SEMI-ANNUAL REPORTS

APRIL 30, 2007

A Letter to Shareholders

Dear Shareholder

In its first four months, 2007 could already be termed an eventful year for investors. For most financial markets, 2007 opened just as 2006 ended - on a positive trajectory. Then, at the end of February and into March, global equity markets registered their first significant decline since last summer. The market jitters were triggered by a significant setback in the Chinese market and were exacerbated by worries of a weakening economy, escalating geopolitical concerns and rising delinquencies in the subprime mortgage market. Still, underlying stock market fundamentals appeared quite sound, supported by a generally favorable global economic backdrop, tame inflation, slowing but still positive earnings growth, relatively low interest rates and attractive valuations. These conditions prevailed later, and the Dow Jones Industrial Average crossed the 13,000 mark for the first time in its history in late April.

Not unlike the equity market, the bond market also experienced volatility as observers attempted to interpret mixed economic signals. A bond market rally (falling yields and rising prices) late last year reversed itself early in 2007 amid some transitory signs of economic strength. Overall, yields have fluctuated month to month but ended April little changed from the beginning of the year. However, compared to one year ago, yields on 30-year Treasury bonds fell 36 basis points (.36%) and 10-year yields fell 44 basis points, while prices correspondingly rose.

For its part, the Federal Reserve Board (the Fed) has left the target short-term interest rate on hold at 5.25% since first pausing in its interest rate-hiking campaign on August 8, 2006. The central bankers continue to express concern about potential inflationary pressures, but also acknowledge signs of

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

economic weakness. Given this relatively "balanced" assessment, most observers believe the Fed will keep interest rates on hold for now.

Against this backdrop, most major market indexes posted positive returns for the annual and semi-annual reporting periods ended April 30, 2007:

Total Returns as of April 30, 2007	6-month
U.S. equities (Standard & Poor's 500 Index)	+ 8.60%
Small cap U.S. equities (Russell 2000 Index)	+ 6.86
International equities (MSCI Europe, Australasia, Far East Index)	+15.46
Fixed income (Lehman Brothers Aggregate Bond Index)	+ 2.64
Tax-exempt fixed income (Lehman Brothers Municipal Bond Index)	+ 1.59
High yield bonds (Lehman Brothers U.S. Corporate High Yield 2% Issuer Cap Index)	+ 6.96

If the first four months are any guide, 2007 could be a year of enhanced market volatility. As you navigate the un-certainties, we encourage you to review your investment goals with your financial professional and to make portfolio changes, as needed. For more insight, we invite you to view "What's Ahead in 2007: An Investment Perspective" and "Are You Prepared for Volatility?" at [www.blackrock.com/funds](http://www.blackrock.com/funds). We thank you for entrusting BlackRock with your investment assets, and we look forward to continuing to serve you in the months and years ahead.

Sincerely,

(Robert C. Doll, Jr.)

SEMI-ANNUAL REPORTS

APRIL 30, 2007

A Discussion With Your Funds' Portfolio Managers

We continued our efforts to enhance yield while protecting net asset value through investment in high-quality portfolios of municipal bonds.

Describe the recent market environment relative to municipal bonds.

Long-term bond yields traded in a fairly broad and volatile range over the past six months, only to end the period little changed. Overall, financial conditions have remained relatively balanced, with moderate economic activity and well-contained inflationary pressures. Recent commentary from the Federal Reserve Board (the Fed) has supported this trading range. The Fed is expected to maintain its "balanced" economic assessment at least into mid-year.

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

During the six-month reporting period, 30-year U.S. Treasury bond yields rose nine basis points (.09%) to 4.81%, while 10-year Treasury note yields rose two basis points to 4.63%. Similarly, movements were fairly muted in the tax-exempt market. As measured by Municipal Market Data, yields on AAA-rated municipal bonds maturing in 30 years declined three basis points to 4.10%, and yields on AAA-rated municipal bonds maturing in 10 years rose 12 basis points to 3.76%.

Investor demand for municipal product continued to strengthen throughout the six-month period. The Investment Company Institute reports that long-term municipal bond funds received over \$8.7 billion in net new cash flows during the first three months of 2007, a 42% increase compared to the first three months of 2006. Weekly fund flows, as reported by AMG Data, also have risen. Weekly inflows during the April 2007 quarter averaged over \$489 million, up from a weekly average of \$400 million in fourth quarter 2006. The improving demand among retail investors reflects, in large part, increased acceptance of lower nominal yields and bond coupon structure. Throughout much of last year, retail-oriented municipal bond broker/dealers noted significant individual investor resistance to purchasing tax-exempt issues with yields below 4.50% and/or issues bearing nominal coupons below 5%. As tax-exempt bond yields have stabilized in recent months, it appears retail investors have become increasingly comfortable purchasing tax-exempt bonds with those characteristics, which has served to support the market's performance.

In terms of supply, issuance of long-term municipal bonds has increased over the past six months. More than \$225 billion in new bonds was issued during the April reporting period, an increase of over 30% compared to the same six months one year ago. Over the past three months, municipalities issued more than \$106 billion in new long-term tax-exempt bonds, an increase of more than 32% compared to the same period a year ago. So far this year, greater than \$135 billion in long-term municipal bonds has been underwritten, putting 2007 annual issuance some 4% ahead of 2005's record pace. Issuers have continued to take advantage of historically low interest rates to refinance outstanding issues. In the first four months of 2007, we have seen 10 underwritings exceeding \$1 billion in size. These "mega-deals" have continued to be relatively easily absorbed by market participants, especially non-traditional and foreign buyers who find the liquidity afforded by these deals to be particularly attractive.

Looking ahead, we believe investor demand will be critical in maintaining the tax-exempt market's strong technical position. The increase in new bond supply seen this year is unlikely to abate significantly, leading to record or near-record annual issuance. Relatively stable yield ratios compared to taxable bonds, coupled with a comparatively steep municipal yield curve, should help to sustain traditional and non-traditional investor interest in tax-exempt bonds and support the market's performance into mid-2007.

BlackRock MuniYield Florida Insured Fund

Describe conditions in the State of Florida.

At period-end, Florida maintained its credit ratings of Aaa, AAA and AA+ from Moody's, Standard & Poor's and Fitch, respectively. The state's consistently strong financial performance has been the result of a robust service-oriented economy, prudent budget decisions and a moderate debt profile.

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

Florida's budget for fiscal year 2007 grew 7% to \$74 billion. Revenues are up only modestly over the prior year and are significantly below original estimates. As a result, Florida's fiscal year 2007-2008 budget proposals reflect expense reductions of approximately 3%. The governor and the legislature will continue to prioritize education spending, with most cuts expected to focus on nonrecurring items. Key credit issues include property tax reform, school funding, homeowners' insurance availability and the overall demand for government services from a rapidly growing population.

