QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 — The Company and Basis of Presentation

QuickLogic Corporation, referenced herein as QuickLogic or the Company, was founded in 1988 and reincorporated in Delaware in 1999. The Company develops and markets low power programmable solutions that enable customers to add differentiated features and capabilities to their mobile, consumer and industrial products. The Company is a fabless semiconductor company that designs, markets and supports Customer Specific Standard Products, or CSSPs, Field Programmable Gate Arrays, or FPGAs, application solutions, associated design software and programming hardware.

The accompanying interim condensed consolidated financial statements are unaudited. In the opinion of management, these statements have been prepared in accordance with generally accepted accounting principles, or GAAP, and include all adjustments, consisting only of normal recurring adjustments, necessary to provide a fair statement of results for the interim periods presented. The Company recommends that these consolidated financial statements be read in conjunction with the Company's Form 10-K for the year ended January 2, 2011. Operating results for the six months ended July 3, 2011 are not necessarily indicative of the results that may be expected for the full year.

QuickLogic's fiscal year ends on the Sunday closest to December 31. QuickLogic's second fiscal quarter for 2011 and 2010 ended Sunday, July 3, 2011 and July 4, 2010, respectively.

Liquidity

We have financed our operations and capital investments through sales of common stock, private equity investments, capital and operating leases, bank lines of credit and cash flows from operations. As of July 3, 2011, our principal sources of liquidity consisted of our cash and cash equivalents of \$21.4 million, available credit under our revolving line of credit with Silicon Valley Bank of \$6.0 million, which expires June 28, 2012, and our investment in TowerJazz Semiconductor Ltd., or TowerJazz, with a fair value of approximately \$0.8 million.

The Company anticipates that its existing cash resources will fund operations, finance purchases of capital equipment and provide adequate working capital for the next twelve months. The Company's liquidity is affected by many factors including, among others, the level of revenue and gross profit as a result of the cyclical nature of the semiconductor industry, the conversion of design opportunities into revenue, market acceptance of existing and new products including CSSPs based on our ArcticLink™ and PolarPro resolution platforms, fluctuations in revenue as a result of product end-of-life, fluctuations in revenue as a result of the stage in the product life cycle of our customers' products, costs of securing access to and availability of adequate manufacturing capacity, levels of inventories, wafer purchase commitments, customer credit terms, the amount and timing of research and development expenditures, the timing of new product introductions, production volumes, product quality, sales and marketing efforts, the value and liquidity of our investment portfolio, changes in operating assets and liabilities, the ability to obtain or renew debt financing and to remain in compliance with the covenants of existing credit facilities, the ability to raise funds from the sale of shares of TowerJazz, the equity in the Company, the issuance and exercise of stock options and participation in the Company's employee stock purchase plan, and other factors related to the uncertainties of the industry and global economics. Accordingly, there can be no assurance that events in the future will not require the Company to seek additional capital or, if so required, that such capital will be available on terms acceptable to the Company.

Principles of Consolidation

Edgar Filing: QUICKLOGIC CORPORATION - Form 10-Q

The consolidated financial statements include the accounts of QuickLogic Corporation and its wholly owned subsidiaries, QuickLogic Canada Company, QuickLogic International, Inc, QuickLogic Kabushiki Kaisha, and QuickLogic Software (India) Private Ltd.

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

Foreign Currency

The functional currency of the Company's non-U.S. operations is the U.S. dollar. Accordingly, all monetary assets and liabilities of these foreign operations are translated into U.S. dollars at current period-end exchange rates and non-monetary assets and related elements of expense are translated using historical exchange rates. Income and expense elements are translated to U.S. dollars using average exchange rates in effect during the period. Gains and losses from the foreign currency transactions of these subsidiaries are recorded as interest income and other, net in the statement of operations.

Uses of Estimates

The preparation of these consolidated financial statements in conformity with GAAP, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates, particularly in relation to revenue recognition, the allowance for doubtful accounts, sales returns, valuation of investments, valuation of long-lived assets, valuation of inventories including identification of excess quantities, market value and obsolescence, measurement of stock-based compensation awards, accounting for income taxes and estimating accrued liabilities.

Concentration of Risk

The Company's accounts receivable are denominated in U.S. dollars and are derived primarily from sales to customers located in North America, Europe, and Asia Pacific. The Company performs ongoing credit evaluations of its customers and generally does not require collateral. See Note 11 for information regarding concentrations associated with accounts receivable. The Company's investment in TowerJazz is subject to equity risk. See Note 4 for the information regarding the Company's investment in TowerJazz Semiconductor, Ltd.

Note 2 — Significant Accounting Policies

There have been no material changes in the Company's significant accounting policies for the second quarter of 2011 from its disclosure in the Annual Report on Form 10-K for the year ended January 2, 2011. For a discussion of the significant accounting policies, please see the Annual Report on Form 10-K for the fiscal year ended January 2, 2011, filed with the Securities Exchange Commission, or SEC, on March 11, 2011.

New Accounting Pronouncements

In May 2011, the FASB issued guidance to amend certain measurement and disclosure requirements related to fair value measurements to improve consistency with international reporting standards. This guidance is effective prospectively for public entities for interim and annual reporting periods beginning after December 15, 2011, with early adoption by public entities prohibited. The Company is currently evaluating this guidance, but does not expect its adoption will have a material effect on its consolidated financial statements.

In June 2011, the FASB issued new guidance on the presentation of comprehensive income that will require a company to present components of net income and other comprehensive income in one continuous statement or in two separate, but consecutive statements. There are no changes to the components that are recognized in net income or other comprehensive income under current GAAP. This guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2011, with early adoption permitted. The Company is

currently evaluating this guidance, but does not expect its adoption will have a material effect on its consolidated financial statements.

Note 3 — Net Income (Loss) Per Share

Basic net income (loss) per share is computed by dividing net income (loss) available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share was computed using the weighted average number of common shares outstanding during the period plus potentially dilutive common shares outstanding during the period under the treasury stock method. In computing diluted net income (loss) per share, the weighted average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options and warrants.

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

For the second quarter of 2011 and of 2010, 7.3 million and 9.5 million, respectively, common shares associated with equity awards outstanding and the estimated number of shares to be purchased under the current offering period of the 2009 Employee Stock Purchase Plan were not included in the calculation of diluted net income (loss) per share, as they were considered antidilutive due to the net loss the Company experienced during these periods.

Note 4 — Investment in TowerJazz Semiconductor Ltd.

During the first quarter of fiscal year 2010, the Company sold 700,000 TowerJazz ordinary shares which resulted in a gain of \$993,000. As of July 3, 2011, the Company held 645,000 available-for-sale TowerJazz ordinary shares with an unrealized gain of \$0.5 million recorded in accumulated other comprehensive income on the balance sheet, representing the difference between the carrying value of \$0.13 per share and \$1.19 per share, their fair value on the last trading day of the reporting period. The fair value of TowerJazz marketable securities as of July 3, 2011 was determined based on “Level 1” inputs as described in Note 7.

