Boston, Massachusetts 02110

Registrant's telephone number, including area code: (617) 292-1000

Date of fiscal year end: July 31, 2010

Date of reporting period August 1, 2009 - January 31, 2010

Item 1. Report to Stockholders:

The following is a copy of the report transmitted to stockholders pursuant to Rule 30e-1 under the Investment Company Act of 1940:

A BALANCED APPROACH

Since 1937, when George Putnam created a diverse mix of stocks and bonds in a single, professionally managed portfolio, Putnam has championed the balanced approach.

A WORLD OF INVESTING

Today, we offer investors a world of equity, fixed-income, multi-asset, and absolute-return portfolios to suit a range of financial goals.

A COMMITMENT TO EXCELLENCE

Our portfolio managers seek superior results over time, backed by original, fundamental research on a global scale. We believe in the value of experienced financial advice, in providing exemplary service, and in putting clients first in all we do.

Message from the Trustees

Dear Fellow Shareholder:

Last year's rally in both stocks and bonds helped investors recoup some of the losses in their portfolios, and Putnam's shareholders were particularly well served. After such strong growth, we are not surprised that the markets paused at the start of 2010.

While no one believes that 2010 will be a repeat performance of 2009, we do feel that today's markets — based on an optimistic earnings outlook and growing evidence of a global economic recovery — offer ample opportunities for active money management, which is something that Putnam does well.

If there is any lesson to be learned from the extraordinary volatility of the past year, it is the importance of positioning one's portfolio to limit downside risk. It is our belief that the best way to achieve this is by diversifying across all asset classes and investment strategies, and by adhering to your plan in every type of market environment.

Lastly, we would like to thank all shareholders who took the time to vote by proxy on a number of issues, including shareholder-friendly management fee changes, presented at the Putnam Funds' shareholder meetings. We would also like to

2

welcome new shareholders to the fund and thank all of our investors for your continued confidence in Putnam.

Respectfully yours,

About the fund

Seeking broad diversification across global bond markets

When Putnam Premier Income Trust was launched in 1988, its three-pronged focus on U.S. investment-grade bonds, high-yield corporate bonds, and non-U.S. bonds was considered innovative. Lower-rated, higher-yielding corporate bonds were relatively new, having just been established in the late 1970s. And, at the time of the fund's launch, few investors were venturing outside the United States for fixed-income opportunities.

The bond investment landscape has undergone a transformation in the two decades since the fund's launch. The U.S. investment-grade market added new sectors such as asset-backed securities, and the high-yield corporate bond sector has grown significantly. Outside the United States, the advent of the euro has resulted in a large market of European bonds. And there are also growing opportunities to invest in the debt of emerging-market countries.

The fund is designed to keep pace with this market expansion. To process the market's increasing complexity, Putnam's fixed-income group aligns teams of specialists with the varied investment opportunities. Each group identifies what it considers to be compelling strategies within its area of expertise. Your fund's portfolio managers select from among these strategies, systematically building a diversified portfolio that seeks to carefully balance risk and return.

The fund's multi-strategy approach is designed to suit the expanding opportunities of today's global bond marketplace. As different factors drive the performance of the various fixed-income sectors, the fund's diversified strategy can take advantage of changing market leadership in pursuit of high current income.

Consider these risks before investing:

International investing involves certain risks, such as currency fluctuations, economic instability, and political developments. Additional risks may be associated with emerging-market securities, including illiquidity and volatility. Lower-rated bonds may offer higher yields in return for more risk. Mutual funds that invest in government securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk. Mutual funds that invest in bonds are subject to certain risks, including interest-rate risk, credit risk, and inflation risk. As interest rates rise, the prices of bonds fall. Long-term bonds are more exposed to interest-rate risk than short-term bonds. Unlike bonds, bond funds have ongoing fees and expenses. The fund's shares trade on a stock exchange at market prices, which may be higher or lower than the fund's NAV. The use of derivatives involves special risks and may result in losses.

How do closed-end funds differ from open-end funds?

More assets at work While open-end funds need to maintain a cash position to meet redemptions, closed-end funds are not subject to redemptions and can keep more of their assets invested in the market.

Traded like stocks Closed-end fund shares are traded on stock exchanges, and their market prices fluctuate in response to supply and demand, among other factors.

Net asset value vs. market price Like an open-end fund's net asset value (NAV) per share, the NAV of a closed-end fund share is equal to the current value of the fund's assets, minus its liabilities, divided by the number of shares outstanding. However, when buying or selling closed-end fund shares, the price you pay or receive is the market price. Market price reflects current market supply and demand and may be higher or lower than the NAV.

Putnam Premier Income Trust balances risk and return across multiple sectors.

Putnam believes that building a diversified portfolio with multiple income-generating strategies is the best way to pursue your fund's objectives. The fund's portfolio is composed of government, credit, and securitized debt instruments.

Weightings are shown as a percentage of the fund's net assets. Allocations and holdings in each sector will vary over time. For more information on current fund holdings, see pages 21-69.

Performance snapshot

Average annual total return (%) comparison as of 1/31/10

Data is historical. Past performance does not guarantee future results. More recent returns may be less or more than those shown. Investment return and net asset value will fluctuate, and you may have a gain or a loss when you sell your shares. Performance assumes reinvestment of distributions and does not account for taxes. Fund returns in the bar chart are at NAV. See pages 7 and 12-13 for additional performance information, including fund returns at market price. Index and Lipper results should be compared to fund performance at NAV. Lipper calculates performance differently than the closed-end funds it ranks, due to varying methods for determining a fund's monthly reinvestment NAV.

** Returns for the six-month period are not annualized, but cumulative.*

6

Interview with your fund's portfolio manager

D. William Kohli

Bill, how did Putnam Premier Income Trust perform for the six months ending January 31, 2010?

The fund performed exceptionally well, beating both its benchmark and its Lipper peer group average by substantial margins. Specifically, the fund returned 19.00% at net asset value versus a 1.98% return for the Barclays Capital Government Bond Index, and 9.98% for the average fund in the Lipper Flexible Income Funds [closed-end] category.

How would you characterize the bond market environment during this period?

Amid clearer signs of economic recovery and an end to the recession, the fixed-income markets continued to rebound, with sectors that carry greater perceived credit risk — such as high-yield bonds, floating-rate bank loans, and emerging-market bonds — leading the way. As investors regained their appetite for risk, all sectors that offered a yield advantage over U.S. Treasuries outperformed Treasuries.

The Federal Reserve Board [Fed] and the U.S. Treasury maintained policies intended to foster market stability and investor confidence. The Fed continued to purchase government-agency mortgage-backed securities [agency MBSs] and held its target interest rate for overnight funds [the federal funds rate] in a range of 0.00% to 0.25%.

This comparison shows your fund's performance in the context of broad market indexes for the six months ended 1/31/10. See page 6 and pages 12-13 for additional fund performance information. Index descriptions can be found on page 14.

Although the economy's prospects brightened during the final months of the period, the Fed signaled that it expected to keep the federal funds rate low for an extended period of time.

What accounted for the fund's strong relative performance?

Successful prepayment strategies, particularly our focus on interest cash flows from agency MBSs, were the greatest contributor to results during the period. Interest-only [IO] securities were priced as if mortgage prepayments would occur at a faster-than-normal pace. In actuality, prepayments were relatively slow, primarily due to declining home prices, which left approximately one in four U.S. mortgage holders with negative equity, making it impossible for them to refinance their mortgages. As investors re-entered the market and liquidity improved, IO securities benefited from both price appreciation and the attractive cash flows resulting from slow mortgage prepayments.

Two key strategies involving non-government-agency MBSs also drove returns. The first focused on super-senior Aaa-rated commercial MBSs, whose prices dropped to levels unjustified by fundamentals in the massive deleveraging of 2008 and subsequently rose as supply-and-demand dynamics improved during 2009. The second strategy emphasized non-agency residential MBSs, where dislocations between price and fundamental value began to normalize.