Overall, Florida's economy has outperformed on both a national and regional basis. Job creation has surpassed the national average, leading to low unemployment and rising personal incomes. The state unemployment rate of 3.3% in March compared to a national average of 4.4%. These trends, coupled with a relatively low cost of living, have continued to encourage migration into Florida and led to a more diversified demographic base. Although the demands of a growing population will put pressure on the state's finances, we continue to believe that Florida is well-positioned given its financial flexibility and record of proactive management.

Florida ranks 19th in debt per capita and 18th in debt as a percent of personal income, according to Moody's. The state's 2006 per capita personal income of \$35,798 was 20th in the nation, according to the U.S. Department of Commerce, and approximated the national average of \$36,276.

How did the Fund perform during the period?

For the six-month period ended April 30, 2007, the Common Shares of BlackRock MuniYield Florida Insured Fund had net annualized yields of 4.60% and 4.94%, based on a period-end per share net asset value of \$14.74 and a per share market price of \$13.72, respectively, and \$0.336 per share income dividends. Over the same period, the total investment return on the Fund's Common Shares was +1.31%, based on a change in per share net asset value from \$14.91 to \$14.74, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, lagged the +1.49% average return of the Lipper Florida Municipal Debt Funds category for the six-month period. (Funds in this Lipper category limit their investment to securities exempt from taxation in Florida [double tax-exempt] or a city in Florida [triple tax-exempt]). The Fund's underperformance is attributed largely to its exposure to bonds with intermediate maturities, which lagged as the yield curve flattened. We have exposure to these sectors through bonds that have been prerefunded - thereby transforming several of our longer-dated issues into intermediate maturities. Although these bonds have underperformed on a total return basis, they were acquired in a higher interest rate environment and, as such, contribute meaningfully to the portfolio's yield. While we have made efforts to reduce some of the Fund's concentration in prerefunded bonds, the cycle repeats itself as more bonds are prerefunded and the absolute low level of interest rates makes them difficult to replace.

As we have noted in the past, the Fund is an insured product within a peer group that includes funds with the ability to invest in uninsured and non-investment grade credits. Although the credit spread tightening phenomenon that has benefited non-investment grade issues has slowed, these lower-quality credits still amply outperformed the high-grade market during the reporting period, and our lack of exposure detracted from performance versus our more aggressive peers.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Shares (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

assuming reinvestment of distributions, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Shares can vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

We did not alter our mainline strategy - that is, we continued our efforts to increase the level of income provided to shareholders while muting the Fund's net asset value volatility. Having said that, the low absolute level of interest rates has presented challenges in terms of yield enhancement, as most of the bonds in the portfolio are booked at higher yields than those currently available in the market. In general, we made purchases when the market backed up (that is, interest rates increased and prices fell) and were sellers in November, after the market had rallied sharply (that is, interest rates fell and prices increased).

SEMI-ANNUAL REPORTS

APRIL 30, 2007

A Discussion With Your Funds' Portfolio Managers (continued)

For the most part, we continued to target premium-coupon bonds in the 20-year to 30-year maturity range whenever they became available. We continued to find the most attractive risk/reward trade-off here, although the flatness of the yield curve has made for few compelling opportunities. New municipal issuance in the State of Florida increased roughly 42% over the six months compared to the same period a year ago. However, as has been the case for some time, few new issues met our desired investment characteristics. Much of the supply came in the form of refinancings, and the majority of the new issues came with coupons below 5%. Late in the period, we did purchase some housing bonds and health care-related issues as supply in these sectors increased. We were able to make these purchases at attractive prices and capture some incremental yield for the portfolio.

Importantly, we remained fully invested throughout the period in an effort to augment yield.

For the six-month period ended April 30, 2007, the Fund's Auction Market Preferred Shares had an average yield of 3.58% for Series A and 3.43% for Series B. The Fed kept its target interest rate unchanged during the six-month period at 5.25%. As such, the Fund's borrowing costs remained relatively stable. Importantly, the municipal yield curve maintained its positive slope, particularly compared to the Treasury curve, and continued to generate an income benefit to the holders of Common Shares from the leveraging of Preferred Shares. As always, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield available to holders of Common Shares. (For a more complete explanation of the benefits and risks of leveraging, see page 12 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

We expect the Fed to keep interest rates on hold for now and, as such,

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

anticipate crosscurrents of strength and weakness in the market. Against this backdrop, the Fund ended the period with a fairly neutral interest rate posture, as we await the market to present opportunities in the form of higher interest rates. As that occurs, we intend to continue our strategy of selling prerefunded bonds with shorter maturities and investing in the 20-year to 30-year area of the municipal curve, where we continue to see the most compelling relative value.

BlackRock MuniYield Michigan Insured Fund, Inc.

Describe conditions in the State of Michigan.

The State of Michigan is rated Aa2, AA and AA- by Moody's, Standard & Poor's and Fitch, respectively. In late January 2007, Fitch downgraded the state's rating, and all three agencies maintain a negative outlook. Michigan ranks 30th in debt per capita and 32nd in debt as a percent of personal income, according to Moody's. The state ranked 27th in per capita income in 2006 (preliminary), according to the U.S. Department of Commerce. Michigan's March 2007 unemployment rate was 6.5%, well above the U.S. rate of 4.5%. It is the only state to have lost jobs for six straight years (through 2006).

Fiscal year 2006 ended on September 30, 2006, with an estimated \$200 million budget surplus, most of which was used to meet fiscal year 2007 spending obligations. Despite the use of the surplus, Michigan's fiscal year 2007 budget gap is \$700 million, following Governor Granholm's recent cuts of \$345 million. The governor's proposed fiscal year 2008 budget, announced in February, closes a large \$2.1 billion gap in a \$23 billion operating budget. This proposed budget relies more heavily on tax increases versus spending cuts, which had been the focus in prior fiscal years. Key credit concerns include an ailing automotive sector, the lack of a sustainable alternative industry and a declining housing market that could further undermine state revenue collections.

How did the Fund perform during the period?