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

Note 6 — Obligations

	As of July 3, 2011 (in thousands)	January 2, 2011
Debt and capital lease obligations:		
Current portion of capital lease obligations	\$207	\$408
Total capital lease	\$207	\$408

Revolving Line of Credit

In June 2011, the Company entered into the Seventh Amendment to Second Amended and Restated Loan and Security Agreement with Silicon Valley Bank. The terms of the amended Agreement include a \$6.0 million revolving line of credit available through June 2012, as long as the Company is in compliance with the loan covenants. Upon each advance, the Company can elect a variable interest rate, which is the prime rate plus one half of one percent (0.50%), or a fixed rate which is LIBOR plus the LIBOR rate margin, as the case may be. During the second quarter of 2011, the Company had no borrowings against the line of credit.

The bank has a first priority security interest in substantially all of the Company's tangible and intangible assets to secure any outstanding amounts under the Agreement. Under the terms of the Agreement, except as noted above, the Company must maintain a minimum tangible net worth of at least \$15 million, adjusted quick ratio of 2-to-1 and a minimum cash balance of at least \$8 million with Silicon Valley Bank. The Agreement also has certain restrictions including, among others, restrictions on the incurrence of other indebtedness, the maintenance of depository accounts, the disposition of assets, mergers, acquisitions, investments, the granting of liens and the payment of dividends. The Company was in compliance with the financial covenants of the agreement as of the end of the current reporting period.

Capital Leases

In January 2010, the Company leased design software and related maintenance under a two-year capital lease at an imputed interest rate of 5.75% per annum. Terms of the agreement require the Company to make quarterly payments of approximately \$38,000 through November 2011. The Company recorded a capital asset of \$233,000 and prepaid maintenance of \$51,000 that is being amortized over the term of the agreement and a capital lease obligation of \$284,000. As of July 3, 2011, \$73,000 was outstanding under the capital lease, all of which was classified as a current liability.

In January 2009, the Company leased design software tools and related maintenance under a three-year capital lease at an imputed interest rate of 5.75% per annum. Terms of the agreement require the Company to make semi-annual payments of principal and interest of approximately \$138,000 through August 2011, for a total of approximately \$825,000 over the three year period. As of July 3, 2011, \$134,000 was outstanding under the capital lease, all of which was classified as a current liability.

Note 7 — Fair Value Measurements

Pursuant to the accounting guidance for fair value measurements and its subsequent updates, fair value is defined as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities

required or permitted to be recorded at fair value, the Company considers the principal or most advantageous market in which it would transact, and it considers assumptions that market participants would use when pricing the asset or liability.

The accounting guidance for fair value measurement also specifies a hierarchy of valuation techniques based upon whether the inputs to those valuation techniques reflect assumptions other market participants would use based upon market data obtained from independent sources (observable inputs) or reflect the company's own assumption of market participant valuation (unobservable inputs). The fair value hierarchy consists of the following three levels:

Level 1 – Inputs are quoted prices in active markets for identical assets or liabilities.

Level 2 – Inputs are quoted prices for similar assets or liabilities in an active market, quoted prices for identical

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable and market-corroborated inputs which are derived principally from or corroborated by observable market data.

Level 3 – Inputs are derived from valuation techniques in which one or more significant inputs or value drivers are unobservable.

The following table presents the Company's financial assets that are measured at fair value on a recurring basis as of July 3, 2011, consistent with the fair value hierarchy provisions of the authoritative guidance (in thousands):

	As of July 3, 2011				As of January 2, 2011			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
Assets:								
Money market funds ⁽¹⁾	\$20,324	\$20,324	\$—	\$—	\$19,722	\$19,722	\$—	\$—
Investment in TowerJazz Semiconductor Ltd.	767	767	—	—	909	909	—	—
Total assets	\$21,091	\$21,091	\$—	\$—	\$20,631	\$20,631	\$—	\$—

⁽¹⁾ Money market funds are presented as a part of cash and cash equivalents on the accompanying consolidated balance sheets as of July 3, 2011 and January 2, 2011.

As of July 3, 2011, there is no material difference between the fair value and the carrying amount of the debt outstanding under the Company's line of credit and capital leasing arrangements.

Note 8 — Employee Stock Plans

1999 Stock Plan

The 1999 Stock Plan, or 1999 Plan, provided for the issuance of incentive and nonqualified options, restricted stock units and restricted stock. Equity awards granted under the 1999 Plan have a term of up to ten years. Options typically vest at a rate of 25% one year after the vesting commencement date, and one forty-eighth for each month of service thereafter. In March 2009, the Board adopted the 2009 Stock Plan which was approved by the Company's stockholders on April 22, 2009. Effective April 22, 2009, no further stock options may be granted under the 1999 Plan.

2009 Stock Plan

The 2009 Stock Plan, or 2009 Plan, was amended and restated by the Board of Directors in March 2011 and approved by the Company's stockholders on April 28, 2011 to, among other things, reserve an additional 1,500,000 shares of common stock for issuance under the Plan. As of July 3, 2011, approximately 6.0 million shares were reserved for issuance under the 2009 Plan. Equity awards that are cancelled, forfeited or repurchased under the 1999 Plan become available for grant under the 2009 Plan, up to a maximum of an additional 7,500,000 shares. Equity awards granted under the 2009 Plan have a term of up to ten years. Options typically vest at a rate of 25% one year after the vesting commencement date, and one forty-eighth for each month of service thereafter. The Company may implement different vesting schedules in the future with respect to any new equity awards.

Employee Stock Purchase Plan

The 2009 Employee Stock Purchase Plan, or 2009 ESPP, was adopted in March 2009. The Company has reserved 2.3 million shares for issuance under the 2009 ESPP. The 2009 ESPP provides for six month offering periods. Participants purchase shares through payroll deductions of up to 20% of an employee's total compensation (maximum of 20,000 shares per offering period). The 2009 ESPP permits the Board of Directors to determine, prior to each offering period, whether participants purchase shares at: (i) 85% of the fair market value of the common stock at the end of the offering period; or (ii) 85% of the lower of the fair market value of the common stock at the beginning or the end of an offering period. The Board of Directors has determined that, until further notice, future offering periods will be made at 85% of the lower of the fair market value of the common stock at the beginning or the end of an offering period.

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

Note 9 — Stock-Based Compensation

Stock-based compensation expense is recognized in the Company's consolidated statements of operations and includes compensation expense for the stock-based compensation awards granted or modified subsequent to January 1, 2006, based on the grant date fair value estimated in accordance with the provisions of the amended authoritative guidance. The impact of the amended authoritative guidance on the Company's consolidated financial statements for the second quarter of 2011 and 2010 was as follows (in thousands):

	Three Months Ended		Six Months Ended	
	July 3, 2011	July 4, 2010	July 3, 2011	July 4, 2010
Cost of revenue	\$35	\$39	\$70	\$86
Research and development	119	180	240	355
Selling, general and administrative	282	414	569	844
Total costs and expenses	\$436	\$633	\$879	\$1,285

The amount of stock-based compensation included in inventories for the second quarter of 2011 and 2010 was not significant.