The fund's yield-curve positioning was another positive. We positioned the portfolio to benefit from a steeper yield curve, believing that short-term rates would remain anchored by the historically low federal funds rate and longer-term rates would rise due to increased supply and inflation concerns. Late in the period, the yield spread

Credit qualities are shown as a percentage of portfolio value as of 1/31/10. A bond rated Baa or higher (Prime-3 or higher, for short-term debt) is considered investment grade. The chart reflects Moody's ratings; percentages may include bonds not rated by Moody's but considered by Putnam Management to be of comparable quality. Ratings will vary over time.

Successful prepayment strategies, particularly our focus on interest cash flows from government-agency mortgage-backed securities, were the greatest contributor to results during the period.

D. William Kohli

between 2-year and 10-year Treasuries widened to an all-time record. Consequently, our strategy of overweighting the short end and underweighting the longer end of the yield curve bolstered the fund's relative results. [The yield curve is a graphical depiction of the difference in yields between shorter- and longer-term bonds.] The fund also benefited from tactical duration adjustments as the yield curve changed during the period. [Duration is a key measure of a bond portfolio's price sensitivity to interest rate changes.]

Lastly, our stake in higher-quality, Ba-rated high-yield corporate bonds, and security selection among emerging-market debt — particularly in Russia, Argentina, and Venezuela — provided a further boost to performance.

What changes did you make to the portfolio during the period?

As the CMBS sector rallied considerably, we reduced our exposure there in favor of nonagency residential MBSs and interest-only collateralized mortgage obligations [CMOs]. In prepayment-sensitive areas, yield spreads on agency MBS pass-through securities tightened to the point where we concluded that they were too richly priced, and we decreased the fund's holdings in this area. By way of background, CMOs are structured

This chart shows how the fund's top risk weightings have changed over the past six months. Weightings are shown as a percentage of net assets. Holdings will vary over time.

* May include exposure to derivative instruments.

9

mortgage-backed securities that use pools of mortgage pass-through bonds, or mortgage loans themselves, as collateral and carve the cash flows into different classes to meet the needs of various investors.

IN THE NEWS

Prices rose again in January, with the Consumer Price Index (CPI) climbing 0.2% for the month, but is deflation on its way? The surprise came in the "core" numbers that exclude more volatile food and energy prices. In January, the core numbers dropped for the first time in more than 25 years, due to falling home prices and high unemployment. This monthly dip is too isolated an incident to be deemed deflation, which can damage an economy as prices spiral downward, eroding companies' profitability and their ability to retain workers. Economists agree that mild, stable inflation is generally the healthiest state for consumer prices.

What is your outlook for the economy, the credit markets, and the fund over the coming months?

The U.S. economy is now growing at a moderate pace, thanks to government stimulus, better financial-market conditions, signs of a stabilizing labor market, and factories replenishing their inventories. While the short-term outlook is more favorable than it has been in a long time, we are not yet, in our view, at the threshold of robust and sustained economic growth. The economy is facing significant headwinds, especially from private sector deleveraging, a constrained banking system, and some concern about the possibility for deflation in 2010. Although monetary policy likely will remain accommodative for some time, economic stimulus from fiscal policy is unlikely to extend beyond 2010. All told, we expect the U.S. economy to expand this year, but more rapidly during the first half of the year than the second.

Despite uncertainty over near-term growth prospects, we believe compelling fixed-income investment opportunities are still available. While yield spreads in certain sectors — especially those that have benefited from overt government support — have tightened to unattractive levels, many other sectors still offer attractive values on a historical basis. Specifically, we remain focused on opportunities among interest-only CMOs, and the most liquid segments of the non-agency residential MBS, CMBS, and asset-backed securities markets. We are, however, proceeding cautiously and recognize the potential for short-term price volatility.

The outlook for interest rates is clouded by two countervailing trends that complicate our inflation forecast. Prices of raw materials are moving upward as the global economy recovers. Yet, reported core inflation [which excludes food and energy prices] is, in our view, likely to fall to zero, dragged down by depressed home prices. The Fed has indicated that it is poised to raise interest rates as soon as the data call for it. At this point, however, it is unclear which set of numbers will cause the central bank to act. Consequently, at period-end, the fund's interest-rate positioning was relatively neutral.

Thanks for updating us, Bill.

10

The views expressed in this report are exclusively those of Putnam Management. They are not meant as investment advice.

Please note that the holdings discussed in this report may not have been held by the fund for the entire period. Portfolio composition is subject to review in accordance with the fund's investment strategy and may vary in the future. Current and future portfolio holdings are subject to risk.

Of special interest

We are pleased to report that effective October 2009, your fund's dividend was increased from \$0.043 to \$0.050 per share, and effective January 2010, the dividend was increased again to \$0.053 per share. These dividend increases were made possible due to increased interest income resulting from higher yields on asset-backed securities, commercial mortgage-backed securities, and residential mortgage-backed securities.

Portfolio Manager **D. William Kohli** is Team Leader of Portfolio Construction at Putnam. He has an M.B.A. from the Haas School of Business at the University of California, Berkeley, and a B.A. from the University of California, San Diego. Bill joined Putnam in 1994 and has been in the investment industry since 1987.

In addition to Bill, your fund's portfolio managers are Michael Atkin, Rob Bloemker, Kevin Murphy, and Paul Scanlon.

11

Your fund's performance

This section shows your fund's performance, price, and distribution information for periods ended January 31, 2010, the end of the first half of its current fiscal year. In accordance with regulatory requirements for mutual funds, we also include performance as of the most recent calendar quarter-end. Performance should always be considered in light of a fund's investment strategy. Data represents past performance. Past performance does not guarantee future results. More recent returns may be less or more than those shown. Investment return, net asset value, and market price will fluctuate, and you may have a gain or a loss when you sell your shares.

Total return and comparative index results For periods ended 1/31/10

Terms and definitions**Important terms**

Total return shows how the value of the fund's shares changed over time, assuming you held the shares through the entire period and reinvested all distributions in the fund.

Net asset value (NAV) is the value of all your fund's assets, minus any liabilities, divided by the number of outstanding shares.

Market price is the current trading price of one share of the fund. Market prices are set by transactions between buyers and sellers on exchanges such as the New York Stock Exchange.

Current yield is the annual rate of return earned from dividends or interest of an investment. Current yield is expressed as a percentage of the price of a security, fund share, or principal investment.

Comparative indexes

Barclays Capital Aggregate Bond Index is an unmanaged index of U.S. investment-grade fixed-income securities.

Barclays Capital Government Bond Index is an unmanaged index of U.S. Treasury and agency securities.

BofA Merrill Lynch U.S. 3-Month Treasury Bill Index is an unmanaged index that seeks to measure the performance of U.S. Treasury bills available in the marketplace.

S&P 500 Index is an unmanaged index of common stock performance.

Indexes assume reinvestment of all distributions and do not account for fees. Securities and performance of a fund and an index will differ. You cannot invest directly in an index.

Lipper is a third-party industry-ranking entity that ranks mutual funds. Its rankings do not reflect sales charges. Lipper rankings are based on total return at net asset value relative to other funds that have similar current investment styles or objectives as determined by Lipper. Lipper may change a fund's category assignment at its discretion. Lipper category averages reflect performance trends for funds within a category.

14

Trustee approval of management contract

General conclusions

The Board of Trustees of the Putnam funds oversees the management of each fund and, as required by law, determines annually whether to approve the continuance of your fund's management contract with Putnam Investment Management ("Putnam Management") and the sub-management contract, with respect to your fund, between Putnam Management and its affiliate, Putnam Investments Limited ("PIL").

