News Release / Presseinformation

Infineon reports strong first quarter results with Segment Result margin of 9.4% New outlook for 2010 FY: Revenue growth in excess of 20% with high single-digit margin

Neubiberg, Germany January 29, 2010 Infineon Technologies AG (FSE: IFX / OTCQX: IFNNY) today reported results for the first quarter of the 2010 fiscal year, ended December 31, 2009.¹

Strong operating performance with revenue increase of 10% sequentially and combined Segment Result² margin of 9.4%

Infineon's revenues in the first quarter were Euro 941 million, a strong increase of 10 percent compared to the fourth quarter of the 2009 fiscal year and of 27 percent year-over-year. Infineon's first quarter combined Segment Result was Euro 88 million, a significant improvement compared to Euro 52 million in the prior quarter. Net income for the first quarter was Euro 66 million compared to Euro 14 million in the prior quarter.

in Euro million	3 months ended Dec 31, 08	year-on-year +/- in %	3 months ended Sep 30, 09	sequential +/- in %	3 months ended Dec 31, 09

Basic and diluted earnings (loss) per share from discontinued operations	(0.32)	+++	(0.01)	+++	0.10
Basic and diluted earnings (loss) per share	(0.46)	+++	0.02	+++	0.06

Outlook for the second quarter and the full 2010 fiscal year

For the second quarter of the 2010 fiscal year, Infineon expects revenues to be approximately on the same level or, due to seasonality, down slightly compared to the first quarter. Second quarter combined Segment Result margin should be a high single-digit percentage.

For the 2010 fiscal year as a whole, Infineon is raising its guidance and is now anticipating growth in revenues in excess of 20 percent compared with the 2009 fiscal year, with a high single-digit combined Segment Result margin.

¹ The sale of the Wireline Communications business to Lantiq, affiliates of Golden Gate Private Equity Inc., closed on November 6, 2009. Statements in this news release reflect the company's operations without this business.

² For a definition of Segment Result and a reconciliation to operating income (loss), please see page 8.

-2-

Thanks to leadership positions in our target markets, we translated the general economic recovery into operating results for the first quarter which exceeded our original expectations. The Automotive and Industrial & Multimarket segments benefited strongly from the market upswing, said Peter Bauer, CEO of Infineon Technologies AG. Although uncertainties in the worldwide economy remain regarding developments in the second half of this fiscal year, we are raising our guidance for the full 2010 fiscal year. We are now looking for revenue growth in excess of 20 percent with a high single-digit combined Segment Result margin. Previously, the company expected revenue growth of ten percent or more with mid single-digit combined Segment Result margin.

The sequential increase in revenues of ten percent in the first quarter reflects growth in the company's Automotive (ATV), Industrial & Multimarket (IMM) and Wireless Solutions (WLS) segments, mostly driven by the economic recovery and improved demand in the supply chain as well as at end customers.

First quarter combined Segment Result of Euro 88 million was up significantly compared to Euro 52 million in the fourth quarter of the 2009 fiscal year. Combined Segment Result margin in the first quarter was 9.4 percent, compared to 6.1 percent in the prior quarter. All of the company's four operating segments achieved positive Segment Result. The increase in combined Segment Result reflected higher sales levels and continued increases in factory loading compared to the prior quarter. This more than offset the increase in operating expenses due to the termination of temporary labor cost reduction measures (short-time work and unpaid leave) and the negative impact of the U.S. dollar against the Euro.

For the first quarter, the loss from continuing operations was Euro 46 million. This amount included a non-recurring operating charge of Euro 81 million in connection with the deconsolidation of ALTIS, the company's joint venture with IBM in France, as described below. For the fourth quarter of the 2009 fiscal year, income from continuing operations was Euro 24 million.

Infineon reported income from discontinued operations, net of income taxes, of Euro 112 million for the first quarter. This amount consisted mainly of an after tax gain of Euro 106 million from the sale of the Wireline Communications (WLC) business to Lantiq, affiliates of Golden Gate Private Equity Inc., as well as the results of the operating WLC business before the closing of the sale of that business.

For the Finance and Business Press: INFXX201001-27e

Worldwide Headquarters: Media Relations Investor Relations	Name:	Phone:	Email:
	Kay Laudien	+49 89 234 28481	kay.laudien@infineon.com
	EU/APAC/USA/CAN	+49 89 234 26655	investor.relations@infineon.com

Net income was Euro 66 million in the first quarter, a strong improvement from the net income of Euro 14 million in the prior quarter. Included in this amount was an after tax gain of Euro 106 million from the sale of the WLC business to Lantiq, which more than offset the non-recurring operating charge of Euro 81 million in connection with the deconsolidation of ALTIS. Basic and diluted earnings per share were Euro 0.06 for the first quarter compared to basic and diluted earnings per share of Euro 0.02 for the fourth quarter of the 2009 fiscal year.

