REMINGTON OIL AND GAS CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. ACCOUNTING POLICIES AND BASIS OF PRESENTATION

Remington Oil and Gas Corporation is an independent oil and gas exploration and production company incorporated in Delaware. Our oil and gas properties are located in the shallow water offshore Gulf of Mexico and the onshore Gulf Coast.

We prepared these financial statements according to the instructions for Form 10-Q. Therefore, the financial statements do not include all disclosures

Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q

required by generally accepted accounting principles. However, we have recorded all transactions and adjustments necessary to fairly present the financial statements included in this Form 10-Q. The adjustments made are normal and recurring. The following notes describe only the material changes in accounting policies, account details or financial statement notes during the first six months of 2002. Therefore, please read these financial statements and notes to the financial statements together with the audited financial statements and notes to financial statements in our 2001 Form 10-K. The income statements for the three and six months ended June 30, 2002, cannot necessarily be used to project results for the full year. We have made certain reclassifications to prior year financial statements in order to conform to current year presentations.

NOTE 2. NEW ACCOUNTING POLICIES

STATEMENT OF FINANCIAL ACCOUNTING STANDARDS NO. 144

During the first quarter of 2002, we adopted Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets," which supercedes Statement of Financial Accounting Standards No. 121, "Accounting for Impairment of Long-Lived Assets." The Statement addresses financial accounting and reporting for the impairment or disposal of long-lived assets. Adoption of this Statement did not have a material effect on our balance sheet or income statement.

UNPROVED PROPERTIES

Through December 31, 2001, we assessed the capitalized costs of unproved properties periodically to determine whether their value has been impaired below the capitalized costs, recognizing a loss to the extent such impairment was indicated. In making these assessments, we considered factors such as exploratory drilling results, future drilling plans and lease expiration terms. Effective January 1, 2002, we implemented a policy whereby we amortize the balance of our individually immaterial unproved property costs (adjusted by an anticipated rate of future successful development) over an average lease term. Individually significant properties (those with a net cost of \$500,000 or more) will continue to be evaluated periodically on a separate basis for impairment. We will transfer the original cost of an unproved property to proved properties when we find commercial oil and gas reserves sufficient to justify development of the property. The effect of this change was not material to our results of operations.

NOTE 3. COMMON STOCK AND NOTES PAYABLE

In March 2002, we issued 3.0 million shares of common stock at \$18.50 per share. Net proceeds from the offering totaled approximately \$52.8 million. We used \$44.0 million of the net proceeds to reduce outstanding bank debt from \$71.0 million to \$27.0 million. We used the remainder of the net proceeds for working capital.

As of June 30, 2002, our amended credit facility of \$150.0 million has a borrowing base of \$75.0 million. Interest only is payable quarterly through May 3, 2004, at which time the line expires and all principal becomes due, unless the line is extended or renegotiated.

REMINGTON OIL AND GAS CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

NOTE 4. NET INCOME PER SHARE

Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q

The following table presents our calculation of basic and diluted income per share.

NOTE 5. CONTINGENCIES

We have no material pending legal proceedings.

6

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion will assist in the understanding our financial position and results of operations. The information below should be read in conjunction with the financial statements, the related notes to financial statements, and our Form 10-K for the year ended December 31, 2001.

Our discussion contains both historical and forward-looking information. We assess the risks and uncertainties about our business, long-term strategy, and financial condition before we make any forward-looking statements, but we cannot guarantee that our assessment is accurate or that our goals and projections can or will be met. Statements concerning results of future exploration, exploitation, development, and acquisition expenditures as well as revenue, expense, and reserve levels are forward-looking statements. We make assumptions about commodity prices, drilling results, production costs, administrative

Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q

expenses, and interest costs that we believe are reasonable based on currently available information.

This discussion is primarily an update to the Management's Discussion and Analysis of Financial Condition and Results of Operations included in the 2001 Form 10-K. We recommend that you read this discussion in conjunction with the Form 10-K.

Our long-term strategy is to increase our oil and gas production and reserves while keeping our operating costs and our finding and development costs competitive with our industry peers.

LIQUIDITY AND CAPITAL RESOURCES

The following table summarizes certain contractual obligations and commercial commitments as of June 30, 2002.

	PAYMENTS DUE BY PERIOD				
	TOTAL	LESS THAN 1 YEAR	1-3 YEARS	4-5 YEARS	AFTER 5 YEARS
			(IN THOUSANDS)		
Contractual obligations					
Bank debt.....	\$27,000	\$ --	\$27,000	\$ --	\$ --
Other payables.....	5,565	3,083	2,482	--	--
Office lease.....	2,689	441	895	984	369
Total.....	\$35,254	\$3,524	\$30,377	\$984	\$369

On June 30, 2002, our current assets exceeded our current liabilities by \$3.0 million. Our current ratio was 1.07 to 1.