In this regard, the Board of Trustees, with the assistance of its Contract Committee consisting solely of Trustees who are not "interested persons" (as such term is defined in the Investment Company Act of 1940, as amended) of the Putnam funds (the "Independent Trustees"), requests and evaluates all information it deems reasonably necessary under the circumstances. Over the course of several months ending in June 2009, the Contract Committee met several times to consider the information provided by Putnam Management and other information developed with the assistance of the Board's independent counsel and independent staff. The Contract Committee reviewed and discussed key aspects of this information with all of the Independent Trustees. At the Trustees' June 12, 2009 meeting, the Contract Committee recommended, and the Independent Trustees approved, the continuance of your fund's management and sub-management contracts, effective July 1, 2009. (Because PIL is an affiliate of Putnam Management and Putnam Management remains fully responsible for all services provided by PIL, the Trustees have not evaluated PIL as a separate entity, except as otherwise indicated below, and all

subsequent references to Putnam Management below should be deemed to include reference to PIL as necessary or appropriate in the context.)

The Independent Trustees' approval was based on the following conclusions:

That the fee schedule in effect for your fund represented reasonable compensation in light of the nature and quality of the services being provided to the fund, the fees paid by competitive funds and the costs incurred by Putnam Management in providing such services, and

That such fee schedule represented an appropriate sharing between fund shareholders and Putnam Management of such economies of scale as may exist in the management of the fund at current asset levels.

These conclusions were based on a comprehensive consideration of all information provided to the Trustees, and were not the result of any single factor. Some of the factors that figured particularly in the Trustees' deliberations and how the Trustees considered these factors are described below, although individual Trustees may have evaluated the information presented differently, giving different weights to various factors. It is also important to recognize that the fee arrangements for your fund and the other Putnam funds are the result of many years of review and discussion between the Independent Trustees and Putnam Management, that certain aspects of the arrangements may receive greater scrutiny in some years than others, and that the Trustees' conclusions may be based, in part, on their consideration of these same arrangements in prior years.

Management fee schedules and categories; total expenses

The Trustees reviewed the management fee schedules in effect for all Putnam funds, including fee levels and breakpoints, and the assignment of funds to particular fee categories. The general fee structure has been carefully developed over the years and re-examined on

15

many occasions and adjusted where appropriate. In this regard, the Trustees noted that shareholders of all funds voted by overwhelming majorities in 2007 to approve new management contracts containing identical fee schedules.

In reviewing fees and expenses, the Trustees generally focused their attention on material changes in circumstances — for example, changes in a fund's size or investment style, changes in Putnam Management's operating costs, or changes in competitive practices in the mutual fund industry — that suggest that consideration of fee changes might be warranted. The Trustees concluded that the circumstances did not warrant changes to the management fee structure of your fund. The Trustees focused on two areas of particular interest, as discussed further below:

Competitiveness. The Trustees reviewed comparative fee and expense information for competitive funds, which indicated that, in a custom peer group of competitive funds selected by Lipper Inc., your fund ranked in the 67th percentile in management fees and in the 1st percentile in total expenses as of December 31, 2008 (the first percentile being the least expensive funds and the 100th percentile being the most expensive funds). The Trustees expressed their intention to monitor this information closely to ensure that fees and expenses of your fund continue to meet evolving competitive standards.

Economies of scale. Your fund currently has the benefit of breakpoints in its management fee that provide shareholders with significant economies of scale, which means that the effective management fee rate of the fund (as a percentage of fund assets) declines as the fund grows in size and crosses specified asset thresholds. Conversely, as the fund shrinks in size — as has been the case for many Putnam funds in recent years — these breakpoints result in increasing fee levels. In recent years, the Trustees have examined the operation of the existing breakpoint structure during periods of both growth and decline in asset levels. The Trustees concluded that the fee schedule in effect for your fund represented an appropriate sharing of economies of scale at that time.

In connection with their review of the management fees and total expenses of the Putnam funds, the Trustees also reviewed the costs of the services provided and profits realized by Putnam Management and its affiliates from their contractual relationships with the funds. This information included trends in revenues, expenses and profitability of Putnam Management and its affiliates relating to the investment management and distribution services provided to the funds. In this regard, the Trustees also reviewed an analysis of Putnam Management's revenues, expenses and profitability with respect to the funds' management contracts, allocated on a fund-by-fund basis.

Investment performance

The quality of the investment process provided by Putnam Management represented a major factor in the Trustees' evaluation of the quality of services provided by Putnam Management under your fund's management contract. The Trustees were assisted in their review of the Putnam funds' investment process and performance by the work of the Investment Oversight Coordinating Committee of the Trustees and the Investment Oversight Committees of the Trustees, which had met on a regular monthly basis with the funds' portfolio teams throughout the year. The Trustees concluded that Putnam Management generally provides a high-quality investment process – as measured by the experience and skills of the individuals assigned to the management of fund portfolios, the resources made available to such personnel, and in general the ability of Putnam Management to

16

attract and retain high-quality personnel – but also recognized that this does not guarantee favorable investment results for every fund in every time period. The Trustees considered the investment performance of each fund over multiple time periods and considered information comparing each fund's performance with various benchmarks and with the performance of competitive funds.

The Trustees noted the disappointing investment performance of many of the funds for periods ended March 31, 2009. They discussed with senior management of Putnam Management the factors contributing to such underperformance and the actions being taken to improve performance. The Trustees recognized that, in recent years, Putnam Management has taken steps to strengthen its investment personnel and processes to address areas of underperformance, including Putnam Management's continuing efforts to strengthen the equity research function, recent changes in portfolio managers including increased accountability of individual managers rather than teams, recent changes in Putnam Management's approach to incentive compensation, including emphasis on top quartile performance over a rolling three-year period, and the recent arrival of a new chief investment officer. The Trustees also recognized the substantial improvement in performance of many funds since the implementation of those changes. The Trustees indicated their intention to continue to monitor performance trends to assess the effectiveness of these efforts and to evaluate whether additional changes to address areas of underperformance are warranted.

In the case of your fund, the Trustees considered that your fund's common share cumulative total return performance at net asset value was in the following percentiles of its Lipper Inc. peer group (Lipper Flexible Income Funds (closed-end)) for the one-year, three-year and five-year periods ended March 31, 2009 (the first percentile being the best-performing funds and the 100th percentile being the worst-performing funds):

One-year period	72nd
<hr/>	
Three-year period	72nd
<hr/>	
Five-year period	72nd
<hr/>	

Over the one-year, three-year and five-year periods ended March 31, 2009, there were 6, 6, and 6 funds, respectively, in your fund's Lipper peer group. Past performance is no guarantee of future results.

As a general matter, the Trustees believe that cooperative efforts between the Trustees and Putnam Management represent the most effective way to address investment performance problems. The Trustees noted that investors in the Putnam funds have, in effect, placed their trust in the Putnam organization, under the oversight of the funds' Trustees, to make appropriate decisions regarding the management of the funds. Based on the responsiveness of Putnam Management in the recent past to Trustee concerns about investment performance, the Trustees concluded that it is preferable to seek change within Putnam Management to address performance shortcomings. In the Trustees' view, the alternative of engaging a new investment adviser for an underperforming fund would entail significant disruptions and would not provide any greater assurance of improved investment performance.

**Brokerage and soft-dollar allocations;
other benefits**

The Trustees considered various potential benefits that Putnam Management may receive in connection with the services it provides under the management contract with your fund. These include benefits related to brokerage and soft-dollar allocations, whereby a portion of the commissions paid by a fund for brokerage may be used to acquire research

17

services that may be useful to Putnam Management in managing the assets of the fund and of other clients. The Trustees considered a change made, at Putnam Management's request, to the Putnam funds' brokerage allocation policy commencing in 2009, which increased the permitted soft dollar allocation to third-party services over what had been authorized in previous years. The Trustees noted that a portion of available soft dollars continue to be allocated to the payment of fund expenses, although the amount allocated for this purpose has declined in recent years. The Trustees indicated their continued intent to monitor regulatory developments in this area with the assistance of their Brokerage Committee and also indicated their continued intent to monitor the potential benefits associated with the allocation of fund brokerage and trends in industry practice to ensure that the principle of seeking best price and execution remains paramount in the portfolio trading process.

