) income	\$(898)	) \$113	\$(588)	) \$259
Basic and diluted earnings per common share:				
Net loss from continuing operations	\$(800)	) \$(62)	) \$(723)	) \$(64)
Net loss	(825)	) (58)	) (743)	) (78)
Non-GAAP financial measures (a):				
Net (loss) income	\$(898)	) \$113	\$(588)	) \$259
Add: Original issue discount amortization expense (b)	96	274	204	600
Add: Income tax expense from continuing operations	15	83	79	13
Less: (Loss) income from discontinued operations, net of tax	(34)	) 5	(26)	) (18)
Core pretax (loss) income (a)	\$(753)	) \$465	\$(279)	) \$890

Core pretax income is not a financial measure defined by accounting principles generally accepted in the United States of America (GAAP). We define core pretax income as earnings from continuing operations before income taxes, original issue discount amortization expense primarily associated with our 2008 bond exchange, and the gain on extinguishment of debt related to the 2008 bond exchange. We believe that the presentation of core pretax (a) income is useful information for the users of our financial statements in understanding the earnings from our core businesses. In addition, core pretax income is the primary measure that management uses to assess the performance of our operations. We believe that core pretax income is a useful alternative measure of our ongoing profitability and performance, when viewed in conjunction with GAAP measures. The presentation of this additional information is not a substitute for net income determined in accordance with GAAP.

(b) Primarily represents original issue discount amortization expense associated with the 2008 bond exchange, including accelerated amortization of \$20 million and \$50 million for the three months and six months ended June 30, 2011 that was reported as a loss on extinguishment of debt in the Condensed Consolidated Statement of Comprehensive Income.

The efficiency ratio equals total other noninterest expense divided by total net revenue. The core efficiency ratio equals total other noninterest expense divided by total net revenue excluding original issue discount amortization (a) expense. As a result of the bankruptcy filings described in Notes 1 and 25 to the Condensed Consolidated Financial Statements, total other noninterest expense for the three months and six months ended June 30, 2012, was adversely affected. Refer to Note 4 to the Condensed Consolidated Financial Statements for further details.

(b)

Net interest spread represents the difference between the rate on total interest-earning assets and the rate on total interest-bearing liabilities, excluding discontinued operations for the periods shown.

(c) Net yield on interest-earning assets represents net financing revenue as a percentage of total interest-earning assets.

(d) Tier 1 capital generally consists of common equity, minority interests, qualifying noncumulative preferred stock, and the fixed rate cumulative preferred stock sold to Treasury under TARP, less goodwill and other adjustments.

Total risk-based capital is the sum of Tier 1 and Tier 2 capital. Tier 2 capital generally consists of preferred stock

(e) not qualifying as Tier 1 capital, limited amounts of subordinated debt and the allowance for loan losses, and other adjustments. The amount of Tier 2 capital may not exceed the amount of Tier 1 capital.

Tier 1 leverage equals Tier 1 capital divided by adjusted quarterly average total assets (which reflects adjustments

(f) for disallowed goodwill and certain intangible assets). The minimum Tier 1 leverage ratio is 3% or 4% depending on factors specified in the regulations.

We define Tier 1 common as Tier 1 capital less noncommon elements, including qualifying perpetual preferred stock, minority interest in subsidiaries, trust preferred securities, and mandatorily convertible preferred securities.

Ally considers various measures when evaluating capital utilization and adequacy, including the Tier 1 common equity ratio, in addition to capital ratios defined by banking regulators. This calculation is intended to complement the capital ratios defined by banking regulators for both absolute and comparative purposes. Because GAAP does

(g) not include capital ratio measures, Ally believes there are no comparable GAAP financial measures to these ratios.

Tier 1 common equity is not formally defined by GAAP or codified in the federal banking regulations and,

therefore, is considered to be a non-GAAP financial measure. Ally believes the Tier 1 common equity ratio is important because we believe analysts and banking regulators may assess our capital adequacy using this ratio.

Additionally, presentation of this measure allows readers to compare certain aspects of our capital adequacy on the same basis to other companies in the industry.

(h) Risk-weighted assets are defined by regulation and are determined by allocating assets and specified off-balance sheet financial instruments into several broad risk categories.

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Overview

Ally Financial Inc. (formerly GMAC Inc.) is a leading, independent, globally diversified, financial services firm. Founded in 1919, we are a leading automotive financial services company with over 90 years experience providing a broad array of financial products and services to automotive dealers and their customers. We became a bank holding company on December 24, 2008, under the Bank Holding Company Act of 1956, as amended. Our banking subsidiary, Ally Bank, is an indirect wholly owned subsidiary of Ally Financial Inc. and a leading franchise in the growing direct (online and telephonic) banking market.

Discontinued Operations

During 2011, we committed to sell certain operations of our International Automotive Finance operations, Insurance operations, and Mortgage operations, and have classified certain of these operations as discontinued. For all periods presented, all of the operating results for these operations were removed from continuing operations. Refer to Note 2 to the Condensed Consolidated Financial Statements for additional information regarding our discontinued operations.

Primary Lines of Business

Our primary lines of business are Global Automotive Services and Mortgage operations. The following table summarizes the operating results excluding discontinued operations of each line of business for the three months and six months ended June 30, 2012 and 2011. Operating results for each of the lines of business are more fully described in the MD&A sections that follow.

(\$ in millions)	Three months ended June 30,			Six months ended June 30,

Our Global Automotive Services operations offer a wide range of financial services and products to retail automotive consumers and automotive dealerships. Our Global Automotive Services consist of three separate reportable segments — North American Automotive Finance operations, International Automotive Finance operations, and Insurance operations. On May 14, 2012, we announced that we have determined to explore strategic alternatives for all of our international operations. These international operations include automotive finance, insurance, and banking and deposit operations that operate within our North American Automotive Finance operations, International Automotive Finance operations, and Insurance operations operating segments.

Our North American Automotive Finance operations include the automotive activities of Ally Bank and ResMor Trust. Our automotive finance services include acquiring or providing retail installment sales contracts, loans, and leases, offering term loans to dealers, financing dealer floorplans and other lines of credit to dealers, fleet leasing, and vehicle remarketing services.

Our Insurance operations offer both consumer finance and insurance products sold primarily through the automotive dealer channel and commercial insurance products sold to dealers. As part of our focus on offering dealers a broad range of consumer finance and insurance products, we provide vehicle service contracts, and maintenance coverage. Our international presence is focused in five core markets: Germany, the United Kingdom, Brazil, Mexico, and China through

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

our joint venture, GMAC-SAIC Automotive Finance Company Limited (GMAC-SAIC).

On June 27, 2012, we announced that Mitsubishi Motors North America, Inc. has selected Ally as the preferred financing provider for Mitsubishi's 100 percent electric-powered Mitsubishi i vehicle model. As a preferred financing provider, Ally Financial will begin offering leasing for other Mitsubishi Motors' vehicles.

On May 22, 2012, we announced that Forest River, Inc., a leading RV manufacturer, has selected Ally Financial as an additional provider for dealer inventory financing in the U.S. In addition, we will also offer dealer real estate and commercial loans, inventory insurance, remarketing services for RV trade-ins, and consumer financing to support new and used RV sales.

On April 25, 2012, Chrysler provided us with notification of nonrenewal for the existing agreement governing the exclusivity privileges related to certain of its retail financing subvention programs (for further discussion on our agreement, refer to our Annual Report on Form 10-K for the year ended December 31, 2011, Item 1, Business - Manufacturer Relationships). As a result of this notification, the agreement will expire on April 30, 2013. The nonrenewal of the existing contract does not preclude the two companies from continuing to work together in the future.

On March 22, 2012, we announced that MG Motor UK selected Ally as the preferred wholesale provider for dealerships in the United Kingdom. This agreement expands on the existing preferred retail financing relationship established in 2011.

Our remaining Mortgage operations are conducted through the mortgage operations of Ally Bank.

On May 14, 2012, Residential Capital, LLC (ResCap) and certain of its wholly owned direct and indirect subsidiaries (collectively, the Debtors) filed voluntary petitions for relief under Chapter 11 of the Bankruptcy Code in the United States Bankruptcy Court for the Southern District of New York. In connection with the filings, Ally Financial Inc. and its direct and indirect subsidiaries and affiliates (excluding the Debtors and their direct and indirect subsidiaries) reached an agreement with the Debtors and certain creditor constituencies on a prearranged Chapter 11 plan. Refer to Note 1 to the Condensed Consolidated Financial Statements for more information regarding the Bankruptcy.

Ally Bank will continue to hold and originate its held-for-investment mortgage loan portfolio (jumbo and prime conforming loans). Ally Bank has decided to exit the warehouse lending business; and accordingly, is not taking on new warehouse lending clients. Ally Bank is committed to an orderly wind-down of these existing activities by the end of the year.

Corporate and Other primarily consists of our centralized corporate treasury and deposit gathering activities, such as management of the cash and corporate investment securities portfolios, short- and long-term debt, retail and brokered deposit liabilities, derivative instruments, the amortization of the discount associated with new debt issuances and bond exchanges, most notably from the December 2008 bond exchange, and the residual impacts of our corporate funds-transfer pricing (FTP) and treasury asset liability management (ALM) activities. Corporate and Other also includes our Commercial Finance Group, certain equity investments, and reclassifications and eliminations between the reportable operating segments. Our Commercial Finance Group provides senior secured commercial-lending products to primarily U.S.-based middle market companies.

n/m = not meaningful

We incurred a net loss from continuing operations of \$864 million for the three months ended June 30, 2012, compared to net income from continuing operations of \$108 million for the three months ended June 30, 2011, and a net loss from continuing operations of \$562 million for the six months ended June 30, 2012, compared to net income from continuing operations of \$277 million for the six months ended June 30, 2011. Net income from continuing operations for the three months and six months ended June 30, 2012, was unfavorably impacted by a \$1.2 billion charge related to the Debtors' Chapter 11 filing. Refer to Note 1 to the Condensed Consolidated Financial Statements for additional information related to ResCap. This charge was partially offset during both periods in 2012 by lower original issue discount (OID) amortization expense related to bond maturities and normal monthly amortization and an

increase in consumer automotive financing revenue related to strong loan origination volume.

Total financing revenue and other interest income decreased by 3% for both the three months and six months ended June 30, 2012, compared to the same periods in 2011. The decreases at our Mortgage operations resulted primarily from the deconsolidation of ResCap effective May 14, 2012. Operating lease revenue at our North American Automotive Finance operations decreased due to a change in portfolio mix primarily associated with the continued wind-down of legacy lease assets. These declines were partially offset by an increase in consumer financing revenue at our North American Automotive operations driven primarily by strong loan origination volume, resulting primarily from increased volumes of used vehicle automotive financing and higher automotive industry sales, as well as limited use of whole-loan sales as a funding source in recent periods. Additionally, we continue to prudently expand our nonprime origination volume.

Interest expense decreased 17% and 15% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011. OID amortization expense decreased \$157 million and \$345 million for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011, due to bond maturities and normal monthly amortization. Additionally, interest expense decreased at our Mortgage operations due to the deconsolidation of ResCap and lower funding costs.

Depreciation expense on operating lease assets increased 81% and 37% for the three months and six months ended June 30, 2012,

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

respectively, compared to the same periods in 2011, primarily due to lower lease remarketing gains as a result of lower lease termination volume.

Net servicing income was \$143 million and \$462 million for the three months and six months ended June 30, 2012, respectively, compared to \$236 million and \$506 million for the same periods in 2011. The decreases were primarily due to the deconsolidation of ResCap and lower levels of off-balance sheet automotive retail serviced assets.

Insurance premiums and service revenue earned decreased 10% and 8% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011, primarily due to declining U.S. vehicle service contracts written between 2007 and 2009.

Gain on mortgage and automotive loans increased 16% and 26% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011. The increases were primarily due to higher consumer mortgage lending-production and margins associated with government-sponsored refinancing programs, higher margins on warehouse and correspondent lending due to decreased competition and more selective originations from these channels, and improved gains on specified pooled loans.

Loss on extinguishment of debt decreased \$25 million and \$64 million for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011. The activity in 2011 included \$20 million and \$50 million of accelerated amortization of original issue discount related to the extinguishment of certain Ally debt for the three months and six months ended June 30, 2011.

Other gain on investments, net, decreased 28% and 11% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011, primarily due to lower realized investment gains.

Other income, net of losses, decreased 5% and increased 14% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011. The increase during the six months ended June 30, 2012, was primarily due to higher fee income and net origination revenue related to increased consumer mortgage-lending production associated with government-sponsored refinancing programs and a decrease in fair value option election valuation losses related to the deconsolidation of ResCap. This increase was partially offset by the absence of a \$121 million gain on the early settlement of a loss holdback provision related to certain historical automotive whole-loan forward flow agreements recognized during 2011.

The provision for loan losses was \$29 million and \$169 million for the three months and six months ended June 30, 2012, respectively, compared to \$50 million and \$163 million for the same periods in 2011. The decrease for the three months ended June 30, 2012, was driven primarily by lower net charge-offs and a related overall favorable credit risk profile.

Compensation and benefits expense decreased 6% and increased 3% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011. The decrease during the three months ended June 30, 2012, was primarily related the deconsolidation of ResCap. The decrease was partially offset during the three months ended June 30, 2012, by an increase in expense associated with the acceleration of the vesting of our share-based compensation awards. Additionally, the six months ended June 30, 2012, increased due to a revaluation adjustment of our share-based compensation awards and an increase in headcount within our Mortgage operations due to higher consumer-lending production.

Insurance losses and loss adjustment expenses decreased 8% during both the three months and six months ended June 30, 2012, compared to the same periods in 2011. The decreases were primarily driven by decreased volume of our U.S. extended service contracts and lower non-weather-related losses from our international business. These decreases were partially offset by higher weather-related losses in the United States on our dealer inventory insurance products.

Other operating expenses increased 117% and 62% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011, primarily due to a \$1.2 billion charge related to the Debtors' Chapter 11 filing, regulatory penalties imposed in foreclosure-related matters of \$90 million during the three months ended June 30, 2012, and higher professional services expense. These increases were partially offset by lower mortgage representation and warranty expense related to the deconsolidation of ResCap and lower state and local

non-income taxes.