Net cash flow from operations before changes in working capital decreased by \$12.4 million, or 26%, primarily because of lower gas revenues during the first half of 2002 compared to the first half of 2001, partially offset by higher oil revenues. Gas sales decreased by \$28.8 million, or 51%, because average prices decreased by 45% and production decreased by 10%. However, oil sales increased by \$2.7 million, or 17%, because oil production increased by 35%, partially offset by lower oil prices.

During the six months of 2002, our capital expenditures totaled \$49.7 million of which \$47.7 million, or 96%, was spent in the Gulf of Mexico where we incurred costs to drill and complete wells and upgrade and complete platforms and facilities. We have increased our 2002 capital and exploration budget from \$75.0 million to \$93.0 million. This updated capital and exploration budget includes \$46.0 million for exploratory wells, \$43.0 million for offshore platforms and development drilling, and \$4.0 million for leasing and seismic and property acquisitions. If our exploratory wells are successful, we may incur additional development costs for well completions, platforms and facilities. We expect that our cash, estimated future cash flow from operations, and available bank line of credit will be adequate to fund these expenditures for the remainder of 2002.

In March 2002 we issued 3.0 million shares of common stock at \$18.50 per share. Net proceeds from the offering totaled approximately \$52.8 million. We used \$44.0 million of the net proceeds to reduce outstanding bank debt from

Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q

\$71.0 million to \$27.0 million, and we used the remainder for working capital.

7

As of June 30, 2002, our credit facility of \$150.0 million had a borrowing base of \$75.0 million. Interest only is payable quarterly through May 3, 2004, at which time the line expires and all principal becomes due, unless the line is extended or renegotiated. As of June 30, 2002, we had \$27.0 million borrowed under the facility. The banks review the borrowing base semi-annually and may increase or decrease the borrowing base relative to a redetermined estimate of proved oil and gas reserves. Our oil and gas properties are pledged as collateral for the line of credit. Additionally, we have agreed not to pay dividends.

RESULTS OF OPERATIONS

We recorded net income for the three months ended June 30, 2002, of \$6.3 million or \$0.24 basic income per share and \$0.22 diluted income per share compared to three months ended June 30, 2001, of \$1.2 million or \$0.06 basic income per share and \$0.05 diluted income per share. For the first six months of 2002, we recorded net income of \$6.5 million or \$0.27 basic income per share and \$0.25 diluted income per share compared to \$15.9 million or \$0.73 basic income per share and \$0.66 diluted income per share for the first six months of 2001. Net income for the three months ended June 30, 2002, was higher than in the prior year primarily because of a one-time pre-tax charge of \$13.5 million recorded in 2001 in connection with the settlement of the Phillips litigation, and a \$4.1 million gain from the sale of certain South Texas properties in 2002, partially offset by lower gas revenues and higher operating expenses in 2002. Net income for the first six months of 2002 compared to 2001 decreased primarily because of lower gas revenue partially offset by the charge recorded in 2001 for the settlement of the Phillips litigation. The following table reflects the increase or decrease in oil and gas sales revenue due to the changes in prices and volumes.

	THREE MONTHS ENDED JUNE 30,		SIX MONTHS ENDED JUNE 30,

Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q

=====

=====

Oil sales revenue for the second quarter of 2002 compared to the same period in 2001 increased by \$3.6 million, or 48%, because oil production increased by 150,000 barrels, or 49%, partially offset by lower average oil prices. Oil production from offshore Gulf of Mexico increased by 177,000 barrels, or 91%, because of production from new properties. Oil production from onshore gulf coast properties decreased by 27,000 barrels, or 24%, because of natural depletion of the existing producing properties and the sale of certain properties in South Texas in April 2002. Average prices decreased from \$24.82 during the second quarter of 2001 to \$24.64 during the second quarter of 2002. Oil sales revenue for the first half of 2002 compared to the first half of 2001 increased by \$2.7 million, or 17%, because oil production increased by 213,000 barrels, or 35%, partially offset by lower average oil prices. Oil production from offshore Gulf of Mexico increased by 245,000 barrels, or 63%, because of production from new properties. Oil production from onshore gulf coast

8

properties decreased by 32,000 barrels, or 15%, because of natural depletion of the existing producing properties and the sale of certain properties in South Texas in April 2002. Average prices decreased from \$25.54 during the first six months of 2001 to \$22.17 during the first six months of 2002, which decreased oil revenues by \$2.0 million.

Gas sales revenue for the three months ended June 30, 2002, compared to the same period in 2001 decreased by \$9.8 million, or 38%, because of lower average gas prices and lower production. Average gas prices decreased from \$4.69 per Mcf in 2001 to \$3.31 per Mcf, or 30%, in 2002, causing gas sales revenues to decrease by \$7.6 million. Production decreased by 664,000 Mcf, or 12%, primarily because of lower gas production from the offshore Gulf of Mexico and the sale of certain properties. Gas sales revenue for the first half of 2002 compared to the first half of 2001 decreased by \$28.8 million, or 51%, because of lower average gas prices and lower production. Average gas prices decreased from \$5.33 per Mcf in 2001 to \$2.94 per Mcf, or 45%, in 2002, causing gas sales revenues to decrease by \$25.6 million. Production decreased by 1.1 Bcf, or 10%, primarily because of lower gas production from the offshore Gulf of Mexico due to natural declines and the sale of certain properties.