The Trustees' annual review of your fund's management contract also included the review of the investor servicing agreement with Putnam Fiduciary Trust Company, which agreement provides benefits to an affiliate of Putnam Management.

**Comparison of retail and institutional
fee schedules**

The information examined by the Trustees as part of their annual contract review has included for many years information regarding fees charged by Putnam Management and its affiliates to institutional clients such as defined benefit pension plans, college endowments, etc. This information included comparisons of such fees with fees charged to the funds, as well as a detailed assessment of the differences in the services provided to these two types of clients. The Trustees observed, in this regard, that the differences in fee rates between institutional clients and mutual funds are by no means uniform when examined by individual asset sectors, suggesting that differences in the pricing of investment management services to these types of clients reflect to a substantial degree historical competitive forces operating in separate market places. The Trustees considered the fact that fee rates across different asset classes are typically higher on average for mutual funds than for institutional clients, as well as the differences between the services that Putnam Management provides to the Putnam funds and those that it provides to institutional clients of the firm, but did not rely on such comparisons to any significant extent in concluding that the management fees paid by your fund are reasonable.

18

Other information for shareholders

Important notice regarding share repurchase program

In September 2009, the Trustees of your fund approved the renewal of a share repurchase program that had been in effect since 2005. This renewal will allow your fund to repurchase, in the 12 months beginning October 8, 2009, up to 10% of the fund's common shares outstanding as of October 7, 2009.

Important notice regarding delivery of shareholder documents

In accordance with SEC regulations, Putnam sends a single copy of annual and semiannual shareholder reports, prospectuses, and proxy statements to Putnam shareholders who share the same address, unless a shareholder requests otherwise. If you prefer to receive your own copy of these documents, please call Putnam at 1-800-225-1581, and Putnam will begin sending individual copies within 30 days.

Proxy voting

Putnam is committed to managing our mutual funds in the best interests of our shareholders. The Putnam funds' proxy voting guidelines and procedures, as well as information regarding how your fund voted proxies relating to portfolio securities during the 12-month period ended June 30, 2009, are available in the Individual Investors section of putnam.com, and on the SEC's Web site, www.sec.gov. If you have questions about finding forms on the SEC's Web site, you may call the SEC at 1-800-SEC-0330. You may also obtain the Putnam funds' proxy voting guidelines and procedures at no charge by calling Putnam's Shareholder Services at 1-800-225-1581.

Fund portfolio holdings

The fund will file a complete schedule of its portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. Shareholders may obtain the fund's Forms N-Q on the SEC's Web site at www.sec.gov. In addition, the fund's Forms N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. You may call the SEC at 1-800-SEC-0330 for information about the SEC's Web site or the operation of the Public Reference Room.

Trustee and employee fund ownership

Putnam employees and members of the Board of Trustees place their faith, confidence, and, most importantly, investment dollars in Putnam mutual funds. As of January 31, 2010, Putnam employees had approximately \$294,000,000 and the Trustees had approximately \$45,000,000 invested in Putnam mutual funds. These amounts include investments by the Trustees' and employees' immediate family members as well as investments through retirement and deferred compensation plans.

Financial statements

A guide to financial statements

These sections of the report, as well as the accompanying Notes, constitute the fund's financial statements.

The fund's portfolio lists all the fund's investments and their values as of the last day of the reporting period. Holdings are organized by asset type and industry sector, country, or state to show areas of concentration and diversification.

Statement of assets and liabilities shows how the fund's net assets and share price are determined. All investment and noninvestment assets are added together. Any unpaid expenses and other liabilities are subtracted from this total. The result is divided by the number of shares to determine the net asset value per share. (For funds with preferred shares, the amount subtracted from total assets includes the liquidation preference of preferred shares.)

Statement of operations shows the fund's net investment gain or loss. This is done by first adding up all the fund's earnings — from dividends and interest income — and subtracting its operating expenses to determine net investment income (or loss). Then, any net gain or loss the fund realized on the sales of its holdings — as well as any unrealized gains or losses over the period — is added to or subtracted from the net investment result to determine the fund's net gain or loss for the fiscal period.

Statement of changes in net assets shows how the fund's net assets were affected by the fund's net investment gain or loss, by distributions to shareholders, and by changes in the number of the fund's shares. It lists distributions and their sources (net investment income or realized capital gains) over the current reporting period and the most recent fiscal year-end. The distributions listed here may not match the sources listed in the Statement of operations because the distributions are determined on a tax basis and may be paid in a different period from the one in which they were earned. Dividend sources are estimated at the time of declaration. Actual results may vary. Any non-taxable return of capital cannot be determined until final tax calculations are completed after the end of the fund's fiscal year.

Financial highlights provide an overview of the fund's investment results, per-share distributions, expense ratios, net investment income ratios, and portfolio turnover in one summary table, reflecting the five most recent reporting periods. In a semiannual report, the highlights table also includes the current reporting period.

* Percentages indicated are based on net assets of \$881,103,987.

□ Non-income-producing security.

□□ The interest rate and date shown parenthetically represent the new interest rate to be paid and the date the fund will begin accruing interest at this rate.

□□ Income may be received in cash or additional securities at the discretion of the issuer.

These securities, in part or in entirety, were pledged and segregated with the broker to cover margin requirements for futures contracts at January 31, 2010.

These securities, in part or in entirety, were pledged and segregated with the custodian for collateral on certain derivative contracts at January 31, 2010.

Ⓒ Senior loans are exempt from registration under the Securities Act of 1933, as amended, but contain certain restrictions on resale and cannot be sold publicly. These loans pay interest at rates which adjust periodically. The interest rates shown for senior loans are the current interest rates at January 31, 2010. Senior loans are also subject to mandatory and/or optional prepayment which cannot be predicted. As a result, the remaining maturity may be substantially less than the stated maturity shown (Notes 1 and 7).

Ⓔ See Note 6 to the financial statements regarding investments in Putnam Money Market Liquidity Fund.

Ⓕ Is valued at fair value following procedures approved by the Trustees. Securities may be classified as Level 2 or Level 3 for Accounting Standards Codification ASC 820 Fair Value Measurements and Disclosures (□ASC 820□) based on the securities valuation inputs.

Ⓖ Real Estate Investment Trust.

At January 31, 2010, liquid assets totaling \$684,483,024 have been segregated to cover certain derivatives contracts.

Debt obligations are considered secured unless otherwise indicated.

144A after the name of an issuer represents securities exempt from registration under Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

The rates shown on FRB and FRN are the current interest rates at January 31, 2010.

The dates shown on debt obligations are the original maturity dates.

IFB are securities that pay interest rates that vary inversely to changes in the market interest rates. As interest rates rise, inverse floaters produce less current income. The interest rates shown are the current interest rates at January 31, 2010.

* Payments related to the referenced debt are made upon a credit default event.

**Ratings are presented for credit default contracts in which the fund has sold protection on the underlying referenced debt. Ratings for an underlying index represent the average of the ratings of all the securities included in that index. The Moody's, Standard & Poor's or Fitch ratings are believed to be the most recent ratings available at January 31, 2010. Securities rated by Putnam are indicated by □/P.□ Securities rated by Fitch are indicated by □/F.□

*** Upfront premium is based on the difference between the original spread on issue and the market spread on day of execution.

ASC 820 establishes a three-level hierarchy for disclosure of fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of the fund's investments. The three levels are defined as follows:

Level 1 □ Valuations based on quoted prices for identical securities in active markets.

Level 2 □ Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 □ Valuations based on inputs that are unobservable and significant to the fair value measurement.