Valuation Assumptions

The amended authoritative guidance requires companies to estimate the fair value of stock-based compensation awards. The fair value of stock-based compensation awards is measured at the grant date and re-measured upon modification, as appropriate. The Company uses the Black-Scholes option pricing model to estimate the fair value of employee stock options and rights to purchase shares under the Company's ESPP, consistent with the provisions of the amended authoritative guidance. Using the Black-Scholes pricing model requires the Company to develop highly subjective assumptions including the expected term of awards, expected volatility of its stock, expected risk-free interest rate and expected dividend rate over the term of the award. The Company's expected term of awards assumption is based primarily on its historical experience with similar grants. The Company's expected stock price volatility assumption for both stock options and ESPP shares is based on the historical volatility of the Company's stock, using the daily average of the opening and closing prices and measured using historical data appropriate for the expected term. The risk-free interest rate assumption approximates the risk-free interest rate of a Treasury Constant Maturity bond with a maturity approximately equal to the expected term of the stock option or ESPP shares. This fair value is expensed over the requisite service period of the award. The fair value of RSAs and RSUs is based on the closing price of the Company's common stock on the date of grant. Equity compensation awards which vest with service are expensed using the straight-line attribution method over the requisite service period.

In addition to the assumptions used in the Black-Scholes pricing model, the amended authoritative guidance requires that the Company recognize expense for awards ultimately expected to vest; therefore we are required to develop an estimate of the number of awards expected to be forfeited prior to vesting, or forfeiture rate. The forfeiture rate is estimated based on historical pre-vest cancellation experience and is applied to all share-based awards.

The following weighted average assumptions are included in the estimated fair value calculations for stock option grants:

Edgar Filing: QUICKLOGIC CORPORATION - Form 10-Q

	July 3, 2011	July 4, 2010	July 3, 2011	July 4, 2010	
Expected term (years)	4.93	5.42	4.93	5.42	
Risk-free interest rate	1.99	% 2.40	% 2.00	% 2.40	%
Expected volatility	58.69	% 58.01	% 58.50	% 58.02	%
Expected dividend	—	—	—	—	

The methodologies for determining the above values were as follows:

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

Expected term: The expected term represents the period that the Company's stock-based awards are expected to be outstanding and is estimated based on historical experience.

Risk-free interest rate: The risk-free interest rate assumption is based upon the risk-free rate of a Treasury Constant Maturity bond with a maturity appropriate for the expected term of the Company's employee stock options.

Expected volatility: The Company determines expected volatility based on historical volatility of the Company's common stock according to the expected term of the options.

Expected dividend: The expected dividend assumption is based on the Company's intent not to issue a dividend under its dividend policy.

The weighted average estimated fair value for options granted during the second quarter of 2011 and 2010 were \$1.82 and \$1.48 per option, respectively. The weighted average estimated fair value for options granted during the first half of 2011 and 2010 were \$2.12 and \$1.48 per option, respectively. As of July 3, 2011, the fair value of unvested stock options, net of expected forfeitures, was approximately \$2.1 million. This unrecognized stock-based compensation expense is expected to be recorded over a weighted average period of 2.12 years.

Stock-Based Compensation Award Activity

The following table summarizes the shares available for grant under the 2009 Plan as of July 3, 2011:

	Shares Available for Grant (in thousands)
Balance at January 2, 2011	1,542
Authorized	1,500
Options granted	(20)
Options forfeited or expired	751
RSUs granted	—
RSUs forfeited or expired	—
Balance at July 3, 2011	3,773

Stock Options

The following table summarizes stock options outstanding and stock option activity under the 1999 Plan and the 2009 Plan, and the related weighted average exercise price, for the first six months of 2011:

	Number of Shares (in thousands)	Weighted Average Exercise Price	Weighted Average Remaining Term (in years)	Aggregate Intrinsic Value (in thousands)
Balance outstanding at January 2, 2011	8,069	\$2.74		
Granted	20	4.17		
Forfeited or expired	(751)	4.49		
Exercised	(528)	2.68		
Balance outstanding at July 3, 2011	6,810	\$2.56	6.32	\$7,981
Exercisable at July 3, 2011	4,420	\$2.74	5.28	\$4,593
Vested and expected to vest at July 3, 2011	6,810	\$2.56	6.32	\$7,981

The aggregate intrinsic value in the table above represents the total pretax intrinsic value, based on the Company's closing stock price of \$3.62 as of the end of the Company's current reporting period, which would have been received by the option holders had all option holders exercised their options as of that date.

The total intrinsic value of options exercised during the first six months of 2011 and 2010 was \$1.6 million and

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

\$409,000, respectively. Total cash received from employees as a result of employee stock option exercises during the first six months of 2011 and 2010 was approximately \$1.4 million and \$458,000, respectively. The Company settles employee stock option exercises with newly issued common shares. In connection with these exercises, there was no tax benefit realized by the Company due to the Company's current loss position. Total stock-based compensation related to stock options was \$436,000 and \$879,000 for the second quarter and first half of 2011, respectively.

Restricted Stock Awards and Restricted Stock Units

The Company began issuing restricted stock awards, or RSAs, in the second quarter of 2007 and restricted stock units, or RSUs, in the third quarter of 2007. RSAs entitle the holder to purchase shares of common stock at par value during a short period of time, and purchased shares are held in escrow until they vest. RSUs entitle the holder to receive, at no cost, one common share for each restricted stock unit as it vests. The Company withheld shares in settlement of employee tax withholding obligations upon the vesting of restricted stock units. There was no stock-based compensation related to RSUs for the second quarter of 2011.

Employee Stock Purchase Plan

The weighted average estimated fair value, as defined by the amended authoritative guidance, of rights issued pursuant to the Company's 2009 ESPP plan during the second quarter of 2011 and 2010 was \$0.80 and \$1.03 per right, respectively.

As of July 3, 2011, \$2.3 million shares under the 2009 ESPP remained available for issuance. For the second quarter and first half of 2011, the Company recorded compensation expense related to the ESPP of \$42,000 and \$86,000, respectively.

The fair value of rights issued pursuant to the Company's ESPP was estimated on the commencement date of each offering period using the following weighted average assumptions:

	Three Months Ended		Six Months Ended		
	July 3, 2011	July 4, 2010	July 3, 2011	July 4, 2010	
Expected term (months)	6.00	6.00	6.00	6.00	
Risk-free interest rate	0.10	% 0.22	% 0.10	% 0.22	%
Volatility	47.00	% 65.00	% 47.00	% 65.00	%
Dividend yield	—	—	—	—	

The methodologies for determining the above values were as follows:

Expected term: The expected term represents the length of the purchase period contained in the ESPP.

Risk-free interest rate: The risk-free interest rate assumption is based upon the risk-free rate of a Treasury Constant Maturity bond with a maturity appropriate for the term of the purchase period.

Expected volatility: The Company determines expected volatility based on historical volatility of the Company's common stock for the term of the purchase period.

Expected dividend: The expected dividend assumption is based on the Company's intent not to issue a dividend under its dividend policy.

As of July 3, 2011, the unrecognized stock-based compensation expense relating to the Company's ESPP was \$59,000 and is expected to be recognized over a weighted average period of approximately 4.5 months.

Note 10 — Income Taxes

In the second quarter of 2011 and 2010, the Company recorded an income tax benefit of \$55,000 and income tax expense of \$13,000, respectively, which consisted primarily of income tax benefits recognized on foreign operations. Based on the available objective evidence, management believes it is more likely than not that the net deferred tax assets will not be fully realizable. Accordingly, with the exception of foreign subsidiaries, the Company has provided a full valuation allowance against the associated deferred tax assets. The Company will continue to assess the realizability of the deferred tax assets in

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

future periods.

The Company had approximately \$43,000 and \$73,000 of unrecognized tax benefits at July 3, 2011 and January 2, 2011, respectively. The Company recognizes interest and penalties related to uncertain tax positions in income tax expense. As of July 3, 2011, the Company had approximately \$10,000 of accrued interest and penalties related to uncertain tax positions.

