Chairman of the Board

Chairman's
Letter to Shareholders

Once again, I am pleased to report that over the six-month period covered by this semiannual report your Fund continued to provide you with monthly tax-free income and an attractive total return. For more details about the management strategy and performance of your Fund, please see the Portfolio Manager's Comments and Performance Overview sections of this report.

As I noted in my last letter to you, our conversations with financial advisers and investors suggest that many of you may be wondering whether longer-term interest rates will soon begin to rise substantially, mirroring the rise that has taken place over the past year in shorter-term rates. If longer-term rates do begin to rise significantly, some of you also may be wondering if that makes this a good time to adjust your holdings of fixed-income investments. We can't answer these questions for you - no one knows what the future will bring.
"In fact, a well-diversified portfolio may actually help to reduce your overall investment risk."

From our experience, we do know that a well-balanced portfolio, structured and carefully monitored with the help of a trusted investment professional, can be an important component in helping you achieve your long-term financial goals. In fact, a well-diversified portfolio may actually help to reduce your overall investment risk. That is one reason why we believe that a municipal bond investment like your Nuveen Fund can be an important building block in a comprehensive investment program designed to perform well in a variety of market conditions.

As in past reports, \(I\) urge you to consider receiving future Fund reports and other Fund information by e-mail and the Internet. Not only will you be able to receive the information faster, but this also may help lower your Fund's expenses. Sign up is quick and easy - see the inside front cover of this report for instructions.

Some of you may have heard that in April, 2005, The St. Paul Travelers Companies, Inc., which owned \(79 \%\) of Nuveen Investments, Inc. (the parent of your Fund's investment adviser) completed a public offering of a substantial portion of its equity stake in Nuveen. At the same time, St. Paul Travelers also entered into agreements to sell the balance of its shares in Nuveen to us or to others at a future date.

These transactions will have no impact on the investment objectives or management of your Fund. However, taken as a whole they are considered to be an "assignment" of your Fund's investment management agreement. This means that you and your fellow Fund shareholders soon will be asked to formally approve the continuation of your Fund's management contract with Nuveen. We will be sending you more information about this process in the coming weeks.

At Nuveen Investments, our mission continues to be to assist you and your financial advisor by offering investment services and products that can help you to secure your financial objectives. We are grateful that you have chosen us as a partner as you pursue your financial goals, and we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,
/s/ Timothy R. Schwertfeger

Nuveen Investments Municipal Closed-End Exchange-Traded Funds
NPP, NMA, NMO, NAD, NXZ, NZF
Portfolio Manager's
Comments

Portfolio manager Tom Spalding reviews key investment strategies and the semiannual performance of these six Funds. With 30 years of investment experience at Nuveen, Tom has managed NXZ since its inception in 2001 and NPP, NMA, NMO, NAD and NZF since 2003.

What key strategies were used to manage these Funds during the six months ended April 30, 2005?

\title{
Edgar Filing: NUVEEN DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS
}

Between November 2004 and April 2005, the Federal Reserve introduced four quarter-point increases in the fed funds rate, raising this short-term rate benchmark from 1.75\% to 2.75\%. (On May 3, 2005, following the end of this reporting period, the Fed announced another \(0.25 \%\) hike, bringing the fed funds rate to \(3.00 \%\).) Given these short-term rate increases, many market participants expected to see steadily higher interest rates across most of the municipal market yield curve as we moved through the reporting period. This did not occur, as longer-term yields (as measured by the widely-followed Bond Buyer 25 Revenue Municipal Bond Index) declined by 14 basis points during the six-month period. As a result, the municipal yield curve flattened.

In this environment, our focus for all these Funds remained on a strategy we have employed for the past few years - finding and holding bonds that, in our judgment, would add immediate value to the Funds' portfolios and that could also perform well under a variety of future market scenarios.