For the six-month period ended April 30, 2007, the Common Stock of BlackRock MuniYield Michigan Insured Fund, Inc. had net annualized yields of 4.66% and 4.98%, based on a period-end per share net asset value of \$15.32 and a per share market price of \$14.33, respectively, and \$.354 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +1.63%, based on a change in per share net asset value from \$15.45 to \$15.32, and assuming reinvestment of all distributions.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

The Fund's total return, based on net asset value, exceeded the +1.40% average return of the Lipper Michigan Municipal Debt Funds category for the six-month period. (Funds in this Lipper category limit their investment to securities exempt from taxation in Michigan or a city in Michigan.) The Fund's favorable relative performance was driven primarily by continued strong returns among the lower-rated issues held in the portfolio. Both retail and institutional demand for higher-yielding credits remained very robust throughout the period, leading to substantial price appreciation for many of the Fund's A-rated and BBB-rated holdings. We are pleased with the Fund's results given that, as an insured fund, at least 80% of portfolio holdings must be insured or rated AAA. Notably, for the six-month period, the Fund also generated an above-average

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

distribution rate compared to its Lipper peer group average, largely reflecting the higher-yield environment in which the Fund originated.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of distributions, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock can vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

Portfolio activity was fairly limited during the semi-annual period. In the most recent quarter (February - April 2007), new issuance of Michigan bonds increased 65% compared to the same period a year ago, well above national levels. However, most of the new supply did not meet our desired investment characteristics. Much of it was issued in maturities shorter than 20 years, involved names in which the Fund already has significant exposure or came with unattractive yields.

Generally speaking, the low absolute level of interest rates continued to present challenges, as the vast majority of the Fund's holdings are booked at higher yields than those currently available in the market. For the most part, this environment rendered few compelling investment opportunities, although we did increase exposure to hospital revenue bonds (rated A or higher) when valuations were attractive.

We remained fully invested throughout the period in an effort to augment yield for our shareholders. We also maintained the Fund's high credit quality, with approximately 82% of net assets rated AAA at period-end.

For the six-month period ended April 30, 2007, the Fund's Auction Market Preferred Stock had average yields of 3.54% for Series A, 3.42% for Series B, 3.45% for Series C and 3.48% for Series D. There was no material change in the Fund's borrowing costs as the Fed kept the federal funds target rate steady at 5.25%. Although flat by historical standards, the tax-exempt yield curve maintained a positive slope throughout the period (particularly compared to the U.S. Treasury yield curve), allowing us to borrow at a lower rate than where we invest. This continued to generate an income benefit to the holders of Common Stock from the leveraging of Preferred Stock. As always, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common Stock. (For a more complete explanation of the benefits and risks of leveraging, see page 12 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

Heading into mid-year, we anticipate little change in tax-exempt bond yields. The current financial environment remains well balanced, with modest economic activity and minimal inflationary pressures. Such an environment should allow the Fed to remain sidelined, awaiting further economic developments to help guide monetary policy. Accordingly, we expect to maintain our current interest rate posture. Should economic activity soften - triggered perhaps by a decline in the equity market or further weakness in housing - we would adopt a more constructive posture.

Forward new-issue supply in Michigan appears limited, which will continue to

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

present a challenge with respect to making desired structural changes within the portfolio.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

A Discussion With Your Funds' Portfolio Managers (continued)

As such, future portfolio activity likely will focus on improving the Fund's already attractive yield and remaining fully invested in an effort to maximize income for shareholders.

BlackRock MuniYield New Jersey Insured Fund, Inc.

Describe conditions in the State of New Jersey.

The State of New Jersey is rated Aa3, AA and AA- by Moody's, Standard & Poor's and Fitch, respectively, with stable outlooks from all three agencies. New Jersey ranks fourth in both debt per capita and debt as a percent of personal income, according to Moody's. It ranked second in per capita income in 2006 (preliminary), according to the U.S. Department of Commerce. New Jersey's April 2007 unemployment rate was 4.3%, versus the U.S. rate of 4.5%. Fiscal year 2006 operations resulted in an estimated \$1.5 billion (unaudited) ending general fund balance. The \$31.0 billion fiscal year 2007 budget includes a 1.0% sales tax hike, which is expected to generate roughly \$1.2 billion, and approximately \$2.0 billion in spending reductions and freezes. These are the major components in reducing a projected \$4.5 billion budget shortfall. Key credit issues include ongoing efforts for property-tax reform, as well as budgetary pressures from retired employees' healthcare and pension costs.

How did the Fund perform during the period?

For the six-month period ended April 30, 2007, the Common Stock of BlackRock MuniYield New Jersey Insured Fund, Inc. had net annualized yields of 4.26% and 4.46%, based on a period-end per share net asset value of \$15.32 and a per share market price of \$14.66, respectively, and \$.324 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +1.64%, based on a change in per share net asset value from \$15.42 to \$15.32, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, trailed the +1.74% average return of the Lipper New Jersey Municipal Debt Funds category for the six-month period. (Funds in this Lipper category limit their investment to those securities exempt from taxation in New Jersey [double tax exempt] or a city in New Jersey [triple tax exempt].) The primary detractor from the Fund's performance was its limited ability (a maximum of 20% of total net assets) to invest in uninsured and lower-rated investment grade credits. The Fund also is precluded from investing in non-investment grade municipal credits, which was a significant disadvantage relative to our more aggressive Lipper peers, as these lower-quality credits continued to outpace the high-grade market during the reporting period. The Fund's slightly short duration early in the period also detracted from performance, as did the ongoing effect of a low-interest-rate environment, wherein issuers of higher-coupon bonds pursue refinancing opportunities and call their outstanding bonds. In an environment where we cannot replace the higher yields lost to calls, this phenomenon dampened the distribution rate of the Fund. Conversely, an emphasis on enhancing the

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

distribution yield of the Fund was beneficial to performance. Out-of-favor coupons (mainly discounted bonds), housing bonds and Puerto Rico bonds were among the top contributors to performance.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of distributions, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock may vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

Portfolio activity reflected our efforts to enhance the Fund's distribution rate. We invested largely on the long end of the municipal yield curve, where we found attractive opportunities to trade the portfolio and to generate higher levels of income for the Fund. In making purchases, we primarily sought new-issue housing bonds, Puerto Rico bonds and out-of-favor coupons (mainly discounted bonds), each of which offers above-market yield and enhances the portfolio's liquidity and potential for capital appreciation. Alternative minimum tax (AMT) issues also were a good source of incremental yield during the period; albeit, we enacted these purchases only when prices were inexpensive on a historical basis.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

New issuance of New Jersey municipal bonds was up 81.6% versus the same six-month period a year ago. Practically all of the increase was attributed to the state's refunding of \$3.6 billion in bonds issued as part of the tobacco industry settlement. The tobacco bond refunding provided a gain for the Fund via the price appreciation associated with the prerefunding of existing holdings, and allowed us to maintain our exposure to this sector. Excluding the tobacco settlement bonds, new issuance of New Jersey municipal bonds was down 6.9%. Nevertheless, we did find moderate opportunities to diversify the portfolio and move into bonds with more attractive coupon structures. Still, as has been the case for some time, the low absolute level of yields in the marketplace, coupled with the lack of a significant directional trade in the market, limited the attractiveness of any major portfolio restructuring.