The following is a summary of the inputs used to value the fund's net assets as of January 31, 2010:

Valuation inputs

Investments in securities:	Level 1	Level 2	Level 3
Common stocks:			
Communication services	\$70,016	\$0	\$0

^d Portfolio turnover excludes dollar roll transactions.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-CSRS

e Includes interest accrued in connection with certain terminated derivatives contracts, which amounted to 0.03% and 0.05% of average net assets for the periods ended January 31, 2010 and July 31, 2009, respectively (Note 2).

f Reflects waivers of certain fund expenses in connection with Putnam Prime Money Market Fund in effect during the period. As a result of such waivers, the expenses of the fund for the periods ended July 31, 2009, July 31, 2008, July 31, 2007, July 31, 2006, and July 31, 2005, reflect a reduction of less than 0.01%, less than 0.01%, 0.01%, 0.01% and 0.02% of average net assets, respectively (Note 6).

The accompanying notes are an integral part of these financial statements.

73

Notes to financial statements 1/31/10 (Unaudited)

Note 1: Significant accounting policies

Putnam Premier Income Trust (the "fund"), a non-diversified Massachusetts business trust, is registered under the Investment Company Act of 1940, as amended, a closed-end management investment company. The fund's investment objective is to seek high current income consistent with the preservation of capital by allocating its investments among the U.S. government sector, high yield sector and international sector of the fixed-income securities market. The fund invests in higher yielding, lower-rated bonds that have a higher rate of default due to the nature of the investments. The fund may invest a significant portion of their assets in securitized debt instruments, including mortgage-backed and asset-backed investments. The yields and values of these investments are sensitive to changes in interest rates, the rate of principal payments on the underlying assets and the market's perception of the issuers. The market for these investments may be volatile and limited, which may make them difficult to buy or sell.

In the normal course of business, the fund enters into contracts that may include agreements to indemnify another party under given circumstances. The fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be, but have not yet been, made against the fund. However, the fund's management team expects the risk of material loss to be remote.

The following is a summary of significant accounting policies consistently followed by the fund in the preparation of its financial statements. The preparation of financial statements is in conformity with accounting principles generally accepted in the United States of America and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates. Subsequent events after the Statement of assets and liabilities date through the date that the financial statements were issued, March 11, 2010, have been evaluated in the preparation of the financial statements.

A) Security valuation Investments for which market quotations are readily available are valued at the last reported sales price on their principal exchange, or official closing price for certain markets. If no sales are reported — as in the case of some securities traded over-the-counter — a security is valued at its last reported bid price. Market quotations are not considered to be readily available for certain debt obligations; such investments are valued on the basis of valuations furnished by an independent pricing service approved by the Trustees or dealers selected by Putnam Investment Management, LLC ("Putnam Management"), the fund's manager, an indirect wholly-owned subsidiary of Putnam Investments, LLC. Such services or dealers determine valuations for normal institutional-size trading units of such securities using methods based on market transactions for comparable securities and various relationships, generally recognized by institutional traders, between securities (which considers such factors as security prices, yields, maturities and ratings). Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore the closing prices for securities in such markets or on such exchanges may not fully reflect events that occur after such close but before the close of the New York Stock Exchange. Accordingly, on certain days, the fund will fair value foreign equity securities taking into account multiple factors, including movements in the U.S. securities markets. The number of days on which fair value prices will be used will depend on market activity and it is possible that fair value prices will be used by the fund to a significant extent. Securities quoted in foreign currencies, if any, are translated into U.S. dollars at the current exchange rate. To the extent a pricing service or dealer is unable to value a security or provides a valuation that Putnam Management does not believe accurately reflects the security's fair value, the security will be valued at fair value by Putnam Management. Certain investments, including certain restricted and illiquid securities and derivatives, are also valued at fair value following procedures approved by the Trustees. Such valuations and procedures are reviewed periodically by the Trustees. Certain securities may be valued on the basis of a price provided by a single source. The fair value of securities is generally determined as the amount that the fund could reasonably expect to realize from an orderly disposition of such securities over a reasonable period of time. By its nature, a fair value price is a good faith estimate of the value of a security in a current sale and does not reflect an actual market price, which may be different by a material amount.

B) Security transactions and related investment income Security transactions are recorded on the trade date (the date the order to buy or sell is executed). Gains or losses on securities sold are determined on the identified cost basis. Interest income is recorded on the accrual basis. Dividend income, net of applicable withholding taxes, is recognized on the ex-dividend date except that certain dividends from foreign securities, if any, are recognized as soon as the fund is informed of the ex-dividend date. Non-cash dividends, if any,

74

are recorded at the fair market value of the securities received. Dividends representing a return of capital or capital gains, if any, are reflected as a reduction of cost and/or as a realized gain. All premiums/discounts are amortized/accreted on a yield-to-maturity basis.

Securities purchased or sold on a delayed delivery basis may be settled a month or more after the trade date; interest income is accrued based on the terms of the securities. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

The fund earned certain fees in connection with its senior loan purchasing activities. These fees are treated as market discount and are recorded as income in the Statement of operations.

C) Stripped securities The fund may invest in stripped securities which represent a participation in securities that may be structured in classes with rights to receive different portions of the interest and principal. Interest-only securities receive all of the interest and principal-only securities receive all of the principal. If the interest-only securities experience greater than anticipated prepayments of principal, the fund may fail to recoup fully its initial investment in these securities. Conversely, principal-only securities increase in value if prepayments are greater than anticipated and decline if prepayments are slower than anticipated. The market value of these securities is highly sensitive to changes in interest rates.

D) Foreign currency translation The accounting records of the fund are maintained in U.S. dollars. The market value of foreign securities, currency holdings, and other assets and liabilities is recorded in the books and records of the fund after translation to U.S. dollars based on the exchange rates on that day. The cost of each security is determined using historical exchange rates. Income and withholding taxes are translated at prevailing exchange rates when earned or incurred. The fund does not isolate that portion of realized or unrealized gains or losses resulting from changes in the foreign exchange rate on investments from fluctuations arising from changes in the market prices of the securities. Such gains and losses are included with the net realized and unrealized gain or loss on investments. Net realized gains and losses on foreign currency transactions represent net realized exchange gains or losses on closed forward currency contracts, disposition of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions and the difference between the amount of investment income and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized appreciation and depreciation of assets and liabilities in foreign currencies arise from changes in the value of open forward currency contracts and assets and liabilities other than investments at the period end, resulting from changes in the exchange rate. Investments in foreign securities involve certain risks, including those related to economic instability, unfavorable political developments, and currency fluctuations, not present with domestic investments.

E) Futures and options contracts The fund may use futures and options contracts to hedge against changes in the values of securities the fund owns, owned or expects to purchase, or for other investment purposes. The fund may also write options on swaps or securities it owns or in which it may invest to increase its current returns.

The potential risk to the fund is that the change in value of futures and options contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments, if there is an illiquid secondary market for the contracts, if interest or exchange rates move unexpectedly or if the counterparty to the contract is unable to perform. With futures, there is minimal counterparty credit risk to the fund since futures are exchange traded and the exchange's clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default. Risks may exceed amounts recognized on the Statement of assets and liabilities. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. Realized gains and losses on purchased options are included in realized gains and losses on investment securities. If a written call option is exercised, the premium originally received is recorded as an addition to sales proceeds. If a written put option is exercised, the premium originally received is recorded as a reduction to the cost of investments.

Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade. The fund and the broker agree to exchange an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin." Exchange traded options are valued at the last sale price or, if no sales are reported, the last bid price for purchased options and the last ask price for written options. Options traded over-the-counter are valued using prices supplied by dealers. Futures and written option contracts outstanding at period end, if any, are listed after the fund's portfolio. The fund had an average contract amount of approximately \$297,700,000 on purchased options contracts for

the six months ended January 31, 2010. See Note 3 for the volume of written

75

options contracts activity for the six months ended January 31, 2010. The fund had an average contract amount of approximately 4,000 on futures contracts for the six months ended January 31, 2010.