Income tax expense from continuing operations was \$15 million and \$79 million for the three months and six months ended June 30, 2012, respectively, compared to income tax expense of \$83 million and \$13 million for the same periods in 2011. The decrease in income tax expense for the three months ended June 30, 2012, compared to the same period in 2011, was primarily related to a \$23 million benefit recorded for reversal of a valuation allowance on net deferred tax assets in our Italian subsidiary and a \$26 million benefit stemming from the application of intraperiod tax allocation guidelines. The increase in tax expense for the six months ended June 30, 2012, compared to the same period in 2011, was due to a non-recurring 2011 benefit of \$101 million related to the reversal of valuation allowance on net deferred tax assets in one of our Canadian subsidiaries.

In calculating the provision for income taxes, we apply an estimated annual effective tax rate to year-to-date ordinary income. We have a full valuation allowance against our domestic net deferred tax assets and certain international net deferred tax assets. Accordingly, income tax expense is driven by foreign income taxes on pretax profits within our foreign operations and U.S. state income taxes in states where profitable subsidiaries are required to file separately from other loss companies in the group or where the use of prior losses is restricted.

Global Automotive Services

Results for Global Automotive Services are presented by reportable segment, which includes our North American Automotive Finance operations, our International Automotive Finance operations, and our Insurance operations. Our Global Automotive Services operations offer a wide range of financial services and insurance products to retail automotive consumers and automotive dealerships. Our automotive finance services include acquiring or providing retail installment sales contracts, loans and leases, offering term loans to dealers, financing dealer floorplans and other lines of credit to dealers, fleet leasing, and vehicle remarketing services. We also are a leading provider of vehicle service contracts with mechanical breakdown and maintenance coverages, and we provide commercial insurance primarily covering dealers' wholesale vehicle inventory.

North American Automotive Finance Operations

Results of Operations

The following table summarizes the operating results of our North American Automotive Finance operations for the periods shown. North American Automotive Finance operations consist of automotive financing in the United States and Canada and include the automotive activities of Ally Bank and ResMor Trust. The amounts presented are before the elimination of balances and transactions with our other reportable segments.

n/m = not meaningful

Our North American Automotive Finance operations earned income before income tax expense of \$631 million and \$1.1 billion for the three months and six months ended June 30, 2012, respectively, compared to \$559 million and \$1.1 billion for the three months and six months ended June 30, 2011, respectively. The increase for the three months ended June 30, 2012 was due primarily to lower provision for loan losses, higher gains on the sale of automotive loans, and higher consumer revenue as a result of increased volume and lower operating expenses. These increases were partially offset by lower operating lease remarketing gains due to lower lease terminations, lower servicing

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

fees, and lower lease remarketing income.

Consumer financing revenue increased 15% and 14% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011. The increases were due to an increase in consumer asset levels primarily to strong loan origination volume, resulting primarily from increased volumes of used vehicle automotive financing and higher automotive industry sales, as well as limited use of whole-loan sales as a funding source in recent periods. Additionally, we continue to prudently expand our nonprime origination volume. The increase in consumer revenue from volume was partially offset by lower yields as a result of the competitive market environment for automotive financing.

Operating lease revenue decreased 3% and 11% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011. The decreases were primarily due to a change in portfolio mix associated with the continued wind-down of legacy lease assets. The decrease for the three months ended June 30, 2012 was partially offset by higher leasing volume.

Depreciation expense on operating lease assets increased 85% and 38% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011, primarily due to lower lease remarketing gains as a result of lower lease termination volume. The increase for the three months ended June 30, 2012 was also a result of higher leasing volume.

Servicing fee income decreased 29% and 31% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011, primarily due to lower levels of off-balance sheet retail serviced assets.

Gains on the sale of automotive loans increased \$24 million for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011, driven by the sale of approximately \$2.0 billion of retail automotive loans during the six months ended June 30, 2012 compared to approximately \$1.3 billion during the six months ended June 30, 2011. We continue to opportunistically utilize whole-loan sales as a source of funding.

Other income decreased 21% and 22% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011, primarily due to lower remarketing fee income driven by lower remarketing volumes through our proprietary SmartAuction platform.

The provision for loan losses was \$16 million and \$94 million for the three months and six months ended June 30, 2012, respectively, compared to \$55 million and \$101 million for the same periods in 2011. The decreases for the three months and six months ended June 30, 2012, were primarily due to lower net charge-offs as a result of continued strong overall portfolio credit quality and favorable pricing in the used vehicle market, as well as continued favorable trends in the commercial portfolio, partially offset by continued growth in the consumer and commercial portfolios.

Other operating expenses decreased 27% and 20% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011. The decreases were primarily driven by favorable state and local tax expense, lower expense related to automotive manufacturer exclusivity arrangements, and lower costs associated with reduced lease termination volumes, including lower vehicle remarketing expenses.

Total noninterest expense	143	152	6	281	308	9
Income from continuing operations before income tax expense	\$72	\$69	4	\$117	\$100	17
Total assets	\$15,467	\$16,582	(7)	\$15,467	\$16,582	(7)
Operating data						
Consumer originations (a) (b)	\$2,306	\$2,267	2	\$4,599	\$4,165	10

(a) Represents consumer originations for continuing operations only.

Includes vehicles financed through our joint venture GMAC-SAIC, which is recorded as other income. We own (b) 40% of GMAC-SAIC alongside Shanghai Automotive Group Finance Company LTD and Shanghai General Motors Corporation LTD.

Our International Automotive Finance operations earned income from continuing operations before income tax expense of \$72 million and \$117 million for the three months and six months ended June 30, 2012, respectively, compared to \$69 million and \$100 million for the three months and six months ended June 30, 2011. The increases were primarily a result of lower operating expenses driven by lower legal costs in Latin America, our continued focus on cost reduction, and higher income earned from our China joint venture. These increases were partially offset by higher provision for loan losses due to unfavorable credit performance in certain countries in Latin America and unfavorable movements in foreign-currency exchange rates.

Total financing revenue and other interest income decreased \$44 million and \$47 million for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011. The decreases were primarily due to unfavorable movements in foreign-currency exchange rates, which were partially offset by stronger consumer originations, primarily in Brazil.

Interest expense decreased \$40 million and \$41 million for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011, primarily due to movements in foreign-currency exchange rates.

Other income increased 5% and 10% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011, primarily due to higher earnings from our China joint venture.

The provision for loan losses increased \$8 million and \$18 million for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011. The increase in provision is related to increased reserves as a result of a cautious

economic outlook primarily in Latin America.

Other operating expenses decreased 7% and 12% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011, primarily due to lower legal expenses in Latin America.

(a) Excludes financing volume and GM consumer sales of discontinued operations, as well as GM consumer sales for other countries in which GM operates and in which we have no financing volume.

(b) Represents vehicles financed through our joint venture GMAC-SAIC. We own 40% of GMAC-SAIC alongside Shanghai Automotive Group Finance Company LTD and Shanghai General Motors Corporation LTD.

Consumer automotive financing volume remained relatively flat during the three months and six months ended June 30, 2012, compared to the same periods in 2011. Lower origination volume at GM was offset by used, Chrysler, and non-GM/Chrysler originations. The decrease in North American GM penetration was due to a change in automotive manufacturers' incentive strategy and a decrease in Ally-exclusive incentives. The decrease in North American Chrysler penetration was the result of increased competition, partially offset by an increase in overall Chrysler volume. Increased non-GM/Chrysler and used volume were the result of our continued strategic focus in these markets. The increases and favorable penetration levels in our International operations were primarily due to aggressive GM manufacturer marketing incentive programs coupled with existing Ally campaigns.

Ally Financial Inc. • Form 10-Q

Manufacturer Marketing Incentives

The following table presents the percentage of retail and lease contracts acquired by us that included rate support from GM.

Six months ended June 30,	2012	2011	
GM subvented volume in North America			
As % of GM North American new retail and lease volume acquired by Ally	65	% 49	%
As % of total North American new and used retail and lease volume acquired by Ally	26	% 25	%
GM subvented International (excluding China) volume (a)			
As % of GM International new retail and lease volume acquired by Ally	71	% 64	%
As % of total International new and used retail and lease volume acquired by Ally	64	% 56	%
GM subvented volume in China (b)			
As % of GM China new retail and lease volume acquired by Ally	6	% 4	%
As % of total China new and used retail and lease volume acquired by Ally	3	% 2	%

(a) Represents subvention for continuing operations only.

(b) Represents vehicles financed through our joint venture GMAC-SAIC. We own 40% of GMAC-SAIC alongside Shanghai Automotive Group Finance Company LTD and Shanghai General Motors Corporation LTD.

The following table presents the percentage of Chrysler subvented retail and lease volume acquired by Ally.

Six months ended June 30,	2012	2011	
Chrysler subvented volume in North America			
As % of Chrysler North American new retail and lease volume acquired by Ally	52	% 52	%
As % of total North American new and used retail and lease volume acquired by Ally	11	% 9	%

During the six months ended June 30, 2012, North American retail contracts acquired that included rate subvention from GM and Chrysler increased as a percentage of total new retail contracts acquired as compared to the same period in 2011 due to a change in the mix of manufacturer marketing incentives away from non-rate programs. International retail contracts acquired from GM that included rate and residual subvention increased as a result of aggressive GM campaigns in various international markets.

For further discussion of manufacturing marketing incentives, refer to our Annual Report on Form 10-K for the year ended December 31, 2011, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations — Automotive Finance Operations.

International (excluding China)	176	157		
Total used vehicles financed	3,396	3,268		
Total commercial wholesale finance receivables	\$36,213	\$34,217		

(a) Share of dealer inventory based on a 7 month average of dealer inventory (excludes in-transit units).

(b) Share of dealer inventory based on wholesale financing share of GM shipments.

Excludes commercial wholesale finance receivables and dealer inventory of discontinued and wind-down operations as well as dealer inventory for other countries in which GM operates and we had no commercial wholesale finance receivables.

(d) Represents vehicles financed through our joint venture GMAC-SAIC. We own 40% of GMAC-SAIC alongside Shanghai Automotive Group Finance Company LTD and Shanghai General Motors Corporation LTD.

Commercial wholesale financing average volume increased for the three months and six months ended June 30, 2012, compared to the same periods in 2011, primarily due to growing dealer inventories required to support increasing global automobile sales. North American GM and Chrysler wholesale penetration decreased for the three months and six months ended June 30, 2012, compared to the same periods in 2011, due to increased competition in the wholesale marketplace.

Insurance Operations

Results of Operations

The following table summarizes the operating results of our Insurance operations excluding discontinued operations for the periods shown. The amounts presented are before the elimination of balances and transactions with our other reportable segments.

(\$ in millions)	Three months ended June 30,			Six months ended June 30,		
	2012	2011	Favorable/ (unfavorable) % change	2012	2011	Favorable/ (unfavorable) % change
Insurance premiums and other income						
Insurance premiums and service revenue earned	\$359	\$395	(9)	\$730	\$788	(7)
Investment income	47	70	(33)	129	149	(13)
Other income	25	18	39	40	31	29
Total insurance premiums and other income	431	483	(11)	899	968	(7)
Expense						
Insurance losses and loss adjustment expenses	205	221	7	360	378	5
Acquisition and underwriting expense						
Compensation and benefits expense	24	24	—	49	51	4
Insurance commissions expense	111	122	9	227	244	7
Other expenses	48	44	(9)	96	92	(4)
Total acquisition and underwriting expense	183	190	4	372	387	4
Total expense	388	411	6	732	765	4
Income from continuing operations before income tax expense	\$43	\$72	(40)	\$167	\$203	(18)
Total assets	\$8,237	\$8,533	(3)	\$8,237	\$8,533	(3)
Insurance premiums and service revenue written	\$386	\$397	(3)	\$759	\$771	(2)
Combined ratio (a)	103.2	% 101.7	%	96.4	% 94.6	%

Management uses a combined ratio as a primary measure of underwriting profitability with its components measured using accounting principles generally accepted in the United States of America. Underwriting (a) profitability is indicated by a combined ratio under 100% and is calculated as the sum of all incurred losses and expenses (excluding interest and income tax expense) divided by the total of premiums and service revenues earned and other income.

Our Insurance operations earned income from continuing operations before income tax expense of \$43 million and \$167 million for the three months and six months ended June 30, 2012, respectively, compared to \$72 million and \$203 million for the three months and six months ended June 30, 2011, respectively. The decreases were primarily attributable to lower insurance premiums and service revenue earned from our U.S. vehicle service contracts and lower investment income.

Insurance premiums and service revenue earned decreased 9% and 7% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011, primarily due to declining U.S. vehicle service contracts written between 2007 and 2009.

Investment income totaled \$47 million and \$129 million for the three months and six months ended June 30, 2012, respectively, compared to \$70 million and \$149 million for the same periods in 2011. The decreases were primarily due to lower realized investment gains. The fair value of the investment portfolio was \$4.2 billion and \$4.6 billion at June 30, 2012 and 2011, respectively.

Other income increased \$7 million and \$9 million for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011, primarily due to a gain on the sale of our Canadian personal lines agency during the second quarter of 2012.

Insurance losses and loss adjustment expenses totaled \$205 million and \$360 million for the three months and six months ended June 30, 2012, respectively, compared to \$221 million and \$378 million for the three months and six months ended June 30, 2011, respectively. The decreases were driven primarily by decreased volume of our U.S. extended service contracts and lower non-weather-related losses from our international business. These decreases were partially offset by higher weather-related losses in the United States on our dealer inventory insurance products. Acquisition and underwriting expense decreased 4% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011. The decreases were primarily due to lower commission expense in our U.S. dealership-related products matching our decrease in earned premiums.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

The following table shows premium and service revenue written by insurance product.

(\$ in millions)	Three months ended		Six months ended	
	June 30,		June 30,	
	2012	2011	2012	2011
Vehicle service contracts				
New retail	\$109	\$93	\$204	\$183
Used retail	133	137	267	266
Reinsurance	(31)	(24)	(62)	(49)
Total vehicle service contracts	211	206	409	400
Wholesale	31	30	51	52
Other finance and insurance (a)	41	41	73	71
North American operations	283	277	533	523
International operations	103	120	226	248
Total	\$386	\$397	\$759	\$771

(a) Other finance and insurance includes Guaranteed Automobile Protection (GAP) coverage, excess wear and tear, and other ancillary products.

