SCANSOFT TO ACQUIRE PHILIPS SPEECH PROCESSING BUSINESS UNITS

Edgar Filing: SCANSOFT INC - Form 8-K

AND RELATED INTELLECTUAL PROPERTY FOR \$35.4 MILLION

World-class Speech Recognition Engines and Enterprise Productivity Applications
Establish ScanSoft as a Leading Supplier in Telephony,
Automotive and Embedded Markets

PEABODY, MASS. AND AMSTERDAM, THE NETHERLANDS, OCTOBER 7, 2002 - ScanSoft, Inc. (Nasdaq: SSFT) and Royal Philips Electronics (NYSE: PHG, AEX: PHI), Europe's largest manufacturer of electronics products, today announced that the companies have signed a definitive agreement whereby ScanSoft will acquire the Philips Speech Processing Telephony and Voice Control business units, and related intellectual property.

Consideration for the transaction is \$35.4 million, comprising \$3.0 million in cash; a \$4.9 million 5% interest note due December 31, 2003; and a \$27.5 million three-year, zero-interest convertible debenture, convertible into common shares of ScanSoft at \$6.00 per share. The transaction has been approved by the boards of directors for both companies, and is expected to close during the first quarter of 2003.

For more than two decades, Philips has been a global leader in the field of speech processing, offering a full line of state-of-the-art products and technologies for the telecommunications, automotive and consumer electronics industries. The acquisition provides ScanSoft with significant resources and market opportunities to:

- Broaden ScanSoft's embedded automatic speech recognition (ASR) solutions for automobiles, mobile devices and consumer electronics, and adds new reference accounts including Bosch-Blaupunkt, Daimler Chrysler, General Motors, Land Rover, Motorola, Opel and Siemens.
- Provide enterprise- and carrier-level productivity solutions for the telephony market, such as directory assistance and automated attendant applications, that are consistent with ScanSoft's strategy of delivering repeatable applications to targeted markets. Leading telecommunications companies, including British Telecom, MCI/Worldcom and Portugal Telecom, have deployed these solutions.

Page 2

- Add telephony-based ASR solutions to complement ScanSoft's market-leading RealSpeak(TM) text-to-speech (TTS) capabilities and enable ScanSoft to offer a combined ASR/TTS solution through its existing channel and technology partners.
- Allow ScanSoft to leverage and expand its current global channel network by providing resellers with market-leading telephony technology and applications.

"Philips is a pioneer and a great believer in the future of the speech recognition industry. By merging our speech telephony businesses into ScanSoft, we will contribute to making a worldwide market leader in this area," said Tom Verbeek, Head of Philips Corporate Investments. "Because of our confidence in the speech industry and ScanSoft in particular, we have elected to receive consideration with a clear upside potential rather than in cash." The Philips Speech Processing Dictation business is not part of this transaction and will remain within Philips to develop applications for its medical businesses and

Edgar Filing: SCANSOFT INC - Form 8-K

other professions in the fields of hardware and software dictation systems.

An ongoing partnership between Philips and ScanSoft is an integral component of the transaction. This partnership includes continued support and collaboration with Phillips Research in speech technology and innovations, joint assertion of acquired patent rights and designation of ScanSoft as the preferred supplier of embedded speech capabilities for Philips consumer electronics. As part of the transaction, ScanSoft will acquire a full complement of products and technologies, a roster of premier partners and customers, ownership of critical intellectual property and an existing royalty revenue stream. ScanSoft will add to its operations employees that are located in Europe, North America and Asia.

"Philips' people, products and technology have gained the respect of customers and competitors for their leadership and innovative capabilities, assets that will help accelerate ScanSoft's success," said Paul Ricci, ScanSoft's chairman and chief executive officer. "We are especially enthusiastic about our ongoing partnership with Philips in research, patent assertion and development of consumer markets for speech."

This acquisition enhances ScanSoft's speech portfolio with solutions that will expand its market opportunities with existing business partners and global channels. As the integration of Philips' speech business begins, ScanSoft will apply the same focus on controlling expenses and enhancing productivity employed during the recent integration of the L&H business. ScanSoft expects the acquired businesses to generate revenues approximating \$18 million in 2003 and to be accretive for the full year, adding \$.02 per share to earnings before the amortization of acquisition-related intangibles.

The businesses to be acquired by ScanSoft include:

- TELEPHONY - The Philips Speech Processing Telephony business allows enterprise customers, telephony vendors and carriers to speech-enable a range of services, including directory assistance, interactive voice response and voice portal applications. Philips automatic speech recognition (ASR) engine, SpeechPearl(R), supports more than 40 languages and can process a vocabulary of more than one million words, making it the solution of choice for telephony applications that target global and broad regional markets. Philips has also leveraged its expertise in telephony ASR to develop VoiceRequest, an enterprise auto-attendant solution, and automated directory assistance implementations that have been deployed by Telia in Sweden, the Japan Multimedia Service and Telefonica de Argentina, among others.

- VOICE CONTROL - The Philips Speech Processing Voice Control business is addressing growing consumer demand for speech-enabled automotive, mobile and consumer electronics products. Philips's SpeechWave and VoCon small-footprint speech recognition engines are ideal for embedded applications including voice-control of climate and entertainment features within cars. These solutions are also used within navigation systems and to enable automated voice dialing within mobile phones, including those from Philips.

INVESTOR CALL

In conjunction with this announcement, ScanSoft will conduct a conference call at 9:00a.m. (ET) today, Monday, October 7, 2002. To listen to the call, please

Edgar Filing: SCANSOFT INC - Form 8-K

telephone (800) 500-0177 or (719) 457-2679 approximately 10 minutes beforehand. For those who are not available to listen to the live conference call, a telephone replay will be available starting at approximately 2:00 p.m. (ET) on Monday, October 7 until 11:30 p.m. (ET) on Sunday, October 13. The access number for the replay is (719) 457-0820 or (888) 203-1112; the confirmation number is 794663. The conference call will also be broadcast live over the Internet. Investors interested in listening to the call should log onto the Company's Web site at www.scansoft.com at least 10 minutes prior to the broadcast. Investors will also have access to an archived version of the call on the Company's Web site.

SAFE HARBOR STATEMENT

This press release contains certain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements are based on management's current expectations and are subject to uncertainty and changes in circumstances. Actual results may vary materially from the expectations contained in the forward-looking statements. The forward-looking statements herein include statements addressing future financial and operating results of ScanSoft, and the timing, benefits and other aspects of the proposed acquisition.

The following factors, among others, could cause actual results to differ materially from those described in the forward-looking statements: potential that the information and estimates used to predict the cost savings and anticipated revenues were not accurate; failure of the acquisition to be materially accretive in a timely manner; failure to retain customers; difficulties with integrating product plans, schedules and resources; difficulties in implementing planned cost reductions; failure to obtain and retain expected synergies; risks associated with the acquisition, transaction costs and the related integration of operations; and other economic, business, and competitive factors affecting the business generally.