With respect to divestments, we continued to trim the portfolio's short-term holdings, specifically shorter-dated prerefunded bonds and high-coupon, short-call bonds (primarily those having a call date within three years or less). These bonds are priced with a premium and, as the call date approaches, their value depreciates at an accelerating rate and they generally underperform the overall market. Although this move temporarily hurts distributable income, we believe it is a worthwhile trade-off to protect the future total return potential of the Fund.

In the Fund's uninsured basket, we sought to reduce our exposure to AA-rated and AAA-rated uninsured paper, in favor of higher-yielding, lower-rated investment grade credits (that is, AA-rated and A-rated issues). Sectors of interest included housing, education (primarily colleges and universities) and health care.

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

For the six-month period ended April 30, 2007, the Fund's Auction Market Preferred Stock had average yields of: 3.17% for Series A and 3.12% for Series B. There was no material change in the Fund's borrowing costs over the course of the period, as the Fed kept its target rate steady at 5.25%. Although flat by historical standards, the tax-exempt yield curve maintained a positive slope throughout the period (particularly compared to the U.S. Treasury yield curve), allowing us to borrow at a lower rate than where we invest. This continued to generate an income benefit to the holders of Common Stock from the leveraging of Preferred Stock. As always, should the spread between short-term and long-term interest rates narrow, the benefits of leverage will decline and, accordingly, the yield on the Fund's Common Stock will be reduced. (For a more complete explanation of the benefits and risks of leveraging, see page 12 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

At period-end, the Fund maintained a neutral duration relative to its Lipper peers. We are encouraged by the recent back-up (that is, increase) in interest rates and the general pick-up in new-issue supply, and will continue to evaluate prospects for portfolio diversification and income accrual. We also will seek additional opportunities to sell shorter-dated bonds and reinvest those proceeds in attractive, longer-dated bonds. Further, if the improvement in new-issue supply continues, and at current market rates, there may be additional opportunities to book bonds at higher yields by swapping out of lower-yielding issues. This strategy enhances the distribution rate of the Fund, and at the same time, allows the portfolio to record losses (the new bonds come at prices lower than those of the bonds being sold), minimizing future taxable gains for shareholders.

All in all, we maintain a positive outlook on the municipal bond market. We continue to expect relative value trading and yield to be the key drivers of the Fund's future performance, and accordingly, will look to the long end of the curve to supply the most suitable prospects.

BlackRock MuniYield Pennsylvania Insured Fund

Describe conditions in the Commonwealth of Pennsylvania.

The Commonwealth of Pennsylvania ended the period with ratings of Aa2, AA and AA from Moody's, Standard & Poor's and Fitch, respectively, all with stable trends. Pennsylvania ranks 25th in debt per capita and 27th in debt as a percent of personal income, according to Moody's. Pennsylvania ranked 18th in per-capita income in 2006, according to the U.S. Bureau of Economic Analysis. The Commonwealth's March 2007 unemployment rate of 3.8% was well below the U.S. rate of 4.4%. Pennsylvania employment numbers continue to post incremental gains in contrast to a declining labor force.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

A Discussion With Your Funds' Portfolio Managers (concluded)

From a fiscal perspective, Pennsylvania's 2006 results show a \$149.3 million general fund surplus and a \$514.1 million ending general fund balance. Through March 2007, Pennsylvania's fiscal year 2007 revenue collections were above official estimates by \$250 million, or 1.3%, led by strong corporate and

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

personal income tax receipts. Under newly enacted Act 1, expanded property tax rebates will initially be financed by the state lottery surplus, but legalized slot gambling revenues (\$371 million year-to-date) eventually will be tapped for this purpose. Casino openings will accelerate over the next couple of years with the development and construction of newly licensed casino operator projects. Homeowners are expected to see reductions in their school property tax bills estimated at a rough average of \$200 per household. Pennsylvania law now requires most school districts to ask voters next year whether they wish to cut property taxes further by increasing local income taxes. School boards also are required to obtain voter approval for tax increases in excess of inflation, which could challenge local budgeting.

How did the Fund perform during the period?

For the six-month period ended April 30, 2007, the Common Shares of BlackRock MuniYield Pennsylvania Insured Fund had net annualized yields of 4.42% and 4.63%, based on a period-end per share net asset value of \$15.89 and a per share market price of \$15.17, respectively, and \$.348 per share income dividends. Over the same period, the total investment return on the Fund's Common Shares was +2.37%, based on an unchanged per share net asset value of \$15.89, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, outpaced the +1.69% average return of the Lipper Pennsylvania Municipal Debt Funds category for the six-month period. (Funds in this Lipper category limit their investment to those securities exempt from taxation in Pennsylvania [double tax-exempt] or a city in Pennsylvania [triple tax-exempt].) The Fund also provided an above average yield during the period, consistent with our efforts to provide an attractive level of income for our shareholders.

The Fund's outperformance can be attributed to our long duration relative to our peers, a posture we had assumed for the majority of the period. Interest rates moved within a very narrow range during the period, but our slightly long bias proved favorable at times when the market rallied (i.e., interest rates fell and prices increased). This was particularly true toward the end of 2006.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Shares (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of distributions, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Shares can vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

We did not significantly alter the portfolio's composition or adjust our underlying strategy during the six-month period. Issuance of new Pennsylvania municipal bonds increased nearly 60% versus the same period a year ago, and this presented some investment opportunities toward the end of the period. Specifically, we invested in some longer-dated Pennsylvania housing bonds that represented attractive relative value. For the most part, however, most of the new issues did not meet our desired investment characteristics. The vast majority had short to intermediate maturities or coupons in the area of only 4.5%, well below the average coupon of bonds booked in the portfolio.

Under these circumstances, we maintained our focus on protecting the Fund's

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

net asset value and providing shareholders with an above average level of income. To that end, we continued to seek incremental yield through investment in longer-dated bonds, while selling shorter-maturity issues in the portfolio. We also remained fully invested throughout the period.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

For the six-month period ended April 30, 2007, the Fund's Auction Market Preferred Shares had average yields of 3.48% for Series A, 3.53% for Series B and 3.51% for Series C. The Fed kept its target interest rate unchanged during the six-month period at 5.25%. As such, the Fund's borrowing costs remained relatively stable. Importantly, the municipal yield curve maintained its positive slope, particularly compared to the Treasury curve, and continued to generate an income benefit to the holders of Common Shares from the leveraging of Preferred Shares. As always, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield available to holders of Common Shares. (For a more complete explanation of the benefits and risks of leveraging, see page 12 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

We ended the period with a fully invested portfolio and a slightly long duration relative to our peers. Municipal yields and credit spreads are near their all-time lows and the slope of the yield curve is historically very flat. However, a favorable supply/demand environment should continue to be supportive of present valuations in the municipal market.