Insurance premiums and service revenue written was \$386 million and \$759 million for the three months and six months ended June 30, 2012, respectively, compared to \$397 million and \$771 million for the same periods in 2011. Insurance premiums and service revenue written decreased due to lower volume in our international business partially offset by higher written premiums in our U.S. vehicle service contract products. Vehicle service contract revenue is earned over the life of the service contract on a basis proportionate to the anticipated cost pattern. Accordingly, the majority of earnings from vehicle service contracts written during the three months and six months ended June 30, 2012, will be recognized as income in future periods.

Cash and Investments

A significant aspect of our Insurance operations is the investment of proceeds from premiums and other revenue sources. We use these investments to satisfy our obligations related to future claims at the time these claims are settled. Our Insurance operations have an Investment Committee, which develops guidelines and strategies for these investments. The guidelines established by this committee reflect our risk tolerance, liquidity requirements, regulatory requirements, and rating agency considerations, among other factors.

The following table summarizes the composition of our Insurance operations cash and investment portfolio at fair value.

(\$ in millions)	June 30, 2012	December 31, 2011
Cash		
Noninterest-bearing cash	\$206	\$211
Interest-bearing cash	1,105	629

Total assets	\$17,146	\$31,323	(45)	\$17,146	\$31,323	(45)

n/m = not meaningful

Our Mortgage operations earned income from continuing operations before income tax expense of \$24 million and \$215 million for the three months and six months ended June 30, 2012, respectively, compared to losses from continuing operations before income tax expense of \$125 million and \$82 million for the three months and six months ended June 30, 2011, respectively. During 2012 we earned higher fee income and net origination revenue related to increased consumer mortgage-lending production associated with government-sponsored refinancing programs and higher net gains on the sale of mortgage loans. Additionally, we incurred lower representation and warranty expense resulting from the deconsolidation of ResCap during the second quarter of 2012. Refer to Note 1 to the Condensed Consolidated Financial Statements for further information regarding ResCap.

Net financing revenue was \$33 million and \$90 million for the three months and six months ended June 30, 2012, respectively, compared to \$69 million and \$129 million for the same periods in 2011. The decreases in net financing revenue were primarily due to the deconsolidation of ResCap during the second quarter of 2012. Additionally, total financing revenue and other interest income decreased during both periods due to lower average yield mix as higher rate Ally Bank mortgage loans run off. Partially offsetting the decreases was lower interest expense related to lower

funding costs.

Total servicing income, net was \$113 million and \$402 million for the three months and six months ended June 30, 2012, respectively, compared to \$195 million and \$419 million for the same periods in 2011. The decreases in total servicing income were primarily related to the deconsolidation of ResCap.

The net gain on mortgage loans increased 32% and 39% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011. The increases were primarily due to higher consumer mortgage lending-production and margins associated with government-sponsored refinancing programs, higher margins on warehouse and correspondent lending due to decreased competition and more selective originations from these channels, and improved gains on specified pooled loans.

Other income, net of losses, was \$127 million and \$254 million for the three months and six months ended June 30, 2012, respectively,

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

compared to \$30 million and \$69 million for the same periods in 2011. The increases were primarily due to higher fee income and net origination revenue related to increased consumer mortgage lending-production associated with government-sponsored refinancing programs and a decrease in fair value option election valuation losses resulting from the deconsolidation of ResCap.

The provision for loan losses was \$21 million and \$48 million for the three months and six months ended June 30, 2012, respectively, compared to \$37 million and \$84 million for the same periods in 2011. The decreases for the three months and six months ended June 30, 2012, were primarily due to lower net charge-offs in 2012 due to the continued runoff of legacy mortgage assets.

Total noninterest expense decreased 26% and 7% for the three months and six months ended June 30, 2012, respectively, compared to the same periods in 2011. The decreases were primarily driven by lower representation and warranty expense resulting from the deconsolidation of ResCap. The decreases were partially offset by regulatory penalties imposed in foreclosure-related matters of \$90 million during the three months ended June 30, 2012.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Mortgage Loan Production and Servicing

Mortgage loan production was \$5.9 billion and \$14.5 billion for the three months and six months ended June 30, 2012, compared to \$12.6 billion and \$24.8 billion for the same periods in 2011. Loan production decreased \$6.7 billion, or 53%, and \$10.2 billion, or 41%, for the three months and six months ended June 30, 2012, compared to the same periods in 2011. The declines in loan production were largely driven by our reduced presence in the correspondent lending channel, partially offset by increased volume in our direct channels associated with government-sponsored refinancing programs.

The following tables summarize consumer mortgage loan production.

	2012		2011	
Three months ended June 30, (\$ in millions)	Number of loans	Dollar amount of loans	Number of loans	Dollar amount of loans

Fair value option election adjustment	38	60
Lower-of-cost or fair value adjustment	—	(60)
Total, net (c)	\$1,377	\$ 8,112

Includes loans subject to conditional repurchase options of \$0 million and \$2.3 billion sold to Ginnie

(a) Mae-guaranteed securitizations at June 30, 2012, and December 31, 2011, respectively. The corresponding liability is recorded in accrued expenses and other liabilities on the Condensed Consolidated Balance Sheet.

Includes unpaid principal write-down of \$0 million and \$1.5 billion at June 30, 2012, and December 31, 2011,

(b) respectively. The amounts are write-downs taken upon the transfer of mortgage loans from held-for-investment to held-for-sale during the fourth quarter of 2009 and charge-offs taken in accordance with our charge-off policy.

Includes loans subject to conditional repurchase options of \$0 million and \$106 million sold to off-balance sheet

(c) private-label securitizations at June 30, 2012, and December 31, 2011, respectively. The corresponding liability is recorded in accrued expenses and other liabilities on the Condensed Consolidated Balance Sheet.

Consumer mortgage loans held-for-investment were as follows.

(\$ in millions)	June 30, 2012	December 31, 2011
Prime conforming	\$257	\$ 278
Prime nonconforming	8,213	8,069
Prime second-lien	1,241	2,200
Government	—	—
Nonprime	—	1,349

Corporate and Other

The following table summarizes the activities of Corporate and Other excluding discontinued operations for the periods shown. Corporate and Other primarily consists of our centralized corporate treasury and deposit gathering activities, such as management of the cash and corporate investment securities portfolios, short- and long-term debt, retail and brokered deposit liabilities, derivative instruments, the amortization of the discount associated with new debt issuances and bond exchanges, most notably from the December 2008 bond exchange, and the residual impacts of our corporate funds-transfer pricing and treasury ALM activities. Corporate and Other also includes our Commercial Finance Group, certain equity investments, and reclassifications and eliminations between the reportable operating segments.

Other (including Commercial Finance Group net financing revenue)	19	27	38	56
Total net financing losses for Corporate and Other	\$(282)	\$(426)	\$(629)	\$(948)
Outstanding original issue discount balance	\$1,992	\$2,564	\$1,992	\$2,564

(a) Amortization is included as interest on long-term debt in the Condensed Consolidated Statement of Comprehensive Income.

The following table presents the scheduled remaining amortization of the original issue discount at June 30, 2012.

Year ended December 31, (\$ in millions)	2012 (a)	2013	2014	2015	2016	2017 and thereafter (b)	Total
Original issue discount							
Outstanding balance	\$1,852	\$1,586	\$1,393	\$1,335	\$1,272	\$—	
Total amortization (c)	140	266	193	58	63	1,272	\$1,992
2008 bond exchange amortization (d)	124	241	166	43	53	1,125	1,752

(a) Represents the remaining future original issue discount amortization expense to be recorded during 2012.

(b) The maximum annual scheduled amortization for any individual year is \$158 million in 2030 of which \$152 million is related to 2008 bond exchange amortization.

(c) The amortization is included as interest on long-term debt on the Condensed Consolidated Statement of Comprehensive Income.

(d) 2008 bond exchange amortization is included in total amortization.

Loss from continuing operations before income tax expense for Corporate and Other was \$1.6 billion and \$2.1 billion for the three months and six months ended June 30, 2012, respectively, compared to \$384 million and \$1.0 billion for the three months and six months ended June 30, 2011, respectively. Corporate and Other's loss from continuing operations before income tax expense is driven by net financing losses, which primarily represents original issue discount amortization expense and the net impact of our FTP methodology, which includes the unallocated cost of maintaining our liquidity and investment portfolios and other unassigned funding costs and unassigned equity.

The higher losses from continuing operations before income tax expense for the three months and six months ended June 30, 2012, were primarily due to a \$1.2 billion charge related to the Debtors' Chapter 11 filing. Refer to Note 1 to the Condensed Consolidated Financial Statements for additional information related to ResCap. Additionally, the higher losses were impacted by the absence of a \$121 million gain on the early settlement of a loss holdback provision related to certain historical automotive whole-loan forward flow agreements recognized during 2011. Partially offsetting the higher losses were decreases in OID amortization expense related to bond maturities and normal monthly amortization. Additionally, we incurred no accelerated amortization of OID for the three months and six months ended June 30, 2012, compared to \$20 million and \$50 million for the three months and six months ended June 30, 2011, respectively.

Corporate and Other also includes the results of our Commercial Finance Group. Our Commercial Finance Group earned income from continuing operations before income tax expense of \$33 million and \$64 million for the three months and six months ended June 30, 2012, respectively, compared to \$82 million and \$133 million for the three months and six months ended June 30, 2011, respectively. The decrease was primarily related to 2012 recoveries of previously charged-off finance receivables and loans having a less favorable impact on provision expense than the 2011 release of specific reserves and a decrease in non-specific loss reserves driven by a decline in the size of the loan portfolio.

Risk Management

Managing the risk to reward trade-off is a fundamental component of operating our businesses. Our risk management process is overseen by the Ally Board of Directors (the Board), various risk committees, and the executive leadership team. The Board sets the risk appetite across our company while the risk committees and executive leadership team identify and monitor potential risks and manage the risk to be within our risk appetite. Ally's primary risks include credit, market, lease residual, operational, liquidity, country, and legal and compliance risk. For more information on our risk management process, refer to the Risk Management MD&A section of our 2011 Annual Report on Form 10-K.

Loan and Lease Exposure

The following table summarizes the exposures from our loan and lease activities.

(\$ in millions)	June 30, 2012	December 31, 2011

Corporate and Other	1,411	1,762
Total serviced loans and leases	\$ 267,493	\$ 481,073

(a) Includes primary mortgage loan-servicing portfolio only.

The risks inherent in our loan and lease exposures are largely driven by changes in the overall economy, used vehicle and housing pricing, unemployment levels, and their impact to our borrowers. The potential financial statement impact of these exposures varies depending on the accounting classification and future expected disposition strategy. We retain the majority of our automobile loans as they complement our core business model, but we do sell loans from time to time on an opportunistic basis. We primarily originate mortgage loans with the intent to sell them and, as such, retain only a small percentage of the loans that we originate or purchase. Loans that we do not intend to retain are sold to investors, primarily securitizations guaranteed by GSEs. However, we may retain an interest or right to service these loans. We ultimately manage the associated risks based on the underlying economics of the exposure.

Credit Risk Management

Credit risk is defined as the potential failure to receive payments when due from a borrower in accordance with contractual obligations. Therefore, credit risk is a major source of potential economic loss to us. To mitigate the risk, we have implemented specific processes across all lines of business utilizing both qualitative and quantitative analyses. Credit risk is monitored by global and line of business committees and the Risk organization. Together they oversee aspects of the credit decisioning and management processes and monitor that credit risk exposures are managed in a safe-and-sound manner and are within our risk appetite. In addition, our Global Loan Review Group provides an

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

independent assessment of the quality of our credit portfolios and credit risk management practices, and directly reports its findings to the Risk and Compliance Committee on a recurring basis.

We have policies and practices that are committed to maintaining an independent and ongoing assessment of credit risk and quality. Our policies require an objective and timely assessment of the overall quality of the consumer and commercial loan and lease portfolios. This includes the identification of relevant trends that affect the collectability of the portfolios, segments of the portfolios that are potential problem areas, loans and leases with potential credit weaknesses, and assessment of the adequacy of internal credit risk policies and procedures to monitor compliance with relevant laws and regulations. In addition, we maintain limits and underwriting guidelines that reflect our risk appetite.

We manage credit risk based on the risk profile of the borrower, the source of repayment, the underlying collateral, and current market conditions. Our business is primarily focused on consumer automobile loans and leases and mortgage loans in addition to automobile-related commercial lending. We monitor the credit risk profile of individual borrowers and the aggregate portfolio of borrowers either within a designated geographic region or a particular product or industry segment. To mitigate risk concentrations, we may take part in loan sales and syndications.

Additionally, we have implemented numerous initiatives in an effort to mitigate loss and provide ongoing support to customers in financial distress. For automobile loans, we offer several types of assistance to aid our customers. Loss mitigation includes changing the due date, extending payments, and rewriting the loan terms. We have implemented these actions with the intent to provide the borrower with additional options in lieu of repossessing their vehicle. For mortgage loans, as part of our participation in certain governmental programs, we offer mortgage loan modifications to qualified borrowers.

During the first half of 2012, the U.S. economy continued to expand and the labor market recovered further, but at a slower pace. Within the U.S. automotive portfolio, encouraging trends include seasonally adjusted and annualized industry new vehicle sales above 14 million and strong pricing in used vehicles. Additionally, the housing market continues to show signs of a recovery with home prices increasing on a year-to-year basis. However, we continue to be cautious with the outlook due to weaker global economic growth and potential changes in the U.S. tax policy and federal government spending set to take effect in 2013.

On-balance Sheet Portfolio

Our on-balance sheet portfolio includes both finance receivables and loans and held-for-sale loans. At June 30, 2012, this primarily included \$107.1 billion of automobile finance receivables and loans and \$12.3 billion of mortgage finance receivables and loans. Within our on-balance sheet portfolio, we have elected to account for certain mortgage loans at fair value. The valuation allowance recorded on fair value-elected loans is separate from the allowance for loan losses. Changes in the fair value of loans are classified as gain on mortgage and automotive loans, net, in the Condensed Consolidated Statement of Comprehensive Income.

During the six months ended June 30, 2012, we further executed on our strategy of discontinuing and selling or liquidating nonstrategic operations. Refer to Note 2 to the Condensed Consolidated Financial Statements for additional information.