The Company is no longer subject to U.S. federal, state and non-U.S. income tax audits by taxing authorities for fiscal years through 1992.

Note 11 — Information Concerning Product Lines, Geographic Information and Revenue Concentration

The Company identifies its business segments based on business activities, management responsibility and geographic location. For all periods presented, the Company operated in a single reportable business segment.

The following is a breakdown of revenue by product line (in thousands):

	Three Months Ended		Six Months Ended	
	July 3, 2011	July 4, 2010	July 3, 2011	July 4, 2010
Revenue by product line ⁽¹⁾ :				
New products	\$1,190	\$2,297	\$2,410	\$4,371
Mature products	4,547	4,182	8,874	7,537
Total revenue	\$5,737	\$6,479	\$11,284	\$11,908

⁽¹⁾ For all periods presented: New products represent products introduced since 2005, and include ArcticLink, ArcticLink II, Eclipse™ II, PolarPro, PolarPro II, and QuickPC®III. Mature products include Eclipse, EclipsePlus, pASIC® 1, pASIC 2, pASIC 3, QuickFC, QuickMIPS, QuickPCI, QuickRAM®, and V3, as well as royalty revenue, programming hardware and software.

The following is a breakdown of revenue by shipment destination (in thousands):

	Three Months Ended		Six Months Ended	
	July 3, 2011	July 4, 2010	July 3, 2011	July 4, 2010
Revenue by geography:				
United States	\$1,907	\$2,054	\$4,668	\$4,174
Europe	1,346	854	2,065	1,883
Taiwan	14	143	118	194
Japan	616	727	1,191	1,402
China	1,099	2,021	1,871	3,031
Rest of North America	62	84	147	269
Rest of Asia Pacific	693	596	1,224	955
Total revenue	\$5,737	\$6,479	\$11,284	\$11,908

The following distributors and customers accounted for 10% or more of the Company's revenue for the periods presented:

15

Table of Contents

QUICKLOGIC CORPORATION

Distributor "B"	*	12	% *	10	%
Distributor "D"	16	% 25	% 15	% 20	%
Customer "B"	21	% 10	% 18	% *	
Customer "E"	14	% *	*	*	

* Represents less than 10% of revenue for the period presented.

The following distributors and customers accounted for 10% or more of the Company's accounts receivable as of the dates presented:

	July 3, 2011	January 2, 2011	
Distributor "A"	48	% 23	%
Distributor "C"	*	20	%
Distributor "D"	22	% 18	%

* Represents less than 10% of accounts receivable as of the date presented.

As of July 3, 2011, less than 10% of the Company's long-lived assets, including property and equipment and other assets, were located outside the United States.

Note 12 — Commitments and Contingencies

Certain wafer manufacturers require the Company to forecast wafer starts several months in advance. The Company is committed to take delivery of and pay for a portion of forecasted wafer volume. As of July 3, 2011 and January 2, 2011, the Company had \$1.4 million and \$2.8 million, respectively, of outstanding commitments for the purchase of wafer inventory.

The Company leases its primary facility under a non-cancelable operating lease that expires in 2012. In addition, the Company rents development facilities in Canada and India as well as sales offices in Europe and Asia. Total rent expense, net of sublease income, for the second quarter of 2011 and 2010 was approximately \$114,000 and \$118,000, respectively.

Future minimum lease commitments under the Company's operating leases, excluding property taxes and insurance are as follows:

	Operating Leases (in thousands)
Fiscal Years	
Remainder of 2011	\$281

2012	518
2013	47
2014 and thereafter	—
	\$846

Note 13 — Litigation

Initial Public Offering Securities Litigation

On October 26, 2001, a putative securities class action was filed in the U.S. District Court for the Southern District of

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

New York against certain investment banks that underwrote QuickLogic's initial public offering, QuickLogic and some of QuickLogic's officers and directors. The complaint alleges excessive and undisclosed commissions in connection with the allocation of shares of common stock in QuickLogic's initial and secondary public offerings and artificially high prices through "tie-in" arrangements which required the underwriters' customers to buy shares in the aftermarket at pre-determined prices in violation of the federal securities laws. Plaintiffs seek an unspecified amount of damages on behalf of persons who purchased QuickLogic's stock pursuant to the registration statements between October 14, 1999 and December 6, 2000. Various plaintiffs have filed similar actions asserting virtually identical allegations against over 300 other public companies, their underwriters, and their officers and directors arising out of each company's public offering. These actions, including the action against QuickLogic, have been coordinated for pretrial purposes and captioned In re Initial Public Offering Securities Litigation, 21 MC 92, or IPO Securities Litigation.

The parties have reached a global settlement of the litigation. Under the settlement, the insurers are to pay the full amount of the settlement share allocated to the Company, and the Company will bear no financial liability. The Company and the other defendants will receive complete dismissals from the case. Certain objectors have filed appeals. No hearing date has been set. The Company did not accrue any amounts related to the proposed settlement because it was not reasonably estimable.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as information contained in "Risk Factors" in Part II, Item 1A and elsewhere in this Quarterly Report on Form 10-Q, contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. We intend that these forward-looking statements be subject to the safe harbors created by those provisions. Forward-looking statements are generally written in the future tense and/or are preceded by words such as "will," "may," "should," "forecast," "could," "expect," "suggest," "believe," "anticipate," "intend," "plan," or other similar words. Forward-looking statements include statements regarding (1) the conversion of our design opportunities into revenue, (2) our revenue levels, including the commercial success of our Customer Specific Standard Products, or CSSPs, and new products, (3) the effects of the slow recovery from the worldwide economic downturn, (4) our liquidity, (5) our gross profit and breakeven revenue level and factors that affect gross profit and the breakeven revenue level, (6) our level of operating expenses, (7) the adequacy of working capital, (8) our research and development efforts, (9) our partners and suppliers and (10) industry trends. The following discussion should be read in conjunction with the attached condensed unaudited consolidated financial statements and notes thereto, and with our audited consolidated financial statements and notes thereto for the fiscal year ended January 2, 2011, found in our Annual Report on Form 10-K filed with the Securities and Exchange Commission, or SEC, on March 11, 2011.

Overview

We develop and market low power customizable semiconductor solutions that enable customers to add new differentiated features to, extend the battery life of, and improve the visual experience with their mobile, consumer and enterprise products. Our targeted mobile market segments include Tablets, Smartphones, Broadband Access Data cards, Secure Access Data cards, and Mobile Enterprise. We are a fabless semiconductor company designing Customer Specific Standard Products, or CSSPs, which are complete, customer-specific solutions that include a combination of silicon solution platforms; Proven System Blocks, or PSBs; customer-specific logic; software drivers; and firmware. Our main platform families, ArcticLink and PolarPro, are standard silicon products. PSBs are developed in numerous categories including Video and Imaging, Storage, Intelligence, Networking and Security. PSBs that have been developed and that are available to customers include our Visual Enhancement Engine, or VEE, and Display Power Optimizer, or DPO, Advanced Encryption Standard, or AES; SDHC/eMMC Host Controllers; USB 2.0 On-The-Go with PHY; MDDI Client with PHY; High Speed UARTs; Pulse Width Modulators; SPI and I2C hosts, display-specific functions such as RGB-split and Frame Recyclers; and Data Performance Manager, or DPM, for accelerated sideloading times. The variety of PSBs offered by us allows system designers to combine multiple discrete chips onto a single CSSP, simplifying design and board layout, lowering Bill of Material, or BOM cost, and accelerating time-to-market. The programmable fabric of our platforms is used for adding differentiated features and provides flexibility to address quickly hardware-based product requirements.

