ULTRAPETROL REPORTS FINANCIAL RESULTS  
FOR FOURTH QUARTER AND FULL YEAR 2015

NASSAU, Bahamas, April 18, 2016 -- Ultrapetrol (Bahamas) Limited (NASDAQ: ULTR), an industrial transportation company serving marine transportation needs in three markets (River Business, Offshore Supply Business and Ocean Business), today announced financial results for the fourth quarter and full year ended December 31, 2015.

Full Year 2015 highlights:

Recorded full year 2015 revenues of \$347.5 million;

Recorded adjusted consolidated EBITDA of \$53.1 million in 2015<sup>1</sup>, which includes adjusted EBITDA of \$16.5 million from our River Business, adjusted EBITDA of \$43.4 million from our Offshore Supply Business, adjusted EBITDA of \$(2.1) million from our Ocean Business, and adjusted EBITDA of \$(4.8) million from foreign currency exchange cash losses mainly from our Brazil subsidiary.

Recorded total adjusted net loss and adjusted net loss per share of \$(40.5) million and \$(0.29), respectively, in 2015, which excludes the effect of a non-cash loss of \$(8.0) million corresponding to a \$(5.6) million impairment charge of goodwill and intangible assets related to Ravenscroft on account of the discontinuation of our ship management operation and a \$(2.4) million loss of our Alejandrina, which was sold on January 28, 2016, in order to write down the carrying amount to its estimated fair value; excludes a \$0.4 million gain related to the sale of dry barges which were subsequently leased back to the Company (for accounting purposes, the gain from the sale is being deferred over the term of the lease up to the present value of the lease payments); and excludes the effect of a \$0.1 million gain for deferred taxes on unrealized foreign exchange gains on U.S. dollar-denominated debt of our Brazilian subsidiary in our Offshore Supply Business.<sup>2</sup> Before adjusting for these effects, the recorded total net loss and net loss per share are \$(48.0) million and \$(0.34), respectively;

Adjusted EBITDA for our River Business segment increased from \$0.2 million in FY 2014 to \$16.5 million in FY 2015.

Fourth Quarter 2015 and subsequent events highlights:

On December 15, 2015, the Company did not make the \$10.0 million interest payment due December 15, 2015, on its outstanding 8.875% First Preferred Ship Mortgage Notes due 2021 (the "Notes"). On January 14, 2016, the 30-day grace period for the Company to make such repayment ended with no cure.

On January 11 and 15, 2016, the Company entered into forbearance and waiver agreements through March 31, 2016, with lenders to certain of the Company's subsidiaries in its Offshore and River business, respectively.

On January 28, 2016, the Company entered into a MOA whereby we agreed to sell the Product Tanker Alejandrina for gross proceeds of \$4.9 million. This vessel was subsequently delivered to buyers on March 7, 2016. Subsequently, on the same date, we completed the repayment of \$2.9 million outstanding under the senior loan facility with Natixis.

On January 29, 2016, the Company announced that, as a result of its negotiations with advisors representing in excess of 85% of the holders of the Notes, the Company reached a forbearance and waiver agreement through March 31, 2016 (the "Bondholder Forbearance Agreement"). This agreement provided for the appointment of two new, independent directors, as well as but not limited to the formation of a special committee that, among other things, is exploring options and will make recommendations to the Company's board of directors in connection with the restructuring of the Company.

On April 5, 2016, the Company announced that it reached an agreement with its secured lenders to extend its existing forbearance and waiver agreements through April 30, 2016.

---

<sup>1</sup> For a reconciliation of non-GAAP measures, please see the tables included under the supplemental information section of this release.

<sup>2</sup> For a detailed explanation of these adjustments and other adjustments elsewhere in this release, see "Overview of Financial Results" and the tables included under the Supplemental Information section of this release.

---

Damián Scokin, Ultrapetrol's President and Chief Executive Officer, stated, "While we have made real progress over the course of 2015 in identifying opportunities to improve our operations and realize cost savings, historically weak commodity markets have hampered our ability to translate that progress into bottom line results. Despite these headwinds, we intend to continue to strengthen our long-term prospects and profitability by enhancing operational performance across the businesses, controlling costs and capex, securing alternative employment for vessels currently experiencing off-hire, and maximizing the profitability of our contracts and assets through improved utilization and efficiency."