As a result, our purchase activity during this period generally concentrated on bonds in the long-intermediate part of the yield curve, that is, bonds that mature in about 20 years. In our opinion, this part of the municipal market yield curve often offered more attractive opportunities and better values than bonds with longer or shorter maturities. The specific securities purchased for each Fund varied according to the average maturity of the Fund's current portfolio and its overall sensitivity to interest rate fluctuations.

As discussed in our last shareholder report, in late 2004 we began using forward interest rate swaps, a type of derivative financial instrument, in an attempt to reduce some of the interest rate risk in NXZ. It is important to note that we did not use the hedge in an attempt to profit from correctly predicting the timing and direction of interest rate movements. Instead, our sole objective was to reduce NXZ's duration (and therefore its price sensitivity to interest rate changes) without having a negative impact on its income stream or common share dividends over the short term. The gain or loss from the hedge is reflected as an addition or subtraction to the Fund's net asset value (NAV) as the

4
market value of the hedge fluctuates. The hedge, was effective in helping to reduce the NAV volatility of NXZ over the course of this reporting period. However, it had a negative impact on the Fund's total return over the six-month period because declining long-term interest rates caused the value of the hedge to decline as the value of the Fund's portfolio rose.

How did the Funds perform?

Individual results for these Funds, as well as for a comparative index and average, are presented in the accompanying table.

* Six-month returns are cumulative; returns for one year, five years, and ten years are annualized.

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the individual Performance Overview for your Fund in this report.

For the six months ended April 30, 2005, the cumulative returns on NAV for all six of the Funds covered in this report outperformed the return on the Lehman Brothers Municipal Bond Index. NXZ and NZF also outperformed the average return for their Lipper peer group, while NPP, NMA, NMO and NAD trailed this measure.

One of the primary factors benefiting the six-month performance of these Funds relative to that of the unleveraged Lehman Brothers index was the Funds' use of financial leverage. While leveraging can add volatility to the Funds' NAVs and share prices, especially during periods of rising interest rates, this strategy can also provide opportunities for additional income and total returns for common shareholders when short-term interest rates remain relatively low and long-term rates fall or remain fairly constant, as they did during this reporting period.
(1) The Lehman Brothers Municipal Bond Index is an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.
(2) The Lipper General Leveraged Municipal Debt Funds category average is calculated using the returns of all closed-end exchange-traded funds in this category for each period as follows: 6 months, 67 funds; 1 year, 67 funds; 5 years, 51 funds; and 10 years, 46 funds. Fund and Lipper returns assume reinvestment of dividends.

As noted earlier, the municipal market yield curve flattened over the course of the reporting period. As a result, the prices of bonds with longer maturities generally tended to perform better than those of securities with shorter maturities. This contributed to the relatively strong performance of NXZ and NZF, which had more exposure to the longer end of the yield curve than the other four Funds. Each Fund's specific holdings of longer and shorter maturity bonds accounted for much of the performance differentials between them over these six-months.

The flattening of the yield curve during this period also created an environment in which many issuers found refunding existing issues to be economically attractive. This led to an increase in escrowed and pre-refunded holdings in most of the Funds, especially NPP, NMA, NXZ and NZF. The performance of the Funds was boosted by these advance refundings, which resulted in price appreciation as well as enhanced credit quality. At the same time, we were trimming the Funds' holdings of some older pre-refunded bonds, which tended to underperform the general municipal market during this period due primarily to the shorter effective maturities of these bonds.

All of the Funds also benefited from their allocations of lower quality bonds during this period, with bonds rated BBB generally outperforming other credit quality sectors as the demand for these bonds increased. Among the lower-rated holdings making positive contributions to the Funds' cumulative six-month returns were hospital bonds, as the healthcare sector ranked second in terms of performance among the Lehman municipal revenue sectors for the period. In addition, bonds backed by the 1998 master tobacco settlement agreement also produced solid performance during this period, as the litigation environment improved and increased demand drove tobacco bond prices higher. As of April 30, 2005, all of these Funds held close to 5\% of their portfolio assets in tobacco bonds.