Utilizing a focused customer engagement model, we market CSSPs to Original Equipment Manufacturers, or OEMs, and Original Design Manufacturers, or ODMs, that offer differentiated mobile products. Our solutions enable OEMs and ODMs to add new features, extend battery life, and improve the visual experience provided by their handheld mobile devices. In addition to working directly with our customers, we partner with other companies with expertise in certain technologies to develop additional intellectual property, reference platforms and system software to provide application solutions. We also work with mobile processor manufacturers and companies that supply storage, networking or graphics components for embedded systems.

We have transitioned from being a broad-based supplier of Field Programmable Gate Arrays, or FPGA, devices to being a supplier of CSSPs. In order to grow our revenue from its current level, we are dependent upon increased revenue from our new products including existing new product platforms and platforms still in development. We expect our business growth to be driven by CSSPs ; therefore, our CSSP revenue growth needs to be strong enough to

enable us to generate profits while we continue to invest in the development, sales and marketing of our new solution platforms, PSBs and CSSPs. The gross margin associated with our CSSPs is generally lower than the gross margin of our FPGA products, due primarily to the price sensitive nature of the higher volume mobile consumer opportunities we are pursuing.

During the second quarter of 2011, we generated total revenue of \$5.7 million which represents a 3% sequential increase in revenues. Our new product revenue was \$1.2 million which is flat from the first quarter of 2011 while our mature product revenue was \$4.5 million, which represents a 5% increase from the first quarter of 2011. Overall, we reported a net loss of \$2.1 million for the second quarter of 2011.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

Critical Accounting Estimates

The methods, estimates and judgments we use in applying our most critical accounting policies have a significant impact on the results we report in our consolidated financial statements. The SEC has defined critical accounting policies as those that are most important to the portrayal of our financial condition and results of operations and require us to make difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Based on this definition, our critical policies include revenue recognition, valuation of inventories including identification of excess quantities and product obsolescence, allowance for doubtful accounts, sales returns, valuation of investments, valuation of long-lived assets, valuation of inventories including identification of excess quantities, market value and obsolescence, measurement of stock-based compensation, accounting for income taxes, fair value measurements of financial assets and liabilities and measuring accrued liabilities. We believe that we apply judgments and estimates in a consistent manner and that this consistent application results in consolidated financial statements and accompanying notes that fairly represent all periods presented. However, any factual errors or errors in these judgments and estimates may have a material impact on our statements of operations and financial condition. For a discussion of critical accounting policies and estimates, please see Item 7 in our Annual Report on Form 10-K for the fiscal year ended January 2, 2011 filed with the SEC on March 11, 2011.

Interest income and other, net	(0.2))% (0.8)%	(0.2))% (0.6)%	
Income (loss) before income taxes	(36.8))% (3.2)%	(25.9))% (2.9)%	
Provision for (benefit from) income taxes	(1.0))% 0.2	%	0.1	% 0.2	%	
Net Income (loss)	(35.8))% (3.4)%	(26.0))% (3.1)%	

Three Months Ended July 3, 2011 and July 4, 2010

Revenue

The table below sets forth the changes in revenue for the three months ended July 3, 2011 as compared to the three months ended July 4, 2010 (in thousands, except percentage data):

	Three Months Ended		July 4, 2010		Change		
	July 3, 2011						
	Amount	% of Total Revenues	Amount	% of Total Revenues	Amount	Percentage	
Revenue by product line ⁽¹⁾ :							
New products	\$1,190	21 %	\$2,297	35 %	\$(1,107)	(48))%
Mature products	4,547	79 %	4,182	65 %	365	9	%
Total revenue	\$5,737	100 %	\$6,479	100 %	\$(742)	(11))%

⁽¹⁾ For all periods presented: New products represent products introduced since 2005, and include ArcticLink, ArcticLink II, Eclipse™ II, PolarPro, PolarPro II, and QuickPC^{III}. Mature products include Eclipse, EclipsePlus, pASIC[®] 1, pASIC 2, pASIC 3, QuickFC, QuickMIPS, QuickPCI, QuickRAM[®], and V3, as well as royalty revenue, programming hardware and software.

New product revenue was negatively impacted during the second quarter of 2011 by an over-supply of inventory already in the channel for our broadband data card and mobile enterprise customers. The increase in mature product revenue primarily resulted from the increase in customer demand for end of life purchases of Eclipse products. One of our U.S. customers, purchasing primarily pASIC 3 and Eclipse devices, accounted for 21% and 10% of total revenue in the second quarters of 2011 and 2010, respectively.

We continue to seek to expand our revenue, including the pursuit of high volume sales opportunities in the consumer

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

market segment, by providing CSSPs incorporating intellectual property such as VEE, DPO, AES or other security standards, or industry standard interfaces such as USB 2.0 OTG, SDIO and control interfaces such as PS2, I2C, SPI, and PWM. Our industry is characterized by intense price competition and by lower margins as order volumes increase. While winning large volume sales opportunities would increase our revenue, we believe these opportunities may decrease our gross profit as a percentage of revenue.

Gross Profit

The table below sets forth the changes in gross profit for the three months ended July 3, 2011 as compared to the three months ended July 4, 2010 (in thousands, except percentage data):

	Three Months Ended July 3, 2011			July 4, 2010			Change		
	Amount	% of Total Revenues		Amount	% of Total Revenues		Amount	Percentage	
Revenue	\$5,737	100	%	\$6,479	100	%	\$(742)	(11)	%
Cost of revenue	1,966	34	%	2,553	39	%	(587)	(23)	%
Gross Profit	\$3,771	66	%	\$3,926	61	%	\$(155)	(4)	%

The \$0.2 million decrease in gross profit in the second quarter of 2011 as compared to the second quarter of 2010 was mainly due to lower revenue and higher unabsorbed overhead in the second quarter of 2011 as compared to the second quarter of 2010. The sale of previously reserved inventories contributed \$42,000, or 0.7% of revenue, to gross profit in the second quarter of 2011 and \$112,000, or 1.7% of revenue, in the second quarter of 2010.

Our semiconductor products have historically had a long product life cycle and obsolescence has not been a significant factor in the valuation of inventories. However, as we pursue opportunities in the mobile market and continue to develop new CSSPs and products, we believe our product life cycle will be shorter and increase the potential for obsolescence. We also regularly review the cost of inventories against estimated market value and record a lower of cost or market reserve for inventories that have a cost in excess of estimated market value. This could have a material impact on our gross margin and inventory balances based on additional write-downs to net realizable value or a benefit from inventories previously written down.