Mr. Scokin continued, "At the same time, we also continue to engage in productive negotiations with our secured lenders as we seek to achieve a consensual financial restructuring that results in a sustainable capital structure that supports our long-term success. Along this process we were able to continue delivering consistently excellent service to our customers, and we remain confident that we can arrive at a successful resolution that benefits all stakeholders. We believe that the steps we are taking will position us to not merely go through this downturn, but to thrive at such time as the market experiences a recovery."

#### Overview of Financial Results

Total revenues for the fourth quarter of 2015 were \$71.1 million as compared with \$78.6 million in the same period of 2014.

Adjusted EBITDA for the fourth quarter of 2015 was \$2.2 million as compared with a loss of \$(1.7) million in the same period of 2014. For a reconciliation of adjusted EBITDA to cash flows from operating activities, please see the tables at the end of this release.

Adjusted net loss for the fourth quarter of 2015 was \$(26.0) million, or \$(0.19) per share as compared with net loss of \$(25.6) million, or \$(0.18) per share, during the same period of 2014. Fourth quarter 2015 adjusted net loss excludes the effect of a non-cash loss of \$(8.0) million corresponding to a \$(5.6) million impairment charge of goodwill and intangible assets related to Ravenscroft on account of the discontinuation of our ship management operation and a \$(2.4) million loss related to our Alejandrina, which was sold on January 28, 2016, to write down the carrying amount to its estimated fair value; excludes the effect of a \$0.3 million gain for deferred taxes on unrealized foreign exchange losses on U.S. dollar-denominated debt of our Brazilian subsidiary in our Offshore Supply Business; and excludes a \$0.1 million gain related to the sale of dry barges which were subsequently leased back to the Company (for accounting purposes, such gain will be deferred over the term of the lease up to the present value of the lease payments).<sup>2</sup> Before adjusting for these effects, the recorded total net loss and net loss per share are \$(33.6) million and \$(0.24), respectively.

Cecilia Yad, Ultrapetrol's Chief Financial Officer, said, "The Company made the decision during the fourth quarter not to make the \$10.0 million interest payment due December 15, 2015, on its outstanding 8.875% First Preferred Ship Mortgage Notes due 2021 (the "Notes"). At the same time, the Company and its advisors continued working diligently to negotiate with all its stakeholders in order to reach a solution to its leverage challenges, and by year end, we were able to maintain a healthy liquidity and continued to operate our business on a normal basis, making full and timely payments to vendors, employees, suppliers and trading counterparties while fully maintaining our commitment to safety and customer service. Nevertheless, given the prevailing market difficulties and the Company's inherent exposure to global commodity markets, we believe that the Company needs to maintain a sizeable liquidity cushion to remain solvent during unpredictable downturns. We continue to carry out intensive ongoing negotiations with our secured lenders, seeking to reorganize our capital structure and create a sustainable balance sheet that provides the Company with the security and stability to protect against unpredicted downturns while maximizing value for all stakeholders."

Business Segment Highlights

River

During the fourth quarter of 2015, as throughout the whole year, our River Business was severely impacted by lower freight rates and a reduction in demand, due to a significant decline in commodity prices for river borne goods. This decrease in freight volumes and rates resulted from the combined adverse effects brought forth by historically low commodity prices, which lowered demand for transport capacity in the river and thus produced an overcapacity of barges in the Hidrovia. To counter these negative effects, the Company has taken measures to seek to fully transition into our new "point-to-point" operational system to reap the whole benefits of its lower cost structure and increased efficiency while also focusing on obtaining additional cost savings and leaner structure. We believe the Company has shown significant changes which translated into operational improvements in a context of major headwinds.

Fourth quarter 2015 River Business segment adjusted EBITDA was a loss of \$(2.3) million compared to a loss of \$(7.2) million in the same period of 2014, representing a \$4.9 million improvement. A significant portion of this difference results from lower voyage expenses and maintenance costs derived from the new operational model implemented in 2015 (we transitioned from a complex hub-and-spoke system to a point-to-point system, which increased voyage efficiency and asset utilization, and improved transit times) and lower running costs related to our four convoys chartered to Vale on account of lower utilization in 2015 compared to 2014.

Net tons transported during the fourth quarter of 2015 increased by 28%, when compared to the same period in 2014, driven mainly by improved maize volumes. However, total freight revenues decreased by 1% during the fourth quarter of 2015, when compared to the same period of 2014, mainly driven by continued weakness in freight rates, which decreased by 23% on average during the fourth quarter of 2015 when compared to the same period of 2014.