Against this backdrop, we intend to continue our efforts to enhance yield for shareholders while also protecting the Fund's underlying value. To that end, we continue to look for maturities in the 25-year to 30-year area and to favor a neutral to slightly long portfolio duration, which offers the benefit of incremental yield. We believe above-average yields can provide for competitive Fund returns over time.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

## The Benefits and Risks of Leveraging

The Funds utilize leveraging to seek to enhance the yield and net asset value of their Common Shares or Common Stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, the Funds issue Preferred Shares or Stock, which pay dividends at prevailing short-term interest rates, and invests the proceeds in long-term municipal bonds. The interest earned on these investments, net of dividends to Preferred Shares or Stock, is paid to Common Shareholders or Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of the Fund's Common Shares or Stock. However, in order to benefit Common Shareholders or Common Stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Shareholders or Common Stock shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a fund's Common Shares or Stock capitalization of \$100 million and the issuance of Preferred Shares or Stock for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays dividends on the \$50 million of Preferred Shares or Stock based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates.

In this case, the dividends paid to Preferred Shareholders or Preferred Stock shareholders are significantly lower than the income earned on the fund's long-term investments, and therefore the Common Shareholders or Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Shares or Stock will be reduced or eliminated completely. At the same time, the market value of the fund's Common Shares or Stock (that is, its price as listed on the New York Stock Exchange) may, as a result, decline. Furthermore, if long-term interest rates rise, the Common Shares' or Stock's net asset value will reflect the full decline in the price of the portfolio's investments, since the value of the fund's Preferred Shares or Stock does not fluctuate. In addition to the decline in net asset value, the market value of the fund's Common Shares or Stock may also decline.

As of April 30, 2007, BlackRock MuniYield Florida Insured Fund, BlackRock MuniYield Michigan Insured Fund, Inc., BlackRock MuniYield New Jersey Insured Fund, Inc. and BlackRock MuniYield Pennsylvania Insured Fund had leverage amounts, due to Auction Market Preferred Shares or Stock, of 36.62%, 37.17%, 35.28% and 35.86% of total net assets, respectively, before the deduction of Preferred Shares or Stock.

As a part of their investment strategy, the Funds may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

when short-term interest rates decrease. Investments in inverse floaters may be characterized as derivative securities and may subject the Funds to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed rate, tax-exempt securities. To the extent the Funds invest in inverse floaters, the market value of each Fund's portfolio and the net asset value of each Fund's shares may also be more volatile than if the Funds did not invest in these securities.

### Swap Agreements

The Funds may invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds, or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom each Fund has entered into a swap will default on its obligation to pay the Fund and the risk that the Fund will not be able to meet its obligation to pay the other party to the agreement.

### Dividend Policy

The Funds' dividend policy is to distribute all or a portion of their net investment income to their shareholders on a monthly basis. In order to provide shareholders with a more stable level of dividend distributions, the Funds may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any particular month pay out such accumulated but un-distributed income in addition to net investment income earned in that month. As a result, the dividends paid by the Funds for any particular month may be more or less than the amount of net investment income earned by the Funds during such month. The Funds' current accumulated but undistributed net investment income, if any, is disclosed in the Statement of Net Assets, which comprises part of the financial information included in these reports.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

Schedule of Investments (concluded)

BlackRock MuniYield Pennsylvania Insured Fund (In Thousands)

\* The cost and unrealized appreciation (depreciation) of investments as of April 30, 2007, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 270,553
	=====
Gross unrealized appreciation	\$ 14,777
Gross unrealized depreciation	(101)
	-----
Net unrealized appreciation	\$ 14,676
	=====

- (a) AMBAC Insured.
- (b) Escrowed to maturity.
- (c) FGIC Insured.
- (d) FNMA/GNMA Collateralized.
- (e) FSA Insured.
- (f) MBIA Insured.
- (g) XL Capital Insured.
- (h) CIFG Insured.
- (i) Securities represent underlying bonds transferred to a separate securitization trust established in a tender option bond transaction in which the Fund may have acquired the residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1(c) to Financial Statements for details of Municipal Bonds Held in Trust.
- (j) Prerefunded.
- (k) Investments in companies considered to be an affiliate of the Fund, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

Affiliate	Net Activity	Dividend Income
CMA Pennsylvania Municipal Money Fund	118	\$18

- (l) Security may have a maturity of more than one year at time of issuance, but has variable rate and demand features that qualify it as a short-term security. The rate disclosed is that currently in effect. This rate changes periodically based upon prevailing market rates
- (m) Represents a zero coupon bond; the interest rate shown reflects the effective yield at that time of purchase.
- (o) Represents the current yield as of April 30, 2007.
- (p) These securities are short-term floating rate certificates issued by tender option bond trusts and are secured by the underlying municipal bond securities.
- o Forward interest rate swaps outstanding as of April 30, 2007 were as follows:

	Notional Amount	Unrealized Appreciation (Depreciation)
Pay a fixed rate of 3.618% and receive a floating rate based on 1-week Bond Market Association rate		
Broker, JPMorgan Chase Expires June 2017	\$ 6,000	\$ 17
Pay a fixed rate of 3.595% and receive a floating rate based on 1-week Bond Market Association rate		
Broker, JPMorgan Chase Expires June 2017	\$ 9,000	41
Pay a fixed rate of 3.627% and receive a floating rate based on 1-week Bond Market Association rate		
Broker, JPMorgan Chase Expires June 2017	\$15,000	30
Pay a fixed rate of 5.136% and receive a floating rate based on 3-month LIBOR		
Broker, JPMorgan Chase Expires July 2017	\$29,000	(13)
Total		\$ 75

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

### Notes to Financial Statements (Unaudited)

#### 1. Significant Accounting Policies:

BlackRock MuniYield Florida Insured Fund, BlackRock MuniYield Michigan Insured Fund, Inc., BlackRock MuniYield New Jersey Insured Fund, Inc. and BlackRock MuniYield Pennsylvania Insured Fund (the "Funds" or individually, as the "Fund") are registered under the Investment Company Act of 1940, as amended, as non-diversified, closed-end management investment companies. The Funds' financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management, necessary to present a fair statement of the results for the interim period. All such adjustments are of a normal, recurring nature. The Funds determine and make available for publication the net asset value of their Common Stock/Shares on a daily basis. The Funds' Common Stock/Shares are listed on the New York Stock Exchange under the symbol MFT for BlackRock MuniYield Florida Insured Fund, MIY for BlackRock MuniYield Michigan Insured Fund, Inc., MJI for BlackRock MuniYield New Jersey Insured Fund, Inc. and MPA for BlackRock MuniYield Pennsylvania Insured Fund. The following is a summary of significant accounting policies followed by the Funds.

(a) Valuation of investments--Municipal bonds are traded primarily in the over-the-counter ("OTC") markets and are valued at the last available bid price in the OTC markets or on the basis of values as obtained by a pricing service. Pricing services use valuation matrixes that incorporate both dealer-supplied valuations and valuation models. The procedures of the pricing service and its valuations are reviewed by the officers of the Funds under the general direction of each Fund's Board of Directors/Trustees. Such valuations and procedures are reviewed periodically by each Fund's Board of Directors/Trustees. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. Options traded in the OTC market are valued at the last asked price (options written) or the last bid price (options purchased). Swap agreements are valued by quoted fair values received daily by the Funds' pricing service. Short-term investments with a remaining maturity of 60 days or less are valued at amortized cost, which approximates market value, under which method the investment is valued at cost and any premium or discount is amortized on a straight line basis to maturity. Effective April 2, 2007, short-term securities purchased with a maturity of greater than 60 days may be valued at amortized cost. Investments in open-end investment companies are valued at their net asset value each business day. Securities and other assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of each Fund's Board of Directors/Trustees.

(b) Derivative financial instruments--Each Fund may engage in various portfolio investment strategies both to increase the return of the Fund and to hedge, or protect, its exposure to interest rate movements and movements in the securities markets. Losses may arise due to changes in the value of the contract due to an unfavorable change in the price of the underlying security, or if the counterparty does not perform under the contract.

\* Financial futures contracts--Each Fund may purchase or sell financial futures contracts and options on such financial futures contracts. Financial futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits, and maintains, as collateral such initial margin

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

\* Options--Each Fund may purchase and write call and put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

SEMI-ANNUAL REPORTS

APRIL 30, 2007

Notes to Financial Statements (continued)

Written and purchased options are non-income producing investments.

\* Forward interest rate swaps--Each Fund may enter into forward interest rate swaps. In a forward interest rate swap, the Fund and the counterparty agree to make periodic net payments on a specified notional contract amount, commencing on a specified future effective date, unless terminated earlier. When the agreement is closed, the Fund records a realized gain or loss in an amount equal to the value of the agreement.

\* Swaps--Each Fund may enter into swap agreements, which are OTC contracts in which the Fund and a counterparty agree to make periodic net payments on a specified notional amount. The net payments can be made for a set period of time or may be triggered by a predetermined credit event. The net periodic payments may be based on a fixed or variable interest rate; the change in market value of a specified security, basket of securities, or index; or the return generated by a security. These periodic payments received or made by the Fund are recorded in the accompanying Statement of Operations as realized gains or losses, respectively. Gains or losses are also realized upon termination of the swap agreements. Swaps are marked-to-market daily and changes in value are recorded as unrealized appreciation (depreciation). Risks include changes in the returns of the underlying instruments, failure of the counterparties to perform under the contracts' terms and the possible lack of liquidity with respect to the swap agreements.

(c) Municipal bonds held in trust--Certain Funds invest in leveraged residual certificates ("TOB Residuals") issued by tender option bond trusts ("TOBs"). A TOB is established by a third party sponsor forming a special purpose entity, into which a Fund, or an agent on behalf of the Fund, transfers municipal securities. A TOB typically issues two classes of beneficial interests: short-term floating rate certificates, which are sold to third party investors, and residual certificates, which are generally issued to the Fund which made the transfer or to affiliates of the Fund. Each Fund's transfers of the municipal securities to a TOB do not qualify for sale treatment under Statement of

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

Financial Accounting Standards No. 140 "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities," therefore the municipal securities deposited into a TOB are presented in the Funds' schedules of investments and the proceeds from the transactions are reported as a liability for trust certificates of the Funds. Similarly, proceeds from residual certificates issued to affiliates, if any, from the transaction are included in the liability for trust certificates. Interest income from the underlying security is recorded by the Funds on an accrual basis. Interest expense incurred on the secured borrowing and other expenses related to remarketing, administration and trustee services to a TOB are reported as expenses of a Fund. The floating rate certificates have interest rates that generally reset weekly and their holders have the option to tender certificates to the TOB for redemption at par at each reset date. The residual interests held by the Funds include the right of the Funds (1) to cause the holders of a proportional share of the floating rate certificates to tender their certificates at par, and (2) to transfer a corresponding share of the municipal securities from the TOB to the Funds. At April 30, 2007, the aggregate value of the underlying municipal securities transferred to TOBs and the liability for trust certificates were:

	Liability for Trust Certificates	Underlying Municipal Range of Interest Rates	Bonds Transferred to TOBs
BlackRock MuniYield Florida Insured Fund	\$10,030,000	3.91% - 3.98%	\$21,618,974
BlackRock MuniYield Michigan Insured Fund, Inc.	\$29,167,500	3.95% - 4.02%	\$62,111,850
BlackRock MuniYield New Jersey Insured Fund, Inc.	\$ 8,258,755	3.92% - 3.94%	\$16,478,735
BlackRock MuniYield Pennsylvania Insured Fund	\$27,400,000	3.97% - 4.02%	\$59,597,248

Financial transactions executed through TOBs generally will underperform the market for fixed rate municipal bonds in a rising interest rate environment, but tend to outperform the market for fixed rate municipal bonds when interest rates decline or remain relatively stable. Should short-term interest rates rise, the Funds' investment in TOB Residuals likely will adversely affect the Funds' investment income - net and distributions to shareholders. Fluctuations in the market value of municipal securities deposited into the TOB may adversely affect the Funds' net asset values per share.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

Notes to Financial Statements (continued)

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

While the Funds' investment policies and restrictions expressly permit investments in inverse floating rate securities such as TOB Residuals, they generally do not allow the Funds to borrow money for purposes of making investments. The Funds' management believes that the Funds' restrictions on borrowings do not apply to the secured borrowings deemed to have occurred for accounting purposes.

(d) Income taxes--It is each Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

(e) Security transactions and investment income--Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Interest income is recognized on the accrual basis. The Funds amortize all premiums and discounts on debt securities.

(f) Dividends and distributions--Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

(g) Offering expenses--Direct expenses relating to the public offering of certain Fund's Preferred Stock/Shares were charged to Common Shares/Stock capital. Any adjustments to estimates of offering costs were recorded to capital.