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

The following table presents our total on-balance sheet consumer and commercial finance receivables and loans reported at carrying value before allowance for loan losses.

(\$ in millions)	Outstanding		Nonperforming (a)		Accruing past due 90 days or more (b)	
	June 30, 2012	December 31, 2011	June 30, 2012	December 31, 2011	June 30, 2012	December 31, 2011
Consumer						
Finance receivables and loans						
Loans at historical cost	\$ 77,959	\$ 73,452	\$ 708	\$ 567	\$ 4	\$ 4
Loans at fair value	—	835	—	210	—	—
Total finance receivables and loans	77,959	74,287	708	777	4	4
Loans held-for-sale	2,000	8,537	5	2,820	—	73
Total consumer loans	79,959	82,824	713	3,597	4	77
Commercial						
Finance receivables and loans						
Loans at historical cost	41,954	40,468	287	339	—	—
Loans at fair value	—	—	—	—	—	—
Total finance receivables and loans	41,954	40,468	287	339	—	—
Loans held-for-sale	—	20	—	—	—	—
Total commercial loans	41,954	40,488	287	339	—	—
Total on-balance sheet loans	\$ 121,913	\$ 123,312	\$ 1,000	\$ 3,936	\$ 4	\$ 77

(a) Includes nonaccrual troubled debt restructured loans of \$326 million and \$934 million at June 30, 2012, and December 31, 2011, respectively.

Generally, loans that are 90 days past due and still accruing represent loans with government guarantees. This (b) includes no troubled debt restructured loans classified as 90 days past due and still accruing at June 30, 2012 and \$42 million at December 31, 2011.

Total on-balance sheet loans outstanding at June 30, 2012, decreased \$1.4 billion to \$121.9 billion from December 31, 2011 reflecting a decrease of \$2.9 billion in the consumer portfolio and an increase of \$1.5 billion in the commercial portfolio. The decrease in total on-balance sheet loans outstanding was primarily driven by the deconsolidation of ResCap, partially offset by strong automobile consumer loan originations and higher dealer floorplan loans, both primarily due to increased automotive industry sales. Refer to Note 1 to the Condensed Consolidated Financial Statements for additional information related to ResCap.

The total TDRs outstanding at June 30, 2012, decreased \$1.1 billion to \$832 million from December 31, 2011. The decrease was due to the deconsolidation of ResCap.

Total nonperforming loans at June 30, 2012, decreased \$2.9 billion to \$1.0 billion from December 31, 2011, reflecting a decrease of \$2.9 billion of consumer nonperforming loans and a decrease of \$52 million of commercial nonperforming loans. The decrease in total nonperforming loans from December 31, 2011, was primarily due to the deconsolidation of ResCap.

The following table includes consumer and commercial net charge-offs from finance receivables and loans at historical cost and related ratios reported at carrying value before allowance for loan losses.

(\$ in millions)	Three months ended June 30,				Six months ended June 30,			
	Net charge-offs (recoveries)		Net charge-off ratios (a)		Net charge-offs (recoveries)		Net charge-off ratios (a)	
	2012	2011	2012	2011	2012	2011	2012	2011

Consumer

Finance receivables and loans at historical cost	\$107	\$104	0.5	%	0.6	%	\$224	\$273	0.6	%	0.8	%
--	-------	-------	-----	---	-----	---	-------	-------	-----	---	-----	---

Commercial

Finance receivables and loans at historical cost	(19	)	17	(0.2	)	0.2	(29	)	37	(0.1	)	0.2
--	-----	---	----	------	---	-----	-----	---	----	------	---	-----

Total finance receivables and loans at historical cost	\$88	\$121	0.3		0.4		\$195	\$310	0.3		0.6	
--	------	-------	-----	--	-----	--	-------	-------	-----	--	-----	--

Net charge-off ratios are calculated as annualized net charge-offs divided by average outstanding finance (a)receivables and loans excluding loans measured at fair value and loans held-for-sale during the year for each loan category.

Net charge-offs were \$88 million and \$195 million for the three months and six months ended June 30, 2012, compared to \$121 million and \$310 million for the three months and six months ended June 30, 2011. The declines are largely due to recoveries in the commercial portfolio. Loans held-for-sale are accounted for at the lower-of-cost or fair value, and therefore we do not record charge-offs.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

The Consumer Credit Portfolio and Commercial Credit Portfolio discussions that follow relate to consumer and commercial finance receivables and loans recorded at historical cost. Finance receivables and loans recorded at historical cost have an associated allowance for loan losses. Finance receivables and loans measured at fair value were excluded from these discussions since those exposures are not accounted for within our allowance for loan losses.

Consumer Credit Portfolio

During the three months and six months ended June 30, 2012, the credit performance of the consumer portfolio remained strong as our nonperforming finance receivables and loans as a percentage of total outstanding consumer finance receivables and loans and charge-off rate were relatively stable. For information on our consumer credit risk practices and policies regarding delinquencies, nonperforming status, and charge-offs, refer to Note 1 to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K.

The following table includes consumer finance receivables and loans recorded at historical cost reported at carrying value before allowance for loan losses.

	Outstanding		Nonperforming (a)		Accruing past due 90 days or more (b)	
(\$ in millions)	June 30, 2012	December 31, 2011	June 30, 2012	December 31, 2011	June 30, 2012	December 31, 2011
Domestic						
Consumer automobile	\$50,697	\$46,576	\$189	\$139	\$—	\$—
Consumer mortgage						
1st Mortgage	7,030	6,867	375	258	2	1
Home equity	2,793	3,102	36	58	—	—
Total domestic	60,520	56,545	600	455	2	1
Foreign						
Consumer automobile	17,439	16,883	108	89	2	3
Consumer mortgage						
1st Mortgage	—	24	—	23	—	—
Home equity	—	—	—	—	—	—
Total foreign	17,439	16,907	108	112	2	3
Total consumer finance receivables and loans	\$77,959	\$73,452	\$708	\$567	\$4	\$4

(a) Includes nonaccrual troubled debt restructured loans of \$293 million and \$180 million at June 30, 2012, and December 31, 2011, respectively.

(b) There were no troubled debt restructured loans classified as 90 days past due and still accruing at June 30, 2012, and December 31, 2011.

Total consumer outstanding finance receivables and loans increased \$4.5 billion at June 30, 2012 compared with December 31, 2011. This increase was driven by automobile consumer loan originations, which outpaced portfolio runoff, primarily due to increased industry sales and growth in used and non-GM/Chrysler originations and aggressive GM manufacturer marketing incentive program.

Total consumer nonperforming finance receivables and loans at June 30, 2012, increased \$141 million to \$708 million from December 31, 2011, reflecting an increase of \$72 million of consumer mortgage nonperforming finance receivables and loans and an increase of \$69 million of consumer automobile nonperforming finance receivables and loans. Nonperforming consumer mortgage finance receivables and loans increased primarily due to increased TDRs as we continue foreclosure prevention and loss mitigation procedures along with our participation in a variety of government-sponsored refinancing programs. Refer to Note 8 to the Condensed Consolidated Financial Statements for additional information. Nonperforming consumer automotive finance receivables and loans increased due in part to higher outstandings and economic stresses in certain areas in Latin America. Nonperforming consumer finance receivables and loans as a percentage of total outstanding consumer finance receivables and loans were 0.9% and

0.8% at June 30, 2012 and December 31, 2011, respectively.

Consumer domestic automotive loans accruing and past due 30 days or more decreased \$94 million to \$689 million at June 30, 2012, compared with December 31, 2011, largely due to normal seasonal trends.

Total consumer finance receivables and loans	\$107	\$104	0.5	0.6	\$224	\$273	0.6	0.8

Net charge-off ratios are calculated as annualized net charge-offs divided by average outstanding finance (a) receivables and loans excluding loans measured at fair value and loans held-for-sale during the year for each loan category.

Our net charge-offs from total consumer automobile finance receivables and loans increased \$10 million for the three months and decreased \$28 million for the six months ended June 30, 2012, compared to the same periods in 2011. The increase in net charge-offs was primarily due to economic stresses in certain areas in Latin America. The decrease in net charge offs for the six months ended June 30, 2012, was primarily due to lower loss frequency reflecting the modest U.S. economic improvements and reduced loss severity due to strong used vehicle pricing.

Our net charge-offs from total consumer mortgage receivables and loans were \$37 million and \$80 million for the three months and six months ended June 30, 2012, compared to \$44 million and \$101 million for the same periods in 2011. The decreases were driven by the improved mix of remaining loans as the lower quality legacy loans continued to runoff.

The following table summarizes the unpaid principal balance of total consumer loan originations for the periods shown. Total consumer loan originations include loans classified as finance receivables and loans and loans held-for-sale during the period.

(\$ in millions)	Three months ended June 30,		Six months ended June 30,

Ally Financial Inc. • Form 10-Q

respectively, compared to the same periods in 2011. The increase was primarily due to higher industry sales, growth in used and non-GM/Chrysler originations, and aggressive GM manufacturer marketing incentive programs, partially offset by lower origination volume at GM.

Total mortgage-originated loans decreased \$6.7 billion and \$10.2 billion for the three months and six months ended June 30, 2012. The decline in loan production was primarily driven by the reduction in correspondent lending.

Consumer loan originations retained on-balance sheet as held-for-investment were \$11.8 billion and \$23.0 billion for the three months and six months ended June 30, 2012, and \$10.0 billion and \$21.9 billion for the three months and six months ended June 30, 2011. The increase was primarily due to increased automobile originations driven by higher industry sales, growth in used and non-GM/Chrysler originations, and aggressive GM manufacturer marketing incentive programs.

The following table shows the percentage of total consumer finance receivables and loans recorded at historical cost reported at carrying value before allowance for loan losses by state and foreign concentration. Total automobile loans were \$68.1 billion and \$63.5 billion at June 30, 2012, and December 31, 2011, respectively. Total mortgage and home equity loans were \$9.8 billion and \$10.0 billion at June 30, 2012, and December 31, 2011, respectively.

	June 30, 2012 (a)		December 31, 2011	
	Automobile	1st Mortgage and home equity	Automobile	1st Mortgage and home equity
Texas	9.7	% 5.8	% 9.5	% 5.5

Other foreign	6.0	—	5.6	0.1
Total consumer loans	100.0	% 100.0	% 100.0	% 100.0

(a) Presentation is in descending order as a percentage of total consumer finance receivables and loans at June 30, 2012.

We monitor our consumer loan portfolio for concentration risk across the geographies in which we lend. The highest concentrations of loans in the United States are in Texas and California, which represented an aggregate of 16.4% of our total outstanding consumer finance receivables and loans at both June 30, 2012 and December 31, 2011.

Concentrations in our Mortgage operations are closely monitored given the volatility of the housing markets. Our consumer mortgage loan concentrations in California, Florida, and Michigan receive particular attention as the real estate value depreciation in these states has been amongst the most severe.

Reposessed and Foreclosed Assets

We classify an asset as reposessed or foreclosed (included in other assets on the Condensed Consolidated Balance Sheet) when physical possession of the collateral is taken. We dispose of the acquired collateral in a timely fashion in accordance with regulatory requirements. For more information on reposessed and foreclosed assets, refer to Note 1 to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K.

Reposessed assets in our Automotive Finance operations at June 30, 2012, decreased \$1 million to \$55 million from December 31, 2011. Foreclosed mortgage assets at June 30, 2012, decreased \$74 million to \$3 million from December 31, 2011, primarily due to the deconsolidation of ResCap.

Higher-Risk Mortgage Loans

Since 2009, we primarily focused our origination efforts on prime conforming and government-insured residential mortgages in the United States. However, we continued to hold mortgage loans originated in prior years that have features that expose us to potentially higher

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

credit risk including high original loan-to-value mortgage loans (prime or nonprime), payment-option adjustable-rate mortgage loans (prime nonconforming), interest-only mortgage loans (classified as prime conforming or nonconforming for domestic production and prime nonconforming or nonprime for international production), and teaser-rate mortgages (prime or nonprime).

In circumstances when a loan has features such that it falls into multiple categories, it is classified to a category only once based on the following hierarchy: (1) high original loan-to-value (LTV) mortgage loans, (2) payment-option adjustable-rate mortgage loans, (3) interest-only mortgage loans, and (4) below-market rate (teaser) mortgages. Given the continued stress within the housing market, we believe this hierarchy provides the most relevant risk assessment of our nontraditional products.

The following table summarizes mortgage finance receivables and loans by higher-risk loan type. These finance receivables and loans are recorded at historical cost and reported at carrying value before allowance for loan losses.

(\$ in millions)	Outstanding		Nonperforming		Accruing past due 90 days or more	
	June 30, 2012	December 31, 2011	June 30, 2012	December 31, 2011	June 30, 2012	December 31, 2011
Interest-only mortgage loans (a)	\$2,527	\$2,947	\$134	\$147	\$—	\$—
Below-market rate (teaser) mortgages	204	248	4	6	—	—
Total higher-risk mortgage loans	\$2,731	\$3,195	\$138	\$153	\$—	\$—

(a) The majority of the interest-only mortgage loans are expected to start principal amortization in 2015 or beyond. High original LTV mortgage finance receivables and loans and payment-option adjustable-rate mortgage finance receivables and loans remained flat at \$1 million and \$3 million, respectively, at June 30, 2012 and December 31, 2011. There were no high original LTV mortgage loans or payment-option adjustable-rate mortgage loans classified as nonperforming or 90 days past due and still accruing at June 30, 2012 and December 31, 2011.

The allowance for loan losses was \$125 million or 4.57% of total higher-risk held-for-investment mortgage loans recorded at historical cost based on carrying value outstanding before allowance for loans losses at June 30, 2012.

The following table includes our five largest state concentrations based on our higher-risk mortgage finance receivables and loans recorded at historical cost and reported at carrying value before allowance for loan losses.

(\$ in millions)	Interest-only mortgage loans	Below-market rate (teaser) mortgages	Total higher-risk mortgage loans

Commercial Credit Portfolio

During the three months and six months ended June 30, 2012, the credit performance of the commercial portfolio improved as nonperforming finance receivables and loans and net charge-offs declined. For information on our commercial credit risk practices and policies regarding delinquencies, nonperforming status, and charge-offs, refer to Note 1 to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K.

