We have certain tax incentives relative to our manganese operations in Carajás, our potash operations in Rosario do Catete, our alumina and aluminum operations in Barcarena and our kaolin operations in Ipixuna and Mazagão. The incentives relative to manganese comprise partial exemption up to 2013. The incentive relating to alumina and potash comprise full income tax exemption on defined production levels, which expire in 2009 and 2013, respectively, while the partial exemption incentives relative to aluminum and kaolin expire in 2013, and bauxite in 2008. An amount equal to the tax saving must be appropriated to a reserve account within stockholders' equity and may not be distributed in the form of cash dividends.

The Company is party to labor, civil, tax and other suits and has been contesting these matters both administratively and in court. When applicable, these are backed by judicial deposits. Provisions for losses are estimated and restated monetarily by management based on the opinions of the legal department and outside counsel.

Labor and social security related actions principally comprise claims for (i) payment of time spent traveling from their residences to the work-place, (ii) additional health and safety related payments and (iii) various other matters, often in connection with disputes about the amount of indemnities paid upon dismissal and the one-third extra holiday pay.

Civil actions principally related to claims made against us by contractors in connection with losses alleged to have been incurred by them as a result of various past government economic plans during which full indexation of contracts for inflation was not permitted and accidents.

Tax related actions principally comprise our challenges of certain revenue taxes, value added tax and income tax.

Table of Contents

In addition to the contingencies for which we have made provisions we have possible losses totaling R\$ 2,632,317 (R\$ 1,966,662 parent company). Based on the advice of our legal counsel, no provision is maintained.

(b) Guarantees given to jointly controlled companies are as follows:

Affiliate	Amount of guarantee		Denominated currency	Purpose Debt guarantee	Final maturity	Counter guarantees
	09/30/06	06/30/06				
SAMARCO	5,890	8,508	US\$	IFC	2008	None

The Company expect such guarantees to be not executed and therefore no provisions for losses have been made.

(c) Upon privatization of the Company in 1997, issued anon-convertible debentures (Debentures) to the stockholders of record, including the federal government. The maturity dates of these Debentures were established to guarantee that pre-privatization stockholders, including the federal government, would share with us in any future benefits from the Company mineral resources.

A total of 388,559,056 Debentures were issued at a par value of R\$ 0.01 (one cent), whose value is to be restated in accordance with the variation in the General Market Price Index (IGP-M), as set forth in the Issue Deed.

On October 4, 2002, the Comissão de Valores Mobiliários - CVM (Brazilian Securities Commission) approved the Company's registration request, for public trading of the Debentures. As from October 28, 2002, the Debentures can be traded on the secondary market.

The debenture holders are entitled to receive semi-annual payments equivalent to a percentage of the net revenue deriving from certain mineral resources owned in May 1997 and included in the Issue Deed.

According to the Debenture Issue Deed, the amount of the premium must include interest up to the month prior to that of effective payment, plus 1% in the month in which the funds are made available to the debenture holder. Pursuant to this Deed, the payment date shall take place each semester in March and September.

On the start-up of copper projects in 2006, CVRD began calculating the premium referring to these minerals rights. Considering the iron ore sale, the Company estimates that the threshold for payment will be reached by approximately 2032 and 2019 for the Southern and Northern systems, respectively. Regarding other minerals, such as bauxite and nickel, the forecast for exploitation is for the second half of the decade, and according to the criteria established in the Deed, payment will be due on the net sales revenue in the fourth year after the date of first commercialization. The obligation to make payments to the debenture holders will cease when the pertinent mineral resources are exhausted.

On 04/03/06 e 02/10/2006 we made available payment related to debentures in the amount of R\$4,491 and R\$ 8,379, respectively.

The estimated costs are accounted for at the present value of the obligations, discounted using a risk free rate; and

The estimated costs are reviewed annually and changes in the present value are adjusted in the recorded amounts of the assets and liabilities.

5.24- Acquisition of INCO

On October 23, 2006 CVRD acquired Inco Limited (Inco) for US\$ 13 billion, corresponding to 174,623,019 common shares for Cdn\$ 86.00 each share, representing 75.66% of its outstanding shares.

Our acquisition is consistent with our long-term corporate strategy and with our non-ferrous metals business strategy. It is a new step in our strategy of developing, operating and maximizing the performance of large-scale, long-life and low-cost assets.