Operating Expenses

The table below sets forth the changes in operating expenses for the three months ended July 3, 2011 as compared to the three months ended July 4, 2010 (in thousands, except percentage data):

	Three Months Ended July 3, 2011			July 4, 2010			Change		
	Amount	% of Total Revenues		Amount	% of Total Revenues		Amount	Percentage	
R&D expense	\$3,312	58	%	\$1,533	24	%	\$1,779	116	%
SG&A expense	2,543	44	%	2,518	39	%	25	1	%
Total operating expenses	\$5,855	102	%	\$4,051	63	%	\$1,804	45	%

Research and Development

Our research and development, or R&D, expenses consist primarily of personnel, overhead and other costs associated with engineering process improvements, programmable logic design, CSSP design and software development. The \$1.8 million increase in R&D expenses in the second quarter of 2011 as compared to the second quarter of 2010 was attributable primarily to a \$1.1 million increase in third party chip design costs; a \$427,000 increase in purchased IP; and a \$194,000 increase in compensation expenses due to the reinstatement of our employees' full cash compensation amounts upon the expiration of a temporary salary reduction initiated in 2010.

Selling, General and Administrative Expense

22

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

Our selling, general and administrative, or SG&A, expenses consist primarily of personnel and related overhead costs for sales, marketing, finance, administration, human resources and general management. The \$25,000 increase in SG&A expenses in the second quarter of 2011 as compared to the second quarter of 2010 was primarily due to a \$132,000 increase in compensation expenses due to the reinstatement of our employees' full cash compensation amounts upon the expiration of a temporary salary reduction initiated in 2010 and a \$30,000 increase in equipment and supplies. These increases were partially offset by a \$133,000 decrease in stock-based compensation.

Interest Expense and Interest Income and Other, net

The table below sets forth the changes in interest expense and interest income and other, net, for the three months ended July 3, 2011 as compared to the three months ended July 4, 2010 (in thousands, except percentage data):

	Three Months Ended		Change	
	July 3, 2011	July 4, 2010	Amount	Percentage
Interest expense	\$(18)	\$(27)	\$9	(33)%
Interest income and other, net	(13)	(50)	37	(74)%
	\$(31)	\$(77)	\$46	(60)%

The decrease in interest expense was due primarily to the reduction of our average debt obligation to \$0.2 million in the second quarter of 2011 from \$2.6 million in the second quarter of 2010. The change in interest income and other, net, was due primarily to foreign exchange fluctuations in the second quarter of 2011 as compared to the second quarter of 2010.

We conduct a portion of our research and development activities in Canada and India and we have sales and marketing activities in various countries outside of the United States. Most of these international expenses are incurred in local currency. Foreign currency transaction gains and losses are included in interest and other income (expense), net, as they occur. We do not use derivative financial instruments to hedge our exposure to fluctuations in foreign currency and, therefore, our results of operations are and will continue to be susceptible to fluctuations in foreign exchange gains or losses.

Provision for (Benefit from) Income Taxes

The table below sets forth the changes in provision for Income Taxes for the three months ended July 3, 2011 as compared to the three months ended July 4, 2010 (in thousands, except percentage data):

	Three Months Ended		Change	
	July 3, 2011	July 4, 2010	Amount	Percentage
Provision for (benefit from) income taxes	\$(55)	\$13	\$(68)	(523)%

The provision for (benefit from) income taxes for the second quarters of 2011 and 2010 were primarily for our foreign operations which are cost-plus entities. The income tax benefit recognized in the three months ended July 3, 2011 related primarily to our foreign operations.

As of the end of the second quarter of 2011, our ability to utilize our income tax loss carryforwards in future periods is uncertain and, accordingly, we recorded a full valuation allowance against the related US tax provision. We will continue to assess the realizability of deferred tax assets in future periods.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

Six Months Ended July 3, 2011 and July 4, 2010

Revenue

The table below sets forth the changes in revenue for the six months ended July 3, 2011 as compared to the six months ended July 4, 2010 (in thousands, except percentage data):

	Six Months Ended July 3, 2011		July 4, 2010		Change	
	Amount	% of Total Revenues	Amount	% of Total Revenues	Amount	Percentage
Revenue by product line ⁽¹⁾ :						
New products	\$2,410	21 %	\$4,371	37 %	\$(1,961)	(45) %
Legacy products	8,874	79 %	7,537	63 %	1,337	18 %
Total revenue	\$11,284	100 %	\$11,908	100 %	\$(624)	(5) %

⁽¹⁾ For all periods presented: New products represent products introduced since 2005, and include ArcticLink, ArcticLink II, Eclipse™ II, PolarPro, PolarPro II, and QuickP@III. Mature products include Eclipse, EclipsePlus, pASIC® 1, pASIC 2, pASIC 3, QuickFC, QuickMIPS, QuickPCI, QuickRAM®, and V3, as well as royalty revenue, programming hardware and software.

New product revenue was negatively impacted during the first half of 2011 by an over-supply of inventory already in the channel for our broadband data card and mobile enterprise customers, and reduced demand from a secure data card customer due to design changes. The increase in legacy product revenue primarily resulted from the increase in customer demand for pASIC 3 and end of life purchases of Eclipse products. One of our U.S. customers, purchasing primarily pASIC 3 devices, accounted for 18% and 9% of total revenue in the first six months of 2011 and 2010, respectively.

In order to grow our revenue from its current level, we are dependent upon increased revenue from our existing new products, especially revenue from CSSPs designed using our ArcticLink, ArcticLink II, PolarPro and PolarPro II solution platforms and the development of additional new products and CSSPs.

We continue to seek to expand our revenue, including the pursuit of high volume sales opportunities in the consumer market segment, by providing CSSPs incorporating intellectual property such as VEE, DPO, AES or other security standards, or industry standard interfaces such as USB 2.0 OTG, SDIO and control interfaces such as PS2, I2C, SPI, and PWM. Our industry is characterized by intense price competition and by lower margins as order volumes increase. While winning large volume sales opportunities will increase our revenue, we believe these opportunities may decrease our gross profit as a percentage of revenue.

Gross Profit

The table below sets forth the changes in gross profit for the six months ended July 3, 2011 as compared to the six months ended July 4, 2010 (in thousands, except percentage data):

Six Months Ended

Edgar Filing: QUICKLOGIC CORPORATION - Form 10-Q

	July 3, 2011			July 4, 2010		Change			
	Amount	% of Total Revenues		Amount	% of Total Revenues	Amount		Percentage	
Revenue	\$ 11,284	100 %		\$ 11,908	100 %	\$(624)		(5)%	
Cost of revenue	3,905	35 %		4,669	39 %	(764)		(16)%	
Gross Profit	\$ 7,379	65 %		\$ 7,239	61 %	\$ 140		2 %	

The \$140,000 increase in gross profit in the first six months of 2011 as compared to the first six months of 2010 was mainly due to the higher shipments of mature products which carry higher gross margins than new products. The sale of previously reserved inventories contributed \$123,000, or 1.1% of revenue, to gross profit in the first six months of 2011 and

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

\$300,000, or 2.5% of revenue, in the first six months of 2010.

Our semiconductor products have historically had a long product life cycle and obsolescence has not been a significant factor in the valuation of inventories. However, as we pursue opportunities in the mobile market and continue to develop new CSSPs and products, we believe our product life cycle will be shorter and increase the potential for obsolescence. We also regularly review the cost of inventories against estimated market value and record a lower of cost or market reserve for inventories that have a cost in excess of estimated market value, which could have a material impact on our gross margin and inventory balances based on additional write-downs to net realizable value or a benefit from inventories previously written down.