The following table includes total commercial finance receivables and loans reported at carrying value before allowance for loan losses.

(\$ in millions)	Outstanding		Nonperforming (a)		Accruing past due 90 days or more (b)	
	June 30, 2012	December 31, 2011	June 30, 2012	December 31, 2011	June 30, 2012	December 31, 2011
Domestic						
Commercial and industrial						
Automobile	\$28,061	\$26,552	\$141	\$105	\$—	\$—
Mortgage	1,146	1,887	—	—	—	—
Other (c)	2,391	1,178	37	22	—	—
Commercial real estate						
Automobile	2,387	2,331	39	56	—	—
Mortgage	—	—	—	—	—	—
Total domestic	33,985	31,948	217	183	—	—
Foreign						
Commercial and industrial						
Automobile	7,786	8,265	60	118	—	—
Mortgage	—	24	—	—	—	—
Other (c)	44	63	—	15	—	—
Commercial real estate						
Automobile	139	154	10	11	—	—
Mortgage	—	14	—	12	—	—
Total foreign	7,969	8,520	70	156	—	—
Total commercial finance receivables and loans	\$41,954	\$40,468	\$287	\$339	\$—	\$—

(a) Includes nonaccrual troubled debt restructured loans of \$31 million and \$21 million at June 30, 2012, and December 31, 2011, respectively.

(b) There were no troubled debt restructured loans classified as 90 days past due and still accruing at June 30, 2012 and December 31, 2011.

(c) Other commercial primarily includes senior secured commercial lending.

Total commercial finance receivables and loans outstanding increased \$1.5 billion to \$42.0 billion at June 30, 2012, from December 31, 2011. The domestic commercial and industrial outstandings increased \$2.0 billion primarily due to increased automotive industry sales and corresponding rise in inventories as well as ResCap financing, partially offset by the decline in mortgage warehouse lending's runoff portfolio. The foreign commercial and industrial outstandings decreased \$522 million primarily due to weakened economic growth in Europe.

Total commercial nonperforming finance receivables and loans were \$287 million at June 30, 2012, a decrease of \$52 million compared to December 31, 2011, primarily due to improvement in dealer performance and continued wind-down on non-core commercial assets. Total nonperforming commercial finance receivables and loans as a percentage of outstanding commercial finance receivables and loans were 0.7% and 0.8% at June 30, 2012, and December 31, 2011, respectively.

n/m = not meaningful

Net charge-off ratios are calculated as annualized net charge-offs divided by average outstanding finance (a)receivables and loans excluding loans measured at fair value and loans held-for-sale during the year for each loan category.

Our net charge-offs from commercial finance receivables and loans resulted in recoveries of \$19 million and \$29 million for the three months and six months ended June 30, 2012, respectively, compared to net charge-offs of \$17 million and \$37 million for the same periods in 2011. The decrease in net charge-offs in the six months period was largely driven by strong recoveries in certain wind-down portfolios and an improved mix of loans in the existing portfolio.

Commercial Real Estate

The commercial real estate portfolio consists of finance receivables and loans issued primarily to automotive dealers. Commercial real estate finance receivables and loans remained flat at \$2.5 billion at June 30, 2012, and December 31, 2011.

The following table presents the percentage of total commercial real estate finance receivables and loans by geographic region and property type. These finance receivables and loans are reported at carrying value before allowance for loan losses.

	June 30, 2012		December 31, 2011	
Geographic region				
Michigan	13.1	%	14.1	%
Florida	12.4		12.4	
Texas	12.2		12.4	
California	9.4		9.3	
Virginia	4.0		4.1

Pennsylvania	2.8		2.9	
Georgia	2.6		2.5	
Alabama	2.6		2.6	
North Carolina	2.2		2.1	
Other United States	29.6		27.5	
Canada	3.1		3.5	
United Kingdom	1.6		1.8	
Mexico	0.6		1.0	
Other foreign	0.3		0.3	
Total commercial real estate finance receivables and loans	100.0	%	100.0	%
Property type				
Automotive dealers	100.0	%	99.4	%
Other	—		0.6	
Total commercial real estate finance receivables and loans	100.0	%	100.0	%

Commercial Criticized Exposure

Finance receivables and loans classified as special mention, substandard, or doubtful are deemed criticized. These classifications are based on regulatory definitions and generally represent finance receivables and loans within our portfolio that have a higher default risk or have already defaulted. These finance receivables and loans require additional monitoring and review including specific actions to mitigate our potential economic loss.

The following table presents the percentage of total commercial criticized finance receivables and loans by industry concentrations. These finance receivables and loans are reported at carrying value before allowance for loan losses.

	June 30, 2012		December 31, 2011	
Industry				
Automotive	87.5	%	82.9	%
Manufacturing	2.7		1.8	
Services	2.6		1.9	
Other	7.2		13.4	
Total commercial criticized finance receivables and loans	100.0	%	100.0	%

Total criticized exposures declined \$410 million to \$2.6 billion at June 30, 2012 from December 31, 2011, primarily due to improvements in the automotive industry as well as the continued wind-down of commercial assets in the real

estate industry. The increase in our automotive criticized concentration rate was driven primarily by the decrease in overall criticized outstandings.

Net charge-offs to average finance receivables and loans outstanding at June 30, 2011 (a)	0.6	%	1.9	%	0.8	%	0.2	0.6 %
Allowance for loan losses to total nonperforming finance receivables and loans at June 30, 2011 (a)	496.4	%	140.1	%	252.6	%	44.4	146.0 %
Ratio of allowance for loans losses to net charge-offs at June 30, 2011	2.7		2.8		2.7		3.6	2.8

(a) Coverage percentages are based on the allowance for loan losses related to finance receivables and loans excluding those loans held at fair value as a percentage of the unpaid principal balance, net of premiums and discounts.

The allowance for consumer loan losses at June 30, 2012, declined \$219 million compared to June 30, 2011. The decline reflected the sustained favorable performance of newer originations combined with the runoff portfolios, which was partially offset by an increase in loans outstanding.

The allowance for commercial loan losses declined \$93 million at June 30, 2012, compared to June 30, 2011, primarily related to the ongoing strength in dealer performance and general overall improvement in the Commercial Finance Group's portfolio.

Market Risk

Our automotive financing, mortgage, and insurance activities give rise to market risk representing the potential loss in the fair value of assets or liabilities and earnings caused by movements in market variables, such as interest rates, foreign-exchange rates, equity prices, market perceptions of credit risk, and other market fluctuations that affect the value of securities and assets held-for-sale. We are primarily exposed to interest rate risk arising from changes in interest rates related to financing, investing, and cash management activities. More specifically, we have entered into contracts to provide financing, to retain mortgage servicing rights, and to retain various assets related to securitization activities all of which are exposed in varying degrees to changes in value due to movements in interest rates. Interest rate risk arises from the mismatch between assets and the related liabilities used for funding. We enter into various financial instruments, including derivatives, to maintain the desired level of exposure to the risk of interest rate fluctuations. Refer to Note 20 to the Condensed Consolidated Financial Statements for further information.

We are also exposed to foreign-currency risk arising from the possibility that fluctuations in foreign-exchange rates will affect future earnings or asset and liability values related to our global operations. We enter into hedges to mitigate foreign exchange risk.

We also have exposure to equity price risk, primarily in our Insurance operations, which invests in equity securities that are subject to price risk influenced by capital market movements. We enter into equity options to economically hedge our exposure to the equity markets.

Although the diversity of our activities from our complementary lines of business may partially mitigate market risk, we also actively manage this risk. We maintain risk management control systems to monitor interest rates, foreign-currency exchange rates, equity price risks, and any of their related hedge positions. Positions are monitored using a variety of analytical techniques including market value, sensitivity analysis, and value at risk models.

Refer to our Annual Report on Form 10-K for the year ended December 31, 2011, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, for further discussion on value at risk and sensitivity analysis. Since December 31, 2011, there have been no material changes in these market risks.

Ally Financial Inc. • Form 10-Q

Liquidity Management, Funding, and Regulatory Capital

Overview

The purpose of liquidity management is to ensure our ability to meet changes in loan and lease demand, debt maturities, deposit withdrawals, and other cash commitments under both normal operating conditions as well as periods of economic or financial stress. Our primary objective is to maintain cost-effective, stable and diverse sources of funding capable of sustaining the organization throughout all market cycles. Sources of liquidity include both retail and brokered deposits and secured and unsecured market-based funding across various maturity, interest rate, currency, and investor profiles. Further liquidity is available through a pool of unencumbered highly liquid securities, borrowing facilities, whole-loan asset sales, repurchase agreements, as well as funding programs supported by the Federal Reserve and the Federal Home Loan Bank of Pittsburgh (FHLB).

We define liquidity risk as the risk that an institution's financial condition or overall safety and soundness is adversely affected by an inability, or perceived inability, to meet its financial obligations, and to withstand unforeseen liquidity stress events. Liquidity risk can arise from a variety of institution specific or market-related events that could negatively impact the cash flows available to the organization. Effective management of liquidity risk helps ensure an organization's ability to meet cash flow obligations that are uncertain as they are affected by external events. The ability of financial institutions to manage liquidity needs and contingent funding exposures has proven essential to the solvency of these same financial institutions.

The Asset-Liability Committee (ALCO) is chaired by the Corporate Treasurer and is responsible for monitoring Ally's liquidity position, funding strategies and plans, contingency funding plans, and counterparty credit exposure arising from financial transactions. Corporate Treasury is responsible for managing the liquidity positions of Ally within prudent operating guidelines and targets approved by ALCO. We manage liquidity risk at the business segment, legal entity, and consolidated levels. Each business segment, along with Ally Bank and ResMor Trust, prepares periodic forecasts depicting anticipated funding needs and sources of funds with oversight and monitoring by Corporate Treasury. Corporate Treasury manages liquidity under baseline projected economic scenarios as well as more severe economically stressed environments. Corporate Treasury, in turn, plans, and executes our funding strategies.

Ally uses multiple measures to frame the level of liquidity risk, manage the liquidity position, or identify related trends as early warning indicators. These measures include coverage ratios that measure the sufficiency of the liquidity portfolio and stability ratios that measure longer- term structural liquidity. In addition, we have established several internal management routines designed to review all aspects of liquidity and funding plans, evaluate the adequacy of liquidity buffers, review stress testing results, and assist senior management in the execution of its structured funding strategy and risk management accountabilities.

We maintain available liquidity in the form of cash, unencumbered highly liquid securities, and available credit facility capacity that, taken together, are intended to allow us to operate and to meet our contractual and contingent obligations in the event of market-wide disruptions and enterprise-specific events. We maintain available liquidity at various entities and consider regulatory restrictions and tax implications that may limit our ability to transfer funds across entities. At June 30, 2012, we maintained \$25.8 billion of total available parent company liquidity and \$13.5 billion of total available liquidity at Ally Bank. Parent company liquidity is defined as our consolidated operations less our Insurance operations and Ally Bank. To optimize cash and secured facility capacity between entities, the parent company lends cash to Ally Bank from time to time under an intercompany loan agreement. At June 30, 2012, \$2.4 billion was outstanding under the intercompany loan agreement. Amounts outstanding are repayable to the parent company upon demand, subject to five days notice. As a result, this amount is included in the parent company available liquidity and excluded from the available liquidity at Ally Bank in the above amounts.

In December 2010, the Basel Committee on Banking Supervision issued "Basel III: International framework for liquidity risk measurement, standards and monitoring", which includes two minimum liquidity risk standards. The first standard is the Liquidity Coverage Ratio (LCR). The LCR measures the ratio of unencumbered, high-quality liquid assets to liquidity needs for a 30-calendar-day time horizon under a severe liquidity stress scenario. The second standard is the Net Stable Funding Ratio (NSFR). The NSFR measures the ratio of stable funding with a maturity

greater than one year to the liquidity characteristics of assets plus contingent exposures. The Basel Committee on Banking Supervision expects the LCR to be implemented beginning in January 2015 and the NSFR beginning in January 2018. We continue to monitor the potential impacts of these developments and expect to be able to meet the final requirements.

Funding Strategy

Our liquidity and ongoing profitability are largely dependent on our timely access to funding and the costs associated with raising funds in different segments of the capital markets and raising deposits. We continue to be focused on maintaining and enhancing our liquidity. Our funding strategy largely focuses on the development of diversified funding sources across a global investor base to meet all our liquidity needs throughout different market cycles, including periods of financial distress. These funding sources include unsecured debt capital markets, public and private asset-backed securitizations, whole-loan asset sales, domestic and international committed and uncommitted credit facilities, brokered certificates of deposits, and retail deposits. We also supplement these sources with a modest amount of short-term borrowings, including Demand Notes, unsecured bank loans, and repurchase arrangements. The diversity of our funding sources enhances funding flexibility, limits dependence on any one source, and results in a more cost-effective funding strategy over the long term. We evaluate funding markets on an ongoing basis to achieve an appropriate balance of unsecured and secured funding sources and the maturity profiles of both. In addition, we further distinguish our funding strategy between Ally Bank funding and parent company or nonbank funding.

The FDIC indicated that it expected us to diversify Ally Bank's overall funding in order to reduce reliance on any one source of funding

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

and to achieve a well-balanced funding portfolio across a spectrum of risk, duration, and cost of funds characteristics. Over the past few years, we have been focused on diversifying our funding sources, in particular at Ally Bank by expanding public and private securitization programs, extending the maturity profile of our brokered deposit portfolio while not exceeding a \$10 billion portfolio, establishing repurchase agreements, and continuing to access funds from the Federal Home Loan Banks.

Since 2009, we have been directing new bank-eligible assets in the United States to Ally Bank in order to reduce and minimize our nonbanking exposures and funding requirements and utilize our growing consumer deposit-taking capabilities. This has allowed us to use bank funding for a wider array of our automotive finance assets and to provide a sustainable long-term funding channel for the business, while also improving the cost of funds for the enterprise.

Ally Bank

Ally Bank raises deposits directly from customers through the direct banking channel via the internet and over the telephone. These deposits provide our automotive finance and mortgage loan operations with a stable and low-cost funding source. At June 30, 2012, Ally Bank had \$42.7 billion of total external deposits, including \$30.4 billion of retail deposits.