F) Forward currency contracts The fund may buy and sell forward currency contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to protect against a decline in value relative to the U.S. dollar of the currencies in which its portfolio securities are denominated or quoted (or an increase in the value of a currency in which securities a fund intends to buy are denominated, when a fund holds cash reserves and short term investments), or for other investment purposes. The U.S. dollar value of forward currency contracts is determined using current forward currency exchange rates supplied by a quotation service. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is marked to market daily and the change in market value is recorded as an unrealized gain or loss. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The fund could be exposed to risk if the value of the currency changes unfavorably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the fund is unable to enter into a closing position. Risks may exceed amounts recognized on the Statement of assets and liabilities. Forward currency contracts outstanding at period end, if any, are listed after the fund's portfolio. Outstanding contracts on forward currency contracts for the six months ended January 31, 2010 are indicative of the volume of activity during the period.

G) Total return swap contracts The fund may enter into total return swap contracts, which are arrangements to exchange a market linked return for a periodic payment, both based on a notional principal amount to help enhance the funds return and manage the fund's exposure to credit risk. To the extent that the total return of the security, index or other financial measure underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the fund will receive a payment from or make a payment to the counterparty. Total return swap contracts are marked to market daily based upon quotations from market makers and the change, if any, is recorded as an unrealized gain or loss. Payments received or made are recorded as realized gains or losses. Certain total return swap contracts may include extended effective dates. Payments related to these swap contracts are accrued based on the terms of the contract. The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or in the price of the underlying security or index, the possibility that there is no liquid market for these agreements or that the counterparty may default on its obligation to perform. The fund's maximum risk of loss from counterparty risk, is the fair value of the contract. This risk may be mitigated by having a master netting arrangement between the fund and the counterparty. Risk of loss may exceed amounts recognized on the Statement of assets and liabilities. Total return swap contracts outstanding at period end, if any, are listed after the fund's portfolio. Outstanding notional on total return swap contracts for the six months ended January 31, 2010 are indicative of the volume of activity during the period.

H) Interest rate swap contracts The fund may enter into interest rate swap contracts, which are arrangements between two parties to exchange cash flows based on a notional principal amount, to manage the fund's exposure to interest rates. An interest rate swap can be purchased or sold with an upfront premium. An upfront payment received by the fund is recorded as a liability on the fund's books. An upfront payment made by the fund is recorded as an asset on the fund's books. Interest rate swap contracts are marked to market daily based upon quotations from an independent pricing service or market makers and the change, if any, is recorded as an unrealized gain or loss. Payments received or made are recorded as realized gains or losses. Certain interest rate swap contracts may include extended effective dates. Payments related to these swap contracts are accrued based on the terms of the contract. The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or if the counterparty defaults on its obligation to perform. The fund's maximum risk of loss from counterparty risk, is the fair value of the contract. This risk may be mitigated by having a master netting arrangement between the fund and the counterparty. Risk of loss may exceed amounts recognized on the Statement of assets and liabilities. Interest rate swap contracts outstanding at period end, if any, are listed after the fund's portfolio. The fund had an average notional amount of approximately \$10,809,500,000 on interest rate swap contracts for the six months ended January 31, 2010.

I) Credit default contracts The fund may enter into credit default contracts to provide a measure of protection against risk of loss following a default, or other credit event in respect of issuers within an underlying index or a single issuer, or to gain credit exposure to an underlying index or issuer. In a credit default contract, the protection buyer typically makes an up front payment and a periodic stream of payments to a counterparty, the protection seller, in exchange for the right to receive a contingent payment upon the occurrence of a credit event on the reference obligation or all other

76

equally ranked obligations of the reference entity. Credit events are contract specific but may include bankruptcy, failure to pay, restructuring and obligation acceleration. An upfront payment received by the fund, as the protection seller, is recorded as a liability on the fund's books. An upfront payment made by the fund, as the protection buyer, is recorded as an asset on the fund's books. Periodic payments received or paid by the fund are recorded as realized gains or losses. The credit default contracts are marked to market daily based upon quotations from an independent pricing service or market makers and the change, if any, is recorded as an unrealized gain or loss. Upon the occurrence of a credit event, the difference between the par value and market value of the reference obligation, net of any proportional amount of the upfront payment, is recorded as a realized gain or loss.

In addition to bearing the risk that the credit event will occur, the fund could be exposed to market risk due to unfavorable changes in interest rates or in the price of the underlying security or index or the possibility that the fund may be unable to close out its position at the same time or at the same price as if it had purchased the underlying reference obligations. In certain circumstances, the fund may enter into offsetting credit default contracts which would mitigate its risk of loss. Risks of loss may exceed amounts recognized on the Statement of assets and liabilities. The fund's maximum risk of loss from counterparty risk, either as the protection seller or as the protection buyer, is the fair value of the contract. This risk may be mitigated by having a master netting arrangement between the fund and the counterparty. Where the fund is a seller of protection, the maximum potential amount of future payments the fund may be required to make is equal to the notional amount of the relevant credit default contract. Credit default contracts outstanding, including their respective notional amounts at period end, if any, are listed after the fund's portfolio. The fund had an average notional amount of approximately \$249,100,000 on credit default swap contracts for the six months ended January 31, 2010.

J) Master agreements The fund is a party to ISDA (International Swap and Derivatives Association, Inc.) Master Agreements (Master Agreements) with certain counterparties that govern over the counter derivative and foreign exchange contracts entered into from time to time. The Master Agreements may contain provisions regarding, among other things, the parties' general obligations, representations, agreements, collateral requirements, events of default and early termination. With respect to certain counterparties, in accordance with the terms of the Master Agreements, collateral posted to the fund is held in a segregated account by the fund's custodian and with respect to those amounts which can be sold or repledged, are presented in the fund's portfolio. Collateral posted to the fund which can not be sold or repledged totaled \$259,974 at January 31, 2010. Collateral pledged by the fund is segregated by the fund's custodian and identified in the fund's portfolio. Collateral can be in the form of cash or debt securities issued by the U.S. Government or related agencies or other securities as agreed to by the fund and the applicable counterparty. Collateral requirements are determined based on the fund's net position with each counterparty. Termination events applicable to the fund may occur upon a decline in the fund's net assets below a specified threshold over a certain period of time. Termination events applicable to counterparties may occur upon a decline in the counterparty's long-term and short-term credit ratings below a specified level. In each case, upon occurrence, the other party may elect to terminate early and cause settlement of all derivative and foreign exchange contracts outstanding, including the payment of any losses and costs resulting from such early termination, as reasonably determined by the terminating party. Any decision by one or more of the fund's counterparties to elect early termination could impact the fund's future derivative activity.

At January 31, 2010, the fund had a net liability position of \$82,938,171 on derivative contracts subject to the Master Agreements. Collateral posted by the fund totaled \$78,308,803.

K) TBA purchase commitments The fund may enter into TBA (to be announced) commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalized. However, it is anticipated that the amount of the commitments will not significantly differ from the principal amount. The fund holds, and maintains until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the fund may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities themselves, and involve a risk of loss if the value of the security to be purchased declines prior to the settlement date, which risk is in addition to the risk of decline in the value of the fund's other assets. Unsettled TBA purchase commitments are valued at fair value of the underlying securities, according to the procedures described under Security valuation above. The contract is marked to market daily and the change in market value is recorded by the fund as an unrealized gain or loss.

77

Although the fund will generally enter into TBA purchase commitments with the intention of acquiring securities for its portfolio or for delivery pursuant to options contracts it has entered into, the fund may dispose of a commitment prior to settlement if Putnam Management deems it appropriate to do so.