Also during this reporting period, NMO continued to hold bonds issued by the Indianapolis Airport Authority and originally backed by United Airlines. As the airline continued its struggle to emerge from bankruptcy, these bonds continued to decline in value, which detracted from NMO's performance during this period. NXZ and NZF also held small quantities of these bonds.

\section*{6}

How were the Funds positioned in terms of credit quality and bond calls as of April 30, 2005?

Even though lower quality bonds performed well over this period, we continued to believe that in the current geopolitical and economic climate it was important to maintain strong credit quality. As of April 30, 2005 , all six of these funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from \(66 \%\) in NXZ to \(76 \%\) in NMA, \(78 \%\) in NAD, 80\% in NMO, 82\% in NZF and 83\% in NPP.

At the end of April 2005, potential call exposure for the period May 2005 through the end of 2006 ranged from \(4 \%\) in NXZ to \(5 \%\) in NZF, \(7 \%\) in NMO, 11\% in NAD, and \(13 \%\) in NPP and NMA. The number of actual bond calls in all of these Funds depends largely on future market interest rates.

All six of the Funds in this report use leverage to enhance opportunities for additional income for common shareholders. The extent of this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R) shareholders. During periods of low short-term rates, leveraged Funds generally pay lower dividends to MuniPreferred shareholders, which can leave more earnings to support common share dividends. However, when short-term interest rates rise, as they did during this reporting period, the Funds' borrowing costs also rise.

\section*{Edgar Filing: NUVEEN DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS}

While leveraging can still provide benefits for common shareholders as short-term rates rise, the extent of the benefit may be less. In addition, any reinvested proceeds from bonds called or retired during this period were reinvested in a low interest rate environment, which also tended to reduce the income generated by the Funds. The combination of these two factors led to dividend reductions in NPP, NMA, NMO and NAD over the six-month period ended April 30, 2005. The dividends of NXZ and NZF, which experienced fewer bond calls, remained stable during this period.

Due to capital gains generated by normal portfolio activity, common shareholders of the following Funds received capital gains and/or net ordinary income distributions at the end of December 2004 as follows:
\begin{tabular}{lrr} 
Long-Term Capital Gains \\
(per share) & Ordinary Income \\
(per share)
\end{tabular}

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's net asset value (NAV). Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of April 30, 2005, all of the Funds in this report had positive UNII balances for both financial statement and tax purposes.

At the end of the reporting period, the Funds' share prices were trading at discounts to their NAVs as shown in the accompanying table:

(1) Taxable-equivalent yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Fund on an after-tax basis. It is based on a federal income tax rate of $28 \%$. For investments that generate qualified dividend income, the taxable-equivalent yield is lower.

# Edgar Filing: NUVEEN DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS 

4/30/05
14.32

#### Abstract

(1) Taxable-equivalent yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the fund on an after-tax basis. It is based on a federal income tax rate of $28 \%$. For investments that generate qualified dividend income, the taxable-equivalent yield is lower.

(1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
* Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates.
** Ratings: Using the higher of Standard \& Poor's or Moody's rating.
*** Securities are backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensures the timely payment of principal and interest. Such securities are normally considered to be equivalent to AAA rated securities.
\(\mathrm{N} / \mathrm{R}\) Investment is not rated.
(WI) Security purchased on a when-issued basis.
+ Security has a maturity of more than one year, but has variable rate and demand features which qualify it as a short-term security. The rate disclosed is that in effect at the end of the reporting period. This rate changes periodically based on market conditions or a specified market index.

(1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
(2) Effective date represents the date on which both the Fund and counterparty commence interest payment accruals on each forward swap contract.
* Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates.
** Ratings: Using the higher of Standard \& Poor's or Moody's rating.
*** Securities are backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensures the timely payment of principal and interest. Such securities are normally considered to be equivalent to AAA rated securities.
\(\mathrm{N} / \mathrm{R}\) Investment is not rated.
\# On December 9, 2002, UAL Corporation, the holding company of United Air Lines, Inc., filed for federal bankruptcy protection. The Adviser determined that it was likely United would not remain current on their interest payment obligations with respect to these bonds and thus has stopped accruing interest.
(PLG) Portion of security, with an aggregate market value of \(\$ 421,775\), has been pledged to collateralize the net payment obligations under forward swap contracts.
(a) The issuer has received a preliminary adverse determination from the Internal Revenue Service (the "IRS") regarding the tax-exempt status of the bonds' coupon payments. The Fund will continue to treat coupon payments as tax-exempt income until such time that it is formally determined that the interest on the bonds should be treated as taxable.

The Adviser determined that it was likely United would not remain current on their interest payment obligations with respect to these bonds and thus has stopped accruing interest.
(WI) Security purchased on a when-issued basis.
+ Security has a maturity of more than one year, but has variable rate and demand features which qualify it as a short-term security. The rate disclosed is that in effect at the end of the reporting period. This rate changes periodically based on market conditions or a specified market index.
(a) The issuer has received a preliminary adverse determination from the Internal Revenue Service (the "IRS") regarding the tax-exempt status of the bonds' coupon payments. The Fund will continue to treat coupon payments as tax-exempt income until such time that it is formally determined that the interest on the bonds should be treated as taxable.

## 1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The funds (the "Funds") covered in this report and their corresponding Common share stock exchange symbols are Nuveen Performance Plus Municipal Fund, Inc. (NPP), Nuveen Municipal Advantage Fund, Inc. (NMA), Nuveen Municipal Market Opportunity Fund, Inc. (NMO), Nuveen Dividend Advantage Municipal Fund (NAD), Nuveen Dividend Advantage Municipal Fund 2 (NXZ) and Nuveen Dividend Advantage Municipal Fund 3 (NZF). Performance Plus (NPP), Municipal Advantage (NMA), Market Opportunity (NMO) and Dividend Advantage (NAD) are traded on the New York Stock Exchange while Dividend Advantage 2 (NXZ) and Dividend Advantage 3 (NZF) are traded on the American Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end, diversified management investment companies.

Each Fund seeks to provide current income exempt from regular federal income tax by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities.

Effective January 1, 2005, Nuveen Advisory Corp. ("NAC"), the Funds' previous Adviser, and its affiliate, Nuveen Institutional Advisory Corp. ("NIAC"), were merged into Nuveen Asset Management ("NAM"), each wholly owned subsidiaries of Nuveen Investments, Inc. ("Nuveen"). As a result of the merger, NAM is now the Adviser to all funds previously advised by either NAC or NIAC.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles.

## Investment Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors/Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. Prices of derivative investments are also provided by an independent pricing service approved by each Fund's Board of Directors/Trustees. If the pricing service is unable to supply a price for a derivative investment each Fund may use a market quote provided by a major broker/dealer in such investments. If it is determined that market prices for an investment are unavailable or inappropriate, the Board of Directors/Trustees of the Funds, or its designee, may establish a fair value for the investment. Temporary investments in securities that have variable rate
and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

## Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from transactions are determined on the specific identification method. Securities purchased on a when-issued or delayed delivery basis may have extended settlement periods. Any securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At April 30, 2005, Performance Plus (NPP), Municipal Advantage (NMA), Market Opportunity (NMO), Dividend Advantage (NAD) and Dividend Advantage 3 (NZF) had outstanding when-issued purchase commitments of $\$ 2,034,620, \$ 1,882,831, \$ 4,592,870$, $\$ 1,988,803$ and $\$ 2,848,468$, respectively. There were no such outstanding purchase commitments in Dividend Advantage 2 (NXZ).

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also includes paydown gains and losses, if any.

## Professional Fees

Professional fees presented in the Statement of Operations consist of legal fees incurred in the normal course of operations, audit fees, tax consulting fees and, in some cases, workout expenditures. Workout expenditures are incurred in an attempt to protect or enhance an investment, or to pursue other claims or legal actions on behalf of the Fund's shareholders.

Federal Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter $M$ of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal income tax, to retain such tax-exempt status when distributed to shareholders of the Funds. Net realized capital gains and ordinary income distributions paid by the Funds are subject to federal taxation.

Notes to
Financial Statements (Unaudited) (continued)
Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the

# Edgar Filing: NUVEEN DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS 

ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles.

Preferred Shares

The Funds have issued and outstanding Preferred shares, $\$ 25,000$ stated value per share, as a means of effecting financial leverage. Each Fund's Preferred shares are issued in more than one Series. The dividend rate on each Series is determined every seven days, pursuant to a dutch auction process overseen by the auction agent, and is payable weekly at the end of each rate period. The number of Preferred shares outstanding, by Series and in total, for each Fund is as follows:

|  | PERFORMANCE <br> PLUS <br> (NPP) | MUNICIPAL ADVANTAGE (NMA) | MARKET <br> OPPORTUNITY <br> (NMO) | DIVIDEND ADVANTAGE <br> (NAD) | DIVIDEN ADVANTAGE (NXZ |

| Total | 19,160 | 14,320 | 15,200 | 11,800 | 8,88 |

## Forward Swap Transactions

The Funds may invest in certain derivative financial instruments. The Funds' use of forward interest rate swap transactions is intended to mitigate the negative impact that an increase in long-term interest rates could have on Common share net asset value. Forward interest rate swap transactions involve each Fund's agreement with the counterparty to pay, in the future, a fixed rate payment in exchange for the counterparty paying the Fund a variable rate payment. The amount of the payment obligation is based on the notional amount of the forward swap contract. The Funds may close out a contract prior to the effective date at which point a realized gain or loss would be recognized. When a forward swap is terminated, it does not involve the delivery of securities or other underlying assets or principal, but rather is settled in cash. Each Fund intends, but is not obligated to, terminate its forward swaps before the effective date. Accordingly, the risk of loss with respect to the swap counterparty on such transactions is limited to the credit risk associated with a counterparty failing to honor its commitment to pay any realized gain to the Fund upon termination. To minimize such credit risk, all counterparties are required to pledge collateral daily (based on the daily valuation of each swap) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when any of the Funds have an unrealized loss on a swap contract, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the swap valuations fluctuate, either up or down, by at least the pre-determined threshold amount.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian
fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Indemnifications

Under the Funds' organizational documents, its Officers and Director/Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

4. INCOME TAX INFORMATION

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to the treatment of paydown gains and losses on investments, timing differences in recognizing income on taxable market discount securities and timing differences in recognizing certain gains and losses on security transactions.

At April 30, 2005, the cost of investments was as follows:

## 5. MANAGEMENT FEE AND OTHER TRANSACTIONS WITH AFFILIATES

As approved by the Board of Directors/Trustees, effective August 1, 2004, a complex-wide management fee structure was adopted for all funds sponsored by the Adviser, or its predecessor and its affiliates. This fee structure separates each fund's management fee into two components - a complex-level component, based on the aggregate amount of all fund assets managed by the Adviser, and a specific fund-level component, based only on the amount of assets within each individual fund. This pricing structure enables Nuveen fund shareholders to benefit from growth in the assets within each individual fund as well as from growth in the amount of complex-wide assets managed by the Adviser. Under no circumstances will this pricing structure result in a fund paying management fees at a rate higher than would otherwise have been applicable had the complex-wide management fee structure not been implemented. As of May 31, 2005, the complex-level fee rate was .1905\%; that is, the funds' effective management fees were reduced by approximately . $0095 \%$.

Effective August 1, 2004 , the annual fund-level fee, payable monthly, for each of the funds is based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

For the first $\$ 125$ million
For the next $\$ 125$ million
For the next $\$ 250$ million
For the next $\$ 500$ million
For the next $\$ 1$ billion
For the next $\$ 3$ billion

Effective August 1, 2004, the annual complex-level fee, payable monthly, which is additive to the fund-level fee, for all Nuveen sponsored funds in the U.S., is based on the aggregate amount of total fund assets managed as follows:

```
COMPLEX-LEVEL ASSETS(1)
```

For the first $\$ 55$ billion
For the next $\$ 1$ billion
For the next $\$ 1$ billion
For the next $\$ 3$ billion
For the next $\$ 3$ billion
For the next $\$ 3$ billion
For the next $\$ 5$ billion
For the next $\$ 5$ billion
For the next $\$ 15$ billion
For Managed Assets over $\$ 91$ billion (2)
(1) The complex-level fee component of the management fee for the funds is calculated based upon the aggregate Managed Assets ("Managed Assets" means the average daily net assets of each fund including assets attributable to all types of leverage used by the Nuveen funds) of Nuveen-sponsored funds in the U.S.
(2) With respect to the complex-wide Managed Assets over $\$ 91$ billion, the fee rate or rates that will apply to such assets will be determined at a later date. In the unlikely event that complex-wide Managed Assets reach $\$ 91$ billion prior to a determination of the complex-level fee rate or rates to be applied to Managed Assets in excess of $\$ 91$ billion, the complex-level fee rate for such complex-wide Managed Assets shall be . $1400 \%$ until such time as a different rate or rates is determined.

```

Each Fund paid through July 31, 2004, an annual management fee, payable monthly, at the rates set forth below, which were based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

```
For the first $125 million
```

For the next $\$ 125$ million
For the next $\$ 250$ million

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its Directors/Trustees who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Directors/Trustees has adopted a deferred compensation plan for independent Directors/Trustees that enables Directors/Trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen advised Funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised Funds.

6. ANNOUNCEMENT REGARDING PARENT COMPANY OF ADVISER

In early April, 2005, The St. Paul Travelers Companies, Inc. ("St. Paul Travelers"), which owned $79 \%$ of Nuveen, (A) completed a public offering of a substantial portion of its equity stake in Nuveen, (B) sold Nuveen $\$ 200$ million of its Nuveen shares, (C) entered into an agreement with Nuveen to sell an additional $\$ 400$ million of its Nuveen shares on a "forward" basis with payment for and settlement of these shares delayed for several months, and (D) entered into agreements with two unaffiliated investment banking firms to sell an amount equal to most or all of its remaining Nuveen shares for current payment but for future settlement. The settlement of transactions (C) and (D) above would likely be deemed an "assignment" (as defined in the 1940 Act) of the investment management agreements between the Funds and the Adviser, which would result in the automatic termination of each agreement under the 1940 Act. The Board of Directors/Trustees will consider approval of new ongoing investment management

reinvestment
account.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS
DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

## EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED
The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

## FLEXIBLE

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a $\$ 2.50$ service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

GLOSSARY OF TERMS USED IN THIS REPORT

AVERAGE ANNUAL TOTAL RETURN: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment's actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.

AVERAGE EFFECTIVE MATURITY: The average of all the maturities of the bonds in a Fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

LEVERAGE-ADJUSTED DURATION: Duration is a measure of the expected period over which a bond's principal and interest will be paid, and consequently is a measure of the sensitivity of a bond's or bond Fund's value to changes when market interest rates change. Generally, the longer a bond's or Fund's duration, the more the price of the bond or Fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is longer than the duration of the Fund's portfolio of bonds.

MARKET YIELD (ALSO KNOWN AS DIVIDEND YIELD OR CURRENT YIELD): An investment's current annualized dividend divided by its current market price.

NET ASSET VALUE (NAV): A Fund's common share NAV per share is calculated by subtracting the liabilities of the Fund (including any MuniPreferred shares issued in order to leverage the Fund) from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

TAXABLE-EQUIVALENT YIELD: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.