At the end of the first quarter, Infineon's gross cash position was Euro 1,678 million compared to Euro 1,507 million at the end of the fourth quarter of the 2009 fiscal year. The increase of Euro 171 million included a cash inflow of Euro 223 million in connection with the sale of the WLC business to Lantiq, partly offset by the deconsolidation of the cash of the ALTIS joint venture in the amount of Euro 88 million. During the first quarter, voluntary repurchases of a portion of the company's subordinated convertible notes due 2010 were made, totaling Euro 46 million at book value, as well as a repayment of other debt, totaling Euro 10 million. Overall, the company's net cash position increased to Euro 874 million as of December 31, 2009, compared to Euro 657 million as of September 30, 2009.

Free cash flow³ from continuing operations for the first quarter was Euro 14 million. This amount included a reduction in cash of Euro 88 million resulting from the deconsolidation of the ALTIS joint venture. In the fourth quarter of the 2009 fiscal year, free cash flow from continuing operations was Euro 151 million. Capital expenditures, including capitalized intangible assets, were Euro 48 million in the first quarter, a slight increase compared to Euro 40 million in the prior quarter. Depreciation and amortization was Euro 106 million, compared to Euro 114 million in the prior quarter.

ALTIS

In December 2009, Infineon deconsolidated its joint venture ALTIS, after the waiving of its option to acquire shares in ALTIS from its joint venture partner IBM. In connection with the deconsolidation, Infineon recorded a non-recurring operating charge of Euro 81 million in its non-segment result. The investment in ALTIS is accounted for as an equity investment from December 31, 2009.

³ For a definition and the calculation of Free cash flow, please see page 10.

Outlook for the second quarter of the 2010 fiscal year**Flat or slightly lower revenues due to seasonality in WLS**

Infineon expects revenues for the second quarter of the 2010 fiscal year to be approximately on the same level or, due to seasonality, down slightly compared to the first quarter, resulting in another quarter with combined Segment Result margin of a high single-digit percentage.

Revenues in the ATV, IMM, and Chip Card & Security (CCS) segments are expected to increase compared to the first quarter. Revenues in the WLS segment are likely to decrease due to the seasonal slow-down which is typical after the Christmas season. This outlook is based on the assumption of a U.S. dollar/Euro exchange rate of 1.50.

Updated outlook for the 2010 fiscal year**Revenue growth now expected to be in excess of 20 percent year-over-year;****Segment Result margin expected to be a positive high single-digit percentage**

Given strong first quarter results and second quarter outlook, Infineon is raising its outlook for the 2010 fiscal year.

In light of the strong performance in the first half of the 2010 fiscal year, and taking a conservative view regarding the sustainability of current growth patterns in the second half of the current fiscal year, Infineon now expects growth in revenues in excess of 20 percent for the 2010 fiscal year, at an assumed U.S. dollar/Euro exchange rate of 1.50. The company still anticipates the year-over-year increase to be driven by increases in revenues in all of the company's operating segments, particularly in the ATV and IMM segments, with lower revenue growth anticipated in the WLS segment, and the lowest growth rate expected in the CCS segment. Revenues in Other Operating Segments, mainly from product supply agreements with Lantiq, are now anticipated to total a low triple-digit million Euro amount.

Infineon expects combined Segment Result in the 2010 fiscal year to improve considerably from the 2009 fiscal year with combined Segment Result margin now anticipated to be a high single-digit percentage.

Driven by the dynamic growth in revenue and production levels, Infineon anticipates that CapEx, including capitalized intangible assets, will be at the higher end of the previous guidance range of Euro 220 million to Euro 250 million for the 2010 fiscal year, compared to Euro 154 million in the 2009 fiscal year. As announced last quarter,

Segment Revenues	6	(50)	1	+++	3	0
Segment Result	(5)	(20)	(16)	63	(6)	

In the first quarter, all of the company's four operating segments were positively impacted by lower opportunity cost of underutilized manufacturing facilities. In most segments, this positive effect, coupled with revenue increases, more than offset increases in operating expenses due to the termination of temporary labor cost reduction measures and the negative impact of the U.S. dollar against the Euro.

In the first quarter, revenues in the **ATV** segment increased 17 percent compared to the fourth quarter of the 2009 fiscal year, driven by growing demand in all regions and inventory replenishment in the supply chain. ATV Segment Result increased significantly on a sequential basis due to the strong growth in revenues and the positive effects of increased production levels, balancing the adverse effects of the termination of temporary labor cost reduction measures.

Revenues in the **IMM** segment increased six percent sequentially, reflecting strong end customer demand for computing, communications and industrial products. IMM Segment Result increased significantly compared to the previous quarter, driven by the

-6-

increase in sales volumes, the positive effects of increased factory loading and an improvement in the segment's product mix. In addition, first quarter IMM revenues and Segment Result benefited from the settlement of patent infringement litigation with Fairchild Semiconductor International Inc. relating to power transistors. In total, the positive effects more than offset the adverse effects mentioned on page 5.