Prices of agricultural products as well as prices of iron ore and petroleum products we carry along the Hidrovia have recently been at historically low levels. Although this may temporarily impact output, we are confident that prices will return to healthy levels. According to the latest United States Department of Agriculture ("USDA") estimates, the soybean crop in Paraguay for 2015 was 8.1 million tons, which is in line with USDA's estimate for the 2014 crop, and is expected to increase to 8.8 million tons in 2016. Argentina, Brazil, Bolivia, Paraguay and Uruguay are estimated to account for approximately 54% of world soybean production in 2016, as compared to 30% in 1995. We believe these figures are a sign of the strength of the long-term growth prospects of the agricultural sector along the Hidrovia, where the seeded area is expected to continue to grow. In addition, iron ore production in the three mines connected with the river system has also increased substantially in the last decade. While iron ore prices are at historically low levels, this commodity still represents an important long-term growth driver for our River Business, as we expect the global demand for iron ore to recover from current lows.

---

### Offshore Supply

In the Offshore Supply Business, we operate a fleet of thirteen PSVs and one RSV. Out of the thirteen PSVs, eleven were chartered in Brazil (although one of these vessels was blocked and three were cancelled during 2015) and two remained laid-up in the North Sea while being tendered for long-term charters with Petrobras. Our RSV UP Coral is contracted under a long-term time charter with Petrobras in Brazil.

The adjusted EBITDA generated by the Offshore Supply Business segment during the fourth quarter of 2015 decreased by 30% to \$6.7 million, compared to \$9.6 million in the same period of 2014. This decrease is mostly attributable to the contract cancellation by Petrobras of our UP Esmeralda, UP Amber and UP Pearl, as well as the blocking of our UP Turquoise in September 2015 and the decision to lay up our UP Jasper and UP Agate in response to the severely depressed rate environment in the North Sea. For a reconciliation of segment adjusted EBITDA to operating profit (loss), please see the tables at the end of this release.

Total revenues from our Offshore Supply Business for the fourth quarter of 2015 decreased by \$8.0 million to \$21.5 million, as compared to \$29.5 million in the same period of 2014. This 27% decrease was primarily related to the contract cancellation by Petrobras of our UP Amber, UP Pearl and UP Esmeralda, and the blocking of our UP Turquoise by Petrobras in September 2015, lower revenues from our UP Jasper and UP Agate related to their lay up in the North Sea on account of low average spot rates and a decrease in revenues in the rest of our PSV fleet (excluding our UP Opal) related to an average 51% devaluation of the Brazilian real between the fourth quarter of 2014 and the fourth quarter of 2015. This was partially offset by an increase in revenue related to our UP Coral and UP Opal, which entered into long-term charters with Petrobras on August 5, 2015 and January 25, 2015, respectively, as compared to their operation in the North Sea during the same period last year.

### Ocean

The Ocean Business segment adjusted EBITDA was a loss of \$(1.1) million in the fourth quarter of 2015, as compared to a loss of \$(2.3) million in the same period of 2014, a \$1.2 million increase. For a reconciliation of segment adjusted EBITDA to operating profit (loss), please see the tables at the end of this release.

Revenues from the Ocean Business increased by \$1.4 million, or 9%, to \$17.3 million in the fourth quarter of 2015, as compared to \$16.0 million the same period of 2014. This increase is mainly attributable to a better performance from our container feeder vessels business coupled with an extensive off-hire during the fourth quarter of 2014 resulting from a mechanical issue with one of our container feeder vessels.

In the fourth quarter of 2015, the Company operated two container vessels in its flag-protected feeder container service in South America, as well as two of our three Product Tankers (Austral and Mentor), which continue to be employed on charters with oil majors in the same flag-protected South American coastal trade in which they have operated in the past. Our Product Tanker Alejandrina completed its last charter on September 18, 2015, and was sold on January 28, 2016, for gross proceeds of \$4.9 million.

### Use of Non-GAAP Measures

Ultrapetrol believes that the disclosed non-Generally Accepted Accounting Principles, or non-GAAP, measures such as adjusted EBITDA, adjusted net income and any other adjustments thereto, when presented in conjunction with comparable GAAP measures, are useful for investors to use in evaluating the liquidity of the company. These non-GAAP measures should not be considered a substitute for, or superior to, measures of liquidity prepared in accordance with GAAP. A reconciliation of adjusted EBITDA to segment operating profit and cash flow from operations is presented in the tables that accompany this press release.