Other income increased primarily because of a \$4.1 million gain from the sale of properties in South Texas in April 2002.

The following table presents certain expense items per Mcf equivalent (Mcfe) of production. (Barrels of oil are converted to Mcfe at a ratio of one barrel equals six Mcf.)

	THREE MONTHS ENDED JUNE 30,		SIX MONTHS ENDED JUNE 30,	
	2002	2001	2002	2001
Operating costs and expenses.....	\$0.57	\$0.50	\$0.51	\$0.47
Depreciation, depletion and amortization.....	\$1.35	\$1.29	\$1.36	\$1.27
General and administrative (excluding stock-based compensation).....	\$0.20	\$0.21	\$0.19	\$0.20
Interest and financing expense.....	\$0.06	\$0.12	\$0.09	\$0.15

Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q

Operating costs and expenses for the second quarter of 2002 compared to the second quarter of 2001 increased by \$607,000, or 16%, and for the first six months of 2002 compared to 2001 increased by \$704,000, or 10%, because of additional operated properties in the Gulf of Mexico.

Exploration expense increased by \$2.2 million during the second quarter of 2002 and by \$4.5 million during the first six months of 2002 primarily because of increased dry hole expense. Dry hole expense for 2002 includes two wells in the Gulf of Mexico and two wells in South Texas totaling \$8.3 million compared to \$1.9 million dry hole expense in 2001. Depreciation, depletion, and amortization expense increased by \$791,000 during the second quarter of 2002 and by \$1.6 million during the first six months of 2002 compared to the same period in the prior year because of increased oil production and an increase in the number of producing properties.

Excluding the \$2.1 million effect of the triggering of the contingent stock grant in January of 2001, general and administrative expenses have been virtually flat between the respective three and six month periods. Stock based compensation expense includes the amortized compensation cost related to the contingent stock grant and the directors fees paid in common stock. During the first quarter of 2001 we recorded a "catch up" amortization of approximately \$2.1 million from the date of the grant in June 1999 to the measurement date in January 2001.

During the second quarter of 2001 we settled litigation with Phillips Petroleum concerning a net profits interest on one of our Gulf of Mexico blocks. In connection with the settlement we charged \$13.5 million to expense during the second quarter of 2001.

9

Interest and financing expenses decreased by 47% during the second quarter of 2002 and by 41% during the six months ended June 30, 2002, compared to the same periods in the prior year because of lower interest rates and lower average debt balances.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

INTEREST RATE RISK

Our market risk sensitive instrument at June 30, 2002, is a revolving bank line of credit. At June 30, 2002, the unpaid principal balance under the line was \$27.0 million which approximates its fair value. The interest rate on this debt is based on a premium of 150 to 225 basis points over the London Interbank Offered Rate ("Libor"). The rate is reset periodically, usually every three months. If on June 30, 2002, Libor changed by one full percentage point (100 basis points) the fair value of our revolving debt would change by approximately \$67,500. We have not entered into any interest rate hedging contracts.

COMMODITY PRICE RISK

Occasionally we sell forward portions of our production under physical delivery contracts that by their terms cannot be settled in cash or other financial instruments. Such contracts are not subject to the provisions of Statement of Financial Accounting Standards No. 133 "Accounting for Derivative Instruments and Hedging Activities." Accordingly we do not provide sensitivity analysis for such contracts. During the period January 1, 2002, through June 30, 2002, we had physical delivery contracts in place to sell 20,000 MMBtu of gas per day (approximately 1/3 of our gas production for that 6-month period) at a

Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q

price of approximately \$2.77 per MMBtu. Currently we are selling all of our production at market prices. A vast majority of our production is sold on the spot markets. Accordingly, we are at risk for the volatility in commodity prices inherent in the oil and gas industry.

PART II

OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We have no material pending legal proceedings.

ITEM 2. CHANGES IN SECURITIES

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None

10

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

On May 21, 2002, we held our annual stockholders' meeting to elect members to the company's board of directors. The stockholders voted as follows:

ELECTION OF DIRECTORS -----	FOR -----	WITHHELD -----
Don D. Box.....	17,737,340	3,112,407
John E. Goble, Jr.	20,684,845	164,902
William E. Greenwood.....	20,684,595	165,152
David H. Hawk.....	20,684,845	164,902
James Arthur Lyle.....	20,684,245	165,502
David E. Preng.....	20,684,245	165,502
Thomas W. Rollins.....	20,684,845	164,902
Alan C. Shapiro.....	20,683,745	166,002
James A. Watt.....	17,746,585	3,103,162

The members of the board of directors do not serve staggered terms of office. All directors elected at the meeting were already members of the board at the time of election. No director serving at the time of the election failed to retain his seat on the board.