Revenues in the **CCS** segment decreased compared to the prior quarter, mainly reflecting the typical seasonal slow-down in the segment's mobile communications and payment businesses. Business with government ID applications increased slightly. CCS Segment Result in the first quarter was stable compared to the prior quarter due to a shift in the segment's product mix towards higher margin businesses. This more than offset the decrease in revenues, the adverse currency development and the termination of temporary labor cost reduction measures.

In the first quarter, revenues in the **WLS** segment increased slightly quarter-over-quarter, mainly due to strong demand of some major mobile phone customers, especially for smart phone solutions. WLS Segment Result was almost stable compared to the prior quarter. The higher revenues could not entirely compensate for the negative effects of the termination of temporary labor cost reduction measures and the impact of the weak U.S. dollar.

Consolidated Statements of Cash Flows**Gross and Net Cash/(Debt) Position***

Infineon defines gross cash position as cash and cash equivalents and available-for-sale financial assets, and net cash/(debt) position as gross cash position less short-term debt and current maturities of long-term debt, and long-term debt. Since Infineon holds a portion of its available monetary resources in the form of readily available-for-sale financial assets, which for IFRS purposes are not considered to be cash, it reports its gross and net cash/(debt) positions to provide investors with an understanding of the Company's overall liquidity. The gross and net cash/(debt) position is determined as follows from the condensed consolidated balance sheets, without adjustment to the IFRS amounts presented:

* Includes only amounts from continuing operations.

in Euro million	Dec 31, 08	Sep 30, 09	Dec 31, 09
Cash and cash equivalents	647	1,414	1,589
Available-for-sale financial assets	132	93	89

Less: Short-term debt and current maturities of long-term debt	212	521	496
Long-term debt	860	329	308

Net Cash/(Debt) Position	(293)	657	874
---------------------------------	--------------	------------	------------

Free Cash Flow*

Infineon defines free cash flow as net cash from operating and investing activities excluding purchases or sales of available-for-sale financial assets. Since Infineon holds a portion of its available monetary resources in the form of available-for-sale financial assets, and operates in a capital intensive industry, it reports free cash flow to provide investors with a measure that can be used to evaluate changes in liquidity after taking capital expenditures into account. Free cash flow is not intended to represent the residual cash flow available for discretionary expenditures, since debt service requirements or other non-discretionary expenditures are not deducted. The free cash flow is determined as follows from the consolidated cash flow statements:

* Includes only amounts from continuing operations.

in Euro million	3 months ended

Ø Nov 16, 2010* Earnings Release for the Fourth Quarter and Full 2010 Fiscal Year

About Infineon

Infineon Technologies AG, Neubiberg, Germany, offers semiconductor and system solutions addressing three central challenges to modern society: energy efficiency, communications, and security. In the 2009 fiscal year (ending September 30), the company reported sales of Euro 3.03 billion with approximately 25,650 employees worldwide. With a global presence, Infineon operates through its subsidiaries in the U.S. from Milpitas, CA, in the Asia-Pacific region from Singapore, and in Japan from Tokyo. Infineon is listed on the Frankfurt Stock Exchange (ticker symbol: IFX) and in the USA on the over-the-counter market OTCQX International Premier (ticker symbol: IFNNY).

DISCLAIMER

This press release includes forward-looking statements and assumptions about the future of Infineon's business and the industry in which we operate. These include statements and assumptions relating to general economic conditions, future developments in the world semiconductor market, our ability to manage our costs and to achieve our savings and growth targets, the resolution of Qimonda's insolvency proceedings and the liabilities we may face as a result of Qimonda's insolvency, the potential disposition or closure of our ALTIS joint venture, the benefits of research and development alliances and activities, our planned levels of future investment, the introduction of new technology at our facilities, our ability to continue to offer commercially viable products, and our expected or projected future results.

These forward-looking statements are subject to a number of uncertainties, including broader economic developments, including the sustainability of recent improvements in the market environment; trends in demand and prices for semiconductors generally and for our products in particular, as well as for the end-products, such as automobiles and consumer electronics, that incorporate our products; the success of our development efforts, both alone and with partners; the success of our efforts to introduce new production processes at our facilities; the actions of competitors; the continued availability of adequate funds; the outcome of antitrust investigations and litigation matters; and the outcome of Qimonda's insolvency proceedings; as well as the other factors mentioned in this press release and those described in the Risk Factors section of our most recent annual report on Form 20-F on file with the with the U.S. Securities and Exchange Commission.

As a result, Infineon's actual results could differ materially from those contained in these forward-looking statements. You are cautioned not to place undue reliance on these forward-looking statements. Infineon does not undertake any obligation to publicly update or revise any forward-looking statements in light of developments which differ from

those anticipated.