Operating Expenses

The table below sets forth the changes in operating expenses for the six months ended July 3, 2011 as compared to the six months ended July 4, 2010 (in thousands, except percentage data):

	Six Months Ended July 3, 2011			July 4, 2010			Change	
	Amount	% of Total Revenues		Amount	% of Total Revenues		Amount	Percentage
R&D expense	\$5,115	45 %		\$3,593	30 %		\$1,522	42 %
SG&A expense	5,150	46 %		4,853	41 %		297	6 %
Total operating expenses	\$10,265	91 %		\$8,446	71 %		\$1,819	22 %

Research and Development

Our R&D expenses consist primarily of personnel, overhead and other costs associated with engineering process improvements, programmable logic design, CSSP design and software development. The \$1.5 million increase in R&D expenses in the first six months of 2011 as compared to the first six months of 2010 was attributable primarily to a \$1.1 million increase in third party chip design costs; a \$254,000 increase in compensation expenses due to the reinstatement of our employees' full cash compensation amounts upon the expiration of a temporary salary reduction initiated in 2010; and a \$147,000 increase in depreciation expenses.

Selling, General and Administrative Expense

Our SG&A expenses consist primarily of personnel and related overhead costs for sales, marketing, finance, administration, human resources and general management. The \$297,000 increase in SG&A expenses in the first six months of 2011 as compared to the first six months of 2010 was primarily due to an increase in compensation expenses due to the reinstatement of our employees' full cash compensation amounts upon the expiration of a temporary salary reduction initiated in 2010.

Interest Expense and Interest Income and Other, net

The table below sets forth the changes in interest expense and interest income and other, net, for the six months ended July 3, 2011 as compared to the six months ended July 4, 2010 (in thousands, except percentage data):

Six Months Ended	Change Amount	Percentage
------------------	------------------	------------

Edgar Filing: QUICKLOGIC CORPORATION - Form 10-Q

	July 3, 2011	July 4, 2010				
Gain on sale of TowerJazz Semiconductor Ltd. Shares	\$—	\$993	\$(993)	(100)%
Interest expense	(26) (45) 19		(42)%
Interest income and other, net	(17) (71) 54		(76)%
	\$(43) \$877	\$(920)	(105)%

The decrease in interest expense was due primarily to the reduction of our average debt obligation to \$0.3 million in the first six months of 2011 from \$2.6 million in the first six months of 2010. The change in interest income and other, net was due primarily to the foreign exchange losses in the first six months of 2011 as compared to the first six months of 2010.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

We conduct a portion of our research and development activities in Canada and India and we have sales and marketing activities in various countries outside of the United States. Most of these international expenses are incurred in local currency. Foreign currency transaction gains and losses are included in interest and other income (expense), net, as they occur. We do not use derivative financial instruments to hedge our exposure to fluctuations in foreign currency; therefore, our results of operations are and will continue to be susceptible to fluctuations in foreign exchange gains or losses.

Provision for (benefit from) Income Taxes

The table below sets forth the changes in provision for Income Taxes from the six months ended July 3, 2011 as compared to the six months ended July 4, 2010 (in thousands, except percentage data):

	Six Months Ended		Change	
	July 3, 2011	July 4, 2010	Amount	Percentage
Provision for (benefit from) Income Taxes	\$9	\$28	\$(19)	(68)%

The provision for (benefit from) income taxes for the first six months of 2011 and 2010 were primarily for our foreign operations which are cost-plus entities.

As of the end of the first six months of 2011, our ability to utilize our income tax loss carryforwards in future periods is uncertain and, accordingly, we recorded a full valuation allowance against the related US tax provision. We will continue to assess the realizability of deferred tax assets in future periods.

Liquidity and Capital Resources

We have financed our operating losses and capital investments through sales of common stock, private equity investments, capital and operating leases, and cash flows from operations. As of July 3, 2011, our principal sources of liquidity consisted of our cash and cash equivalents of \$21.4 million, available credit under our revolving line of credit with Silicon Valley Bank of \$6.0 million, and our investment in TowerJazz with a market value of approximately \$0.8 million. As of July 3, 2011, there is no material difference between the fair value and the carrying amount of the debt outstanding under the Company's line of credit and capital leasing arrangements. The borrowing under the Company's line of credit is subject to maintaining a tangible net worth of at least \$15 million, unrestricted cash or cash equivalent balance of at least \$8 million and a quick ratio of 2-to-1. Upon each advance, the Company can elect a variable interest rate, which is the prime rate plus one half of one percent, or a fixed rate which is the LIBOR plus the LIBOR rate margin. We were in compliance with all loan covenants as of the end of the current reporting period.

Most of our cash and cash equivalents were invested in a US Treasury money market fund rated AAAM/Aaa. Our interest-bearing debt consisted of \$0.2 million outstanding under capital leases (see Note 6 of the Condensed Unaudited Consolidated Financial Statements). During the first three quarters of 2010, we sold 700,000 shares of TowerJazz ordinary shares. As of July 3, 2011, the 645,000 remaining shares of our investment in TowerJazz had a market value of approximately \$0.8 million.

Net cash from operating activities

Net cash used for operating activities was \$1.5 million in the first six months of 2011. The cash used for operating activities was primarily derived from (1) a net loss of \$2.9 million; (2) \$1.7 million of net non-cash charges; and (3)

net changes in working capital which accounted for cash usage of \$211,000 in the first six months of 2011. The non-cash charges consisted primarily of stock-based compensation of \$879,000, depreciation and amortization of \$651,000, and a write-down of inventory of \$176,000. The net changes in working capital included an increase in inventories of \$883,000; a decrease in other assets of \$64,000; a decrease in accrued liabilities of \$217,000; and a decrease in trade payables of \$25,000. This was offset by a decrease in accounts receivable of \$1.0 million and a decrease in deferred royalty revenue of \$132,000.

Net cash used for operating activities was \$1.6 million in the first half of 2010. The cash used for operating activities resulted from the net loss in the first half of 2010 as well as changes in working capital. The net loss of \$358,000 included non-cash charges of \$1.1 million which consist of the gain on the sale of TowerJazz shares of \$993,000, stock-based compensation of \$1.3 million, depreciation and amortization of \$582,000, utilization of wafer credits of \$190,000, and a write-down of inventory of \$73,000. The changes in the working capital accounts included an increase in accounts receivable of \$836,000, an increase in inventories of \$177,000, an increase in other assets of \$618,000, and a decrease in trade payable of \$765,000 due to

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

the timing of expenditures. These cash uses in the working capital accounts were partially offset by an increase in other long term liabilities of \$116,000.

Net cash from investing activities

Net cash used by investing activities for the first six months of 2011 was \$501,000, resulting primarily from purchases of capital expenditures to acquire manufacturing equipment. Capital expenditures, which are largely driven by the development of new products and manufacturing levels, are projected to be approximately \$1.2 million during the remainder of fiscal year 2011.

Net cash provided by investing activities for the first half of 2010 was \$1.0 million, resulting from proceeds from the sale of TowerJazz shares of \$1.1 million, partially offset by \$147,000 in capital expenditures primarily made to acquire manufacturing equipments.

Net cash from financing activities

Net cash provided by financing activities was \$1.4 million for the first six months of 2011, resulting from \$1.6 million in proceeds related to the issuance of common shares to employees under our equity plans, partially offset by scheduled payments under the terms of our capital lease obligations.