At June 30, 2012, Ally Bank maintained cash liquidity of \$3.4 billion and unencumbered highly liquid U.S. federal government and U.S. agency securities of \$5.0 billion. In addition, at June 30, 2012, Ally Bank had unused capacity in committed secured funding facilities of \$7.5 billion, including an equal allocation of shared unused capacity of \$3.8 billion from a facility also available to the parent company. Our ability to access this unused capacity depends on having eligible assets to collateralize the incremental funding and, in some instances, the execution of interest rate hedges.

Maximizing bank funding continues to be a key part of our long-term liquidity strategy. We have made significant progress in migrating assets to Ally Bank and growing our retail deposit base since becoming a bank holding company in December 2008. Retail deposit growth is key to further reducing our cost of funds and decreasing our reliance on the capital markets. We believe deposits provide a low-cost source of funds that are less sensitive to interest rate changes, market volatility, or changes in our credit ratings when compared to other funding sources. We have continued to expand our deposit gathering efforts through our direct and indirect marketing channels. Current retail product offerings consist of a variety of savings products including certificates of deposits (CDs), savings accounts, money market accounts, IRA deposit products, as well as an online checking product. In addition, we utilize brokered deposits, which are obtained through third-party intermediaries. In the first six months of 2012, the deposit base at Ally Bank grew \$3.1 billion, ending the quarter at \$42.7 billion from \$39.6 billion at December 31, 2011. The growth in deposits has been primarily attributable to our retail deposit portfolio. Strong retention rates continue to materially contribute to our growth in retail deposits. In the second quarter of 2012, we retained 90% of maturing CD balances up for renewal in the same period. In addition to retail and brokered deposits, Ally Bank had access to funding through a variety of other sources including FHLB advances, public securitizations, private secured funding arrangements, and the Federal Reserve's Discount Window. At June 30, 2012, debt outstanding from the FHLB totaled \$4.3 billion with no debt outstanding from the Federal Reserve. Also, as part of our liquidity and funding plans, Ally Bank utilizes certain securities as collateral to access funding from repurchase agreements with third parties. Repurchase agreements are generally short-term. Funding from repurchase agreements is accounted for as debt on our Condensed Consolidated Balance Sheet. At June 30, 2012, Ally Bank had no debt outstanding under repurchase agreements.

Refer to Note 13 to the Condensed Consolidated Financial Statements for a summary of deposit funding by type. The following table shows Ally Bank's number of accounts and deposit balances by type as of the end of each quarter since 2011.

(\$ in millions)	2nd Quarter 2012	1st Quarter 2012	4th Quarter 2011	3rd Quarter 2011	2nd Quarter 2011	1st Quarter 2011
Number of retail accounts	1,082,753	1,036,468	976,877	919,670	851,991	798,622
Deposits						

Edgar Filing: Ally Financial Inc. - Form 10-Q

Retail	\$30,403	\$29,323	\$27,685	\$26,254	\$24,562	\$23,469
Brokered	9,905	9,884	9,890	9,911	9,903	9,836
Other (a)	2,411	2,314	2,029	2,704	2,405	2,064
Total deposits	\$42,719	\$41,521	\$39,604	\$38,869	\$36,870	35,369

(a) Other deposits include mortgage escrow and other deposits (excluding intercompany deposits).

In addition to building a larger deposit base, we continue to remain active in the securitization markets to finance our Ally Bank automotive loan portfolios. During the second quarter of 2012, Ally Bank completed three term securitization transactions backed by retail and dealer floorplan automotive loans raising \$3.9 billion, including a \$2.0 billion off-balance sheet securitization. Securitization has proven to be a reliable and cost-effective funding source. Additionally, for retail automotive loans and leases, the term structure of the transaction locks in funding for a specified pool of loans and leases for the life of the underlying asset creating an effective tool for managing interest rate and liquidity risk. We manage the execution risk arising from secured funding by maintaining a diverse investor base and maintaining capacity in our committed secured facilities. At June 30, 2012, Ally Bank had exclusive access to \$9.5 billion from committed credit facilities. Ally Bank also had access to a \$3.9 billion committed facility that is shared with the parent company.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Nonbank Funding

At June 30, 2012, the parent company maintained cash liquidity in the amount of \$11.4 billion and available liquidity from unused capacity in committed credit facilities of \$12.0 billion, including an equal allocation of shared unused capacity of \$3.8 billion from a facility also available to Ally Bank. Parent company funding is defined as our consolidated operations less our Insurance operations and Ally Bank. The unused capacity amount at June 30, 2012 also includes \$2.0 billion of availability that is sourced from certain committed funding arrangements generally reliant upon the origination of future automotive receivables over the next twelve months. Our ability to access unused capacity in secured facilities depends on the availability of eligible assets to collateralize the incremental funding and, in some instances, the funding also relies on the execution of interest rate hedges and, in one instance, rating agency consent. Funding sources at the parent company generally consist of longer-term unsecured debt, committed credit facilities, asset-backed securitizations, and a modest amount of short-term borrowings.

In the second quarter of 2012, we completed \$1.5 billion in funding through the debt capital markets. We will continue to access the unsecured debt capital markets on an opportunistic basis to help pre-fund upcoming debt maturities. In addition, we have short-term and long-term unsecured debt outstanding from a retail debt program known as SmartNotes. SmartNotes are generally fixed-rate instruments with fixed-maturity dates ranging from 9 months to 30 years that we have issued through a network of participating broker-dealers. There were \$8.8 billion and \$9.0 billion of SmartNotes outstanding at June 30, 2012, and December 31, 2011, respectively.

We also obtain unsecured funding from the sale of floating-rate demand notes under our Demand Notes program. The holder has the option to require us to redeem these notes at any time without restriction. Demand Notes outstanding were \$3.0 billion at June 30, 2012, compared to \$2.8 billion at December 31, 2011. Unsecured short-term bank loans also provide short-term funding. At June 30, 2012, we had \$4.0 billion in short-term unsecured debt outstanding, a decrease of \$0.5 billion from December 31, 2011. Refer to Note 14 and Note 15 to the Condensed Consolidated Financial Statements for additional information about our outstanding short-term borrowings and long-term unsecured debt, respectively.

Secured funding continues to be a significant source of financing at the parent company. In the second quarter, the parent company completed automotive-related transactions that included a \$646 million public term securitization in Europe, the renewal and extension of \$679 million of committed secured funding capacity and the creation of incremental private secured funding capacity totaling \$3.9 billion. We continue to maintain significant funding capacity at the parent company to fund automotive-related assets, including a \$7.5 billion syndicated facility that can fund U.S. and Canadian automotive retail and commercial loans, as well as leases. On March 19, 2012, this facility was renewed by a syndicate of nineteen lenders and extended such that half of the capacity will mature in March 2013 and the other half will mature in March 2014. In addition to this facility, there are a variety of others that provide funding in various countries. At June 30, 2012, the parent company had \$28.9 billion of commitments globally in various facilities secured by automotive assets.

Recent Funding Developments

During the first six months of 2012, we completed funding transactions totaling \$16.5 billion and we renewed key existing funding facilities as we realized access to both the public and private markets. Key funding highlights from 2012 were as follows:

• We accessed the unsecured debt capital markets in February and in June and raised \$2.5 billion.

In the first six months of 2012, we have continued to access the public asset-backed securitization markets completing five U.S. transactions that raised \$6.1 billion and a Canadian transaction that raised \$516 million. In April, we completed our first-ever public European dealer floorplan automotive securitization that raised \$646 million. Also in the second quarter of 2012, Ally Bank raised \$2.0 billion from an off-balance sheet securitization of U.S. retail automotive loans.

• We created \$4.4 billion of new private capacity to fund automotive assets.

• We renewed and extended \$16.4 billion of key automotive funding facilities. The automotive facility renewal amount includes the March 2012 refinancing of \$15.0 billion in credit facilities at both the parent company and Ally Bank

with a syndicate of nineteen lenders. The \$15.0 billion capacity is secured by retail, lease and dealer floorplan automotive assets and is allocated to two separate \$7.5 billion facilities, one of which is available to the parent company and a Canadian subsidiary while the other is available to Ally Bank. After the refinancing, half of the capacity matures in March 2013 and the other half matures in March 2014.

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Funding Sources

The following table summarizes debt and other sources of funding and the amount outstanding under each category for the periods shown.

As a result of our funding strategy to maximize funding sources at Ally Bank and grow our retail deposit base, the percentage of funding sources from Ally Bank has increased in 2012 from 2011 levels. In addition, deposits represent a larger portion of the overall funding mix.

(\$ in millions)	Bank	Nonbank	Total	%
June 30, 2012				
Secured financings	\$26,101	\$23,478	\$49,579	35
Institutional term debt	—	22,688	22,688	16

Retail debt programs (a)	—	14,148	14,148	10
Temporary Liquidity Guarantee Program (b)	—	7,400	7,400	5
Bank loans and other	1	2,446	2,447	2
Total debt (c)	25,534	73,882	99,416	69
Deposits (d)	39,604	5,446	45,050	31
Total on-balance sheet funding	\$65,138	\$79,328	\$144,466	100
Off-balance sheet securitizations				
Mortgage loans	\$—	\$60,630	\$60,630	
Total off-balance sheet securitizations	\$—	\$60,630	\$60,630	

(a) Primarily includes \$8.8 billion and \$9.0 billion of Ally SmartNotes at June 30, 2012 and December 31, 2011, respectively.

(b) This will mature in the second half of 2012.

(c) Excludes fair value adjustment as described in Note 15 to the Condensed Consolidated Financial Statements.

(d) Bank deposits include retail, brokered, mortgage escrow, and other deposits. Nonbank deposits include dealer wholesale deposits and deposits at ResMor Trust. Intercompany deposits are not included.

Refer to Note 15 to the Condensed Consolidated Financial Statements for a summary of the scheduled maturity of long-term debt at June 30, 2012.

Funding Facilities

We utilize both committed and uncommitted credit facilities. The financial institutions providing the uncommitted facilities are not contractually obligated to advance funds under them. The amounts outstanding under our various funding facilities are included on our Condensed Consolidated Balance Sheet.

The total capacity in our committed funding facilities is provided by banks and other financial institutions through private transactions. The committed secured funding facilities can be revolving in nature and allow for additional funding during the commitment period, or they can be amortizing and do not allow for any further funding after the closing date. At June 30, 2012, \$33.2 billion of our \$42.3 billion of committed capacity was revolving. Our revolving facilities generally have an original tenor ranging from 364 days to two years. As of June 30, 2012, we had \$17.5 billion of committed funding capacity from revolving facilities with a remaining tenor greater than 364 days.

Ally Bank Funding Facilities						

Facilities for Automotive Finance Operations — Secured

At June 30, 2012, Ally Bank had exclusive access to \$9.5 billion from committed credit facilities. Ally Bank's largest facility is a \$7.5 billion revolving syndicated credit facility secured by automotive receivables. During the first quarter of 2012, we renewed this facility with

126

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

half of this facility maturing in March 2013, and the remainder maturing in March 2014. At June 30, 2012, the amount outstanding under this facility was \$3.9 billion. Ally Bank also had access to a \$3.9 billion committed facility that is shared with the parent company. In the event these facilities are not renewed, the outstanding debt will be repaid over time as the underlying collateral amortizes.

Nonbank Funding Facilities

Facilities for Automotive Finance Operations — Unsecured

Revolving credit facilities — During the quarter ended June 30, 2012, our U.S. unsecured revolving credit facility and our committed unsecured bank facilities in Canada matured. We maintain \$119 million in committed unsecured bank facilities in our international operations, most of which mature in March 2013.

Facilities for Automotive Finance Operations — Secured

The parent company's largest facility is a \$7.5 billion revolving syndicated credit facility secured by U.S. and Canadian automotive receivables. During the first quarter of 2012, we renewed this facility with half of this facility maturing in March 2013, and the remainder maturing in March 2014. In the event this facility is not renewed at maturity, the outstanding debt will be repaid over time as the underlying collateral amortizes. At June 30, 2012, there was \$3.8 billion outstanding under this facility.

In addition to our syndicated revolving credit facility, we also maintain various bilateral and multilateral secured credit facilities in multiple countries that fund our Automotive Finance operations. These are primarily private securitization facilities that fund a specific pool of automotive assets. Many of the facilities have revolving commitments and allow for the funding of additional assets during the commitment period. At June 30, 2012, the parent company maintained exclusive access to \$28.9 billion of committed secured credit facilities and forward purchase commitments to fund automotive assets, and also had access to a \$3.9 billion committed facility that is shared with Ally Bank.

Cash Flows

Net cash provided by operating activities was \$4.9 billion for the six months ended June 30, 2012, compared to \$4.4 billion for the same period in 2011. During the six months ended June 30, 2012, the net cash inflow from sales and repayment of mortgage and automotive loans held-for-sale exceeded cash outflow from new originations and purchases of such loans by \$1.7 billion. During the six months ended June 30, 2011, this activity resulted in a net cash inflow of \$3.3 billion.

Net cash used in investing activities was \$6.1 billion for the six months ended June 30, 2012, compared to \$6.8 billion for the same period in 2011. The net cash outflow from finance receivables and loans decreased \$1.8 billion for the six months ended June 30, 2012, compared to the same period in 2011. The cash outflow to purchase operating lease assets exceeded cash inflows from disposals of such assets by \$2.5 billion for the six months ended June 30, 2012, compared to a net cash outflow of \$196 million for the six months ended June 30, 2011. The increase in net cash outflows associated with leasing activities compared to the prior year was primarily due to a decrease in cash received on lease dispositions. Cash received from sales and maturities of available-for-sale investment securities, net of purchases, increased \$1.8 billion during the six months ended June 30, 2012, compared to the same period in 2011. Net cash provided by financing activities for the six months ended June 30, 2012, totaled \$4.3 billion, compared to \$5.7 billion in the same period in 2011. Cash used to repay short-term debt increased \$1.3 billion in the six months end June 30, 2012, compared to the same period in 2011. Cash generated from long-term debt issuances exceeded cash used to repay such debt by \$3.2 billion for the six months ended June 30, 2012, compared to \$3.3 billion for the same period in 2011.