L) TBA sale commitments The fund may enter into TBA sale commitments to hedge its portfolio positions or to sell mortgage-backed securities it owns under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as cover for the transaction.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-CSRS

Unsettled TBA sale commitments are valued at the fair value of the underlying securities, generally according to the procedures described under "Security valuation" above. The contract is marked to market daily and the change in market value is recorded by the fund as an unrealized gain or loss. If the TBA sale commitment is closed through the acquisition of an offsetting TBA purchase commitment, the fund realizes a gain or loss. If the fund delivers securities under the commitment, the fund realizes a gain or a loss from the sale of the securities based upon the unit price established at the date the commitment was entered into. TBA sale commitments outstanding at period end, if any, are listed after the fund's portfolio.

M) Dollar rolls To enhance returns, the fund may enter into dollar rolls (principally using TBAs) in which the fund sells securities for delivery in the current month and simultaneously contracts to purchase similar securities on a specified future date. During the period between the sale and subsequent purchase, the fund will not be entitled to receive income and principal payments on the securities sold. The fund will, however, retain the difference between the initial sales price and the forward price for the future purchase. The fund will also be able to earn interest on the cash proceeds that are received from the initial sale, on settlement date. The fund may be exposed to market or credit risk if the price of the security changes unfavorably or the counterparty fails to perform under the terms of the agreement.

N) Federal taxes It is the policy of the fund to distribute all of its taxable income within the prescribed time and otherwise comply with the provisions of the Internal Revenue Code of 1986, as amended (the "Code"), applicable to regulated investment companies. It is also the intention of the fund to distribute an amount sufficient to avoid imposition of any excise tax under Section 4982 of the Code. The fund is subject to the provisions of Accounting Standards Codification ASC 740 *Income Taxes* ("ASC 740"). ASC 740 sets forth a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. The fund did not have any unrecognized tax benefits in the accompanying financial statements. No provision has been made for federal taxes on income, capital gains or unrealized appreciation on securities held nor for excise tax on income and capital gains. Each of the fund's federal tax returns for the prior three fiscal years remains subject to examination by the Internal Revenue Service and state departments of revenue.

At July 31, 2009, the fund had a capital loss carryover of \$207,420,492 available to the extent allowed by the Code to offset future net capital gain, if any. The amount of the carryover and the expiration dates are:

Loss Carryover	Expiration
\$44,917,486	July 31, 2010
80,119,935	July 31, 2011
6,338,093	July 31, 2015
17,302,669	July 31, 2016
58,742,309	July 31, 2017

Pursuant to federal income tax regulations applicable to regulated investment companies, the fund has elected to defer to its fiscal year ending July 31, 2010 \$166,441,646 of losses recognized during the period November 1, 2008 to July 31, 2009.

O) Distributions to shareholders Distributions to shareholders from net investment income are recorded by the fund on the ex-dividend date. Distributions from capital gains, if any, are recorded on the ex-dividend date and paid at least annually. The amount and character of income and gains to be distributed are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. Dividend sources are estimated at the time of declaration. Actual results may vary. Any non-taxable return of capital cannot be determined until final tax calculations are completed after the end of the fund's fiscal year. Reclassifications are made to the fund's capital accounts to reflect income and gains available for distribution (or available capital loss carryovers) under income tax regulations.

The aggregate identified cost on a tax basis is \$941,824,748, resulting in gross unrealized appreciation and depreciation of \$109,812,795 and \$70,804,000, respectively, or net unrealized appreciation of \$39,008,795.

Note 2: Management fee, administrative services and other transactions

The fund pays Putnam Management for management and investment advisory services quarterly based on

78

the average net assets (including assets, but excluding liabilities, attributable to leverage for investment purposes) of the fund. The fee is based on the following annual rates: 0.75% of the first \$500 million of average weekly assets, 0.65% of the next \$500 million, 0.60% of the next \$500 million, and 0.55% of the next \$5 billion, with additional breakpoints at higher asset levels.

Putnam Investments Limited ("PIL"), an affiliate of Putnam Management, is authorized by the Trustees to manage a separate portion of the assets of the fund as determined by Putnam Management from time to time. Putnam Management pays a quarterly sub-management fee to PIL for its services at an annual rate of 0.40% of the average net assets (including assets, but excluding liabilities, attributable to leverage for investment purposes) of the portion of the fund managed by PIL.

On September 15, 2008, the fund terminated its outstanding derivatives contracts with Lehman Brothers Special Financing, Inc. ("LBSF") in connection with the bankruptcy filing of LBSF's parent company, Lehman Brothers Holdings, Inc. On September 26, 2008, the fund entered into a receivable purchase agreement ("Agreement") with another registered investment company (the "Seller") managed by Putnam Management. Under the Agreement, the Seller sold to the fund the right to receive, in the aggregate, \$1,457,093 in net payments from LBSF in connection with certain terminated derivatives transactions (the "Receivable"), in exchange for an initial payment plus (or minus) additional amounts based on the fund's ultimate realized gain (or loss) with respect to the Receivable. The Receivable will be offset against the fund's net payable to LBSF of \$13,827,173 and is included in the Statement of assets and liabilities in Payable for investments purchased. Future payments under the Agreement are valued at fair value following procedures approved by the Trustees and are included in the Statement of assets and liabilities. All remaining payments under the Agreement will be recorded as realized gain or loss. The fund's net payable to LBSF was calculated in accordance with the fund's master contract with LBSF. The fund has accrued interest on the net payable, which is included in the Statement of operations in Interest expense. Putnam Management currently is in discussions with LBSF regarding resolution of amounts payable to LBSF. Amounts recorded are estimates and final payments may differ from these estimates by a material amount.

The fund reimburses Putnam Management an allocated amount for the compensation and related expenses of certain officers of the fund and their staff who provide administrative services to the fund. The aggregate amount of all such reimbursements is determined annually by the Trustees.

Custodial functions for the fund's assets are provided by State Street Bank and Trust Company ("State Street"). Custody fees are based on the fund's asset level, the number of its security holdings and transaction volumes.

Putnam Investor Services, a division of Putnam Fiduciary Trust Company ("PFTC"), which is an affiliate of Putnam Management, provided investor servicing agent functions to the fund. Putnam Investor Services was paid a monthly fee for investor servicing at an annual rate of 0.05% of the fund's average net assets. The amounts incurred for investor servicing agent functions provided by PFTC during the six months period ended January 31, 2010 are included in Investor servicing fees in the Statement of operations.

Under the custodian contract between the fund and State Street, the custodian bank has a lien on the securities of the fund to the extent permitted by the fund's investment restrictions to cover any advances made by the custodian bank for the settlement of securities purchased by the fund. At January 31, 2010, the payable to the custodian bank represents the amount due for cash advanced for the settlement of securities purchased.

The fund has entered into expense offset arrangements with PFTC and State Street whereby PFTC's and State Street's fees are reduced by credits allowed on cash balances. For the six months period ended January 31, 2010, the fund's expenses were reduced by \$1,734 under the expense offset arrangements.

Each independent Trustee of the fund receives an annual Trustee fee, of which \$632, as a quarterly retainer, has been allocated to the fund, and an additional fee for each Trustees meeting attended. Trustees receive additional fees for attendance at certain committee meetings and industry seminars and for certain compliance-related matters. Trustees also are reimbursed for expenses they incur relating to their services as Trustees.