Net cash provided by financing activities was \$275,000 for the first half of 2010, resulting from scheduled payments under the terms of our debt and capital lease obligations, partially offset by \$468,000 in proceeds related to the issuance of common shares to employees under our equity plans. During the first half of 2010, we repaid \$4.0 million of revolving debt at an interest rate of 6% and borrowed \$2.0 million of revolving debt with an interest rate of 6% in Q1 2010 and \$2.0 million of revolving debt with an interest rate of 4.5% in Q2 2010.

We require substantial cash to fund our business. However, we believe that our existing cash resources will be sufficient to fund operations and capital expenditures, and provide adequate working capital for at least the next twelve months. After the next twelve months, our cash requirements will depend on many factors, including our level of revenue and gross profit, the market acceptance of our existing and new products, the levels at which we maintain inventories and accounts receivable, costs of securing access to adequate manufacturing capacity, new product development efforts, capital expenditures and the level of our operating expenses.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

Contractual Obligations and Commercial Commitments

The following table summarizes our contractual obligations and commercial commitments as of July 3, 2011 and the effect such obligations and commitments are expected to have on our liquidity and cash flows in future fiscal periods (in thousands):

	Payments Due by Period			
	Total	Less than 1 Year	1-3 Years	More than 3 Years
Contractual cash obligations:				
Operating leases	\$845	\$545	\$300	\$—
Wafer purchases ⁽¹⁾	1,377	1,377	—	—
Other purchase commitments	3,463	3,463	—	—
Total contractual cash obligations	5,685	5,385	300	—
Other commercial commitments ⁽²⁾ :				
Revolving line of credit	—	—	—	—
Capital lease obligations	207	207	—	—
Total commercial commitments	207	207	—	—
Total contractual obligations and commercial commitments ⁽³⁾	\$5,892	\$5,592	\$300	\$—

(1) Certain of our wafer manufacturers require us to forecast wafer starts several months in advance. We are committed to take delivery of and pay for a portion of forecasted wafer volume. Wafer purchase commitments of \$1.4 million include both firm purchase commitments and a portion of our forecasted wafer starts as of July 3, 2011.

(2) Other commercial commitments are included as liabilities on our balance sheets as of July 3, 2011.

(3) Does not include unrecognized tax benefits of \$43,000 as of July 3, 2011. See Note 10 of the Condensed Unaudited Consolidated Financial Statements.

Concentration of Suppliers

We depend on a limited number of contract manufacturers, subcontractors and suppliers for wafer fabrication, assembly, programming and testing of our devices, and for the supply of programming equipment. These services are typically provided by one supplier for each of our devices. We purchase these single or limited source services through standard purchase orders. Because we rely on independent subcontractors to perform these services, we cannot directly control product delivery schedules, costs or quality levels. Our future success also depends on the financial viability of our independent subcontractors. These subcontract manufacturers produce products for other companies and we must place orders in advance of expected delivery. As a result, we have only a limited ability to react to fluctuations in demand for our products, which could cause us to have an excess or a shortage of inventories of a particular product, and our ability to respond to changes in demand is limited by the ability of these suppliers to provide products with the quantity, quality, cost and timeliness that we require. The decision not to provide these services to us or the inability to supply these services to us, such as in the case of a natural or financial disaster, would have a significant impact on our business. Increased demand from other companies could result in these subcontract manufacturers allocating available capacity to customers that are larger or have long-term supply contracts in place and we may be unable to obtain adequate foundry and other capacity at acceptable prices, or we may experience

delays or interruption in supply. Additionally, volatility of economic, market, social and political conditions in countries where these suppliers operate may be unpredictable and could result in a reduction in product revenue or increase our cost of revenue and could adversely affect our business, financial condition and results of operations.

Off-Balance Sheet Arrangements

We do not maintain any off-balance sheet partnerships, arrangements or other relationships with unconsolidated entities or others, often referred to as structured finance or special purpose entities, which are established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Table of Contents

Recently Issued Accounting Pronouncements

See Note 2 of the Condensed Unaudited Consolidated Financial Statements for a description of recent accounting pronouncements, including the respective dates of adoption and effects on results of operations and financial condition.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Risk

Our exposure to market rate risk for changes in interest rates relates primarily to our investment portfolio and variable rate debt. We do not use derivative financial instruments to manage our interest rate risk. We are adverse to principal loss and ensure the safety and preservation of invested funds by limiting default, market risk and reinvestment risk. Our investment portfolio is generally comprised of investments that meet high credit quality standards and have active secondary and resale markets. Since these securities are subject to interest rate risk, they could decline in value if interest rates fluctuate or if the liquidity of the investment portfolio were to change. Due to the short duration and conservative nature of our investment portfolio, we do not anticipate any material loss with respect to our investment portfolio. A 10% move in interest rates as of the end of the second quarter of 2011 would have an immaterial effect on our financial position, results of operations and cash flows.

Foreign Currency Exchange Rate Risk

All of our sales and costs of manufacturing are transacted in U.S. dollars. We conduct a portion of our research and development activities in Canada and India and have sales and marketing offices in several locations outside of the United States. We use the U.S. dollar as our functional currency. Most of the costs incurred at these international locations are in local currency. If these local currencies strengthen against the U.S. dollar, our payroll and other local expenses will be higher than we currently anticipate. Since our sales are transacted in U.S. dollars, this negative impact on expenses would not be offset by any positive effect on revenue. Operating expenses denominated in foreign currencies were approximately 16% and 17% of total operating expenses for the first six months of 2011 and 2010, respectively. A currency exchange rate fluctuation of 10% would have caused our operating expenses to change by approximately \$166,000 in the first six months of 2011.

Equity Price Risk

Our exposure to equity price risk for changes in market value relates primarily to our investment in TowerJazz. TowerJazz's ordinary shares trade on the Nasdaq Global Market under the symbol "TSEM". Since these securities are publicly traded on the open market, they are subject to market fluctuations. Temporary market fluctuations are reflected by increasing or decreasing the present value of the related securities and recording "accumulated other comprehensive income (loss)" in the equity section of the balance sheet. An "other than temporary" decline in market value is reflected by decreasing the carrying value of the related securities and recording a charge to operating expenses in the income statement. A determination that a decline in market value is "other than temporary" includes factors such as the then current market value and the period of time that the market value had been below the carrying value. During the first quarter of 2010, we sold 700,000 TowerJazz ordinary shares. In the first six months of 2011 and 2010, we marked to market and recorded an unrealized gain of \$0.5 million and \$0.3 million, respectively, based on the quoted market price of the stock on the last day of the reporting period. As a result, the carrying value of the TowerJazz ordinary shares was \$1.19 per share as of the end of the second quarter of 2011.

There have been no changes since the end of the last fiscal year, in the risk exposures described above or the management of such exposures and there are no expected changes going forward.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to ensure that information required to be disclosed in the reports we file or submit pursuant to the Securities and Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Table of Contents

Management, with the participation of the Chief Executive Officer and Chief Financial Officer, has performed an evaluation of our disclosure controls and procedures for the current period. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded to a reasonable assurance level that, as of July 3, 2011, our disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

See Note 13 of the Condensed Unaudited Consolidated Financial Statements for a description of legal proceedings.

Item 1A. Risk Factors

Our 2010 Annual Report on Form 10-K for the year ended January 2, 2011 includes a detailed discussion of our risk factors at Part I, Item 1A, Risk Factors, which should be read in conjunction with the the updates disclosed in our Quarterly Report on Form 10-Q for the quarter ended April 3, 2011.