Capital Planning and Stress Tests

As a bank holding company with \$50 billion or more of consolidated assets, Ally is required to conduct periodic stress tests and submit a proposed capital action plan to the FRB every January, which the FRB must take action on by the following March. The proposed capital action plan must include a description of all planned capital actions over a nine-quarter planning horizon, including any issuance of a debt or equity capital instrument, any capital distribution, and any similar action that the FRB determines could have an impact on Ally's consolidated capital. The proposed

capital action plan must also include a discussion of how Ally will maintain capital above the minimum regulatory capital ratios and above a Tier 1 common equity-to-total risk-weighted assets ratio of 5 percent, and serve as a source of strength to Ally Bank. The FRB must approve Ally's proposed capital action plan before Ally may take any proposed capital action covered by the new regime. Ally submitted its capital plan in January 2012, and on March 13, 2012, the FRB released its Comprehensive Capital Analysis and Review. The FRB objected to Ally's capital plan; however, the FRB did provide notice of non-objection to Ally's planned preferred dividends and interest on the trust preferred securities and subordinated debt. Ally submitted a revised capital plan on June 11, 2012, as required. It is unknown whether the FRB will accept Ally's revised plan as submitted or require further revisions.

Regulatory Capital

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Credit Ratings

The cost and availability of unsecured financing are influenced by credit ratings, which are intended to be an indicator of the creditworthiness of a particular company, security, or obligation. Lower ratings result in higher borrowing costs and reduced access to capital markets. This is particularly true for certain institutional investors whose investment guidelines require investment-grade ratings on term debt and the two highest rating categories for short-term debt (particularly money market investors).

Nationally recognized statistical rating organizations rate substantially all our debt. The following table summarizes our current ratings and outlook by the respective nationally recognized rating agencies.

Rating agency	Short-term	Senior debt	Outlook	Date of last action
Fitch	B	BB-	Rating Watch Negative	April 18, 2012 (a)
Moody's	Not-Prime	B1	Stable	February 7, 2011 (b)
S&P	C	B+	Positive	May 17, 2012 (c)
DBRS	R-4	BB-Low	Review - Developing	May 15, 2012 (d)

(a) Fitch placed our senior debt on Rating Watch Negative and affirmed the short term rating of B on April 18, 2012.

(b) Moody's upgraded our senior debt rating to B1 from B3, affirmed the short-term rating of Not-Prime, and affirmed the outlook of Stable on February 7, 2011.

(c) Standard & Poor's affirmed our senior debt rating of B+ and the short-term rating of C, and changed the outlook to Positive on May 17, 2012.

(d) DBRS placed our ratings Under Review - Developing on May 15, 2012.

Off-balance Sheet Arrangements

Refer to Note 10 to the Condensed Consolidated Financial Statements.

Purchase Obligations

Certain of the structures related to whole-loan sales, securitization transactions, and other off-balance sheet activities contain provisions that are standard in the whole-loan sale and securitization markets where we may (or, in certain limited circumstances, are obligated to) purchase specific assets from entities. Our obligations are as follows.

Loan Repurchases and Obligations Related to Loan Sales

ResCap Bankruptcy Filing

As described in Notes 1 and 25 to the Condensed Consolidated Financial Statements, on May 14, 2012, Residential Capital, LLC (ResCap) and certain of its wholly owned direct and indirect subsidiaries (collectively, the Debtors) filed voluntary petitions for relief under Chapter 11 of the Bankruptcy Code in the United States Bankruptcy Court for the Southern District of New York (Bankruptcy Court). In connection with the filings, Ally Financial Inc. and its direct and indirect subsidiaries and affiliates (excluding the Debtors and their direct and indirect subsidiaries) (collectively, AFI) reached an agreement with the Debtors and certain creditor constituencies on a prearranged Chapter 11 plan (the Plan).

The contemplated Plan, which has not yet been filed with the Bankruptcy Court and is subject to Bankruptcy Court approval, is based on a settlement (the Settlement) that provides for the release of all existing or potential causes of action between AFI and the Debtors, as well as a release of all existing or potential ResCap-related causes of action against Ally held by third parties. As a result, a significant portion of our representation and warranty reserve was eliminated. Related to the deconsolidation of ResCap, Ally Bank was allocated a representation and warranty reserve, which was \$124 million at June 30, 2012 with respect to Ally Bank's sold and serviced loans. No other representation and warranty exposure would exist provided the Bankruptcy Court approves the Plan.

Overview

Ally Bank, within our Mortgage operations, sells loans that take the form of securitizations guaranteed by Fannie Mae and Freddie Mac. In connection with securitizations and loan sales, the trustee, for the benefit of the related security

holders, is provided various representations and warranties related to the loans sold. The specific representations and warranties typically relate to, among other things, the ownership of the loan, the validity of the lien securing the loan, the loan's compliance with the criteria for inclusion in the transaction, including compliance with underwriting standards or loan criteria established by the buyer, the ability to deliver required documentation and compliance with applicable laws. In general, the representations and warranties described above may be enforced against Ally Bank at any time unless a sunset provision is in place. Upon discovery of a breach of a representation or warranty, the breach is corrected in a manner conforming to the provisions of the sale agreement. This may require Ally Bank to repurchase the loan, indemnify the investor for incurred losses, or otherwise make the investor whole. See Repurchase Process below.

Originations

Since 2009, we have focused primarily on originating domestic prime conforming and government-insured mortgages. Representation and warranty risk-mitigation strategies include, but are not limited to, pursuing settlements with investors where economically beneficial in order to resolve a pipeline of demands in lieu of loan-by-loan assessments that could result in repurchasing loans, aggressively contesting claims we do not consider valid (rescinding claims), or seeking recourse against correspondent lenders from whom we purchased loans wherever appropriate.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

The following table summarizes domestic mortgage loans sold by ResCap where Ally Bank maintained the mortgage servicing rights; and following the deconsolidation of ResCap, the loans sold by Ally Bank. The following table presents domestic mortgage loans sold by GSEs (original unpaid principal balance).

	Six months ended June 30,	Year ended December 31,				
(\$ in billions)	2012	2011	2010	2009	2008	2007
Fannie Mae	\$9.3	\$33.8	\$35.2	\$21.1	\$17.7	\$6.7
Freddie Mac	3.9	15.8	15.7	8.5	8.6	2.3
Total sales (a)	\$13.2	\$49.6	\$50.9	\$29.6	\$26.3	\$9.0

(a) Representation and warranty obligations vary by loan and may not apply to all loans sold by Ally Bank.

Representation and Warranty Obligation Reserve Methodology

The liability for representation and warranty obligations reflects management's best estimate of probable lifetime losses at Ally Bank. We consider historical and recent demand trends in establishing the reserve. The methodology used to estimate the reserve considers a variety of assumptions including borrower performance (both actual and estimated future defaults), repurchase demand behavior, historical loan defect experience, historical mortgage insurance rescission experience, and historical and estimated future loss experience, which includes projections of future home price changes as well as other qualitative factors including investor behavior. In cases where we may not be able to reasonably estimate losses, a liability is not recognized. Management monitors the adequacy of the overall reserve and makes adjustments to the level of reserve, as necessary, after consideration of other qualitative factors including ongoing dialogue and experience with counterparties.

At the time a loan is sold, an estimate of the fair value of the liability is recorded and classified in accrued expenses and other liabilities on our Condensed Consolidated Balance Sheet and recorded as a component of gain (loss) on mortgage and automotive loans, net, in our Condensed Consolidated Statement of Comprehensive Income. We recognize changes in the liability when additional relevant information becomes available. Changes in the estimate are recorded as other operating expenses in our Condensed Consolidated Statement of Comprehensive Income. The repurchase reserve at June 30, 2012, relates exclusively to GSE exposure.

Ally Bank experienced an increase in new claims for the three months ended June 30, 2012 and a decrease in new claims for the six months ended June 30, 2012 compared to the same periods in 2011. The increase in repurchase claims from Fannie Mae was primarily for loans originated in 2008 prior to enhanced underwriting standards and increased claim activity associated with missing documents. The claims associated with missing documents have historically had high rescission rates. The following tables present Ally Bank's new claims by GSEs (original unpaid principal balance).

Three months ended June 30, (\$ in millions)	2012	2011
Fannie Mae	\$85	\$65
Freddie Mac	22	40
Total claims	\$107	\$105

Six months ended June 30, (\$ in millions)	2012	2011
Fannie Mae	\$130	\$99
Freddie Mac	64	109
Total claims	\$194	\$208

The following table presents the total number and original unpaid principal balance of loans related to unresolved representation and warranty demands (indemnification claims or repurchase demands). The table includes demands that we have requested be rescinded but have not been agreed to by the investor.

	June 30, 2012		December 31, 2011	
(\$ in millions)	Number of Loans	Original UPB of Loans	Number of Loans	Original UPB of Loans

Edgar Filing: Ally Financial Inc. - Form 10-Q

Freddie Mac	84	20	138	31
Total number of loans and unpaid principal balance	364	\$82	210	\$46

Repurchase Process

After receiving a claim under representation and warranty obligations, Ally Bank will review the claim to determine the appropriate

129

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

response (e.g., appeal and provide or request additional information) and take appropriate action (rescind, repurchase the loan, or remit indemnification payment). Historically, repurchase demands were generally related to loans that became delinquent within the first few years following origination. As a result of market developments over the past several years, investor repurchase demand behavior has changed significantly. GSEs are more likely to submit claims for loans at any point in the loan's life cycle, including requests for loans that become delinquent or loans that incur a loss. Representation and warranty claims are generally reviewed on a loan-by-loan basis to validate if there has been a breach requiring a potential repurchase or indemnification payment. Ally Bank actively contests claims to the extent they are not considered valid. Ally Bank is not required to repurchase a loan or provide an indemnification payment where claims are not valid.

The risk of repurchase or indemnification and the associated credit exposure is managed through the underwriting and quality assurance practices and by servicing mortgage loans to meet investor standards. Ally Bank believes that, in general, the longer a loan performs prior to default, the less likely it is that an alleged breach of representation and warranty will be found to have a material and adverse impact on the loan's performance. When loans are repurchased, Ally Bank bears the related credit loss on the loans. Repurchased loans are classified as held-for-sale and initially recorded at fair value.

The following table presents Ally Bank's new claims by vintage (original unpaid principal balance).

(\$ in millions)	Three months ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Pre 2008	\$19	\$11	\$34	\$23
2008	61	41	99	71
Post 2008	27	53	61	114
Total claims	\$107	\$105	\$194	\$208

Private Mortgage Insurance

Mortgage insurance is required for certain consumer mortgage loans sold to the GSEs and certain securitization trusts. Mortgage insurance is typically required for first-lien consumer mortgage loans having a loan-to-value ratio at origination of greater than 80 percent. Mortgage insurers are, in certain circumstances, permitted to rescind existing mortgage insurance that covers consumer loans if they demonstrate certain loan underwriting requirements have not been met. Upon receipt of a rescission notice, Ally Bank will assess the notice and, if appropriate, refute the notice, or if the notice cannot be refuted, Ally Bank attempts to remedy the defect. In the event the mortgage insurance cannot be reinstated, Ally Bank may be obligated to repurchase the loan or provide an indemnification payment in the event of a loss, subject to contractual limitations. While Ally Bank makes every effort to reinstate the mortgage insurance, it has had limited success and as a result, most of these requests result in rescission of the mortgage insurance. At June 30, 2012, Ally Bank has approximately \$11 million in original unpaid principal balance of outstanding mortgage insurance rescission notices where it has not received a repurchase demand. However, this unpaid principal amount is not representative of expected future losses.

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Critical Accounting Estimates

We identified critical accounting estimates that, as a result of judgments, uncertainties, uniqueness, and complexities of the underlying accounting standards and operations involved could result in material changes to our financial condition, results of operations, or cash flows under different conditions or using different assumptions.

Our most critical accounting estimates are as follows.

Fair value measurements

Allowance for loan losses

Valuation of automobile lease assets and residuals

Valuation of mortgage servicing rights

Goodwill

Determination of reserves for insurance losses and loss adjustment expenses

Legal and regulatory reserves

Loan repurchase and obligations related to loan sales

Determination of provision for income taxes

During the first quarter as part of our assessment of critical accounting estimates, we concluded that in accordance with Accounting Standards Codification 740, Income Taxes, there was a change in the methodologies and processes used in developing the provision for income taxes from what was described in our 2011 Annual Report on Form 10-K. Refer to Note 1 to the Condensed Consolidated Financial Statements for further discussion regarding the methodology and process used in the determination of provision for income taxes. There have been no other significant changes in the methodologies and processes used in developing these estimates from what was described in our 2011 Annual Report on Form 10-K.

Fair Value of Financial Instruments

We use fair value measurements to record fair value adjustments to certain instruments and to determine fair value disclosures. Refer to Note 22 to the Condensed Consolidated Financial Statements for description of valuation methodologies used to measure material assets and liabilities at fair value and details of the valuation models, key inputs to those models, and significant assumptions utilized. We follow the fair value hierarchy set forth in Note 22 to the Condensed Consolidated Financial Statements in order to prioritize the inputs utilized to measure fair value. We review and modify, as necessary, our fair value hierarchy classifications on a quarterly basis. As such, there may be reclassifications between hierarchy levels.

The following table summarizes assets and liabilities measured at fair value and the amounts measured using Level 3 inputs. The table includes recurring and nonrecurring measurements.

(\$ in millions)	June 30, 2012	December 31, 2011		
Assets at fair value	\$21,711	\$30,172		
As a percentage of total assets	12	% 16		%
Liabilities at fair value	\$5,072	\$6,299		
As a percentage of total liabilities	3	% 4		%
Assets at fair value using Level 3 inputs	\$1,652	\$4,666		
As a percentage of assets at fair value	8	% 15		%
Liabilities at fair value using Level 3 inputs	\$29	\$878		
As a percentage of liabilities at fair value	1	% 14		%

Level 3 assets declined 65% or \$3.0 billion primarily due to the deconsolidation of ResCap during the three months ended June 30, 2012, which resulted in a significant decline in mortgage servicing rights, mortgage loans held-for-sale, net, and consumer mortgage finance receivables and loans, net. Refer to Note 1 to the Condensed Consolidated Financial Statements. As the value of the consumer mortgage finance receivables and loan, net, declined, the value of the related on-balance sheet securitization debt also declined, which was the primary reason Level 3 liabilities declined by 97% or \$849 million.