The proposed transaction will bring a better diversification to our Company's activities by products, markets and geographic asset base contributing to reducing our business and financial risks.

Inco is a leading Canadian-based nickel company, and one of the largest nickel producers possessing the world's largest nickel reserve base.

In accordance with CVRD stated purpose of acquiring 100% of the outstanding shares of Inco, CVRD are taking the steps to acquire the remaining shares. Until 03/11/06 CVRD have already acquired 196,078,276 shares by approximately US\$ 15 billion, representing 86.57% of Inco's capital.

The financial disbursement with the acquisition of 100% of Inco shares is estimated to reach US\$ 17.6 billion. Most part of money is coming from a bridge loan supplied by a syndicate of banks. The bridge loan has a two-year tenor, with an interest rate of Libor plus 40 basis points during the first year and Libor plus 60 basis points during the second

year.

CVRD expects to conclude shortly several transactions to take out the bridge loan aiming to extend the debt maturity close to the pre-acquisition level, longer than seven years.

Until 11/03/06 CVRD has already acquired 196,078,276 shares by approximately US\$ 15 billion, representing 86,57% of Inco's capital.

2. Except as mentioned in paragraph 3, our limited review was carried out in accordance with the specific procedures established by the Institute of Independent Auditors of Brazil (IBRACON), in conjunction with the Federal Accounting Board, and consisted mainly of: (a) inquiries and discussion with the officers responsible for the Company's and its investees' accounting, financial and operational areas about the procedures adopted for preparing the Quarterly Financial Information (ITR), and (b) review of the information and subsequent events which have, or may have, relevant effects on the Company's and its investees' financial positions and operations.
3. The financial statements as of September 30, 2006, of certain subsidiaries, jointly owned and associated companies, in which there are relevant investments, have not been reviewed by independent auditors. Accordingly, the conclusions resulting from our review do not cover the amounts of R\$6,882,668 thousand of these investments and R\$257,325 thousand of the income generated by them for the quarter then ended.
4. Based on our limited review, except for the effects of the adjustments, if any, which might have been required if the financial statements of the subsidiaries, jointly-owned and associated companies mentioned in paragraph 3 had been reviewed by independent auditors, we are not aware of any relevant adjustment which should be made to the Quarterly Financial Information (ITR), referred to in paragraph 1, for it to be in accordance with the rules issued by the Brazilian Securities Commission (CVM) specifically applicable to the preparation of the obligatory Quarterly Financial Information (ITR).

Table of Contents**B Additional Information****8 Management's Discussion and Analysis of the Operating Results for the Year Ended September 30, 2006 and Supplemental Information**

As a result of the analysis some general aspects must be considered, as follows:

On 09/30/06, about 92% of the consolidated gross revenue and 25% of consolidated total cost are linked to the U.S. dollar. Consequently, fluctuations in the exchange rate between the two currencies have a significant impact on the operating results.

Approximately 84% of consolidated short-term and long-term loans on 09/30/06 are denominated in U.S. dollars. As a result, exchange rate fluctuations have a significant impact on the financial expenses and income.

The average Dollar rate fell 12.37% between periods (R\$2.19 on 09/30/06 against R\$2.49 in 09/30/05), partially offset by price increases, and the end rate fell 2.16% (R\$2.17 in 09/30/06 against R\$2.22 in 09/30/05).

In 2006, iron ore prices increased by 19% and pellets prices decreased by 3%.

The consolidated Trade Balance was:

Table of Contents

Sales volume and revenues by products and services:

The 15% gross revenue increase, from R\$26,145,758 to R\$30,054,122 was due to:

Reference price increase of 19% for iron ore and decreased 3% for pellets;

Increase of copper prices;

Increase of iron ore volumes sold; and

Beginning of the sale of pig iron and coal in 2006.

The above effects were partially offset by:

The devaluation of the average dollar compared with the real was 12%; and

Decrease in ferroalloys prices (due to increase of offer began by the end of 2004) and the decline of manganese volume sold.

The 11% increase in the cost of products and services (R\$13,231,976 on 09/30/06 against R\$ 11,903,910 on 09/30/05) is due to increase in sales volumes and changes in the prices of materials, oil, energy and services which comprise production cost during the period.