The fund has adopted a Trustee Fee Deferral Plan (the "Deferral Plan") which allows the Trustees to defer the receipt of all or a portion of Trustees fees payable on or after July 1, 1995. The deferred fees remain invested in certain Putnam funds until distribution in accordance with the Deferral Plan.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-CSRS

The fund has adopted an unfunded noncontributory defined benefit pension plan (the "Pension Plan") covering all Trustees of the fund who have served as a Trustee for at least five years and were first elected prior to 2004. Benefits under the Pension Plan are equal to 50% of the Trustee's average annual attendance and retainer fees for the three years ended December 31, 2005. The retirement benefit is payable during a Trustee's lifetime, beginning the year following retirement, for the number of years of service through

79

December 31, 2006. Pension expense for the fund is included in Trustee compensation and expenses in the Statement of operations. Accrued pension liability is included in Payable for Trustee compensation and expenses in the Statement of assets and liabilities. The Trustees have terminated the Pension Plan with respect to any Trustee first elected after 2003.

Note 3: Purchases and sales of securities

During the six months period ended January 31, 2010, cost of purchases and proceeds from sales of investment securities other than short-term investments aggregated \$362,049,788 and \$353,407,992, respectively. There were no purchases or sales of U.S. government securities.

Written option transactions during the period ended January 31, 2010 are summarized as follows:

		Contract Amounts	Premiums Received
<hr/>			
Written options outstanding at beginning of period			
	USD	907,058,000	\$ 47,013,617
	JPY	□	□

of period JPY □ □

Note 4: Shares repurchased

In September 2009, the Trustees approved the renewal of the repurchase program to allow the fund to repurchase up to 10% of its outstanding common shares over the 12 month period ending October 7, 2010 (based on shares outstanding as of October 7, 2009). Prior to this renewal, the Trustees had approved a repurchase program to allow the fund to repurchase up to 10% of its outstanding common shares over the 12 month period ending October 7, 2009 (based on shares outstanding as of October 7, 2008) and prior to that, to allow the fund to repurchase up to 10% of its outstanding common shares over the 12 month period ending October 7, 2008 (based on shares outstanding as of October 5, 2007). Repurchases are made when the fund's shares are trading at less than net asset value and in accordance with procedures approved by the fund's Trustees.

For the six-months ended January 31, 2010, the fund did not repurchase any shares.

Note 5: Summary of derivative activity

The following is a summary of the market values of derivative instruments as of January 31, 2010:

	Asset derivatives		Liability derivatives	
	Statement of assets and liabilities location	Market value	Statement of assets and liabilities location	Market value
Derivatives not accounted for as hedging instruments under ASC 815				
Credit contracts	Receivables	\$520,400	Payables	\$24,663,825
Foreign exchange contracts	Receivables	3,791,996	Payables	2,510,713
Interest rate contracts	Investments, Receivables, Net assets □ Unrealized appreciation/ (depreciation)	86,834,264*	Payables, Net assets □ Unrealized appreciation/ (depreciation)	146,871,102*
Total		\$91,146,660		\$174,045,640

* Includes cumulative appreciation/depreciation of futures contracts as reported in The fund's portfolio. Only current day's variation margin is reported within the Statement of assets and liabilities.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-CSRS

The following is a summary of realized and unrealized gains or losses of derivative instruments on the Statement of operations for the six months ended January 31, 2010 (see Note 1):

Amount of Realized Gain or (Loss) on Derivatives Recognized in Income

Derivatives not accounted for as hedging instruments under ASC 815	Options	Futures	Forward currency contracts	Swaps	Total
Credit contracts	\$□	\$□	\$□	\$(3,992,910)	\$(3,992,910)
Foreign exchange contracts	□	□	4,961,425	□	4,961,425
Interest rate contracts	2,948,390	(11,533,027)	□	37,579,768	28,995,131
Total	\$2,948,390	\$(11,533,027)	\$4,961,425	\$33,586,858	\$29,963,646

Change in Unrealized Appreciation or (Depreciation) on Derivatives Recognized in Income

Derivatives not accounted for as hedging instruments under ASC 815	Options	Futures	Forward currency contracts	Swaps	Total
Credit contracts	\$□	\$□	\$□	\$7,191,706	\$7,191,706
Foreign exchange contracts	□	□	880,939	□	880,939
Interest rate contracts	2,977,213	9,945,452	□	(50,316,594)	(37,393,929)
Total	\$2,977,213	\$9,945,452	\$880,939	\$(43,124,888)	\$(29,321,284)

Note 6: Investment in Putnam Money Market Liquidity Fund

The fund invested in Putnam Money Market Liquidity Fund, an open-end management investment company managed by Putnam Management. Investments in Putnam Money Market Liquidity Fund are valued at its closing net asset value each business day. Income distributions earned by the fund are recorded as interest income in the Statement of operations and totaled \$68,215 for

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-CSRS

the period ended January 31, 2010. During the period ended January 31, 2010, cost of purchases and proceeds of sales of investments in Putnam Money Market Liquidity Fund aggregated \$295,493,518 and \$344,153,433, respectively. Management fees charged to Putnam Money Market Liquidity Fund have been waived by Putnam Management.

Note 7: Senior loan commitments

Senior loans are purchased or sold on a when-issued or delayed delivery basis and may be settled a month or more after the trade date, which from time to time can delay the actual investment of available cash balances; interest income is accrued based on the terms of the securities. Senior loans can be acquired through an agent, by assignment from another holder of the loan, or as a participation interest in another holder's portion of the loan. When the fund invests in a loan or participation, the fund is subject to the risk that an intermediate participant between the fund and the borrower will fail to meet its obligations to the fund, in addition to the risk that the borrower under the loan may default on its obligations.

Note 8: Regulatory matters and litigation

In late 2003 and 2004, Putnam Management settled charges brought by the Securities and Exchange Commission (the "SEC") and the Massachusetts Securities Division in connection with excessive short-term trading in Putnam funds. Distribution of payments from Putnam Management to certain open-end Putnam funds and their shareholders is expected to be completed in the next several months. These allegations and related matters have served as the general basis for certain lawsuits, including purported class action lawsuits against Putnam Management and, in a limited number of cases, some Putnam funds. Putnam Management believes that these lawsuits will have no material adverse effect on the funds or on Putnam Management's ability to provide investment management services. In addition, Putnam Management has agreed to bear any costs incurred by the Putnam funds as a result of these matters.

Note 9: Market and credit risk

In the normal course of business, the fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the contracting party to the transaction to perform (credit risk). The fund may be exposed to additional credit risk that an institution or other entity with which the fund has unsettled or open transactions will default.

* In October 2005, the Board of Trustees of the Putnam Funds initiated the closed-end fund share repurchase program, which, as subsequently amended, authorized the repurchase of up to 10% of the fund's outstanding common shares over the two-years ending October 5, 2007. The Trustees subsequently renewed the program on three occasions, to permit the repurchase of an additional 10% of the fund's outstanding common shares over each of the twelve-month periods beginning on October 8, 2007, October 8, 2008 and October 8, 2009.

The October 8, 2008 - October 7, 2009 program, which was announced in September 2008, allowed repurchases up to a total of 14,564,288 shares of the fund. The October 8, 2009 - October 7, 2010 program, which was announced in September 2009, allows repurchases up to a total of 14,017,462 shares of the fund.

**Information prior to October 7, 2009 is based on the total number of shares eligible for repurchase under the program, as amended through September 2008. Information from October 8, 2009 forward is based on the total number of shares eligible for repurchase under the program, as amended through September 2009.

Item 10. Submission of Matters to a Vote of Security Holders:

Not applicable

Item 11. Controls and Procedures:

(a) The registrant's principal executive officer and principal financial officer have concluded, based on their evaluation of the effectiveness of the design and operation of the registrant's disclosure controls and procedures as of a date within 90 days of the filing date of this report, that the design and operation of such procedures are generally effective to provide reasonable assurance that information required to be disclosed by the registrant in this report is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms.

(b) Changes in internal control over financial reporting: Not applicable

Item 12. Exhibits:

(a)(1) Not applicable

(a)(2) Separate certifications for the principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the Investment Company Act of 1940, as amended, are filed herewith.

(b) The certifications required by Rule 30a-2(b) under the Investment Company Act of 1940, as amended, are filed herewith.