(h) Recent accounting pronouncements--In July 2006, the Financial Accounting Standards Board ("FASB") issued Interpretation No. 48 ("FIN 48"), "Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109." FIN 48 prescribes the minimum recognition threshold a tax position must meet in connection with accounting for uncertainties in income tax positions taken or expected to be taken by an entity, including mutual funds, before being measured and recognized in the financial statements. Adoption of FIN 48 is required for fiscal years beginning after December 15, 2006. The impact on the Funds' financial statements, if any, is currently being assessed.

In September 2006, "Statement of Financial Accounting Standards No. 157, Fair Value Measurements" ("FAS 157"), was issued and is effective for fiscal years beginning after November 15, 2007. FAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. At this time, management is evaluating the implications of FAS 157 and its impact on the Funds' financial statements, if any, has not been determined.

In addition, in February 2007, FASB issued "Statement of Financial Accounting Standards No. 159, The Fair Value Option for Financial Assets and Financial Liabilities" ("FAS 159"), which is effective for fiscal years beginning after November 15, 2007. Early adoption is permitted as of the beginning of a fiscal year that begins on or before November 15, 2007, provided the entity also elects to apply the provisions of FAS 157. FAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. FAS 159 also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. At this time, management is evaluating the implications of FAS 159 and its impact on the Funds' financial statements, if any, has not been determined.

2. Investment Advisory Agreement and Transactions with Affiliates:

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

The Investment Advisory Agreement between each Fund and BlackRock Advisors, LLC (the "Manager"), an indirect, wholly owned subsidiary of BlackRock, Inc. became effective on September 29, 2006. Prior to September 29, 2006, Fund Asset Management, L.P. ("FAM") was each Fund's manager. The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly owned subsidiary of Merrill Lynch & Co., Inc. ("Merrill Lynch"), which is the limited partner. Merrill Lynch and The PNC Financial Services Group, Inc. are the principal owners of BlackRock, Inc.

The Manager is responsible for the management of each Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Fund. For such services, each Fund pays a monthly fee at an annual rate of .50% of the Fund's average daily net assets, including proceeds from the issuance of Preferred Stock/Shares. The Manager has agreed to reimburse its management fee by the amount of management fees each Fund pays to the Manager indirectly through its investment(s) described below:

SEMI-ANNUAL REPORTS

APRIL 30, 2007

Notes to Financial Statements (continued)

	Investment	Reimbursement for the Six Months Ended April 30, 2007
BlackRock MuniYield Florida Insured Fund	CMA Florida Municipal Money Fund	\$ 8,988
BlackRock MuniYield Michigan Insured Fund, Inc.	CMA Michigan Municipal Money Fund	\$13,425
BlackRock MuniYield New Jersey Insured Fund, Inc.	CMA New Jersey Municipal Money Fund	\$ 3,676
BlackRock MuniYield Pennsylvania Insured Fund	CMA Pennsylvania Municipal Money Fund	\$ 2,812

In addition, the Manager has entered into separate sub-advisory agreements with BlackRock Investment Management, LLC ("BIM"), an affiliate of the Manager, with respect to each Fund, under which the Manager pays BIM for services it provides a monthly fee that is a percentage of the management fee paid by the Fund to the Manager.

Each of the Funds reimbursed the Manager for certain accounting services. The reimbursements were as follows:

Reimbursement

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

BlackRock MuniYield Florida Insured Fund	\$1,888
BlackRock MuniYield Michigan Insured Fund, Inc.	\$4,225
BlackRock MuniYield New Jersey Insured Fund, Inc.	\$1,981
BlackRock MuniYield Pennsylvania Insured Fund	\$2,696

Certain officers and/or directors/trustees of the Funds are officers and/or directors of BlackRock, Inc. or its affiliates.

### 3. Investments:

Purchases and sales of investments, excluding short-term securities, for the six months ended April 30, 2007 were as follows:

	Total Purchases	Total Sales

BlackRock MuniYield Michigan Insured Fund, Inc.	\$ 30,574,304	\$ 37,384,025
BlackRock MuniYield New Jersey Insured Fund, Inc.	\$ 30,421,383	\$ 30,852,476
BlackRock MuniYield Pennsylvania Insured Fund	\$ 31,631,954	\$ 31,374,168

### 4. Stock/Share Transactions:

BlackRock MuniYield Florida Insured Fund and BlackRock MuniYield Pennsylvania Insured Fund are authorized to issue an unlimited number of Common Shares of beneficial interest, par value \$.10 per share together with 1,000,000 Preferred Shares of beneficial interest, par value of \$.05 per share. Each Fund's Board of Trustees is authorized, however, to reclassify any unissued shares of beneficial interest without approval of the holders of Common Shares.

BlackRock MuniYield Michigan Insured Fund, Inc. and BlackRock MuniYield New Jersey Insured Fund, Inc. are authorized to issue 200,000,000 shares of stock, including Preferred Stock, par value \$.10 per share or \$.05 per share, all of which were initially classified as Common Stock. Each Fund's Board of Directors is authorized, however, to classify any unissued shares of stock without approval of holders of Common Stock.

#### Common Stock/Shares

##### BlackRock MuniYield Florida Insured Fund

Shares issued and outstanding during the six months ended April 30, 2007 remained constant. Shares issued and outstanding during the year ended October 31, 2006 increased by 1,851 as a result of dividend reinvestment.

##### BlackRock MuniYield Michigan Insured Fund, Inc.

Shares issued and outstanding during the six months ended April 30, 2007 remained constant. Shares issued and outstanding during the year ended October 31, 2006 increased by 40,195 as a result of dividend reinvestment.

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

BlackRock MuniYield New Jersey Insured Fund, Inc.

Shares issued and outstanding during the six months ended April 30, 2007 and the year ended October 31, 2006 remained constant.

BlackRock MuniYield Pennsylvania Insured Fund

Shares issued and outstanding during the six months ended April 30, 2007 and the year ended October 31, 2006 remained constant.