We have numerous internal controls in place to ensure the appropriateness of fair value measurements. Significant fair value measures are subject to detailed analytics and management review and approval. We have an established model validation policy and program in place that covers all models used to generate fair value measurements. This model validation program ensures a controlled environment is used for

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

the development, implementation, and use of the models and change procedures. Further, this program uses a risk-based approach to select models to be reviewed and validated by an independent internal risk group to ensure the models are consistent with their intended use, the logic within the models is reliable, and the inputs and outputs from these models are appropriate. Additionally, a wide array of operational controls are in place to ensure the fair value measurements are reasonable, including controls over the inputs into and the outputs from the fair value measurement models. For example, we backtest the internal assumptions used within models against actual performance. We also monitor the market for recent trades, market surveys, or other market information that may be used to benchmark model inputs or outputs. Certain valuations will also be benchmarked to market indices when appropriate and available. We have scheduled model and/or input recalibrations that occur on a periodic basis but will recalibrate earlier if significant variances are observed as part of the backtesting or benchmarking noted above.

Considerable judgment is used in forming conclusions from market observable data used to estimate our Level 2 fair value measurements and in estimating inputs to our internal valuation models used to estimate our Level 3 fair value measurements. Level 3 inputs such as interest rate movements, prepayment speeds, credit losses, and discount rates are inherently difficult to estimate. Changes to these inputs can have a significant effect on fair value measurements. Accordingly, our estimates of fair value are not necessarily indicative of the amounts that could be realized or would be paid in a current market exchange.

Net interest spread excluding original issue discount and including noninterest bearing deposit liabilities (k)	1.91	2.21
Net yield on interest-earning assets (l)	1.92	1.84
Net yield on interest-earning assets excluding original issue discount (l)	2.15	2.50

(a) Changes in interest not solely due to volume or yield/rate are allocated in proportion to the absolute dollar amount of change in volume and yield/rate.

(b) Average balances are calculated using a combination of monthly and daily average methodologies.

Excludes income on equity investments of \$7 million and \$5 million during the three months ended June 30, 2012 (c) and 2011, respectively. Yields on available-for-sale debt securities are based on fair value as opposed to historical cost.

Nonperforming finance receivables and loans are included in the average balances. For information on our (d) accounting policies regarding nonperforming status, refer to Note 1 to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K.

Includes gains on sale of \$54 million and \$166 million during the three months ended June 30, 2012 and 2011, (e) respectively. Excluding these gains on sale, the annualized yield would be 7.84% and 11.40% at June 30, 2012 and 2011, respectively.

(f) Includes the effects of derivative financial instruments designated as hedges.

Average balance includes \$1,960 million and \$2,609 million related to original issue discount at June 30, 2012 and (g) 2011, respectively. Interest expense includes original issue discount amortization of \$96 million and \$254 million during the three months ended June 30, 2012 and 2011, respectively.

(h) Excluding original issue discount the rate on long-term debt was 4.07% and 4.63% at June 30, 2012 and 2011, respectively.

(i) Excluding original issue discount the rate on total interest-bearing liabilities was 3.30% and 3.80% at June 30, 2012 and 2011, respectively.

(j) Excluding original issue discount the rate on total funding sources was 3.25% and 3.74% at June 30, 2012 and 2011, respectively.

(k) Net interest spread represents the difference between the rate on total interest-earning assets and the rate on total interest-bearing liabilities.

(l) Net yield on interest-earning assets represents net financing revenue as a percentage of total interest-earning assets.

Net yield on interest-earning
assets excluding original issue
discount (l)

(a) Changes in interest not solely due to volume or yield/rate are allocated in proportion to the absolute dollar amount of change in volume and yield/rate.

(b) Average balances are calculated using a combination of monthly and daily average methodologies.

Excludes income on equity investments of \$12 million and \$11 million during the six months ended June 30, 2012 (c) and 2011, respectively. Yields on available-for-sale debt securities are based on fair value as opposed to historical cost.

Nonperforming finance receivables and loans are included in the average balances. For information on our (d) accounting policies regarding nonperforming status, refer to Note 1 to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K.

Includes gains on sale of \$108 million and \$286 million during the six months ended June 30, 2012 and 2011, (e) respectively. Excluding these gains on sale, the annualized yield would be 7.94% and 11.73% at June 30, 2012 and 2011, respectively.

(f) Includes the effects of derivative financial instruments designated as hedges.

Average balance includes \$2,011 million and \$2,761 million related to original issue discount at June 30, 2012 and (g) 2011, respectively. Interest expense includes original issue discount amortization of \$204 million and \$550 million during the six months ended June 30, 2012 and 2011, respectively.

(h) Excluding original issue discount the rate on long-term debt was 4.33% and 4.81% at June 30, 2012 and 2011, respectively.

(i) Excluding original issue discount the rate on total interest-bearing liabilities was 3.49% and 3.95% at June 30, 2012 and 2011, respectively.

(j) Excluding original issue discount the rate on total funding sources was 3.44% and 3.89% at June 30, 2012 and 2011, respectively.

(k) Net interest spread represents the difference between the rate on total interest-earning assets and the rate on total interest-bearing liabilities.

(l) Net yield on interest-earning assets represents net financing revenue as a percentage of total interest-earning assets.

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Recently Issued Accounting Standards

Refer to Note 1 to the Condensed Consolidated Financial Statements.

Forward-looking Statements

The foregoing Management's Discussion and Analysis of Financial Condition and Results of Operations and other portions of this Form 10-Q contain various forward-looking statements within the meaning of applicable federal securities laws, including the Private Securities Litigation Reform Act of 1995, that are based upon our current expectations and assumptions concerning future events that are subject to a number of risks and uncertainties that could cause actual results to differ materially from those anticipated.

The words "expect," "anticipate," "estimate," "forecast," "initiative," "objective," "plan," "goal," "project," "outlook," "priorit," "intend," "evaluate," "pursue," "seek," "may," "would," "could," "should," "believe," "potential," "continue," or the negative of these words or similar expressions is intended to identify forward-looking statements. All statements herein, other than statements of historical fact, including without limitation statements about future events and financial performance, are forward-looking statements that involve certain risks and uncertainties.

While these statements represent our current judgment on what the future may hold and we believe these judgments are reasonable, these statements are not guarantees of any events or financial results, and Ally's actual results may differ materially due to numerous important factors that are described in the most recent reports on Forms 10-K and 10-Q for Ally, each of which may be revised or supplemented in subsequent reports on Forms 10-Q and 8-K. Such factors include, among others, the following: maintaining the mutually beneficial relationship between Ally and General Motors ("GM"), and Ally and Chrysler Group LLC ("Chrysler"); the profitability and financial condition of GM and Chrysler; bankruptcy court approval of the plan and settlement related to the bankruptcy filings by Residential Capital, LLC and certain of its subsidiaries; our ability to realize the anticipated benefits associated with being a bank holding company, and the increased regulation and restrictions that we are now subject to; the potential for deterioration in the residual value of off-lease vehicles; disruptions in the market in which we fund our operations, with resulting negative impact on our liquidity; changes in our accounting assumptions that may require or that result from changes in the accounting rules or their application, which could result in an impact on earnings; changes in the credit ratings of Ally, Chrysler, or GM; changes in economic conditions, currency exchange rates or political stability in the markets in which we operate; and changes in the existing or the adoption of new laws, regulations, policies or other activities of governments, agencies and similar organizations (including as a result of the Dodd-Frank Act and Basel III).

Use of the term "loans" describes products associated with direct and indirect lending activities of Ally's global operations. The specific products include retail installment sales contracts, loans, lines of credit, leases or other financing products. The term "originate" refers to Ally's purchase, acquisition, or direct origination of various "loan" products.

Controls and Procedures

Ally Financial Inc. • Form 10-Q

Item 4. Controls and Procedures

We maintain disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), designed to ensure that information required to be disclosed in reports filed under the Exchange Act is recorded, processed, summarized, and reported within the specified time periods. Our disclosure controls and procedures are also designed to ensure that information required to be disclosed in the reports we file and submit under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer (Principal Executive Officer) and Senior Executive Vice President of Finance and Corporate Planning (Principal Financial Officer), to allow timely decisions regarding required disclosure.

As of the end of the period covered by this report, our Principal Executive Officer and Principal Financial Officer evaluated, with the participation of our management, the effectiveness of our disclosure controls and procedures and concluded that our disclosure controls and procedures were effective.

There were no changes in our internal controls over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) that occurred during our most recent fiscal quarter that materially affected, or were reasonably likely to materially affect, our internal controls over financial reporting.

Our management, including our Principal Executive Officer and Principal Financial Officer, does not expect that our disclosure controls or our internal controls will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within Ally have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with associated policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II — OTHER INFORMATION

Ally Financial Inc. • Form 10-Q

Item 1. Legal Proceedings

Refer to Note 25 to the Condensed Consolidated Financial Statements (incorporated herein by reference) for a discussion related to our legal proceedings, which supplements the discussion of legal proceedings set forth in Note 31 to our 2011 Annual Report on Form 10-K.

Item 1A. Risk Factors

Other than with respect to the risk factor provided below, there have been no material changes to the Risk Factors described in our 2011 Annual Report on Form 10-K and subsequent quarterly report on Form 10-Q for the three months ended March 31, 2012.

Risks Related to Our Business

The Bankruptcy Court may not approve the Settlement or the Plan, and, even if the Settlement and Plan are approved, each may not be consummated if certain conditions are not met or if delays occur. If the Settlement and Plan are not approved and consummated, we will not be entitled to any release from claims of the Debtors or third parties.

On May 14, 2012 (the Petition Date), Residential Capital, LLC (ResCap) and certain of its wholly owned direct and indirect subsidiaries (collectively, the Debtors) filed voluntary petitions for relief under Chapter 11 of the Bankruptcy Code in the United States Bankruptcy Court for the Southern District of New York (Bankruptcy Court). In connection with the filings, Ally Financial Inc. and its direct and indirect subsidiaries and affiliates (excluding the Debtors and their direct and indirect subsidiaries) (collectively, AFI) reached an agreement with the Debtors and certain creditor constituencies on a prearranged Chapter 11 plan (the Plan). The Plan includes a proposed settlement (the Settlement) between AFI and the Debtors, which includes a release of all existing or potential causes of action between AFI and the Debtors, as well as a release of all existing or potential ResCap related causes of action against AFI held by third parties.

There can be no assurance that the Bankruptcy Court will approve the Settlement. In particular, the Bankruptcy Court may not approve the proposed release of all existing or potential ResCap related causes of action against AFI held by third parties. Even if the Settlement is approved, there can be no assurance that the conditions to effectiveness of the Settlement will be satisfied. These conditions include, among other things, that the Plan and the order that confirms the Plan (the Confirmation Order) must incorporate the terms and conditions of the Settlement.

There can also be no assurance that the Bankruptcy Court will confirm the Plan, and, even if the Plan is confirmed, the consummation of the Plan is subject to several conditions, and there can be no assurance that the required conditions will be satisfied. The failure to do so could result in modifications to the Plan, or the pursuit of an alternative form of reorganization or liquidation. This could result in delay and significant expense, and any modifications to the Plan or other alternative may well be less favorable to AFI. Even if substantial elements of the Plan are confirmed by the Bankruptcy Court and all required conditions are satisfied, there could be significant litigation against AFI for any claims not released under the Plan.

The Debtors currently expect to sell their mortgage origination and servicing business and certain other mortgage-related assets under section 363 of the Bankruptcy Code, and not as part of the Plan as was previously contemplated. If these asset sales occur outside of the Plan, it could have an adverse impact on the likelihood that the Bankruptcy Court would confirm the Plan as submitted.

ResCap has obtained debtor-in-possession financing, including from AFI. The proceeds from the asset sales contemplated by the Debtors will be used to repay this financing. If the asset sales do not occur, or if there otherwise is an event of default under either of ResCap's debtor-in-possession financing facilities and the lenders thereto accelerated repayment, it is unlikely that the Plan would be consummated.

The Settlement currently contemplates that, if the Bankruptcy Court does not enter the Confirmation Order on or before October 31, 2012 or the effective date of the Plan does not occur on or before December 15, 2012, or entry of the Confirmation Order or the effective date of the Plan does not occur on such later date as the parties may agree upon, then the Plan and Settlement will terminate. In that event, subject to certain conditions, AFI will still be required

to perform all of its obligations described above with respect to the Settlement, except that AFI will not make the \$750 million cash contribution and will not be entitled to receive any releases from either the Debtors or any third party claimants. In addition, under certain circumstances, ResCap has the ability to terminate the Settlement and not seek confirmation of the Plan, in which case AFI would not be entitled to receive the releases. If AFI does not receive the releases described above, the Debtors and/or third party creditors are likely to assert substantial claims directly against AFI, which could have a material adverse impact on our results of operations, financial position or cash flows.

On June 4, 2012, Berkshire Hathaway Inc. filed a motion in the Bankruptcy Court for the appointment of an independent examiner to investigate, among other things, certain of the Debtors' transactions with AFI occurring prior to the Petition Date, any claims the Debtors may hold against AFI's officers and directors, and any claims the Debtors propose to release under the Plan. On June 18, 2012, the Bankruptcy Court approved the appointment of an examiner and, subsequently, the United States Trustee for the Southern District of New York appointed former bankruptcy judge Arthur J. Gonzalez, Esq. as the examiner. On July 27, 2012, the Bankruptcy Court entered an order approving the scope of the examiner's investigation. The investigation will include, among other things: (a) all material pre-petition transactions between or among the Debtors and AFI, Cerberus Capital Management, L.P. and its subsidiaries and affiliates, and/or Ally Bank; (b) certain post-petition negotiations and transactions with the Debtors, including with respect to plan sponsor, plan support, and settlement agreements, the debtor-in-possession financing with AFI, the stalking horse asset purchase agreement with AFI, and the servicing agreement with Ally Bank; (c) all state and federal law claims or causes of action the Debtors propose to release as part of the Plan; and (d) the release of all existing or potential ResCap-related causes of action against AFI held by third parties. The examiner's preliminary estimate regarding the time necessary for the examiner to complete the examiner's investigation and related report is six months. As a result of the six month period established by

the Bankruptcy Court, it is unlikely that the Bankruptcy Court will enter the Confirmation Order by the required deadlines described above. If the parties cannot agree on modifications to these deadlines, the Plan and the Settlement will terminate.