8.1.3 Selling expenses and administrative expenses

Selling expenses decreased by 9%, from R\$286,445 on 09/30/05 to R\$261,738 on 09/30/06, while administrative expenses increased by 21% from R\$897,801 on 09/30/05 to R\$1,087,996 on 09/30/06, basically due to personnel agreements and expenses with depreciation.

8.1.4 Research and development

Research and development increased by 44%, from R\$463.014 on 09/30/05 to R\$667.184 on 09/30/06, reflecting CVRD expansion plan to diversify production and expansion of production to meet world demand.

8.1.5 Other operating expenses

Other operating expenses increased by 13%, from R\$629,226 on 09/30/05 to R\$712,545 on 09/30/06. See note 5.23.

8.1.6 Net financial results

The net financial result had an impact of R\$462,227 (expense of R\$974,068 on 09/30/06 compared to expense of R\$511,841 on 09/30/05) due to exchange rate variation effect over the foreign debt, that was partially compensated with the exchange variation on cash equivalents.

Table of Contents**8.1.7 Income tax and social contribution**

Income tax and social contribution reflect an expense of R\$1.970,208 on 09/30/06 compared with an expense of R\$2.215.492 on 09/30/05, mainly caused by decrease of taxable income, partially compensated with not taxable abroad income (International Taxation agreement).

8.1.8 Cash generation

The operating cash generation measured by EBITDA (earnings before financial results, results of equity investments, interest, income tax and depreciation, amortization and depletion, more dividends received) was R\$14,801,250 on 09/30/06, against R\$12,500,812 on 09/30/05, an increase of 18%.

EBITDA is not a BR GAAP measure and does not represent cash flow for the periods presented and should not be considered as an alternative to net income (loss), as an indicator of our operating performance or as an alternative to cash flow as a source of liquidity.

Our definition of EBITDA may not be comparable with EBITDA as defined by other companies.

Although EBITDA, as defined above, it does not provide a US GAAP measure of operating cash flows, our management uses it to measure our operating performance and financial analysts in evaluating our business commonly use it.

8.2 Comments on the Parent Company Results**8.2.1 Gross revenue**

The 9% increase in gross revenue (R\$14,482,735 on 09/30/06 against R\$13,277,033 on 09/30/05) is the result of the 11% increase in sales of iron ore and also for the increase of prices. This effect was compensated in part by the 12% average appreciation of the real against the U. S. dollar. The major part of revenues is linked to the dollar.

8.2.2 Cost of products and services

Cost of products and services sold to 09/30/06 was R\$7,877,551, on 09/30/06 against R\$7,032,494 on 09/30/05 representing a 12% increase. The main factors are, higher volumes sold of products in general, contracts readjustments and the increase of assets reflecting increase of expenses related to depreciation.

8.2.3 Gross margin

The gross margin increased by 1.2 P.P (42,5% on 09/30/06 against 43,7% on 09/30/05) mainly due to the devaluation of the dollar against the real, since most of revenues are linked to the dollar.

Exchange variation in Stockholders' Equity of companies abroad	(612,822)	(1,063,126)
Results of equity investments	6,774,814	3,718,923

Table of Contents

Results of equity investments are strongly affected by the exchange rate variation over debt, which had a positive impact due to the appreciation of the Real against the Dollar in the period ended in September, 2006 of 8% in comparison with a 16% decrease during the period ended in September, 2005. This effect is partially offset by the negative exchange rate variation from investments abroad.

Operationally, volumes and average selling prices increased in iron ore and aluminum areas. This increase was partially compensated by decrease in average selling prices and volume in manganese and ferroalloys, manganese and steel areas. The decrease in pellets is due to reduction of quantities sold.

The negative result of equity in others, as above, refers to expenses with subsidiaries of mineral prospection in Africa, South America and Oceania.

8.2.5 Selling expenses and administrative expenses

Selling expenses increased by R\$ 1,549, from R\$ 1,185 on 09/30/05 to R\$ 2,734 on 09/30/06, while administrative expenses increased by 36%, from R\$ 460,060 on 09/30/05 to R\$ 623,939 on 09/30/06, basically due to personnel agreement and expenses with depreciation.

Income tax and social contribution reflect an expense of R\$869,922 on 09/30/06 compared with an expense of R\$1,070,072 on 09/30/05, mainly caused by decrease of taxable income.