Preferred Stock/Shares

Auction Market Preferred Stock/Shares are redeemable Preferred Stock/Shares of the respective Funds, with a liquidation preference of \$25,000 per share plus accrued and unpaid dividends that entitle their holders to receive cash dividends at an annual rate that may vary for the successive dividend periods.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

Notes to Financial Statements (concluded)

Preferred Shares of BlackRock MuniYield Florida Insured Fund and BlackRock MuniYield Pennsylvania Insured Fund have a par value of \$.05 per share. BlackRock MuniYield Michigan Insured Fund, Inc. has a par value of \$.05 per share on Series A Shares, Series B Shares and Series C Shares, and \$.10 per share on Series D Shares. BlackRock MuniYield New Jersey Insured Fund, Inc. has a par value of \$.05 per share for Series A Shares and \$.10 per share for Series B Shares. The yields in effect at October 31, 2006 were as follows:

	BlackRock MuniYield Florida Insured Fund	BlackRock MuniYield Michigan Insured Fund, Inc.
Series A	3.85%	3.50%
Series B	3.80%	3.45%
Series C	--	3.60%
Series D	--	3.60%

	BlackRock MuniYield New Jersey Insured Fund, Inc.	BlackRock MuniYield Pennsylvania Insured Fund
Series A	3.27%	3.85%
Series B	3.80%	3.78%
Series C	--	3.88%

Each Fund pays commissions to certain broker-dealers at the end of each

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

auction at an annual rate ranging from .25% to .375%, calculated on the proceeds of each auction. For the six months ended April 30, 2007, Merrill Lynch, Pierce, Fenner & Smith Incorporated earned commissions as follows:

	Commissions
BlackRock MuniYield Florida Insured Fund	\$ 53,850
BlackRock MuniYield Michigan Insured Fund, Inc.	\$ 91,406
BlackRock MuniYield New Jersey Insured Fund, Inc.	\$ 52,732
BlackRock MuniYield Pennsylvania Insured Fund	\$ 72,085

### 5. Capital Loss Carryforward:

#### BlackRock MuniYield Florida Insured Fund

On October 31, 2006, the Fund had a net capital loss carryforward of \$2,755,001, of which \$673,276 expires in 2008 and \$2,081,725 expires in 2012. This amount will be available to offset like amounts of any future taxable gains.

#### BlackRock MuniYield Michigan Insured Fund, Inc.

On October 31, 2006, the Fund had a net capital loss carryforward of \$12,942,798, of which \$374,297 expires in 2007, \$7,490,629 expires in 2008, \$1,124,652 expires in 2010 and \$3,953,220 expires in 2012. This amount will be available to offset like amounts of any future taxable gains.

#### BlackRock MuniYield Pennsylvania Insured Fund

On October 31, 2006, the Fund had a net capital loss carryforward of \$3,249,768, all of which expires in 2008. This amount will be available to offset like amounts of any future taxable gains.

### 6. Subsequent Event:

Each Fund paid a tax-exempt income dividend to holders of Common Stock/Shares on June 1, 2007 to stock/shareholders of record on May 15, 2007. The amount of the tax-exempt income dividend was as follows:

	Per Share Amount
BlackRock MuniYield Florida Insured Fund	\$.056000
BlackRock MuniYield Michigan Insured Fund, Inc.	\$.059000
BlackRock MuniYield New Jersey Insured Fund, Inc.	\$.054000
BlackRock MuniYield Pennsylvania Insured Fund	\$.058000

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

If you are located in a jurisdiction where specific laws, rules or regulations require BlackRock to provide you with additional or different privacy-related rights beyond what is set forth below, then BlackRock will comply with those specific laws, rules or regulations.

BlackRock obtains or verifies personal non-public information from and about you from different sources, including the following: (i) information we receive from you or, if applicable, your financial intermediary, on applications, forms or other documents; (ii) information about your transactions with us, our affiliates, or others; (iii) information we receive from a consumer reporting agency; and (iv) from visits to our Web sites.

BlackRock does not sell or disclose to non-affiliated third parties any non-public personal information about its Clients, except as permitted by law or as is necessary to respond to regulatory requests or to service Client accounts. These non-affiliated third parties are required to protect the confidentiality and security of this information and to use it only for its intended purpose.

We may share information with our affiliates to service your account or to provide you with information about other BlackRock products or services that may be of interest to you. In addition, BlackRock restricts access to non-public personal information about its Clients to those BlackRock employees with a legitimate business need for the information. BlackRock maintains physical, electronic and procedural safeguards that are designed to protect the non-public personal information of its Clients, including procedures relating to the proper storage and disposal of such information.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

### Availability of Quarterly Schedule of Investments

The Funds file their complete schedules of portfolio holdings with the Securities and Exchange Commission ("SEC") for the first and third quarters of each fiscal year on Form N-Q. The Funds' Forms N-Q are available on the SEC's Web site at <http://www.sec.gov>. The Funds' Forms N-Q may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

### Electronic Delivery

Electronic copies of most financial reports and prospectuses are available on the Funds' Web site. Shareholders can sign up for e-mail notifications of quarterly statements, annual and semi-annual reports and prospectuses by enrolling in the Funds' electronic delivery program.

Shareholders Who Hold Accounts with Investment Advisers, Banks or Brokerages: Please contact your financial advisor to enroll. Please note that not all investment advisers, banks or brokerages may offer this service.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

## Edgar Filing: BLACKROCK MUNIYIELD FLORIDA INSURED FUND - Form N-CSRS

- Item 2 - Code of Ethics - Not Applicable to this semi-annual report
- Item 3 - Audit Committee Financial Expert - Not Applicable to this semi-annual report
- Item 4 - Principal Accountant Fees and Services - Not Applicable to this semi-annual report
- Item 5 - Audit Committee of Listed Registrants - Not Applicable to this semi-annual report
- Item 6 - Schedule of Investments - The registrant's Schedule of Investments is included as part of the Report to Stockholders filed under Item 1 of this form.
- Item 7 - Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies - Not Applicable to this semi-annual report
- Item 8 - Portfolio Managers of Closed-End Management Investment Companies - Not Applicable to this semi-annual report
- Item 9 - Purchases of Equity Securities by Closed-End Management Investment Company and Affiliated Purchasers - Not Applicable
- Item 10 - Submission of Matters to a Vote of Security Holders - The registrant's Nominating Committee will consider nominees to the Board recommended by shareholders when a vacancy becomes available. Shareholders who wish to recommend a nominee should send nominations which include biographical information and set forth the qualifications of the proposed nominee to the registrant's Secretary. There have been no material changes to these procedures.
- Item 11 - Controls and Procedures
  - 11(a) - The registrant's principal executive and principal financial officers or persons performing similar functions have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the "1940 Act")) are effective as of a date within 90 days of the filing of this report based on the evaluation of these controls and procedures required by Rule 30a-3(b) under the 1940 Act and Rule 13a-15(b) under the Securities and Exchange Act of 1934, as amended.
  - 11(b) - There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Act (17 CFR 270.30a-3(d)) that occurred during the second fiscal quarter of the period covered by this report that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.
- Item 12 - Exhibits attached hereto
  - 12(a)(1) - Code of Ethics - Not Applicable to this semi-annual report
  - 12(a)(2) - Certifications - Attached hereto
  - 12(a)(3) - Not Applicable