Investment Community Conference Call

Ultrapetrol will host a conference call for investors and analysts on Tuesday, April 19, 2016, at 10:00 a.m. EDT accessible via telephone and Internet with an accompanying slide presentation. Investors and analysts may participate in the live conference call by dialing 1-800-475-0542 (toll-free U.S.) or +1-773-756-0169 (outside of the U.S.); passcode: ULTR. Please register at least 10 minutes before the conference call begins. A replay of the call will be available for one week via telephone starting approximately one hour after the call ends. The replay can be accessed at 1-888-566-0435 (toll-free U.S.) or +1-402-998-0605 (outside of the U.S.); passcode: 4845. The webcast will be archived on Ultrapetrol's Web site for 30 days after the call.

About Ultrapetrol

Ultrapetrol is an industrial transportation company serving the marine transportation needs of its clients in the markets on which it focuses. It serves the shipping markets for containers, grain and soya bean products, forest products, minerals, crude oil, petroleum, and refined petroleum products, as well as the offshore oil platform supply market with its extensive and diverse fleet of vessels. These include river barges and pushboats, platform supply vessels, tankers and two container feeder vessels. More information on Ultrapetrol can be found at [www.ultrapetrol.net](http://www.ultrapetrol.net).

---

Forward-Looking Language

The forward-looking statements in this press release are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, our management's examination of historical operating trends, data contained in our records and other data available from third parties. Although we believe that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control, we cannot assure you that we will achieve or accomplish these expectations, beliefs or projections.

In addition to these important factors, other important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include future operating or financial results; pending or recent acquisitions, business strategy and expected capital spending or operating expenses, including dry docking and insurance costs; general market conditions and trends, including charter rates, vessel values, and factors affecting vessel supply and demand; our ability to obtain additional financing; our financial condition and liquidity, including our ability to obtain financing in the future to fund capital expenditures, acquisitions and other general corporate activities; our expectations about the availability of vessels to purchase, the time that it may take to construct new vessels, or vessels' useful lives; our dependence upon the abilities and efforts of our management team; changes in governmental rules and regulations or actions taken by regulatory authorities; adverse weather conditions that can affect production of the goods we transport and navigability of the river system; the highly competitive nature of the oceangoing transportation industry; the loss of one or more key customers; fluctuations in foreign exchange rates and devaluations; potential liability from future litigation; and other factors. Please see our filings with the Securities and Exchange Commission for a more complete discussion of these and other risks and uncertainties.

(1) As a result of a non-compliance of and the cross default provisions contained in relevant debt agreements, the Company has classified its entire debt as of December 31, 2015, as current liabilities in the consolidated financial statements included elsewhere herein. As a result, the Company reports a working capital deficit of \$383.8 million at December 31, 2015. If our indebtedness is accelerated, it will be very difficult in the current financing environment for us to refinance our debt or obtain additional financing and we could lose our vessels if our lenders foreclose their liens, which could impair our ability to conduct our business and continue as a going concern. The

consolidated financial statements included elsewhere herein have been prepared assuming that the Company will continue as a going concern. Accordingly, the consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts, the amounts and classification of liabilities, or any other adjustments that might result in the event the Company is unable to continue as a going concern.

Includes total revenues from transportation and services of \$330.6 million and \$16.9 million from manufacturing in 2015; revenues from transportation and services of \$347.7 million and \$16.0 million from manufacturing in 2014; (2) revenue from transportation and services \$345.6 million and \$65.6 million from manufacturing in 2013; revenues from transportation and services of \$282.9 million and \$30.3 million from manufacturing in 2012 and revenues from transportation and services of \$285.4 million and \$19.1 million from manufacturing in 2011.

Operating and manufacturing expenses are voyage expenses, running costs and manufacturing costs. Voyage expenses, which are incurred when a vessel is operating under a contract of affreightment (as well as any time when they are not operating under time or bareboat charter), comprise all costs relating to a given voyage, including port charges, canal dues and fuel (bunkers) costs, are paid by the vessel owner and are recorded as (3) voyage expenses. Voyage expenses also include charter hire payments made by us to owners of vessels that we have chartered in. Manufacturing expenses, which are incurred when a constructed river barge is sold, is comprised of steel cost, which is the largest component of our raw materials and the cost of labor. Running costs, or vessel operating expenses, include the cost of all vessel management, crewing, repairs and maintenance, spares and stores, insurance premiums, lubricants and certain drydocking costs.

(4) Not applicable when a net loss is reported.

(5) Current assets less current liabilities.

(6) Includes accrued interest.

(7) The following table reconciles our "EBITDA as defined in the Notes due 2021" and "Adjusted Consolidated EBITDA" to our cash flows from operating activities:
